61305	C	Open skull for exploration
61312	C	Open skull for drainage
61313	C	Open skull for drainage
61314	C	Open skull for drainage
61315	C	Open skull for drainage
61320	C	Open skull for drainage
61321	C	Open skull for drainage
61332	C	Explore/biopsy eye socket
61333	C	Explore orbit/remove lesion
61334	C	Explore orbit/remove object
61340	C	Relieve cranial pressure
61343	C	Incise skull (press relief)
61345	C	Relieve cranial pressure
61440	C	Incise skull for surgery
61450	C	Incise skull for surgery
61458	C	Incise skull for brain wound
61460	C	Incise skull for surgery
61470	C	Incise skull for surgery
61480	C	Incise skull for surgery
61490	C	Incise skull for surgery
61500	C	Removal of skull lesion
61501	C	Remove infected skull bone
61510	C	Removal of brain lesion
61512	C	Remove brain lining lesion
61514	C	Removal of brain abscess
61516	C	Removal of brain lesion
61518	C	Removal of brain lesion
61519	C	Remove brain lining lesion
61520	C	Removal of brain lesion
61521	C	Removal of brain lesion
61522	C	Removal of brain abscess
61524	C	Removal of brain lesion
61526	C	Removal of brain lesion
61530	C	Removal of brain lesion
61531	C	Implant brain electrodes
61533	C	Implant brain electrodes
61534	C	Removal of brain lesion
61535	C	Remove brain electrodes
61536	C	Removal of brain lesion
61538	C	Removal of brain tissue
61539	C	Removal of brain tissue
61541	C	Incision of brain tissue
61542	C	Removal of brain tissue
61543	C	Removal of brain tissue
61544	C	Remove & treat brain lesion
61545	C	Excision of brain tumor
61546	C	Removal of pituitary gland
61548	C	Removal of pituitary gland
61550	C	Release of skull seams
61552	C	Release of skull seams
61556	C	Incise skull/sutures
61557	C	Incise skull/sutures
61558	C	Excision of skull/sutures
61559	C	Excision of skull/sutures
61563	C	Excision of skull tumor
61564	C	Excision of skull tumor
61570	C	Remove foreign body, brain
61571	C	Incise skull for brain wound
61575	C	Skull base/brainstem surgery
61576	C	Skull base/brainstem surgery
61580	C	Craniofacial approach, skull
61581	C	Craniofacial approach, skull
61582	C	Craniofacial approach, skull
61583	C	Craniofacial approach, skull
61584	C	Orbitocranial approach/skull
61585	C	Orbitocranial approach/skull
61586	C	Resect nasopharynx, skull
61590	C	Infratemporal approach/skull
61591	C	Infratemporal approach/skull
61592	C	Orbitocranial approach/skull
61595	C	Transtemporal approach/skull
61596	C	Transcochlear approach/skull
61597	C	Transcondylar approach/skull
61598	C	Transpetrosal approach/skull
61600	C	Resect/excise cranial lesion
61601	C	Resect/excise cranial lesion
61605	C	Resect/excise cranial lesion
61606	C	Resect/excise cranial lesion
61607	C	Resect/excise cranial lesion
61608	C	Resect/excise cranial lesion
61609	C	Transect artery, sinus
61610	C	Transect artery, sinus
61611	C	Transect artery, sinus
61612	C	Transect artery, sinus
61613	C	Remove aneurysm, sinus
61615	C	Resect/excise lesion, skull
61616	C	Resect/excise lesion, skull
61618	C	Repair dura
61619	C	Repair dura
61624	C	Occlusion/embolization cath
61626	C	Occlusion/embolization cath
61680	C	Intracranial vessel surgery
61682	C	Intracranial vessel surgery
61684	C	Intracranial vessel surgery
61686	C	Intracranial vessel surgery
61690	C	Intracranial vessel surgery
61692	C	Intracranial vessel surgery
61700	C	Inner skull vessel surgery
61702	C	Inner skull vessel surgery
61703	C	Clamp neck artery
61705	C	Revise circulation to head
61708	C	Revise circulation to head
61710	C	Revise circulation to head
61711	C	Fusion of skull arteries
61720	C	Incise skull/brain surgery
61735	C	Incise skull/brain surgery
61750	C	Incise skull/brain biopsy
61751	C	Brain biopsy w/ct/mr guide
61760	C	Implant brain electrodes
61770	C	Incise skull for treatment
61791	C	Treat trigeminal tract
61795	C	Brain surgery using computer
61850	C	Implant neuroelectrodes
61860	C	Implant neuroelectrodes
61862	C	Implant neurostimul, subcort
61870	C	Implant neuroelectrodes
61875	C	Implant neuroelectrodes
61880	C	Revise/remove neuroelectrode
61886	C	Implant neurostim arrays
61888	C	Revise/remove neuroreceiver
62000	C	Treat skull fracture
62005	C	Treat skull fracture
62010	C	Treatment of head injury
62100	C	Repair brain fluid leakage
62115	C	Reduction of skull defect
62116	C	Reduction of skull defect
62117	C	Reduction of skull defect
62120	C	Repair skull cavity lesion
62121	C	Incise skull repair
62140	C	Repair of skull defect
62141	C	Repair of skull defect
62142	C	Remove skull plate/flap
62143	C	Replace skull plate/flap
62145	C	Repair of skull & brain
62146	C	Repair of skull with graft
62147	C	Repair of skull with graft
62160	C	Establish brain cavity shunt
62190	C	Establish brain cavity shunt
62192	C	Establish brain cavity shunt
62200	C	Establish brain cavity shunt
62201	C	Establish brain cavity shunt
62220	C	Establish brain cavity shunt
62223	C	Establish brain cavity shunt
62256	C	Remove brain cavity shunt
62258	C	Replace brain cavity shunt
62351	C	Implant spinal canal cath
63001	C	Removal of spinal lamina
63003	C	Removal of spinal lamina
63005	C	Removal of spinal lamina
63011	C	Removal of spinal lamina
63012	C	Removal of spinal lamina
63015	C	Removal of spinal lamina
63016	C	Removal of spinal lamina
63017	C	Removal of spinal lamina
63020	C	Neck spine disk surgery
63030	C	Low back disk surgery
63035	C	Spinal disk surgery add-on
63040	C	Neck spine disk surgery
63042	C	Low back disk surgery
63045	C	Removal of spinal lamina
63046	C	Removal of spinal lamina
63047	C	Removal of spinal lamina
63048	C	Remove spinal lamina add-on
63055	C	Decompress spinal cord
63056	C	Decompress spinal cord
63057	C	Decompress spine cord add-on
63064	C	Decompress spinal cord
63066	C	Decompress spine cord add-on
63075	C	Neck spine disk surgery
63076	C	Neck spine disk surgery
63077	C	Spine disk surgery, thorax
63078	C	Spine disk surgery, thorax

64820	C	Remove sympathetic nerves
64866	C	Fusion of facial/other nerve
64868	C	Fusion of facial/other nerve
65273	C	Repair of eye wound
69150	C	Extensive ear canal surgery
69155	C	Extensive ear/neck surgery
69502	C	Mastoidectomy
69535	C	Remove part of temporal bone
69554	C	Remove ear lesion
69950	C	Incise inner ear nerve
69970	C	Remove inner ear lesion
74300	C	X-ray bile ducts/pancreas
74301	C	X-rays at surgery add-on
75900	C	Arterial catheter exchange
75940	C	X-ray placement, vein filter
75945	C	Intravascular us
75946	C	Intravascular us add-on
75960	C	Transcatheter intro, stent
75961	C	Retrieval, broken catheter
75962	C	Repair arterial blockage
75964	C	Repair artery blockage, each
75966	C	Repair arterial blockage
75968	C	Repair artery blockage, each
75970	C	Vascular biopsy
75978	C	Repair venous blockage
75992	C	Atherectomy, x-ray exam
75993	C	Atherectomy, x-ray exam
75994	C	Atherectomy, x-ray exam
75995	C	Atherectomy, x-ray exam
75996	C	Atherectomy, x-ray exam
92970	C	Cardioassist, internal
92971	C	Cardioassist, external
92975	C	Dissolve clot, heart vessel
92977	C	Dissolve clot, heart vessel
92978	C	Intravasc us, heart add-on
92979	C	Intravasc us, heart add-on
92986	C	Revision of aortic valve
92987	C	Revision of mitral valve
92990	C	Revision of pulmonary valve
92992	C	Revision of heart chamber
92993	C	Revision of heart chamber
92997	C	Pul art balloon repr, percut
92998	C	Pul art balloon repr, percut
94652	C	Pressure breathing (IPPB)
94762	C	Measure blood oxygen level
95920	C	Intraop nerve test add-on
95961	C	Electrode stimulation, brain
95962	C	Electrode stim, brain add-on
99190	C	Special pump services
99191	C	Special pump services
99192	C	Special pump services
99234	C	Observ/hosp same date
99235	C	Observ/hosp same date
99236	C	Observ/hosp same date
99251	C	Initial inpatient consult
99252	C	Initial inpatient consult
99253	C	Initial inpatient consult
99254	C	Initial inpatient consult
99255	C	Initial inpatient consult
99261	C	Follow-up inpatient consult
99262	C	Follow-up inpatient consult
99263	C	Follow-up inpatient consult

99296	C	Neonatal critical care
99297	C	Neonatal critical care
99298	C	Neonatal critical care
99356	C	Prolonged service, inpatient
99357	C	Prolonged service, inpatient
99433	C	Normal newborn care/hospital
G0180	C	Cryo. ablation, prostate

ADDENDUM F.—STATUS INDICATORS: HOW VARIOUS SERVICES ARE TREATED UNDER OUTPATIENT PPS

Indicator	Service	Status
A	Pulmonary Rehabilitation Clinical Trial	Not Paid Under PPS
C	Inpatient Procedures	Admit Patient; Bill as Inpatient
A	Durable Medical Equipment, Prosthetics and	DMEPOS Fee Schedule
E	Non-Covered Items and Services	Non-paid
A	Physical, Occupational and SpeechTherapy	Rehabilitation Fee Schedule
A	Ambulance	Ambulance Fee Schedule
A	EPO for ESRD Patients	National Rate
A	Clinical Diagnostic Laboratory Services	Laboratory Fee Schedule
A	Physican Services for ESRD Patients	Not Paid Under PPS
A	Screening Mammography	National Rate
N	Incidental Services, packaged into APC Rat	Packaged
P	Partial Hospitalization	Paid Per Diem APC
S	Significant Procedure, Not Discounted When	Paid
T	Procedure, Multiple When Discount Applies	Paid
V	Visit to Clinic or Emergency Department	Paid
X	Ancillary Service	Paid

Department of Agriculture

Cooperative State Research, Education, and Extension Service

Integrated Research, Education, and Extension Competitive Grants Program—Pest Management: Request for Proposals and Request for Input; Notice

DEPARTMENT OF AGRICULTURE

Cooperative State Research, Education, and Extension Service

Integrated Research, Education, and Extension Competitive Grants Program—Pest Management: Request for Proposals and Request for Input

AGENCY: Cooperative State Research, Education, and Extension Service.

ACTION: Notice of Request for Proposals and Request for Input.

SUMMARY: The Cooperative State Research, Education and Extension Service (CSREES) announces the availability of grant funds and requests proposals for the Integrated Research, Education, and Extension Competitive Grants Program—Pest Management for fiscal year (FY) 2000 to support integrated, multifunctional agricultural research, extension, and education activities that address pest management priorities in United States agriculture, particularly those priorities addressing anticipated regulatory losses of key pest management tools resulting from the implementation of the Food Quality Protection Act (FQPA) of 1996. The Integrated Research, Education, and Extension Competitive Grants Program—Pest Management will have four program components: Crops at Risk from FQPA Implementation (CAR); FQPA Risk Avoidance and Mitigation for Major Food Crop Systems (RAMP); Methyl Bromide Transitions (MBT); and Pest Management Centers. The amount available for support of this program in FY 2000 is approximately $11,000,000.

This notice sets out the objectives for these projects, the eligibility criteria for projects and applicants, the application procedures, and the set of instructions needed to apply for a Pest Management grant under this authority.

By this notice, CSREES additionally solicits stakeholder input from any interested party regarding the FY 2000 Integrated Research, Education, and Extension Competitive Grants Program—Pest Management for use in the development of any future requests for proposals for this program.

DATES: Proposals must be transmitted by June 6, 2000, as indicated by the postmark or date on courier bill of lading. Proposals transmitted after this date will not be considered for funding. Comments regarding this request for proposals are requested within six months from the issuance of this notice. Comments received after that date will be considered to the extent practicable.

ADDRESSES: The address for hand-delivered proposals or proposals submitted using an express mail or overnight courier service is: Integrated Research, Education, and Extension Competitive Grants Program—Pest Management; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; Room 303, Aerospace Center; 901 D Street, S.W.; Washington, D.C. 20024.

Proposals sent via the U.S. Postal Service must be sent to the following address: Integrated Research, Education, and Extension Competitive Grants Program—Pest Management; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2245; 1400 Independence Avenue, S.W.; Washington, D.C. 20250–2245.

Written user comments should be submitted by first-class mail to: Policy and Program Liaison Staff; Office of Extramural Programs; USDA–CSREES; STOP 2299; 1400 Independence Avenue, S.W.; Washington, D.C. 20250–2299; or via e-mail to: RFP–OEP@reeusda.gov. In your comments, please include the name of the program and the fiscal year of the RFP to which you are responding.

FOR FURTHER INFORMATION CONTACT: Applicants and other interested parties are encouraged to contact the following individuals: CAR: Dr. Rick Meyer; National Program Leader; Plant and Animal Systems Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2210; 1400 Independence Avenue, S.W.; Washington, D.C. 20250–2210; Telephone: (202) 401–4891; Fax: (202) 401–4888; e-mail address: hmeyer@reeusda.gov.; RAMP: Dr. Steve Yaninek; National Program Leader; Plant and Animal Systems Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2210; 1400 Independence Avenue, S.W.; Washington, D.C.; Telephone: (202) 401–6702; Fax: 202–401–4888; e-mail address: syaninek@reeusda.gov.; MBT: Dr. Robin Huettel; National Program Leader; Plant and Animal Systems Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2210; 1400 Independence Avenue, S.W.; Washington, D.C.; Telephone: (202) 401–5804; Fax: (202) 401–4888; e-mail address: rhuettel@reeusda.gov; Pest Management Centers: Dr. Dennis Kopp; National Program Leader; Plant and Animal Systems Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2210; 1400 Independence Avenue, S.W.; Washington, D.C.; Telephone: (202) 401–6437; Fax: (202) 401–4888; e-mail address: dkopp@reeusda.gov.

Stakeholder Input

CSREES is soliciting comments regarding this solicitation of applications from any interested party. These comments will be considered in the development of any future RFP for the program. Such comments will be forwarded to the Secretary or his designee for use in meeting the requirements of section 103(c)(2) of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7613(c)(2)). This section requires the Secretary to solicit and consider input on a current RFP from persons who conduct or use agricultural research, education and extension for use in formulating future RFPs for competitive programs. Comments should be submitted as provided for in the **ADDRESSES** and **DATES** portions of this Notice.

Catalog of Federal Domestic Assistance

This program is listed in the Catalog of Federal Domestic Assistance under 10.303, Integrated Research, Education, and Extension Competitive Grants Program.

Part I—General Information

A. Legislative Authority and Background

Section 406 of the Agricultural Research, Extension, and Education Reform Act of 1998 (AREERA) (7 U.S.C. 7626) authorized the Secretary of Agriculture to establish a research, education, and extension competitive grants program to provide funding for integrated, multifunctional agricultural research, extension, and education activities. Subject to the availability of appropriations to carry out this program, the Secretary may award grants to colleges and universities (as defined by 1404 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (NARETPA) (7 U.S.C. 3103)) on a competitive basis for integrated research, education, and extension projects. Grants are to be awarded to address priorities in United States agriculture that involve integrated research, education, and extension activities as determined by the Secretary in consultation with the National Agricultural Research, Extension, Education, and Economics Advisory Board.

On November 19, 1999, the Secretary published in the **Federal Register** [64 FR 63560] a notice that the administration of this grant program had been delegated to the Cooperative State Research, Education, and Extension Service (CSREES). This notice also solicited public comment from persons who use or conduct research, extension, or education regarding the priorities to be addressed by this new program. In addition, this notice announced a public meeting to obtain comments to use in developing the proposed rule and requests for proposals for this new grant program. The public meeting was held on December 6, 1999. All the comments and the official transcript of the meeting have been made available for review on the CSREES web page (http://www.reeusda.gov/integrated/). This RFP was developed in consultation with the Advisory Board. In addition, the comments and testimonies from the December 6, 1999, public meeting were considered in the formulation of this RFP.

The entire program is funded in FY 2000 at $37,637,702 (after deduction for administrative expenses) for the following integrated activities: Water Quality ($12,374,115), Food Safety ($14,277,277), and the Pest Management Component that includes: Pesticide Impact Assessment ($4,322,310), Crops at Risk from Food Quality and Protection Act (FQPA) Implementation ($952,000), FQPA Risk Mitigation Program for Major Food Crop Systems ($3,808,000), and Methyl Bromide Transitions ($1,904,000). There will be three RFP's for this program. The Water Quality and Food Safety Programs will each have a separate RFP, while the latter four programs will be announced as one RFP. This notice announces and describes the Pest Management component of the Program.

CSREES will administer the Integrated Research, Education, and Extension Competitive Grants Program by determining priorities in United States agriculture through Agency stakeholder input processes and in consultation with the National Agricultural Research, Extension, Education, and Economics Advisory Board. Each RFP for the different program areas (i.e., Water Quality, Food Safety, etc.) will be developed each fiscal year based on these established priorities and the resulting determined approaches to solving these critical agricultural issues. Although this overall grant program seeks to solve critical agricultural issues through an integration of research, education, and extension activities, a component of a RFP, depending on the priority being addressed and/or the stage at which the priority is being addressed, may request proposals that are research, education, or extension only, or a combination thereof. However, the overall overarching approach to solving the critical agricultural issue, priority, or problem will be through an integration of research, education, and extension activities within each individual program area.

B. Purpose, Priorities, and Fund Availability

The components of the Integrated Competitive Grants Program—Pest Management are Crops at Risk from FQPA Implementation program (CAR); FQPA Risk Avoidance and Mitigation for Major Food Crop Systems (RAMP); Methyl Bromide Transitions Program (MBTP); and Pesticide Impact Assessment Program (hereafter referred to as "Pest Management Centers"). These four components will address anticipated regulatory losses of key pest management tools resulting from the implementation of the Food Quality Protection Act of 1996 (FQPA) (see http://www.epa.gov/oppfead1/fqpa/index.html), other regulatory actions, or other agreements (e.g., Clean Air Act, as amended 1990).

The four components of the Integrated Research, Education, and Extension Competitive Grants Program—Pest Management will support a wide range of complementary research, education, and extension activities. Together, these four components support activities to assess the use and efficacy of available pest management tools, develop and demonstrate the efficacy of reduced-risk pesticides and other pest management alternatives, and identify possible transition and mitigation strategies that serve as viable pest management options for crops and agro-ecosystems at risk due to anticipated regulatory actions.

By integrating these four separate program components into a single competitive grants program, CSREES has responded to stakeholder suggestions that the Agency develop a coordinated program to address pest management challenges that face the Nation in the short- and long-terms. Projects supported by the four components of the Integrated Activities Pest Management Competitive Grants Program provide a coordinated response to FQPA needs and issues. CSREES also expects that Integrated Research, Education, and Extension Competitive Grants Program—Pest Management projects will be integral components of other CSREES pest management programs such as the Pest Management Alternatives Program (PMAP), the Regional Integrated Pest Management Grants Program (RIPM), the Pesticide Applicator Training program (PAT), the Minor Crops Program (IR–4), and to pest management activities funded under the regional Sustainable Agriculture Research and Education program (SARE) and the National Research Initiative (NRI).

There is no commitment by USDA to fund any particular proposal or to make a specific number of awards. Approximately $11 million will be available to fund proposals in FY 2000 distributed among the program components as follows: CAR—$952,000, RAMP—$3,808,000, MBT—$1,904,000 and Pest Management Centers—$4,322,310.

C. Definitions

For the purpose of awarding grants under this program, the following definitions are applicable:

(1) *Administrator* means the Administrator of the Cooperative State Research, Education, and Extension Service (CSREES) and any other officer or employee of the Department to whom the authority involved my be delegated.

(2) *Authorized departmental officer* means the Secretary or any employee of the Department who has the authority to issue or modify grant instruments on behalf of the Secretary.

(3) *Authorized organizational representative* means the president or

chief executive officer of the applicant organization or the official, designated by the president or chief executive officer of the applicant organization, who has the authority to commit the resources of the organization.

(4) *Budget period* means the interval of time (usually 12 months) into which the project period is divided for budgetary and reporting purposes.

(5) *Cash contributions* means the applicant's cash outlay, including the outlay of money contributed to the applicant by non-Federal third parties.

(6) *Department* or *USDA* means the United States Department of Agriculture.

(7) *Education activity* means formal classroom instruction, laboratory instruction, and practicum experience in the food and agricultural sciences and other related matters such as faculty development, student recruitment and services, curriculum development, instructional materials and equipment, and innovative teaching methodologies.

(8) *Extension activity* means an act or process that delivers science-based knowledge and informal educational programs to people, enabling them to make practical decisions.

(9) *Grant* means the award by the Secretary of funds to an eligible organization or individual to assist in meeting the costs of conducting, for the benefit of the public, an identified project which is intended and designed to accomplish the purpose of the program as identified in these guidelines.

(10) *Grantee* means an organization designated in the grant award document as the responsible legal entity to which a grant is awarded.

(11) *Integrated* means to bring the three components of the agricultural knowledge system (research, education, and extension) together around a problem area or activity.

(12) *Matching* means that portion of allowable project costs not borne by the Federal Government, including the value of in-kind contributions.

(13) *Peer review* means an evaluation of a proposed project for scientific or technical quality and relevance performed by experts with the scientific knowledge and technical skills to conduct the proposed work or to give expert advice on the merits of a proposal.

(14) *Principal investigator/Project director* means the single individual designated by the grantee in the grant application and approved by the Secretary who is responsible for the direction and management of the project.

(15) *Prior approval* means written approval evidencing prior consent by an authorized departmental officer as defined in (2) above.

(16) *Project* means the particular activity within the scope of the program supported by a grant award.

(17) *Project period* means the period, as stated in the award document and modifications thereto, if any, during which Federal sponsorship begins and ends.

(18) *Research activity* means a scientific investigation or inquiry that results in the generation of knowledge.

(19) *Secretary* means the Secretary of Agriculture and any other officer or employee of the Department to whom the authority involved may be delegated.

(20) *Third party in-kind contributions* means non-cash contributions of property or services provided by non-Federal third parties, including real property, equipment, supplies and other expendable property, directly benefitting and specifically identifiable to a funded project or program.

(21) *Total integrated, multifunctional research, education, and extension approach* means that the combination of grants (although the individual grants may involve only research, education, or extension activities or a combination thereof) awarded under the fiscal year's program components will work together to address the priorities in United States agriculture as determined by the Secretary of Agriculture in consultation with the Advisory Board, that involve integrated research, extension, and education activities.

D. Eligibility

Proposals may be submitted by colleges and universities as defined in section 1404 of the National Agricultural research, Extension, and Teaching Policy Act of 1977 (NARETPA). The terms "college" and "university" mean an educational institution in any State which (1) admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, (2) is legally authorized within such State to provide a program of education beyond secondary education, (3) provides an educational program for which a bachelor's degree or any other higher degree is awarded, (4) is a public or other nonprofit institution, and (5) is accredited by a nationally recognized accrediting agency or association. Although an applicant may be eligible based on its status as one of these entities, there are factors which may exclude an applicant from receiving Federal financial and nonfinancial assistance and benefits under this program (e.g., debarment or suspension of an individual involved or a determination that an applicant is not responsible based on submitted organizational management information). Eligible applicants may subcontract to organizations not eligible under these requirements.

Please note that a research foundation maintained by a college or university is not eligible to receive an award under this program.

E. Matching Requirements

1. General Requirement

If a grant provides a particular benefit to a specific agricultural commodity, the grant recipient is required to provide funds or in-kind support to match the amount of the grant funds provided. See section 10. c. on "Matching Funds" under Part III, B, "Content of Proposals" for more details.

2. Waiver

CSREES may waive the matching funds requirement specified in the above paragraph for a grant if CSREES determines that (a) the results of the project, while of particular benefit to a specific agricultural commodity, are likely to be applicable to agricultural commodities generally; or (b) the project involves a minor commodity, the project deals with scientifically important research, and the grant recipient is unable to satisfy the matching funds requirement.

F. Funding Restrictions

CSREES has determined that grant funds awarded under this authority may not be used for the renovation or refurbishment of research, education, or extension space; the purchase or installation of fixed equipment in such space; or the planning, repair, rehabilitation, acquisition, or construction of buildings or facilities.

G. Types of Grant Instruments

In FY 2000 all projects will be awarded using a "New Grant" instrument. In future years, projects under the Integrated Research, Education, and Extension Competitive Grants Program authority can be awarded using one of the grant instruments described below:

(1) New grant. This is a grant instrument by which the Department agrees to support a specified level of effort for a project that generally has not been supported previously under this program. This type of grant is approved on the basis of peer review recommendations.

(2) Renewal grant. This is a grant instrument by which the Department agrees to provide additional funding for a project period beyond that approved in an original or amended award, provided that the cumulative period does not exceed the statutory limitation. When a renewal application is submitted, it should include a summary of progress to date from the previous granting period. A renewal grant shall be based upon new application, de novo peer review and staff evaluation, new recommendation and approval, and a new award instrument.

(3) Supplemental grant. This is an instrument by which the department agrees to provide small amounts of additional funding under a new or renewal grant as specified above and may involve a short-term (usually six months or less) extension of the project period beyond that approved in an original or amended award, but in no case may the cumulative period for the project exceed the statutory limitation. A supplement is awarded only if required to assure adequate completion of the original scope of work and if there is sufficient justification to warrant such action. A request of this nature normally will not require additional peer review.

H. Funding Mechanisms

The two mechanisms by which new, renewal, and supplemental grants shall be awarded are as follows:

(1) Standard grant. This is a funding mechanism whereby the Department agrees to support a specified level of effort for a predetermined time period without the announced intention of providing additional support at a future date.

(2) Continuation grant. This is a funding mechanism whereby the Department agrees to support a specified level of effort for a predetermined period of time with a statement of intention to provide additional support at a future date, provided that performance has been satisfactory, appropriations are available for this purpose, and continued support will be in the best interests of the Federal government and the public. This kind of mechanism normally will be awarded for an initial one-year period, and any subsequent continuation project grants will be awarded in one-year increments. The award of a continuation project grant to fund an initial or succeeding budget period does not constitute an obligation to fund any subsequent budget period. Unless prescribed otherwise by CSREES, a grantee must submit a separate application for continued support for each subsequent fiscal year. Requests for such continued support must be submitted in duplicate at least three months prior to the expiration date of the budget period currently being funded. Decisions regarding continued support and the actual funding levels of such support in future years usually will be made administratively after consideration of such factors as the grantee's progress and management practices and the availability of funds. Since initial peer reviews are based upon the full term and scope of the original application, additional evaluations of this type generally are not required prior to successive years' support. However, in unusual cases (e.g., when the nature of the project or key personnel change or when the amount of future support requested substantially exceeds the grant application originally reviewed and approved), additional reviews may be required prior to approving continued funding.

Part II—Program Description

A. Project Types

Approximately, $952,000 is available for CAR projects in FY 2000. Proposals should be between two to four years in duration with a budget of not more than $200,000 per year.

Approximately $3,808,000 is available for RAMP projects in FY 2000. Proposals can be up to five years in duration with a maximum budget of $500,000 per year.

Approximately $1,904,000 is available for MBT proposals. It is anticipated that 12–15 grants of up to two years in duration will be awarded in this program component.

Approximately $4,322,000 is available for Pest Management Center proposals. Pest Management Centers will be supported for a 3-year period at levels reflective of the activities proposed.

Grants awarded under the Program Area Description of MBT (as described in this RFP) will be issued as "New Grant" instruments and will be awarded as "Standard Grants." Grants awarded under the Program Area Descriptions of CAR, RAMP, and Pest Management Center (as described in this RFP) will be issued as "New Grant" instruments and may be awarded as "Continuation Grants."

B. Program Area Description

The Integrated Research, Education, and Extension Competitive Grants Program—Pest Management supports efforts to modify existing pest management approaches or develop new methods that address needs created by the implementation of regulatory actions. Projects supported under this authority must show evidence of research, education, and extension integration at the program or institutional level.

Alternative pest control chemistries and practices resulting from FQPA tolerance reassessment and reregistration should be considered when preparing proposals for this program. These priorities are determined through a critical evaluation of pest management needs for a commodity and the effect of regulatory changes on current pest management practices. These priorities were published in a November 18, 1999, **Federal Register** notice titled "Pesticide Reregistration Performance Measures and Goals" [64 FR 63036-63045]. This notice is available on the Environmental Protection Agency (EPA) web site at http://www.epa.gov/ fedrgstr/EPAFR-CONTENTS/1999/November/Day-18/ contents.htm/. This notice provides the schedule for completion of regulatory review for high priority chemicals. The overall priorities for FQPA review are also available on the EPA web site at http://www.eps.gov/oppfead1/fqpa/ toleran.htm/.

Activities funded by the Integrated Research, Education, and Extension Competitive Grants Program—Pest Management will address work needed to facilitate grower knowledge and adoption of pesticides that are newly registered or are candidates for registration. Recently-registered chemical pesticides are identified in annual reports on the web site of the EPA Office of Pesticide Programs at http://www.epa.gov/pesticides. Pesticides that are candidates for registration in FY 2000 are named in the interim work plan of the EPA Registration Division. The interim work plan is available on the web at http:// www.epa.gov/opprd001/workplan. Twenty-five new chemicals are included in the work plan in addition to many new uses for 64 already-registered chemicals. The work plan provides the trade name, crops, and company for each chemical and identifies those chemicals that qualified for the EPA reduced-risk status. Biopesticides that are recently registered and those under consideration for registration are identified on the web site at www.epa.gov/pesticides/ biopesticides/. Updates to EPA pesticide priority review and reregistration lists are available at http://www.epa.gov/ pesticides. EPA also issues an electronic newsletter that will announce updates. Sign-up information for the electronic newsletter is available at http:// www.epa.gov/pesticides.

The phase.out of methyl bromide is required under Title IV of the Clean Air Act (as amended in 1990) because of its ozone-depleting potential. In October 1998, the Clean Air Act was amended to change the phase out date to 2005, in harmonization with the date agreed to in the Montreal Protocol. More information on the phase out of methyl bromide is available on the EPA website at http://www.epa. gov/ozone/mbr/harmoniz.html.

Proposals are solicited for the following program areas:

1. Crops at Risk From FQPA Implementation (CAR) (Program Area 112.1)

(Maximum award: $200,000 per year for two to four years).

The Crops at Risk from FQPA Implementation (CAR) program is an intermediate-term (two to four years) research, education, and extension competitive grants program with at-risk crops or cropping systems as the focal point. Several crops and cropping systems face potentially severe economic impacts as a result of the possible restrictions or elimination of certain pesticides resulting from implementation of the Food Quality Protection Act (FQPA) of 1996 and other regulatory actions. In the short-term, small-acreage fruit and vegetable crops are most vulnerable. However, many more crops, including large-acreage grain, forage and fiber crops, will be impacted during the pesticide review process. Development of new multiple-tactic pest management strategies designed to assist producers during the transition is the goal of this program component.

Specific Objectives: a. Evaluate new approaches to pest management techniques and technology (rates, timing,pre-harvest intervals, application methods and equipment, post-harvest treatment etc.) That could reduce or eliminate pesticide residues of concern or the effects of these residues.

b. Develop new pest management tactics based on alternative technologies, including products of genetic engineering, biological organisms, biological pesticides, new chemical pesticides, and cultural practices; and

c. Demonstrate and describe how new tactics can be economically and practically integrated into pest management programs for individual crops.

Updates to EPA pesticide priority review and registration lists are available at http://www.epa.gov/pesticides. EPA also issues an electronic newsletter that will announce updates. Sign-up information for the electronic newsletter is available at http://www.epa.gov/pesticides.

Proposals that address priorities established by stakeholders representing an entire crop production region, consider crosscutting challenges, and show evidence of multi-state or within-state cooperation regarding research, education, and extension will be given preference.

2. FQPA Risk Avoidance and Mitigation for Major Food Crop Systems Program (RAMP) (Program Area 112.2)

(Maximum award: $500,000 per year for up to five years).

The FQPA Risk Avoidance and Mitigation for Major Food Crop Systems Program (RAMP) is a long-term (up to five years) research, education, and extension competitive grants program to develop reduced risk pest management strategies for agro-ecosystems. Global markets for food and grain products demand high quality at competitive prices. Growers are faced with meeting market demands and ever-increasing production costs coupled with decreasing or unstable commodity prices. Added to these constraints are concerns posed by implementation of regulatory actions over the next decade. Many of the pest management tools growers have depended on in the past may be restricted or eliminated. Growers face uncertainty regarding which pest management tactics will continue to be available and how to make use of new technologies, such as bioengineered crop innovations and precision agriculture in their production systems. There is a critical need to devise pest management systems that consider all aspects of crop production

Projects supported by RAMP will have a food, fiber and grain production system focus and can include consideration of food safety, occupational safety, water quality and other environmental concerns. The program will address the major acreage cropping systems including, but not limited to, corn, soybean, wheat, cotton and rice, as well as, the fruits and vegetables most important in the human diet, especially the diets of infants and children. Emphasis will be placed on development and implementation of new and innovative pest management systems designed to maintain crop productivity and profitability while addressing environmental quality and human health concerns. The goal of this long-term effort is to eliminate or minimize pesticide residues of concern on foods, in drinking water , and in the environment. This program also supports projects to reduce occupational risk for producers and their employees. These will be long-term projects and will evolve from in-depth discussions of pest management needs and priorities involving stakeholders. Projects are intended to enhanced stability and sustainability of agricultural production systems and will be multi-state or regional in scale, typically involve multiple cropping systems that define an agroecosystem. A major goal of this effort will be the development of pest management systems that are based on an advanced understanding of cropping system biology and ecology.

Specific Objectives: a. Develop methods of pest management that reduce or eliminate the risk from pesticide residues; and b. Develop and implement information intensive approaches to pest management based on a more complete understanding of crop and pest biology, their interactions and mutual impacts, and factors impacting the stability of pest management systems in major cropping systems.

Proposals that strive to maintain crop economic viability based on a diverse bio-based pest management system are encouraged. Proposals should address priorities established by stakeholders representing an entire cropping system and consider crosscutting challenges, and must show evidence for multi-state and multi-disciplinary cooperation regarding research, education, and extension. Proposals should catalog and review the pest management tactics currently being used in the targeted cropping system, then define opportunities for new pest management approaches as part of the proposal. All proposals should include an outreach component to promote the exchange of pest management information among researchers, extension agents, producers, and commodity groups as it relates to the project. Outreach efforts can make use of publications, website development, field days, workshops or other relevant planning and outreach activities. Successful proposals will provide milestones and independently verifiable indicators that can be used to measure progress and impact across a range of ecological, agronomic and economic criteria. Budgetary provisions should be made to support formal stakeholder reviews after the second field season and at the end of the project.

3. Methyl Bromide Transitions Program (MBT) (Progam Area 112.3)

(No Maximum award and up to two years; however, it is anticipated that 12–15 grants will be funded).

The Methyl Bromide Transitions Program (MBT) supports the discovery and implementation of practical pest management alternatives for commodities affected by the phase-out of methyl bromide. Projects supported by MBT will focus on short- to intermediate-term solutions for all commodities at risk using presently available or newly developed pest management technologies and practices. Since alternatives to methyl bromide that have thus far been developed require different pest management strategies than those used for methyl bromide alone, projects supported by MBT will emphasize the development and implementation of integrated management approaches. This includes increased research, education and extension activities on all commodities at risk, including field trials and other demonstration projects that enhance the adoption of pest management alternatives for all commodities. It also will support the technology transfer of results to growers through education and outreach programs.

Specific Objectives: a. Conduct integrated research, education, and extension activities for pest management alternatives on strawberry, tomato, other vegetables, fruits and nuts;

b. Conduct integrated research, education, and extension activities for pest management alternatives for nurseries, including the floral industry and forest nurseries (e.g., general nursery production, production for pest and pathogen-free rootstocks);

c. Develop extension activities to implement pest management alternatives, including field trials and other demonstration projects that enhance the adoption of alternative management practices; and

d. Increase transfer of results to growers through education and outreach programs that promote the implementation of pest management alternatives.

Proposals that address priorities established by stakeholders, consider crosscutting challenges, and show evidence of multi-state or within-state cooperation involving research, education, and extension will be given preference.

4. Pest Management Centers (Program Area 112.4)

(No maximum award; however, budget requests should be at levels reflective of the complexity and intensity of agriculture within the region for a duration up to three years).

USDA has placed a high priority on the establishment of Pest Management Centers as a means of strengthening its connection with production agriculture, research and extension programs, and agricultural stakeholders throughout the United States. USDA and EPA have recognized the need for a pest management information network that can quickly respond to information needs of the public and private sectors. When fully implemented, Pest Management Centers will help USDA and its partner institutions identify, prioritize and coordinate a national pest management research, extension, and education program implemented on a regional basis.

Pest Management Centers will be the focal point for team building efforts, communication networks, and stakeholder participation within a given region. Pest Management Centers will promote open communication, exchange of information and resources, collaboration, and integration of activities among individuals, institutions, states, and regions into coordinated efforts around common themes that span institutional or geographical boundaries. Pest Management Centers also will bring together and help focus the institutional and individual expertise needed to successfully address a range of pest management issues confronting farmers and other pest managers (e.g., regulatory restrictions, development of pest resistance, invasive species, and biotechnology). When fully implemented, Pest Management Centers will maximize the availability of dispersed expertise, reduce duplication of effort, enhance interdisciplinary and multiorganizational efforts, and provide regional expert information, technology, and education upon which production agriculture, government agencies, and agricultural stakeholders can draw.

The process to develop the Pest Management Centers will begin in FY 2000 with the formation of four geographically-based regional Pest Management Centers with one in each of the north central, northeastern, southern, and western regions of the United States. The four regional Pest Management Centers funded in FY 2000 by this RFP will be instrumental in creating a regional process that will evolve into Agroecological Pest Management Centers in FY 2003, based upon agroecologically defined crop production regions.

Pest Impact Assessment Program funds will be used to implement and support the regional Pest Management Centers. The regional Pest Management Centers will fulfill a real and immediate need in establishing a national 2-way pest management communication network which includes USDA and other government agencies, scientists at colleges and universities, and stakeholders focusing on pest management issues. These activities, among other things, will ensure broad based stakeholder participation in initiating a 3-year process to facilitate the planning and development of future Agroecological Pest Management Centers.

Successful applicants for FY 2000 regional Pest Management Centers should present a plan that will demonstrate their capacity to form and fund collaborative information networks that cross traditional institutional, disciplinary, and geographic boundaries to address the region's pest management priorities. The four successful proposals funded in FY 2000 will be expected to conduct the following activities:

a. Establish a team of pest managers, producers and commodity groups, and other stakeholders that represent the diversity of capabilities, institutions, and pest management issues found in the region.

b. Establish a regionally-based pest management information and communication network linking USDA and other Federal agencies with agricultural researchers and stakeholders throughout the region. Among the responsibilities of the network will be to (1) collect, synthesize, and disseminate information on pest management practices; (2) coordinate crop profile development and develop pest management strategy plans for important commodities in the region; and (3) coordinate science reviews of documents related to crop production, pest management, regulatory, health, and environmental risk issues.

c. Facilitate an interactive process designed to identify appropriate boundaries for agroecological pest management areas in the United States. Once determined, agroecological areas will serve to demarcate the Agroecological Pest Management Centers needed to address regional and National priorities. These Agroecological Pest Management Centers will be geographically defined by an appropriate set of criteria, such as agroecological or crop production regions, that reflect principal agricultural production zones in the country and address the broad spectrum of pest management needs within each region. The function of the regional Pest Management Centers will be redistributed in FY 2003 to the newly defined Agroecological Pest Management Centers that will be established in an open and fair competitive process during FY 2003.

The planning for the FY 2003 Pest Management Centers should be an integral part of the proposal for the FY 2000 regional Pest Management Centers. Thus applicants should include plans for:

a. Bringing together pest management professionals and stakeholders to establish the pest management information network and to identify and prioritize agroecological pest management needs. Agroecological Pest Management Centers will serve as regional hubs responsible for ensuring efficient access to pest management expertise and data available through colleges and universities.

b. Defining functional agroecologoically based pest management regions within the four geographic regions of the country to facilitate the evolution of regional Pest Management Centers into Agroecological Pest Management Centers.

c. Participating as a regional representative on a national steering committee established by CSREES to harmonize regional pest management needs into a proposed comprehensive national network compatible and complimentary agroecologically based Pest Management Centers.

Proposed budgets could include funding for a regional Pest Management Center director and support staff, and to support the information network. Regional Pest Management Centers will be supported for a 3-year period. Annual funding beyond the first year will be dependent upon demonstration of the regional Pest Management Center's accomplishments and the continued availability of Federal funds.

C. Expected Program Outputs and Reporting Requirements

The grantee must prepare an annual report that details all significant activities towards achieving the goals and objectives of the project. The narrative should be succinct and be no longer than five pages, using 12-point, single-spaced type. The report also should include a listing of any students who worked on the project (report graduate degrees awarded and undergraduates trained, as applicable). A budget summary should be attached to this report, which will provide an overview of all monies spent during the reporting period.

Part III—Preparation of a Proposal

A. Program Application Materials

Program application materials are available at the Integrated Research, Education, and Extension Competitive Grants Program website (http://www.reeusda.gov/integrated/). If you do not have access to our web page or have trouble downloading material, you may contact the Proposal Services Unit, Office of Extramural Programs, USDA/CSREES at (202) 401–5048. When calling the Proposal Services Unit, please indicate that you are requesting forms for the Integrated Research, Education, and Extension Competitive Grants Program—Pest Management. These materials may also be requested via Internet by sending a message with your name, mailing address (not e-mail) and phone number to psb@reeusda.gov. State that you want a copy of the Program Description and application materials (orange book) for the Fiscal Year 2000 Integrated Research, Education, and Extension Competitive Grants Program—Pest Management.

B. Content of Proposals

1. General

The proposal should follow these guidelines, enabling reviewers to more easily evaluate the merits of each proposal in a systematic, consistent fashion:

(a) The proposal should be prepared on only one side of the page using standard size (8½″×11″) white paper, one inch margins, typed or word processed using no type smaller than 12 point font, and single or double spaced. Use an easily readable font face (e.g., Geneva, Helvetica, Times Roman).

(b) Each page of the proposal, including the Project Summary, budget pages, required forms, and any appendices, should be numbered sequentially.

(c) The proposal should be stapled in the upper left-hand corner. Do not bind. An original and 14 copies (15 total) must be submitted in one package, along with 10 copies of the "Project Summary" as a separate attachment.

(d) If applicable, proposals should include original illustrations (photographs, color prints, etc.) in all copies of the proposal to prevent loss of meaning through poor quality reproduction.

2. Cover Page (Form CSREES–661)

Each copy of each grant proposal must contain an "Application for Funding", Form CSREES–661. One copy of the application, preferably the original, must contain the pen-and-ink signature(s) of the proposing principal investigator(s)/project director(s) (PI/PD) and the authorized organizational representative who possesses the necessary authority to commit the organization's time and other relevant resources to the project. Any proposed PI/PD or co-PI/PD whose signature does not appear on Form CSREES–661 will not be listed on any resulting grant award. Complete both signature blocks located at the bottom of the "Application for Funding" form.

Form CSREES–661 serves as a source document for the CSREES grant database; it is therefore important that it be completed accurately. The following items are highlighted as having a high potential for errors or misinterpretations:

(a) Title of Project (Block 6). The title of the project must be brief (80-character maximum), yet represent the major thrust of the effort being proposed. Project titles are read by a variety of nonscientific people; therefore, highly technical words or phraseology should be avoided where possible. In addition, introductory phrases such as "investigation of" or "research on" "education for" or "outreach that" should not be used.

(b) Program to Which You Are Applying (Block 7). "Integrated Research, Education, and Extension Competitive Grants Program—Pest Management."

(c) Program Area and Number (Block 8). The name of the program component, e.g., CAR, 112.1 or RAMP, 112.2 should be inserted in this block.

(d) Type of Award Request (Block 13). Check the block for "new."

(e) Principal Investigator(s)/Project Director(s) (PI/PD) (Block 15). The designation of excessive numbers of co-PI/PD's creates problems during final review and award processing. Listing multiple co-PI/PD's, beyond those required for genuine collaboration, is therefore discouraged. Note that providing a Social Security Number is voluntary, but is an integral part of the CSREES information system and will assist in the processing of the proposal.

(f) Type of Performing Organization (Block 18). A check should be placed in the box beside the type of organization which actually will carry out the effort. For example, if the proposal is being submitted by an 1862 Land-Grant Institution but the work will be performed in a department, laboratory, or other organizational unit of an agricultural experiment station, box "03" should be checked. If portions of the effort are to be performed in several departments, check the box that applies to the individual listed as PI/PD #1 in Block 15.a.

(g) Other Possible Sponsors (Block 22). List the names or acronyms of all other public or private sponsors including other agencies within USDA and other programs funded by CSREES

to whom your application has been or might be sent. In the event you decide to send your application to another organization or agency at a later date, you must inform the identified CSREES Program Director as soon as practicable. Submitting your proposal to other potential sponsors will not prejudice its review by CSREES; however, duplicate support for the same project will not be provided. Complete the "Application for Funding," Form CSREES–661, in its entirety.

(h) One copy of the "Application for Funding" form must contain the signatures (in ink) of the PI/PD's and authorized organizational representative for the applicant organization.

3. Table of Contents

For consistency and ease in locating information, each proposal must contain a detailed Table of Contents just after the cover page. The Table of Contents should contain page numbers for each component of the proposal. Page numbers should begin with the first page of the Project Description.

4. Project Summary

The proposal must contain a Project Summary of 250 words or less on a separate page which should be placed immediately after the Table of Contents and should not be numbered. The names and affiliated organizations of all PI/PD's and co-PI/PD's should be listed on this form as well as the title of the project, in addition to the title of the project. The summary should be a self-contained, specific description of the activity to be undertaken and should focus on: overall project goal(s) and supporting objectives; plans to accomplish project goal(s); and relevance of the project to the Integrated Competitive Grants Program—Pest Management. The importance of a concise, informative Project Summary cannot be overemphasized.

5. Project Description

For CAR, RAMP, and MBT proposals, the project description may not exceed 15 single- or double-spaced pages. Project descriptions for Pest Management Centers may not exceed 20 single- or double-spaced pages. The Project Description should include the following components.

a. *Introduction and Rationale:* Include a clear statement of the problems to be addressed and goals expected to be accomplished. Describe the supporting objectives; questions; research, education and/or extension components to be included; and/or partners that will be used to accomplish the goal(s) set. In addition, this section should include in-depth information on the following, when applicable:

1. Estimates of the magnitude of the issues and their relevance to stakeholders and to ongoing State-Federal food and agricultural research, education and extension programs.

2. Role of stakeholders in problem identification, planning, implementation and evaluation as appropriate.

3. Reasons for having the work performed by the proposing institution.

4. For CAR, RAMP, and MBTP proposals only: A detailed plan for the research, education, and technology transfer that will be used to implement the pest management alternative solution in the field, and should identify milestones and independently verifiable indicators.

b. *Objectives:* Clear, concise, complete, and logically arranged statement(s) of the specific aims of the proposed effort must be included in all proposals. Pest Management Center proposals should indicate which information needs will be given first priority, and identify major Center deliverables, such as crop profiles, reports, databases, and Web sites.

c. *Procedures:* For CAR, RAMP, and MBTP Proposals: The procedures or methodology to be applied to the proposed effort should be explicitly stated. This section should include but not necessarily be limited to:

1. A description of the proposed investigations and/or experiments in the sequence in which it is planned to carry them out;

2. Techniques to be employed, including their feasibility;

3. Kinds of results expected;

4. Means by which data will be analyzed or interpreted;

5. Pitfalls that might be encountered; and

6. Limitations to proposed procedures.

For Pest Management Center Proposals: The proposal should provide details regarding the procedures and processes that will be used to manage the Pest Management Center. Proposals should include, but not necessarily be limited to, the following aspects of Center management:

1. Identify the Center Director and other key personnel who will comprise the Center's staff;

2. Describe how the Pest Management Center will be managed, including how and by who work priorities will be established (e.g., steering and stakeholder advisory committees), how partner institutions and stakeholders will participate in Center management, how information collected by the Center will be aggregated and disseminated, and how Center activities will be coordinated with the activities of the other three regional Centers;

3. Describe the open and competitive process that will be used to identify the institutions and individuals that will form the information network in the region (Centers should build upon existing regional coordination efforts to the extent possible or should indicate why existing efforts are not relevant. The proposal should also describe how coordination with the National Agricultural Statistics Service (NASS), the Economic Research Service (ERS), EPA, the Agricultural Research Service (ARS), and other government agencies will be ensured;

4. Provide an action plan, including milestones, for the establishment of the Pest Management Center, the regional information network, the participatory process to identify agro-ecosystems centers; and

5. Describe the process that will be used to hold an "independent" evaluation of the Center on an annual basis (Members of the review team should reflect the Center's "community of interest", including member institutions, Center clients, and stakeholder groups. The results of the annual review will be used by CSREES to determine whether continued funding of the Center is justified.).

d. *Cooperation and Institutional Units Involved:* Cooperative and multi-state applications are encouraged. Identify each institutional unit contributing to the project. Identify each institution in a multiple-institution proposal and designate the lead institution. When appropriate, the project should be coordinated with the efforts of other State and/or national programs. Clearly define the roles and responsibilities of each institutional unit of the project team, if applicable.

e. *Literature Review:* A summary of pertinent publications with emphasis on their relationship to the effort being proposed should be provided and should include all important and recent publications from other institutions, as well as those from the applicant institution. The citations themselves should be accurate, complete, and written in an acceptable journal format.

6. Appendices to Project Description

Appendices to the Project Description are allowed if they are directly germane to the proposed project and are limited to a total of two of the following: reprints (papers that have been published in peer reviewed journals) and preprints (manuscripts in press for a peer reviewed journal; these must be

accompanied by a letter of acceptance from the publishing journal).

7. Key Personnel

All senior personnel who are expected to be involved in the effort must be clearly identified. For each person, the following should be included:

a. The roles and responsibilities of each PI/PD and/or collaborator should be clearly described;

b. An estimate of the time commitment involved for each PI/PD and/or collaborator; and

c. Vitae of each PI/PD, senior associate, and other professional personnel. This section should include vitae of all key persons who are expected to work on the project, whether or not CSREES funds are sought for their support. The vitae should be limited to two (2) pages each in length, excluding publications listings. A chronological list of all publications in refereed journals during the past four (4) years, including those in press, must be provided for each project member for which a curriculum vitae is provided. Also list only those non-refereed technical publications that have relevance to the proposed project. All authors should be listed in the same order as they appear on each paper cited, along with the title and complete reference as these usually appear in journals.

8. Conflict-of-Interest List

A Conflict-of-Interest List must be provided for all individuals involved in the project (identified as key personnel). Each list should be on a separate page and include alphabetically the full names of the individuals in the following categories: (a) All collaborators on projects within the past four years, including current and planned collaborations; (b) all co-authors on publications within the past four years, including pending publications and submissions; (c) all persons in your field with whom you have had a consulting or financial arrangement within the past four years, who stand to gain by seeing the project funded; and (d) all thesis or postdoctoral advisees/advisors within the past four years (some may wish to call these life-time conflicts). This form is necessary to assist program staff in excluding from proposal review those individuals who have conflicts-of-interest with the personnel in the grant proposal. The Program Director must be informed of any additional conflicts-of-interest that arise after the proposal is submitted.

9. Collaborative and/or Subcontractual Arrangements

If it will be necessary to enter into formal consulting or collaborative arrangements with others, such arrangements should be fully explained and justified. In addition, evidence should be provided that the collaborators involved have agreed to render these services. If the need for consultant services is anticipated, the proposal narrative should provide a justification for the use of such services, a statement of work to be performed, and a resume or curriculum vita for each consultant. For purposes of proposal development, informal day-to-day contacts between key project personnel and outside experts are not considered to be collaborative arrangements and thus do not need to be detailed.

All anticipated subcontractual arrangements also should be explained and justified in this section. A proposed statement of work and a budget for each arrangement involving the transfer of substantive programmatic work or the providing of financial assistance to a third party must be provided. Agreements between departments or other units of your own institution and minor arrangements with entities outside of your institution (e.g., requests for outside laboratory analyses) are excluded from this requirement.

If you expect to enter into subcontractual arrangements, please note that the provisions contained in 7 CFR Part 3019, USDA Uniform Administrative Requirements for Grant and Other Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations, and the general provisions contained in 7 CFR Part 3015.205, USDA Uniform Federal Assistance Regulations, flow down to subrecipients. In addition, required clauses from Sections 40–48 ("Procurement Standards") and Appendix A ("Contract Provisions") to 7 CFR Part 3019 should be included in final contractual documents, and it is necessary for the subawardee to make a certification relating to debarment/suspension.

10. Budget (Form CSREES–55)

a. Budget Form. Prepare the budget, Form CSREES–55, in accordance with instructions provided. A budget form is required for each year of requested support. In addition, a cumulative budget is required detailing the requested total support for the overall project period. The budget form may be reproduced as needed by applicants. Funds may be requested under any of the categories listed on the form, provided that the item or service for which support is requested is allowable under the authorizing legislation, the applicable Federal cost principles, and these program guidelines, and can be justified as necessary for the successful conduct of the proposed project. Applicants must also include a Budget Narrative to justify their budgets (see section b below.)

The following guidelines should be used in developing your proposal budget(s):

1. Salaries and Wages. Salaries and wages are allowable charges and may be requested for personnel who will be working on the project in proportion to the time such personnel will devote to the project. If salary funds are requested, the number of Senior and Other Personnel and the number of CSREES-Funded Work Months must be shown in the spaces provided. Grant funds may not be used to augment the total salary or rate of salary of project personnel or to reimburse them for time in addition to a regular full-time salary covering the same general period of employment. Salary funds requested must be consistent with the normal policies of the institution.

2. Fringe Benefits. Funds may be requested for fringe benefit costs if the usual accounting practices of your organization provide that organizational contributions to employee benefits (social security, retirement, etc.) be treated as direct costs. Fringe benefit costs may be included only for those personnel whose salaries are charged as a direct cost to the project.

3. Nonexpendable Equipment. Nonexpendable equipment means tangible nonexpendable personal property including exempt property charged directly to the award having a useful life of more than one year and an acquisition cost of $5,000 (or lower depending on institutional policy) or more per unit. As such, items of necessary instrumentation or other nonexpendable equipment should be listed individually by description and estimated cost in the Budget Narrative. This applies to revised budgets as well, as the equipment item(s) and amount(s) may change.

4. Materials and Supplies. The types of expendable materials and supplies which are required to carry out the project should be indicated in general terms with estimated costs in the Budget Narrative.

5. Travel. The type and extent of travel and its relationship to project objectives should be described briefly and justified. If foreign travel is proposed, the country to be visited, the

specific purpose of the travel, a brief itinerary, inclusive dates of travel, and estimated cost must be provided for each trip. Airfare allowances normally will not exceed round-trip jet economy air accommodations. U.S. flag carriers must be used when available. See 7 CFR Part 3015.205(b)(4) for further guidance.

6. Publication Costs/Page Charges. Include anticipated costs associated with publications in a journal (preparing and publishing results including page charges, necessary illustrations, and the cost of a reasonable number of coverless reprints) and audio-visual materials that will be produced. Photocopying and printing brochure, etc., should be shown in Section I., "All Other Direct Costs" of Form CSREES–55.

7. Computer (ADPE) Costs. Reimbursement for the costs of using specialized facilities (such as a university- or department-controlled computer mainframe or data processing center) may be requested if such services are required for completion of the work.

8. All Other Direct Costs. Anticipated direct project charges not included in other budget categories must be itemized with estimated costs and justified in the Budget Narrative. This also applies to revised budgets, as the item(s) and dollar amount(s) may change. Examples may include space rental at remote locations, subcontractual costs, and charges for consulting services, telephone, facsimile, shipping costs, and fees necessary for laboratory analyses. You are encouraged to consult the "Instructions for Completing Form CSREES–55, Budget," of the Application Kit for detailed guidance relating to this budget category. Form AD–1048 must be completed by each subcontractor or consultant and retained by the grantee. Pest Management Centers proposals should indicate that sub-contractual arrangements are anticipated, but should not identify specific institutions. Successful Pest Management Center applicants will be expected to conduct an open and competitive process to identify institutional members of its regionally-based information network, after which subcontractual arrangements can be made between the Center's host institution and member institutions.

9. Indirect Costs. Section 1462 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3310) limits indirect costs for this program to 19 percent of total Federal funds provided under each award. Therefore the recovery of indirect costs under this program may not exceed the lesser of the institution's official negotiated indirect cost rate or the equivalent of 19 percent of total Federal funds awarded. If no rate has been negotiated, a reasonable dollar amount (equivalent to less than 19 percent of total Federal funds requested) in lieu of indirect costs may be requested, subject to approval by USDA.

b. Budget Narrative. All budget categories, excluding Indirect Costs, for which support is requested, must be individually listed (with costs) and justified on a separate sheet of paper and placed immediately behind the Budget Form. Explanations of matching funds or lack there of on commodity-specific projects also are to be included in this section.

c. Matching Funds. If an applicant concludes that matching funds are not required as specified under Part I (e), a justification should be included in the Budget Narrative. CSREES will consider this justification when ascertaining final matching requirements or in determining if required matching can be waived. CSREES retains the right to make final determinations regarding matching requirements.

For those grants requiring matching funds as specified under Part I (e), proposals should include written verification of commitments of matching support (including both cash and in-kind contributions) from third parties. Written verification means:

(a) For any third party cash contributions, a separate pledge agreement for each donation, signed by the authorized organizational representatives of the donor organization and the applicant organization, which must include: (1) The name, address, and telephone number of the donor; (2) the name of the applicant organization; (3) the title of the project for which the donation is made; (4) the dollar amount of the cash donation; and (5) a statement that the donor will pay the cash contribution during the grant period; and

(b) For any third party in-kind contributions, a separate pledge agreement for each contribution, signed by the authorized organizational representatives of the donor organization and the applicant organization, which must include: (1) The name, address, and telephone number of the donor; (2) the name of the applicant organization; (3) the title of the project for which the donation is made; (4) a good faith estimate of the current fair market value of the third party in-kind contribution; and (5) a statement that the donor will make the contribution during the grant period.

The sources and amount of all matching support from outside the applicant institution should be summarized on a separate page and placed in the proposal immediately following the Budget Narrative. All pledge agreements must be placed in the proposal immediately following the summary of matching support.

The value of applicant contributions to the project shall be established in accordance with applicable cost principles. Applicants should refer to OMB Circular A–21, Cost Principles for Educational Institutions, for further guidance and other requirements relating to matching and allowable costs.

11. Current and Pending Support (Form CSREES–663)

All proposals must contain Form CSREES–663 listing other current public or private support (including in-house support) to which key personnel identified in the proposal have committed portions of their time, whether or not salary support for person(s) involved is included in the budget. Analogous information must be provided for any pending proposals that are being considered by, or that will be submitted in the near future to, other possible sponsors, including other USDA Programs or agencies. Concurrent submission of identical or similar proposals to the possible sponsors will not prejudice proposal review or evaluation by the CSREES for this purpose. However, a proposal that duplicates or overlaps substantially with a proposal already reviewed and funded (or to be funded) by another organization or agency will not be funded under this program. Note that the project being proposed should be included in the pending section of the form.

12. Assurance Statement(s), (Form CSREES–662)

A number of situations encountered in the conduct of projects require special assurances, supporting documentation, etc., before funding can be approved for the project. In addition to any other situation that may exist with regard to a particular project, it is expected that some applications submitted in response to these guidelines will involve the following:

a. Recombinant DNA or RNA Research. As stated in 7 CFR Part 3015.205 (b)(3), all key personnel identified in the proposal and all endorsing officials of the proposing organization are required to comply with the guidelines established by the National Institutes of Health entitled,

"Guidelines for Research Involving Recombinant DNA Molecules," as revised. If your project proposes to use recombinant DNA or RNA techniques, you must so indicate by checking the "yes" box in Block 19 of Form CSREES–661 (the Cover Page) and by completing Section A of Form CSREES–662. For applicable proposals recommended for funding, Institutional Biosafety Committee approval is required before CSREES funds will be released.

b. Animal Care. Responsibility for the humane care and treatment of live vertebrate animals used in any grant project supported with funds provided by CSREES rests with the performing organization. Where a project involves the use of living vertebrate animals for experimental purposes, all key project personnel identified in a proposal and all endorsing officials of the proposing organization are required to comply with the applicable provisions of the Animal Welfare Act of 1966, as amended (7 U.S.C. 2131 *et seq.*) and the regulations promulgated thereunder by the Secretary in 9 CFR Parts 1, 2, 3, and 4 pertaining to the care, handling, and treatment of these animals. If your project will involve these animals, you should check "yes" in block 20 of Form CSREES–661 and complete Section B of Form CSREES–662. In the event a project involving the use of live vertebrate animals results in a grant award, funds will be released only after the Institutional Animal Care and Use Committee has approved the project.

c. Protection of Human Subjects. Responsibility for safeguarding the rights and welfare of human subjects used in any grant project supported with funds provided by CSREES rests with the performing organization. Guidance on this issue is contained in the National Research Act, Pub. L. No. 93–348, as amended, and implementing regulations promulgated by the Department under 7 CFR Part 1c. If you propose to use human subjects for experimental purposes in your project, you should check the "yes" box in Block 21 of Form CSREES–661 and complete Section C of Form CSREES–662. In the event a project involving human subjects results in a grant award, funds will be released only after the appropriate Institutional Review Board has approved the project.

13. Certifications

Note that by signing Form CSREES–661 the applicant is providing the certifications required by 7 CFR Part 3017, as amended, regarding Debarment and Suspension and Drug Free Workplace, and 7 CFR Part 3018, regarding Lobbying. The certification forms are included in the application package for informational purposes only. These forms should not be submitted with the proposal since by signing form CSREES–661 your organization is providing the required certifications. If the project will involve a subcontractor or consultant, the subcontractor/consultant should submit a form AD–1048 to the grantee organization for retention in their records. This form should not be submitted to USDA.

14. Compliance With the National Environmental Policy Act (NEPA) (Form CSREES–1234)

As outlined in 7 CFR Part 3407 (the Cooperative State Research, Education, and Extension Service regulations implementing NEPA), the environmental data for any proposed project is to be provided to CSREES so that CSREES may determine whether any further action is needed. In some cases, however, the preparation of environmental data may not be required. Certain categories of actions are excluded from the requirements of NEPA.

In order for CSREES to determine whether any further action is needed with respect to NEPA, pertinent information regarding the possible environmental impacts of a particular project is necessary; therefore, Form CSREES–1234, "NEPA Exclusions Form," must be included in the proposal indicating whether the applicant is of the opinion that the project falls within a categorical exclusion and the reasons therefore. If it is the applicant's opinion that the proposed project falls within the categorical exclusions, the specific exclusion must be identified. Form CSREES–1234 and supporting documentation should be included as the last page of this proposal.

Even though a project may fall within the categorical exclusions, CSREES may determine that an Environmental Assessment or an Environmental Impact Statement is necessary for an activity, if substantial controversy on environmental grounds exists or if other extraordinary conditions or circumstances are present which may cause such activity to have a significant environmental effect.

C. Submission of Proposals

1. When To Submit (Deadline Date)

Proposals must be transmitted by June 6, 2000, as indicated by postmark or date of courier bill of lading. Proposals transmitted after this date will not be considered for funding.

2. What To Submit

An original and 14 copies must be submitted. In addition submit 10 copies of the proposal's Project Summary. All copies of the proposals and the Project Summaries must be submitted in one package.

3. Where To Submit

Applicants are strongly encouraged to submit completed proposals via overnight mail or delivery service to ensure timely receipt by the USDA. The address for hand-delivered proposals or proposals submitted using an express mail or overnight courier service is: Integrated Research, Education, and Extension Competitive Grants Program -Pest Managment; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; Room 303, Aerospace Center; 901 D Street, S.W.; Washington, D.C. 20024.

Proposals sent via the U.S. Postal Service must be sent to the following address: Integrated Research, Education, and Extension Competitive Grants Program—Pest Management; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2245; 1400 Independence Avenue, S.W.; Washington, D.C. 20250–2245.

D. Acknowledgment of Proposals

The receipt of all proposals will be acknowledged by e-mail. Therefore, applicants strongly are encouraged to provide e-mail addresses, where designated, on the Form CSREES–661. If the applicant's email address is not indicated, CSREES will acknowledge receipt of proposal by letter.

Once the proposal has been assigned an identification number, please cite that number on all future correspondence. If the applicant does not receive an acknowledgment within 60 days of the submission deadline, please contact the Program Director.

Part IV—Review Process

A. General

Each proposal will be evaluated using a 3-part process. First, each proposal will be screened to ensure that it meets the administrative requirements as set forth in this request for proposals-tier review process. Second, a panel will consider the relevance of the proposal to program objectives. Third, a technical peer panel will consider the technical merits of the proposal. The relevancy panel will be comprised of representatives from USDA and other federal agencies, farm and commodity

organizations, environmental and consumer groups, experts from colleges and universities, and others as needed. The technical peer panel will include representatives with appropriate scientific backgrounds from colleges and universities, USDA, EPA, and organizations with research, education, and extension expertise as needed. Funding determinations will come from a rank-ordered list of projects based on the combined relevancy and scientific peer panel scores. CSREES has found the above review process most appropriate for evaluating pest management grant proposals as proven through the administration of the Pest Management Alternatives Research Program as authorized under the Competitive, Special, and Facilities Research Grant Act.

Overall, peer review panel members will be selected based upon their training and experience in relevant scientific, education or extension fields taking into account the following factors: (a) The level of formal scientific, technical education, and extension experience of the individual, as well as the extent to which an individual is engaged in relevant research, education and/or extension activities; (b) the need to include as peer reviewers experts from various areas of specialization within relevant scientific, education, and extension fields; (c) the need to include as reviewers other experts (producers, range or forest managers/operators, consumers, etc.) who can assess relevance of the proposals to targeted audiences and to program needs; (d) the need to include as peer reviewers experts from a variety of organizational types (e.g., colleges, universities, industry, state and Federal agencies, private profit and non-profit organizations), and geographic locations; (e) the need to maintain a balanced composition of peer review groups with regard to minority and female representation and an equitable age distribution; and (f) the need to include members that can judge the effective usefulness to producers and the general public of each proposal.

B. Evaluation Criteria

Priority will be given for integrated, multifunctional research, education, and extension projects.

The criteria used to evaluate proposals submitted to the Integrated Research, Education, and Extension Competitive Grants Program—Pest Management will vary depending on which of the four program components you are requesting funding from. The two sets of evaluation criteria are listed below.

1. Evaluation Criteria for CAR, RAMP, and MBT Proposals

Proposals for CAR, RAMP, and MBT funding will be evaluated based on the criteria described below. The relevancy panel will assign up to 30 points based on Criterion a, and the technical panel will assign up to 70 points based on Criteria b–f. The criteria are listed below.

a. Relevance to Program Objectives (30 points): Factors that will be considered include the importance of the crop/pest combination (particularly agronomic and economic considerations; e.g., magnitude of the pest problem if a widely used pesticide is no longer available), number of crops and pesticides addressed, user involvement in planning and implementation, potential for rapid integration into production practices, and demonstration of consideration of existing pest management programs.

b. Importance of the Problem (10 points): particularly ecological and agronomic considerations.

c. Technical Quality of the Approach (15 points): include the feasibility of attaining objectives; and the adequacy of professional training and experience, facilities and equipment.

d. Potential to Reduce Reliance on Pesticides (15 points).

e. Level of End-User Involvement (20 points): Examples are grower or commodity group involvement in planning or conducting research trials and demonstrations.

f. Appropriateness of the Budget (10 points).

2. Evaluation Criteria for Pest Management Center Proposals

Proposals for Pest Management Center funding will be evaluated based on the criteria described below. The relevancy panel will assign up to 30 points based on Criterion a, and the technical panel will assign up to 70 points based on Criteria b–e. The criteria are listed below.

a. Relevance to Program Objectives (30 points).

b. Appropriateness of Process to Establish Information Network (20 points): The process to establish the information network should ensure that all eligible colleges and universities have an opportunity to be become a member of the regional Center's information network.

c. Capacity to Attain Program Objectives (20 points): Factors that will be considered include the ability to provide leadership to form a broad-based regional information network; the strength of the action plan for development of Pest Management Centers organized around crop production regions (agro-ecosystems); the ability to foster research, extension and education collaborations, interdisciplinary teams, and inter-institutional partnerships; the adequacy, professional training and experience of Center staff; and the level of institutional support for Center including facilities and equipment.

d. Level of End-User Involvement (20 points): Factors that will be considered include evidence that stakeholders were consulted during proposal preparation and will participate in operation of the Center, and the ability to establish partnerships with stakeholders to accomplish Center objectives.

e. Appropriateness of the Budget (10 points): The budget should be reflective of the complexity and intensity of agriculture within the region.

C. Conflicts-of-Interest and Confidentiality

During the peer evaluation process, extreme care will be taken to prevent any actual or perceived conflicts-of-interest that may impact review or evaluation. For the purpose of determining conflicts-of-interest, the academic and administrative autonomy of an institution shall be determined by reference to the January 1998 issue of the Codebook for Compatible Statistical Reporting of Federal Support to Universities, Colleges, and Nonprofit Institutions, prepared by Quantum Research Corporation for the National Science Foundation.

Names of submitting institutions and individuals, as well as proposal content and peer evaluations, will be kept confidential, except to those involved in the review process, to the extent permitted by law. In addition, the identities of peer reviewers will remain confidential throughout the entire review process. Therefore, the names of the reviewers will not be released to applicants. At the end of the fiscal year, names of panelists will be made available in such a way that the panelists cannot be identified with the review of any particular proposal.

Part V—Additional Information

A. Access To Review Information

Copies of summary reviews, not including the identity of reviewers, will be sent to the applicant PI/PD after the review process has been completed.

B. Grant Awards

(1) General

Within the limit of funds available for such purpose, the awarding official of

CSREES shall make grants to those responsible, eligible applicants whose proposals are judged most meritorious under the procedures set forth in this RFP. The date specified by the awarding official of CSREES as the effective date of the grant shall be no later than September 30 of the Federal fiscal year in which the project is approved for support and funds are appropriated for such purpose, unless otherwise permitted by law. It should be noted that the project need not be initiated on the grant effective date, but as soon thereafter as practical so that project goals may be attained within the funded project period. All funds granted by CSREES under this RFP shall be expended solely for the purpose for which the funds are granted in accordance with the approved application and budget, the regulations, the terms and conditions of the award, the applicable Federal cost principles, and the Department's assistance regulations (parts 3015 and 3019 of 7 CFR).

(2) Organizational Management Information

Specific management information relating to an applicant shall be submitted on a one-time basis as part of the responsibility determination prior to the award of a grant identified under this RFP, if such information has not been provided previously under this or another CSREES program. CSREES will provide copies of forms recommended for use in fulfilling these requirements as part of the preaward process.

(3) Grant Award Document and Notice of Grant Award

The grant award document shall include at a minimum the following:

(a) Legal name and address of performing organization or institution to whom the Administrator has awarded a grant under the terms of this request for proposals;

(b) Title of project;

(c) Name(s) and address(es) of PI/PD's chosen to direct and control approved activities;

(d) Identifying grant number assigned by the Department;

(e) Project period, specifying the amount of time the Department intends to support the project without requiring recompetition for funds;

(f) Total amount of Departmental financial assistance approved by the Administrator during the project period;

(g) Legal authority(ies) under which the grant is awarded;

(h) Approved budget plan for categorizing allocable project funds to accomplish the stated purpose of the grant award; and

(i) Other information or provisions deemed necessary by CSREES to carry out its respective granting activities or to accomplish the purpose of a particular grant.

The notice of grant award, in the form of a letter, will be prepared and will provide pertinent instructions or information to the grantee that is not included in the grant award document.

C. Use of Funds; Changes

(1) Delegation of Fiscal Responsibility

Unless the terms and conditions of the grant state otherwise, the grantee may not in whole or in part delegate or transfer to another person, institution, or organization the responsibility for use or expenditure of grant funds.

(2) Changes in Project Plans

(a) The permissible changes by the grantee, PI/PD(s), or other key project personnel in the approved project grant shall be limited to changes in methodology, techniques, or other aspects of the project to expedite achievement of the project's approved goals. If the grantee and/or the PI/PD(s) are uncertain as to whether a change complies with this provision, the question must be referred to the CSREES Authorized Departmental Officer (ADO) for a final determination.

(b) Changes in approved goals or objectives shall be requested by the grantee and approved in writing by the ADO prior to effecting such changes. In no event shall requests for such changes be approved which are outside the scope of the original approved project.

(c) Changes in approved project leadership or the replacement or reassignment of other key project personnel shall be requested by the grantee and approved in writing by the awarding official of CSREES prior to effecting such changes.

(d) Transfers of actual performance of the substantive programmatic work in whole or in part and provisions for payment of funds, whether or not Federal funds are involved, shall be requested by the grantee and approved in writing by the ADO prior to effecting such transfers, unless prescribed otherwise in the terms and conditions of the grant.

(e) Changes in Project Period: The project period may be extended by CSREES without additional financial support, for such additional period(s) as the ADO determines may be necessary to complete or fulfill the purposes of an approved project, but in no case shall the total project period exceed five years. Any extension of time shall be conditioned upon prior request by the grantee and approval in writing by the ADO, unless prescribed otherwise in the terms and conditions of a grant.

(f) Changes in Approved Budget: Changes in an approved budget must be requested by the grantee and approved in writing by the ADO prior to instituting such changes if the revision will involve transfers or expenditures of amounts requiring prior approval as set forth in the applicable Federal cost principles, Departmental regulations, or in the grant award.

D. Applicable Federal Statutes and Regulations

Several Federal statutes and regulations apply to grant proposals considered for review and to project grants awarded under this program. These include, but are not limited to:

7 CFR Part 1.1—USDA implementation of the Freedom of Information Act

7 CFR Part 3—USDA implementation of OMB Circular No. A–129 regarding debt collection.

7 CFR Part 15, subpart A—USDA implementation of Title VI of the Civil Rights Act of 1964, as amended.

7 CFR Part 3015—USDA Uniform Federal Assistance Regulations, implementing OMB directives (i.e., Circular Nos. A–21 and A–122) and incorporating provisions of 31 U.S.C. 6301–6308 (the Federal Grant and Cooperative Agreement Act of 1977, Pub. L. No. 95–224), as well as general policy requirements applicable to recipients of Departmental financial assistance.

7 CFR Part 3017—USDA implementation of Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants).

7 CFR Part 3018—USDA implementation of Restrictions on Lobbying. Imposes prohibitions and requirements for disclosure and certification related to lobbying on recipients of Federal contracts, grants, cooperative agreements, and loans.

7 CFR Part 3019—USDA implementation of OMB Circular A–110, Uniform Administrative Requirements for Grants and Other Agreements With Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations.

7 CFR Part 3052—USDA implementation of OMB Circular No. A–133, Audits of States, Local Governments, and Non-profit Organizations.

7 CFR Part 3407—CSREES procedures to implement the National Environmental Policy Act of 1969, as amended.

29 U.S.C. 794 (section 504, Rehabilitation Act of 1973) and 7 CFR Part 15B (USDA implementation of statute)—prohibiting discrimination based upon physical or mental handicap in Federally assisted programs.

35 U.S.C. 200 *et seq.*—Bayh-Dole Act, controlling allocation of rights to inventions made by employees of small business firms and domestic nonprofit organizations, including universities, in Federally assisted programs (implementing regulations are contained in 37 CFR Part 401).

E. Confidential Aspects of Proposals and Awards

When a proposal results in a grant, it becomes a part of the record of CSREES transactions, available to the public upon specific request. Information that the Secretary determines to be of a confidential, privileged, or proprietary nature will be held in confidence to the extent permitted by law. Therefore, any information that the applicant wishes to have considered as confidential, privileged, or proprietary should be clearly marked within the proposal. The original copy of a proposal that does not result in a grant will be retained by the Agency for a period of one year. Other copies will be destroyed. Such a proposal will be released only with the consent of the applicant or to the extent required by law. A proposal may be withdrawn at any time prior to the final action thereon.

F. Regulatory Information

For the reasons set forth in the final Rule-related Notice to 7 CFR part 3015, subpart V (48 FR 29115, June 24, 1983), this program is excluded from the scope of the Executive Order 12372 which requires intergovernmental consultation with State and local officials. Under the provisions of the Paperwork Reduction Act of 1995, as amended (44 U.S.C. chapter 35), the collection of information requirements contained in this Notice have been approved under OMB Document No. 0524–0022.

Done at Washington, D.C., this 4th day of April 2000.

Charles W. Laughlin,

Administrator, Cooperative State Research, Education, and Extension Service.

Department of Agriculture

Cooperative State Research, Education, and Extension Service

Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative: Request for Proposals and Request for Input; Notice

DEPARTMENT OF AGRICULTURE

Cooperative State Research, Education, and Extension Service

Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative: Request for Proposals and Request for Input

AGENCY: Cooperative State Research, Education, and Extension Service, USDA.

ACTION: Notice of request for proposals and request for input.

SUMMARY: The Cooperative State Research, Education and Extension Service (CSREES) announces the availability of grant funds and requests proposals for the Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative for fiscal year (FY) 2000 to support integrated, multifunctional agricultural research, extension, and education activities that address food safety priorities in United States agriculture. The amount available for support of this program in FY 2000 is approximately $14,277,000.

This notice sets out the objectives for these projects, the eligibility criteria for projects and applicants, the application procedures, and the set of instructions needed to apply for a Food Safety grant under this authority.

By this notice, CSREES additionally solicits stakeholder input from any interested party regarding the FY 2000 Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative for use in the development of any future requests for proposals for this program.

DATES: Proposals must be transmitted by June 6, 2000, as indicated by the postmark or date on courier bill of lading. Proposals transmitted after this date will not be considered for funding. Comments regarding this request for proposals are requested within six months from the issuance of this notice. Comments received after that date will be considered to the extent practicable.

ADDRESSES: The address for hand-delivered proposals or proposals submitted using an express mail or overnight courier service is: Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; Room 303, Aerospace Center; 901 D Street, S.W.; Washington, D.C. 20024.

Proposals sent via the U.S. Postal Service must be sent to the following address: Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2245; 1400 Independence Avenue, S.W.; Washington, D.C. 20250–2245.

Written user comments should be submitted by first-class mail to: Policy and Program Liaison Staff; Office of Extramural Programs; USDA–CSREES; STOP 2299; 1400 Independence Avenue, S.W.; Washington, D.C. 20250–2299; or via e-mail to: RFP–OEP@reeusda.gov. In your comments, please include the name of the program and the fiscal year of the RFP to which you are responding.

FOR FURTHER INFORMATION: Applicants and other interested parties are encouraged to contact Dr. Jan Singleton; National Program Leader, Food Science and Food Safety; Plant and Animal Systems Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2220; 1400 Independence Avenue, S.W.; Washington, D.C. 20250–2220; telephone: (202) 401–1954; fax: (202) 401–5179; email: jsingleton@reeusda.gov.

Stakeholder Input

CSREES is soliciting comments regarding this solicitation of applications from any interested party. These comments will be considered in the development of any future RFP for the program. Such comments will be forwarded to the Secretary or his designee for use in meeting the requirements of section 103(c)(2) of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7613(c)(2)). This section requires the Secretary to solicit and consider input on a current RFP from persons who conduct or use agricultural research, education and extension for use in formulating future RFPs for competitive programs. Comments should be submitted as provided for in the **ADDRESSES** and **DATES** portions of this Notice.

Catalog of Federal Domestic Assistance

This program is listed in the Catalog of Federal Domestic Assistance under 10.303, Integrated Research, Education, and Extension Competitive Grants Program.

Part I—General Information

A. Legislative Authority and Background

Section 406 of the Agricultural Research, Extension, and Education Reform Act of 1998 (AREERA) (7 U.S.C. 7626) authorized the Secretary of Agriculture to establish a research, education, and extension competitive grants program to provide funding for integrated, multifunctional agricultural research, extension, and education activities. Subject to the availability of appropriations to carry out this program, the Secretary may award grants to colleges and universities (as defined by 1404 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (NARETPA) (7 U.S.C. 3103)) on a competitive basis for integrated research, education, and extension projects. Grants are to be awarded to address priorities in United States agriculture that involve integrated research, education, and extension activities as determined by the Secretary in consultation with the National Agricultural Research, Extension, Education, and Economics Advisory Board.

On November 19, 1999, the Secretary published in the **Federal Register** (64

FR 63560) a notice that the administration of this grant program had been delegated to the Cooperative State Research, Education, and Extension Service (CSREES). This notice also solicited public comment from persons who use or conduct research, extension, or education regarding the priorities to be addressed by this new program. In addition, this notice announced a public meeting to obtain comments to use in developing the proposed rule and requests for proposals for this new grant program. The public meeting was held on December 6, 1999. All the comments and the official transcript of the meeting have been made available for review on the CSREES web page (http://www.reeusda.gov/integrated/). This RFP was developed in consultation with the Advisory Board. In addition, the comments and testimonies from the December 6, 1999, public meeting were considered in the formulation of this RFP.

The entire program is funded in FY 2000 at $37,637,702 (after deduction for administrative expenses) for the following integrated activities: Water Quality ($12,374,115), Food Safety ($14,277,277), Pesticide Impact Assessment ($4,322,310), Crops at Risk from Food Quality and Protection Act (FQPA) Implementation ($952,000), FQPA Risk Mitigation Program for Major Food Crop Systems ($3,808,000), and Methyl Bromide Transition Program ($1,904,000). There will be three RFP's for this program. The Water Quality and Food Safety Programs will each have a separate RFP, while the latter four programs will be announced as one RFP. This notice announces and describes the Food Safety component of the Program.

CSREES will administer the Integrated Research, Education, and Extension Competitive Grants Program by determining priorities in United States agriculture through Agency stakeholder input processes and in consultation with the National Agricultural Research, Extension, Education, and Economics Advisory Board. Each RFP for the different program areas (*i.e.*, Water Quality, Food Safety, etc.) will be developed each fiscal year based on these established priorities and the resulting determined approaches to solving these critical agricultural issues. Although this overall grant program seeks to solve critical agricultural issues through an integration of research, education, and extension activities, a component of a RFP, depending on the priority being addressed and/or the stage at which the priority is being addressed, may request proposals that are research, education, or extension only, or a combination thereof. However, the overall overarching approach to solving the critical agricultural issue, priority, or problem will be through an integration of research, education, and extension activities within each individual program area.

B. Purpose, Priorities, and Fund Availability

The purpose of the National Food Safety Initiative is to support projects that address selected priority issues in food safety and demonstrate an integrated approach to solving problems in food safety research, education, and extension as described in this RFP. Various models for integration of research, education, and extension will be considered for funding. Proposals describing multistate, multi-institutional, multidisciplinary, and/or multifunctional activities (and combinations thereof) are acceptable. However, special emphasis will be given to proposals describing multifunctional activities that integrate research, education, and extension (i.e. those that contain research, education, and extension components).

The component areas described below address priority issues in food safety that were identified by stakeholders during a series of public meetings held to solicit program input from various users of food safety information at the local, state, regional, and national levels. Interdepartmental food safety priorities and those supported by the Presidential Food Safety Initiative were also considered in the development of this RFP.

There is no commitment by USDA to fund any particular proposal or to make a specific number of awards. Approximately $14,277,000 will be available to fund proposals in FY 2000. Proposals are being solicited in 12 component areas: (1) Qualitative and Quantitative Risk Assessments; (2) Control Measures for Food-Borne Microbial Pathogens; (3) Sources and Incidence of Microbial Pathogens; (4) Antibiotic Resistant Microbial Pathogens; (5) Improving the Safety of Fresh Fruits and Vegetables; (6) Food Handler Education and Training for Consumer and Youth; (7) Food Handler Education for High-risk and Hard-to-reach Audiences; (8) Food Handler Education for Commercial and Non-Commercial Audiences; (9) Hazard Analysis and Critical Control Points Model Development, Testing and Implementation; and (10) Integrating Food Safety into Related Agricultural Problems. In addition, proposals are being solicited for (11) National Coordination of Integrated Food Safety Programs and Resources and a (12) National Center for Home Food Processing and Preservation.

C. Definitions

For the purpose of awarding grants under this program, the following definitions are applicable:

(1) *Administrator* means the Administrator of the Cooperative State Research, Education, and Extension Service (CSREES) and any other officer or employee of the Department to whom the authority involved my be delegated.

(2) *Authorized departmental officer* means the Secretary or any employee of the Department who has the authority to issue or modify grant instruments on behalf of the Secretary.

(3) *Authorized organizational representative* means the president or chief executive officer of the applicant organization or the official, designated by the president or chief executive officer of the applicant organization, who has the authority to commit the resources of the organization.

(4) *Budget period* means the interval of time (usually 12 months) into which the project period is divided for budgetary and reporting purposes.

(5) *Cash contributions* means the applicant's cash outlay, including the outlay of money contributed to the applicant by non-Federal third parties.

(6) *Department* or *USDA* means the United States Department of Agriculture.

(7) *Education activity* means formal classroom instruction, laboratory instruction, and practicum experience in the food and agricultural sciences and other related matters such as faculty development, student recruitment and services, curriculum development, instructional materials and equipment, and innovative teaching methodologies.

(8) *Extension activity* means an act or process that delivers science-based knowledge and informal educational programs to people, enabling them to make practical decisions.

(9) *Grant* means the award by the Secretary of funds to an eligible organization or individual to assist in meeting the costs of conducting, for the benefit of the public, an identified project which is intended and designed to accomplish the purpose of the program as identified in these guidelines.

(10) *Grantee* means an organization designated in the grant award document as the responsible legal entity to which a grant is awarded.

(11) *Integrated* means to bring the three components of the agricultural knowledge system (research, education,

and extension) together around a problem area or activity.

(12) *Matching* means that portion of allowable project costs not borne by the Federal Government, including the value of in-kind contributions.

(13) *Peer review* means an evaluation of a proposed project for scientific or technical quality and relevance performed by experts with the scientific knowledge and technical skills to conduct the proposed work or to give expert advice on the merits of a proposal.

(14) *Principal investigator/Project director* means the single individual designated by the grantee in the grant application and approved by the Secretary who is responsible for the direction and management of the project.

(15) *Prior approval* means written approval evidencing prior consent by an authorized departmental officer as defined in (2) above.

(16) *Project* means the particular activity within the scope of the program supported by a grant award.

(17) *Project period* means the period, as stated in the award document and modifications thereto, if any, during which Federal sponsorship begins and ends.

(18) *Research activity* means a scientific investigation or inquiry that results in the generation of knowledge.

(19) *Secretary* means the Secretary of Agriculture and any other officer or employee of the Department to whom the authority involved may be delegated.

(20) *Third party in-kind contributions* means non-cash contributions of property or services provided by non-Federal third parties, including real property, equipment, supplies and other expendable property, directly benefitting and specifically identifiable to a funded project or program.

(21) *Total integrated, multifunctional research, education, and extension approach* means that the combination of grants (although the individual grants may involve only research, education, or extension activities or a combination thereof) awarded under the fiscal year's program components will work together to address the priorities in United States agriculture as determined by the Secretary of Agriculture in consultation with the Advisory Board, that involve integrated research, extension, and education activities.

D. Eligibility

Proposals may be submitted by colleges and universities as defined in section 1404 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (NARETPA). The terms "college" and "university" mean an educational institution in any State which (1) admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, (2) is legally authorized within such State to provide a program of education beyond secondary education, (3) provides an educational program for which a bachelor's degree or any other higher degree is awarded, (4) is a public or other nonprofit institution, and (5) is accredited by a nationally recognized accrediting agency or association. Although an applicant may be eligible based on its status as one of these entities, there are factors which may exclude an applicant from receiving Federal financial and nonfinancial assistance and benefits under this program (*e.g.*, debarment or suspension of an individual involved or a determination that an applicant is not responsible based on submitted organizational management information). Eligible applicants may subcontract to organizations not eligible under these requirements.

Please note that a research foundation maintained by a college or university is not eligible to receive an award under this program.

E. Matching Requirements

1. General Requirement

If a grant provides a particular benefit to a specific agricultural commodity, the grant recipient is required to provide funds or in-kind support to match the amount of the grant funds provided. See section 10. c. on "Matching Funds" under Part III, B, "Content of Proposals" for more details.

2. Waiver

CSREES may waive the matching funds requirement specified in the above paragraph for a grant if CSREES determines that (a) the results of the project, while of particular benefit to a specific agricultural commodity, are likely to be applicable to agricultural commodities generally; or (b) the project involves a minor commodity, the project deals with scientifically important research, and the grant recipient is unable to satisfy the matching funds requirement.

F. Funding Restrictions

CSREES has determined that grant funds awarded under this authority may not be used for the renovation or refurbishment of research, education, or extension space; the purchase or installation of fixed equipment in such space; or the planning, repair, rehabilitation, acquisition, or construction of buildings or facilities.

G. Types of Grant Instruments

In FY 2000 all projects will be awarded using a "New Grant" instrument. In future years, projects under the Integrated Research, Education, and Extension Competitive Grants Program authority can be awarded using one of the grant instruments described below:

(1) New grant. This is a grant instrument by which the Department agrees to support a specified level of effort for a project that generally has not been supported previously under this program. This type of grant is approved on the basis of peer review recommendations.

(2) Renewal grant. This is a grant instrument by which the Department agrees to provide additional funding for a project period beyond that approved in an original or amended award, provided that the cumulative period does not exceed the statutory limitation. When a renewal application is submitted, it should include a summary of progress to date from the previous granting period. A renewal grant shall be based upon new application, *de novo* peer review and staff evaluation, new recommendation and approval, and a new award instrument.

(3) Supplemental grant. This is an instrument by which the department agrees to provide small amounts of additional funding under a new or renewal grant as specified above and may involve a short-term (usually six months or less) extension of the project period beyond that approved in an original or amended award, but in no case may the cumulative period for the project exceed the statutory limitation. A supplement is awarded only if required to assure adequate completion of the original scope of work and if there is sufficient justification to warrant such action. A request of this nature normally will not require additional peer review.

H. Funding Mechanisms

The two mechanisms by which new, renewal, and supplemental grants shall be awarded are as follows:

(1) Standard grant. This is a funding mechanism whereby the Department agrees to support a specified level of effort for a predetermined time period without the announced intention of providing additional support at a future date.

(2) Continuation grant. This is a funding mechanism whereby the Department agrees to support a

specified level of effort for a predetermined period of time with a statement of intention to provide additional support at a future date, provided that performance has been satisfactory, appropriations are available for this purpose, and continued support will be in the best interests of the Federal government and the public. This kind of mechanism normally will be awarded for an initial one-year period, and any subsequent continuation project grants will be awarded in one-year increments. The award of a continuation project grant to fund an initial or succeeding budget period does not constitute an obligation to fund any subsequent budget period. Unless prescribed otherwise by CSREES, a grantee must submit a separate application for continued support for each subsequent fiscal year. Requests for such continued support must be submitted in duplicate at least three months prior to the expiration date of the budget period currently being funded. Decisions regarding continued support and the actual funding levels of such support in future years usually will be made administratively after consideration of such factors as the grantee's progress and management practices and the availability of funds. Since initial peer reviews are based upon the full term and scope of the original application, additional evaluations of this type generally are not required prior to successive years' support. However, in unusual cases (*e.g.*, when the nature of the project or key personnel change or when the amount of future support requested substantially exceeds the grant application originally reviewed and approved), additional reviews may be required prior to approving continued funding.

Part II—Program Description

A. Project Types

For Program Areas 1 through 10, the maximum total award is $600,000, and for a project period up to three years. For Program Areas 11 and 12, the maximum total award is $600,000 per year and for a project period up to four years.

Proposals that focus on one functional area (*i.e.*, research only, education only, or extension only) are acceptable. However, applicants should explain how the separate functional area will meet the overall goal of a total integrated, multifunctional research, education, and extension approach.

Applications received in any of the aforementioned program areas should include budgets commensurate with the activities proposed. Grants awarded under Program Description Areas 1 through 10 of this RFP will be issued as "New Grant" instruments and will be awarded as "Standard Grants." Grants awarded under Program Description Areas 11 and 12 of this RFP will be issued as "New Grant" instruments and may be awarded as "Continuation Grants."

B. Program Area Description

Integrated research, education, and/or extension proposals that address the following selected priority issues are requested:

For Program Areas 1 through 10:

(Maximum award: $600,000 and up to three years).

(1) Qualitative and Quantitative Risk Assessments (Program Area 111.1)

This category will support the development and testing of comprehensive, qualitative and/or quantitative science-based risk assessments for microbial food-borne pathogens (*e.g.*, Listeria monocytogenes, Campylobacter jejuni, Cyclospora, Salmonella, *etc.*) and/or their toxins associated with ready-to-eat foods, including those foods that are fresh, minimally processed or processed.

(2) Control Measures for Food-borne Microbial Pathogens (Program Area 111.2)

This category will support the establishment of the scientific bases for, and the development of, models for identifying and validating critical control points, critical limits, and process capability related to control measures for significant food-borne microbial pathogens and/or their toxins in production, processing and distribution of foods.

(3) Sources and Incidence of Microbial Pathogens (Program Area 111.3)

This category will support identification of the sources and incidence of microbial pathogens of animal and human origin that impact on food safety and the development and implementation of strategies for their prevention and control.

(4) Antibiotic Resistant Microbial Pathogens (Program Area 111.4)

This category will support: (a) The identification of factors that lead to the development of antibiotic resistant microbial pathogens related to food safety; (b) the identification and application of measures to prevent antibiotic resistence; and (c) the development and application of alternative approaches to the use of antibiotics.

(5) Improving the Safety of Fresh Fruits and Vegetables (Program Area 111.5)

This category will support the development of projects that focus on improving the safety of fresh and minimally processed imported and domestic fruits and vegetables, which includes: (a) The development of safe and efficacious techniques to enhance or ensure microbiological safety; (b) approaches that relate to post-production, harvesting, handling, transportation, and distribution control measures to the prevention of microbial pathogen infection or cross-contamination; or (c) development of procedures for sampling to accurately detect the presence of microbial pathogens and/or their toxins.

(6) Food Handler Education and Training for Consumers and Youth (Program Area 111.6)

This category will support the development of education and training programs that promote and enhance general food safety and food handler education for youths, adults, and older Americans preparing food in the home. Special emphasis will be given to education efforts that support activities of the *Presidential Food Safety Initiative and the Fight BAC* campaign of the government and industry-wide *Partnership for Food Safety Education.* Information about the Presidential Initiative, Fight BAC, and the Partnership for Food Safety Education can be found at the following website: http://www.foodsafety.gov.

(7) Food Handler Education for High-risk and Hard-to-reach Audiences (Program Area 111.7)

This category will support the development of consumer education and training programs for high-risk or under-served groups (*i.e.* pregnant or nursing mothers, infants, children, the chronically ill, those with limited resources, those with low literacy skills, or those who speak English as a second language). Projects that target families receiving Federal food assistance are encouraged.

(8) Food Handler Education for Commercial and Non-commercial Audiences, Including Food Handler Certification Training and Other Train-the-trainer Programs (Program Area 111.8)

This category will support the development, implementation, and evaluation of *train-the-trainer* programs for food handlers in commercial and

non-commercial settings (e.g., institutional food service, retail establishments, hospitals, health care facilities, day care facilities, congregate meal sites, gleaning and food recovery programs, food banks, soup kitchens, churches, service clubs, etc.). Special emphasis will be given to the development and implementation of food handler certification programs.

(9) Hazard Analysis and Critical Control Points (HACCP) Model Development, Testing, and Implementation (Program Area 111.9)

This category will support the development of projects that focus on the development of HACCP models for education and training in four targeted areas: (a) Minimizing microbial food safety hazards for fresh fruits and vegetables through the development of training and education programs for domestic and international growers and producers; (b) HACCP plan development and implementation in small and very small meat and poultry plants and other small food processing plants; (c) HACCP plan development and implementation in retail establishments, including distribution and transportation sectors of the food industry; (d) HACCP *train-the-trainer* programs using currently available models, curricula, and materials. HACCP model development must include pilot-testing, model implementation and evaluation. Regional, multi-state, or national workshops focused on training potential users of the HACCP models will be supported and are encouraged.

(10) Integrating Food Safety into Related Agricultural Programs (Program Area 111.10)

This category will support the development of projects that incorporate food safety concepts and food safety education into other topical areas in agriculture including, but not limited to, those focusing on: (a) Water quality; (b) animal waste management; (c) integrated pest management; (d) small farms; and (e) sustainable agriculture. For example, projects in this category might focus on developing educational programs that teach growers and producers how to reduce the risk of food-borne illness by minimizing microbial and pesticide contamination through integrated pest management, the control of pesticide application, water quality, and animal waste management. Priority consideration will be given to proposals that describe multi-disciplinary efforts that include those with expertise in food safety and nutrition.

In addition CSREES is soliciting proposals in the following areas:

For Program Areas 11 and 12: *(Maximum award: $600,000/per year and up to four years)*

(11) National Coordination of Integrated Food Safety Programs and Resources (Program Area 111.11)

This category will support the development of integrated food safety resources that facilitate national and international networking and coordination among the various users of food safety information, from production to consumption (i.e. farmers, producers, growers, packers, shippers, retailers, food service workers, processors, inspectors, veterinarians, sanitarians, educators, researchers, consumers, etc.). Special emphasis will be given to the development of databases and interactive software that support decision-making and problem-solving among food safety researchers, educators, consumers, and others. Proposals to support national or regional conferences, multi-user distance education programs, satellite videoteleconferences, and other communication transfer technologies will be supported.

(12) Home Food Processing and Preservation (Program Area 111.12)

This category will support the development of a *National Center for Home Food Processing and Preservation*. Activities conducted by the *Center* should include: (a) Reviewing recent research conducted in the public and private sectors on home food processing and preservation techniques, and formulating recommendations for new recipes and guidelines based on the reviews; (b) updating current guidelines on home food processing and preservation; (c) developing and testing new recipes and guidelines on home food processing and preservation methods for specialty foods, ethnic foods, and new varieties of fruits and vegetables; (d) establishing distribution mechanisms for disseminating new guidelines for home food processing and preservation; and (e) identifying areas where further research in home food processing and preservation techniques are needed.

C. Expected Program Outputs and Reporting Requirements

The grantee must prepare an annual report that details all significant activities towards achieving the goals and objectives of the project. The narrative should be succinct and be no longer than five pages, using 12-point, single-spaced type. The report also should include a listing of any students who worked on the project (report graduate degrees awarded and undergraduates trained, as applicable). A budget summary should be attached to this report, which will provide an overview of all monies spent during the reporting period.

Part III—Preparation of a Proposal

A. Program Application Materials

Program application materials are available at the Integrated Research, Education, and Extension Competitive Grants Program website (http://www.reeusda.gov/integrated/). If you do not have access to our web page or have trouble downloading material, you may contact the Proposal Services Unit, Office of Extramural Programs, USDA/CSREES at (202) 401–5048. When calling the Proposal Services Unit, please indicate that you are requesting forms for the Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative. These materials may also be requested via Internet by sending a message with your name, mailing address (not e-mail) and phone number to psb@reeusda.gov. State that you want a copy of the Program Description and application materials (orange book) for the Fiscal Year 2000 Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative.

B. Content of Proposals

1. General

The proposal should follow these guidelines, enabling reviewers to more easily evaluate the merits of each proposal in a systematic, consistent fashion:

(a) The proposal should be prepared on only one side of the page using standard size (8 ½″ x 11″) white paper, one inch margins, typed or word processed using no type smaller than 12 point font, and single or double spaced. Use an easily readable font face (*e.g.*, Geneva, Helvetica, Times Roman).

(b) Each page of the proposal, including the Project Summary, budget pages, required forms, and any appendices, should be numbered sequentially.

(c) The proposal should be stapled in the upper left-hand corner. Do not bind. An original and 14 copies (15 total) must be submitted in one package, along with 10 copies of the "Project Summary" as a separate attachment.

(d) If applicable, proposals should include original illustrations (photographs, color prints, etc.) in all copies of the proposal to prevent loss of

meaning through poor quality reproduction.

2. Cover Page (Form CSREES–661)

Each copy of each grant proposal must contain an "Application for Funding", Form CSREES–661. One copy of the application, preferably the original, must contain the pen-and-ink signature(s) of the proposing principal investigator(s)/project director(s)(PI/PD) and the authorized organizational representative who possesses the necessary authority to commit the organization's time and other relevant resources to the project. Any proposed PI/PD or co-PI/PD whose signature does not appear on Form CSREES–661 will not be listed on any resulting grant award. Complete both signature blocks located at the bottom of the "Application for Funding" form.

Form CSREES–661 serves as a source document for the CSREES grant database; it is therefore important that it be completed accurately. The following items are highlighted as having a high potential for errors or misinterpretations:

(a) Title of Project (Block 6). The title of the project must be brief (80-character maximum), yet represent the major thrust of the effort being proposed. Project titles are read by a variety of nonscientific people; therefore, highly technical words or phraseology should be avoided where possible. In addition, introductory phrases such as "investigation of" or "research on" "education for" or "outreach that" should not be used.

(b) Program to Which You Are Applying (Block 7). "Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative."

(c) Program Area and Number (Block 8). The name of the program component, *e.g.* Qualitative and Quantitative Risk Assessments, 111.1 or Control Measures for Food-borne Microbial Pathogens, 111.2 should be inserted in this block.

(d) Type of Award Request (Block 13). Check the block for "new."

(e) Principal Investigator(s)/Project Director(s) (PI/PD) (Block 15). The designation of excessive numbers of co-PI/PD's creates problems during final review and award processing. Listing multiple co-PI/PD's, beyond those required for genuine collaboration, is therefore discouraged. Note that providing a Social Security Number is voluntary, but is an integral part of the CSREES information system and will assist in the processing of the proposal.

(f) Type of Performing Organization (Block 18). A check should be placed in the box beside the type of organization which actually will carry out the effort. For example, if the proposal is being submitted by an 1862 Land-Grant Institution but the work will be performed in a department, laboratory, or other organizational unit of an agricultural experiment station, box "03" should be checked. If portions of the effort are to be performed in several departments, check the box that applies to the individual listed as PI/PD #1 in Block 15.a.

(g) Other Possible Sponsors (Block 22). List the names or acronyms of all other public or private sponsors including other agencies within USDA and other programs funded by CSREES to whom your application has been or might be sent. In the event you decide to send your application to another organization or agency at a later date, you must inform the identified CSREES Program Director as soon as practicable. Submitting your proposal to other potential sponsors will not prejudice its review by CSREES; however, duplicate support for the same project will not be provided. Complete the "Application for Funding," Form CSREES–661, in its entirety.

(h) One copy of the "Application for Funding" form must contain the signatures (in ink) of the PI/PD's and authorized organizational representative for the applicant organization.

3. Table of Contents

For consistency and ease in locating information, each proposal must contain a detailed Table of Contents just after the cover page. The Table of Contents should contain page numbers for each component of the proposal. Page numbers should begin with the first page of the Project Description.

4. Project Summary

The proposal must contain a Project Summary of 250 words or less on a separate page which should be placed immediately after the Table of Contents and should not be numbered. The names and institutions of all PI/PD's and co-PI/PD's should be listed on this form, in addition to the title of the project. The summary should be a self-contained, specific description of the activity to be undertaken and should focus on: overall project goal(s) and supporting objectives; plans to accomplish project goal(s); and relevance of the project to the goals of the National Food Safety Initiative. The importance of a concise, informative Project Summary cannot be overemphasized.

5. Project Description

The Project Description may not exceed a total of 18 pages including figures and tables.

(a) *Justification:* This section should include in-depth information on the following, when applicable:

(i) a statement must be given at the beginning of the justification that clearly identifies the area(s) in Part II B that is (are) addressed in the proposal;

(ii) estimates of the magnitude of the food safety problem and its relevance to ongoing National food and agricultural research programs; and

(iii) reasons for having the work performed by the proposing institution.

(b) *Objectives:* Clear, concise, complete, and logically arranged statement(s) of specific aims of the proposed effort must be included in all proposals.

(c) *Methodology:* The procedures or methodology to be applied to the proposed effort should be explicitly stated. This section should include but not necessarily be limited to:

(i) a description of the proposed activities and the sequence in which they will be carried out;

(ii) procedures, techniques, methodologies, or approaches to be employed, including their feasibility;

(iii) kinds of results or expected outcomes;

(iv) evaluation methods or means by which data/information will be analyzed or interpreted;

(v) problems that might be encountered; and

(vi) limitations to proposed procedures, techniques, methodologies, or approaches.

(d) *Literature Review:* A summary of pertinent publications with emphasis of their relationship to the effort being proposed should be provided and should include all important and recent publications from other institutions, as well as those from the applicant institution. The citations themselves should be accurate, complete, and written in an acceptable journal format.

(e) *Current Work:* Current unpublished institutional activities "to date" in the program area under which the proposal is being submitted should be described.

(f) *Cooperation and Institutional Units Involved:* Cooperative, multi-institutional and multidisciplinary applications are encouraged. Identify each institutional unit contributing to the project and designate the lead institution or institutional unit. When appropriate, the project should be coordinated with the efforts of other State and/or national programs. Clearly

define the roles and responsibilities of each institutional unit of the project team, if applicable.

(g) *Equipment and Facilities:* All facilities which are available for use or assignment to the project during the requested period of support should be reported and described briefly. Any potentially hazardous materials, procedures, situations, or activities, whether or not directly related to a particular phase of the effort, must be explained fully, along with an outline of the precautions to be exercised. Examples include work with toxic chemicals and experiments that may put human subjects or animals at risk. All items of major instrumentation available for use or assignment to the proposed project should be itemized. In addition, items of non-expendable equipment needed to conduct and bring the project to a successful conclusion should be listed, including dollar amounts and, if funds are requested for their acquisition, justified.

(h) *Project Timetable:* The proposal should outline all important phases as a function of time, year by year, for the entire project, including periods beyond the grant funding period.

An applicant for the National Center for Home Food Processing and Preservation should include a management plan to ensure efficient administration of the grant and how activities will be integrated across collaborators.

6. Appendices to Project Description

Appendices to the Project Description are allowed if they are directly germane to the proposed project and are limited to a total of two of the following: Reprints (papers that have been published in peer reviewed journals) and preprints (manuscripts in press for a peer reviewed journal; these must be accompanied by a letter of acceptance from the publishing journal).

7. Key Personnel

All senior personnel who are expected to be involved in the effort must be clearly identified. For each person, the following should be included:

a. The roles and responsibilities of each PI/PD and/or collaborator should be clearly described;

b. An estimate of the time commitment involved for each PI/PD and/or collaborator; and

c. Vitae of each PI/PD, senior associate, and other professional personnel. This section should include vitae of all key persons who are expected to work on the project, whether or not CSREES funds are sought for their support. The vitae should be limited to two (2) pages each in length, excluding publications listings. A chronological list of all publications in refereed journals during the past four (4) years, including those in press, must be provided for each project member for which a curriculum vitae is provided. Also list only those non-refereed technical publications that have relevance to the proposed project. All authors should be listed in the same order as they appear on each paper cited, along with the title and complete reference as these usually appear in journals.

8. Conflict-of-Interest List

A Conflict-of-Interest List must be provided for all individuals involved in the project (identified as key personnel). Each list should be on a separate page and include alphabetically the full names of the individuals in the following categories: (a) All collaborators on projects within the past four years, including current and planned collaborations; (b) all co-authors on publications within the past four years, including pending publications and submissions; (c) all persons in your field with whom you have had a consulting or financial arrangement within the past four years, who stand to gain by seeing the project funded; and (d) all thesis or postdoctoral advisees/advisors within the past four years (some may wish to call these life-time conflicts). This form is necessary to assist program staff in excluding from proposal review those individuals who have conflicts-of-interest with the personnel in the grant proposal. The Program Director must be informed of any additional conflicts-of-interest that arise after the proposal is submitted.

9. Collaborative and/or Subcontractual Arrangements

If it will be necessary to enter into formal consulting or collaborative arrangements with others, such arrangements should be fully explained and justified. In addition, evidence should be provided that the collaborators involved have agreed to render these services. If the need for consultant services is anticipated, the proposal narrative should provide a justification for the use of such services, a statement of work to be performed, and a resume or curriculum vita for each consultant. For purposes of proposal development, informal day-to-day contacts between key project personnel and outside experts are not considered to be collaborative arrangements and thus do not need to be detailed.

All anticipated subcontractual arrangements also should be explained and justified in this section. A proposed statement of work and a budget for each arrangement involving the transfer of substantive programmatic work or the providing of financial assistance to a third party must be provided. Agreements between departments or other units of your own institution and minor arrangements with entities outside of your institution (*e.g.*, requests for outside laboratory analyses) are excluded from this requirement.

If you expect to enter into subcontractual arrangements, please note that the provisions contained in 7 CFR Part 3019, USDA Uniform Administrative Requirements for Grant and Other Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations, and the general provisions contained in 7 CFR Part 3015.205, USDA Uniform Federal Assistance Regulations, flow down to subrecipients. In addition, required clauses from Sections 40–48 ("Procurement Standards") and Appendix A ("Contract Provisions") to 7 CFR Part 3019 should be included in final contractual documents, and it is necessary for the subawardee to make a certification relating to debarment/suspension.

10. Budget (Form CSREES–55)

a. Budget Form. Prepare the budget, Form CSREES–55, in accordance with instructions provided. A budget form is required for each year of requested support. In addition, a cumulative budget is required detailing the requested total support for the overall project period. The budget form may be reproduced as needed by applicants. Funds may be requested under any of the categories listed on the form, provided that the item or service for which support is requested is allowable under the authorizing legislation, the applicable Federal cost principles, and these program guidelines, and can be justified as necessary for the successful conduct of the proposed project. Applicants must also include a Budget Narrative to justify their budgets (see section b below.)

The following guidelines should be used in developing your proposal budget(s):

1. Salaries and Wages. Salaries and wages are allowable charges and may be requested for personnel who will be working on the project in proportion to the time such personnel will devote to the project. If salary funds are requested, the number of Senior and Other

Personnel and the number of CSREES–Funded Work Months must be shown in the spaces provided. Grant funds may not be used to augment the total salary or rate of salary of project personnel or to reimburse them for time in addition to a regular full-time salary covering the same general period of employment. Salary funds requested must be consistent with the normal policies of the institution.

2. Fringe Benefits. Funds may be requested for fringe benefit costs if the usual accounting practices of your organization provide that organizational contributions to employee benefits (social security, retirement, etc.) be treated as direct costs. Fringe benefit costs may be included only for those personnel whose salaries are charged as a direct cost to the project.

3. Nonexpendable Equipment. Nonexpendable equipment means tangible nonexpendable personal property including exempt property charged directly to the award having a useful life of more than one year and an acquisition cost of $5,000 (or lower depending on institutional policy) or more per unit. As such, items of necessary instrumentation or other nonexpendable equipment should be listed individually by description and estimated cost in the Budget Narrative. This applies to revised budgets as well, as the equipment item(s) and amount(s) may change.

4. Materials and Supplies. The types of expendable materials and supplies which are required to carry out the project should be indicated in general terms with estimated costs in the Budget Narrative.

5. Travel. The type and extent of travel and its relationship to project objectives should be described briefly and justified. If foreign travel is proposed, the country to be visited, the specific purpose of the travel, a brief itinerary, inclusive dates of travel, and estimated cost must be provided for each trip. Airfare allowances normally will not exceed round-trip jet economy air accommodations. U.S. flag carriers must be used when available. See 7 CFR Part 3015.205(b)(4) for further guidance.

6. Publication Costs/Page Charges. Include anticipated costs associated with publications in a journal (preparing and publishing results including page charges, necessary illustrations, and the cost of a reasonable number of coverless reprints) and audio-visual materials that will be produced. Photocopying and printing brochure, etc., should be shown in Section I., "All Other Direct Costs" of Form CSREES–55.

7. Computer (ADPE) Costs. Reimbursement for the costs of using specialized facilities (such as a university- or department-controlled computer mainframe or data processing center) may be requested if such services are required for completion of the work.

8. All Other Direct Costs. Anticipated direct project charges not included in other budget categories must be itemized with estimated costs and justified in the Budget Narrative. This also applies to revised budgets, as the item(s) and dollar amount(s) may change. Examples may include space rental at remote locations, subcontractual costs, and charges for consulting services, telephone, facsimile, shipping costs, and fees necessary for laboratory analyses. You are encouraged to consult the "Instructions for Completing Form CSREES–55, Budget," of the Application Kit for detailed guidance relating to this budget category. Form AD–1048 must be completed by each subcontractor or consultant and retained by the grantee.

9. Indirect Costs. Section 1462 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3310) limits indirect costs for this program to 19 percent of total Federal funds provided under each award. Therefore the recovery of indirect costs under this program may not exceed the lesser of the institution's official negotiated indirect cost rate or the equivalent of 19 percent of total Federal funds awarded. If no rate has been negotiated, a reasonable dollar amount (equivalent to less than 19 percent of total Federal funds requested) in lieu of indirect costs may be requested, subject to approval by USDA.

b. *Budget Narrative.* All budget categories, with the exception of Indirect Costs for which support is requested, must be individually listed (with costs) and justified on a separate sheet of paper and placed immediately behind the Budget Form. Explanations of matching funds or lack thereof on commodity-specific projects also are to be included in this section.

c. Matching Funds. If an applicant concludes that matching funds are not required as specified under Part I (e), a justification should be included in the Budget Narrative. CSREES will consider this justification when ascertaining final matching requirements or in determining if required matching can be waived. CSREES retains the right to make final determinations regarding matching requirements.

For those grants requiring matching funds as specified under Part I (e), proposals should include written verification of commitments of matching support (including both cash and in-kind contributions) from third parties. Written verification means:

(a) For any third party cash contributions, a separate pledge agreement for each donation, signed by the authorized organizational representatives of the donor organization and the applicant organization, which must include: (1) The name, address, and telephone number of the donor; (2) the name of the applicant organization; (3) the title of the project for which the donation is made; (4) the dollar amount of the cash donation; and (5) a statement that the donor will pay the cash contribution during the grant period; and

(b) For any third party in-kind contributions, a separate pledge agreement for each contribution, signed by the authorized organizational representatives of the donor organization and the applicant organization, which must include: (1) The name, address, and telephone number of the donor; (2) the name of the applicant organization; (3) the title of the project for which the donation is made; (4) a good faith estimate of the current fair market value of the third party in-kind contribution; and (5) a statement that the donor will make the contribution during the grant period.

The sources and amount of all matching support from outside the applicant institution should be summarized on a separate page and placed in the proposal immediately following the Budget Narrative. All pledge agreements must be placed in the proposal immediately following the summary of matching support.

The value of applicant contributions to the project shall be established in accordance with applicable cost principles. Applicants should refer to OMB Circular A–21, Cost Principles for Educational Institutions, for further guidance and other requirements relating to matching and allowable costs.

11. Current and Pending Support (Form CSREES–663)

All proposals must contain Form CSREES–663 listing other current public or private support (including in-house support) to which key personnel identified in the proposal have committed portions of their time, whether or not salary support for person(s) involved is included in the budget. Analogous information must be provided for any pending proposals that are being considered by, or that will be submitted in the near future to, other

possible sponsors, including other USDA Programs or agencies. Concurrent submission of identical or similar proposals to the possible sponsors will not prejudice proposal review or evaluation by the CSREES for this purpose. However, a proposal that duplicates or overlaps substantially with a proposal already reviewed and funded (or to be funded) by another organization or agency will not be funded under this program. Note that the project being proposed should be included in the pending section of the form.

12. Assurance Statement(s), (Form CSREES–662)

A number of situations encountered in the conduct of projects require special assurances, supporting documentation, etc., before funding can be approved for the project. In addition to any other situation that may exist with regard to a particular project, it is expected that some applications submitted in response to these guidelines will involve the following:

a. Recombinant DNA or RNA Research. As stated in 7 CFR Part 3015.205 (b)(3), all key personnel identified in the proposal and all endorsing officials of the proposing organization are required to comply with the guidelines established by the National Institutes of Health entitled, "Guidelines for Research Involving Recombinant DNA Molecules," as revised. If your project proposes to use recombinant DNA or RNA techniques, you must so indicate by checking the "yes" box in Block 19 of Form CSREES–661 (the Cover Page) and by completing Section A of Form CSREES–662. For applicable proposals recommended for funding, Institutional Biosafety Committee approval is required before CSREES funds will be released.

b. Animal Care. Responsibility for the humane care and treatment of live vertebrate animals used in any grant project supported with funds provided by CSREES rests with the performing organization. Where a project involves the use of living vertebrate animals for experimental purposes, all key project personnel identified in a proposal and all endorsing officials of the proposing organization are required to comply with the applicable provisions of the Animal Welfare Act of 1966, as amended (7 U.S.C. 2131 *et seq.*) and the regulations promulgated thereunder by the Secretary in 9 CFR Parts 1, 2, 3, and 4 pertaining to the care, handling, and treatment of these animals. If your project will involve these animals, you should check "yes" in block 20 of Form CSREES–661 and complete Section B of Form CSREES–662. In the event a project involving the use of live vertebrate animals results in a grant award, funds will be released only after the Institutional Animal Care and Use Committee has approved the project.

c. Protection of Human Subjects. Responsibility for safeguarding the rights and welfare of human subjects used in any grant project supported with funds provided by CSREES rests with the performing organization. Guidance on this issue is contained in the National Research Act, Pub. L. No. 93–348, as amended, and implementing regulations promulgated by the Department under 7 CFR Part 1c. If you propose to use human subjects for experimental purposes in your project, you should check the "yes" box in Block 21 of Form CSREES–661 and complete Section C of Form CSREES–662. In the event a project involving human subjects results in a grant award, funds will be released only after the appropriate Institutional Review Board has approved the project.

13. Certifications

Note that by signing Form CSREES–661 the applicant is providing the certifications required by 7 CFR Part 3017, as amended, regarding Debarment and Suspension and Drug Free Workplace, and 7 CFR Part 3018, regarding Lobbying. The certification forms are included in the application package for informational purposes only. These forms should not be submitted with the proposal since by signing form CSREES–661 your organization is providing the required certifications. If the project will involve a subcontractor or consultant, the subcontractor/consultant should submit a form AD–1048 to the grantee organization for retention in their records. This form should not be submitted to USDA.

14. Compliance with the National Environmental Policy Act (NEPA) (Form CSREES–1234)

As outlined in 7 CFR Part 3407 (the Cooperative State Research, Education, and Extension Service regulations implementing NEPA), the environmental data for any proposed project is to be provided to CSREES so that CSREES may determine whether any further action is needed. In some cases, however, the preparation of environmental data may not be required. Certain categories of actions are excluded from the requirements of NEPA.

In order for CSREES to determine whether any further action is needed with respect to NEPA, pertinent information regarding the possible environmental impacts of a particular project is necessary; therefore, Form CSREES–1234, "NEPA Exclusions Form," must be included in the proposal indicating whether the applicant is of the opinion that the project falls within a categorical exclusion and the reasons therefore. If it is the applicant's opinion that the proposed project falls within the categorical exclusions, the specific exclusion must be identified. Form CSREES–1234 and supporting documentation should be included as the last page of this proposal.

Even though a project may fall within the categorical exclusions, CSREES may determine that an Environmental Assessment or an Environmental Impact Statement is necessary for an activity, if substantial controversy on environmental grounds exists or if other extraordinary conditions or circumstances are present which may cause such activity to have a significant environmental effect.

C. Submission of Proposals

1. When To Submit (Deadline Date)

Proposals must be transmitted by June 6, 2000, as indicated by postmark or date of courier bill of lading. Proposals transmitted after this date will not be considered for funding.

2. What To Submit

An original and 14 copies must be submitted. In addition submit 10 copies of the proposal's Project Summary. All copies of the proposals and the Project Summaries must be submitted in one package.

3. Where To Submit

Applicants are strongly encouraged to submit completed proposals via overnight mail or delivery service to ensure timely receipt by the USDA. The address for hand-delivered proposals or proposals submitted using an express mail or overnight courier service is: Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; Room 303, Aerospace Center; 901 D Street, S.W.; Washington, D.C. 20024.

Proposals sent via the U.S. Postal Service must be sent to the following address: Integrated Research, Education, and Extension Competitive Grants Program—National Food Safety Initiative; c/o Proposal Services Unit; Cooperative State Research, Education,

and Extension Service; U.S. Department of Agriculture; STOP 2245; 1400 Independence Avenue, S.W.; Washington, D.C. 20250–2245.

D. Acknowledgment of Proposals

The receipt of all proposals will be acknowledged by e-mail. Therefore, applicants are encouraged to provide e-mail addresses, where designated, on the Form CSREES–661. If the applicant's e-mail address is not indicated, CSREES will acknowledge receipt of the proposal by letter.

Once the proposal has been assigned an identification number, please cite that number on all future correspondence. If the applicant does not receive an acknowledgment within 60 days of the submission deadline, please contact the Program Director.

Part IV—Review Process

A. General

Each proposal will be evaluated in a 2-part process. First, each proposal will be screened to ensure that it meets the administrative requirements as set forth in this request for proposals. Second, proposals that meet these requirements will be technically evaluated by a peer review panel.

Peer review panel members will be selected based upon their training and experience in relevant scientific, education or extension fields taking into account the following factors: (a) The level of formal scientific, technical education, and extension experience of the individual, as well as the extent to which an individual is engaged in relevant research, education and/or extension activities; (b) the need to include as peer reviewers experts from various areas of specialization within relevant scientific, education, and extension fields; (c) the need to include as reviewers other experts (producers, range or forest managers/operators, consumers, etc.) who can assess relevance of the proposals to targeted audiences and to program needs; (d) the need to include as peer reviewers experts from a variety of organizational types (*e.g.*, colleges, universities, industry, state and Federal agencies, private profit and non-profit organizations), and geographic locations; (e) the need to maintain a balanced composition of peer review groups with regard to minority and female representation and an equitable age distribution; and (f) the need to include members that can judge the effective usefulness to producers and the general public of each proposal.

B. Evaluation Factors

The evaluation factors below will be used in reviewing applications submitted in response to this request for proposals:

(1) Overall merit of the proposal.

(a) The project goal, approach, or hypothesis is conceptually adequate and related to selected priority issues identified in the request for proposals;

(b) Objectives are clearly described and related to selected priority issues identified in the request for proposals;

(c) There is a demonstrated need for the project;

(d) The target audience(s) is identified (where appropriate);

(e) The proposed technique, procedure, or methodology is clearly described;

(f) The technique, procedure, or methodology is suitable and feasible for the proposed project;

(g) The evaluation procedures, or means by which data will be analyzed and interpreted, are clearly described and are suitable for the proposed project;

(h) The expected results or outcomes are clearly stated; and (i) The probability of success of the project is indicated.

(2) Qualifications of the proposed project personnel, adequacy of the facilities, and budget request.

(a) The roles of all project personnel are clearly defined;

(b) There is evidence that project personnel have sufficient expertise needed to complete the project;

(c) There is evidence of partnerships with other disciplines and institutions;

(d) There is sufficient time allocated for systematic attainment of objectives;

(e) There is evidence of institutional experience and competence in the identified area of work;

(f) There is adequate support personnel, facilities, and instrumentation;

(g) All necessary budget information is provided and all figures are tallied correctly;

(h) The budget narrative provides adequate justification for all budget categories; and

(i) The proposed budget is appropriate for the scope of the project.

(3) The relevance of the proposed project to current issues in food safety and related topical areas.

(a) The relevance to current issues in food safety is described; and

(b) The project makes a unique and original contribution to food safety.

Proposals submitted for the National Center for Home Food Processing and Preservation also will be judged on the quality of the management plan that is proposed.

Priority will be given for integrated, multifunctional research, education, and extension projects.

C. Conflicts-of-Interest and Confidentiality

During the peer evaluation process, extreme care will be taken to prevent any actual or perceived conflicts-of-interest that may impact review or evaluation. For the purpose of determining conflicts-of-interest, the academic and administrative autonomy of an institution shall be determined by reference to the January 1998 issue of the Codebook for Compatible Statistical Reporting of Federal Support to Universities, Colleges, and Nonprofit Institutions, prepared by Quantum Research Corporation for the National Science Foundation.

Names of submitting institutions and individuals, as well as proposal content and peer evaluations, will be kept confidential, except to those involved in the review process, to the extent permitted by law. In addition, the identities of peer reviewers will remain confidential throughout the entire review process. Therefore, the names of the reviewers will not be released to applicants. At the end of the fiscal year, names of panelists will be made available in such a way that the panelists cannot be identified with the review of any particular proposal.

Part V—Additional Information

A. Access To Review Information

Copies of summary reviews, not including the identity of reviewers, will be sent to the applicant PI/PD after the review process has been completed.

B. Grant Awards

(1) General

Within the limit of funds available for such purpose, the awarding official of CSREES shall make grants to those responsible, eligible applicants whose proposals are judged most meritorious under the procedures set forth in this RFP. The date specified by the awarding official of CSREES as the effective date of the grant shall be no later than September 30 of the Federal fiscal year in which the project is approved for support and funds are appropriated for such purpose, unless otherwise permitted by law. It should be noted that the project need not be initiated on the grant effective date, but as soon thereafter as practical so that project goals may be attained within the funded project period. All funds granted by CSREES under this RFP shall be

expended solely for the purpose for which the funds are granted in accordance with the approved application and budget, the regulations, the terms and conditions of the award, the applicable Federal cost principles, and the Department's assistance regulations (parts 3015 and 3019 of 7 CFR).

(2) Organizational Management Information

Specific management information relating to an applicant shall be submitted on a one-time basis as part of the responsibility determination prior to the award of a grant identified under this RFP, if such information has not been provided previously under this or another CSREES program. CSREES will provide copies of forms recommended for use in fulfilling these requirements as part of the preaward process.

(3) Grant Award Document and Notice of Grant Award

The grant award document shall include at a minimum the following:

(a) Legal name and address of performing organization or institution to whom the Administrator has awarded a grant under the terms of this request for proposals;

(b) Title of project;

(c) Name(s) and address(es) of PI/PD's chosen to direct and control approved activities;

(d) Identifying grant number assigned by the Department;

(e) Project period, specifying the amount of time the Department intends to support the project without requiring recompetition for funds;

(f) Total amount of Departmental financial assistance approved by the Administrator during the project period;

(g) Legal authority(ies) under which the grant is awarded;

(h) Approved budget plan for categorizing allocable project funds to accomplish the stated purpose of the grant award; and

(i) Other information or provisions deemed necessary by CSREES to carry out its respective granting activities or to accomplish the purpose of a particular grant.

The notice of grant award, in the form of a letter, will be prepared and will provide pertinent instructions or information to the grantee that is not included in the grant award document.

C. Use of Funds; Changes

(1) Delegation of Fiscal Responsibility

Unless the terms and conditions of the grant state otherwise, the grantee may not in whole or in part delegate or transfer to another person, institution, or organization the responsibility for use or expenditure of grant funds.

(2) Changes in Project Plans

(a) The permissible changes by the grantee, PI/PD(s), or other key project personnel in the approved project grant shall be limited to changes in methodology, techniques, or other aspects of the project to expedite achievement of the project's approved goals. If the grantee and/or the PI/PD(s) are uncertain as to whether a change complies with this provision, the question must be referred to the CSREES Authorized Departmental Officer (ADO) for a final determination.

(b) Changes in approved goals or objectives shall be requested by the grantee and approved in writing by the ADO prior to effecting such changes. In no event shall requests for such changes be approved which are outside the scope of the original approved project.

(c) Changes in approved project leadership or the replacement or reassignment of other key project personnel shall be requested by the grantee and approved in writing by the awarding official of CSREES prior to effecting such changes.

(d) Transfers of actual performance of the substantive programmatic work in whole or in part and provisions for payment of funds, whether or not Federal funds are involved, shall be requested by the grantee and approved in writing by the ADO prior to effecting such transfers, unless prescribed otherwise in the terms and conditions of the grant.

(e) Changes in Project Period: The project period may be extended by CSREES without additional financial support, for such additional period(s) as the ADO determines may be necessary to complete or fulfill the purposes of an approved project, but in no case shall the total project period exceed five years. Any extension of time shall be conditioned upon prior request by the grantee and approval in writing by the ADO, unless prescribed otherwise in the terms and conditions of a grant.

(f) Changes in Approved Budget: Changes in an approved budget must be requested by the grantee and approved in writing by the ADO prior to instituting such changes if the revision will involve transfers or expenditures of amounts requiring prior approval as set forth in the applicable Federal cost principles, Departmental regulations, or in the grant award.

D. Applicable Federal Statutes and Regulations

Several Federal statutes and regulations apply to grant proposals considered for review and to project grants awarded under this program. These include, but are not limited to:

7 CFR Part 1.1—USDA implementation of the Freedom of Information Act.

7 CFR Part 3—USDA implementation of OMB Circular No. A–129 regarding debt collection.

7 CFR Part 15, subpart A—USDA implementation of Title VI of the Civil Rights Act of 1964, as amended.

7 CFR Part 3015—USDA Uniform Federal Assistance Regulations, implementing OMB directives (*i.e.*, Circular Nos. A–21 and A–122) and incorporating provisions of 31 U.S.C. 6301–6308 (the Federal Grant and Cooperative Agreement Act of 1977, Pub. L. No. 95–224), as well as general policy requirements applicable to recipients of Departmental financial assistance.

7 CFR Part 3017—USDA implementation of Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants).

7 CFR Part 3018—USDA implementation of Restrictions on Lobbying. Imposes prohibitions and requirements for disclosure and certification related to lobbying on recipients of Federal contracts, grants, cooperative agreements, and loans.

7 CFR Part 3019—USDA implementation of OMB Circular A–110, Uniform Administrative Requirements for Grants and Other Agreements With Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations.

7 CFR Part 3052—USDA implementation of OMB Circular No. A–133, Audits of States, Local Governments, and Non-profit Organizations.

7 CFR Part 3407—CSREES procedures to implement the National Environmental Policy Act of 1969, as amended.

29 U.S.C. 794 (section 504, Rehabilitation Act of 1973) and 7 CFR Part 15B (USDA implementation of statute)—prohibiting discrimination based upon physical or mental handicap in Federally assisted programs.

35 U.S.C. 200 *et seq.*—Bayh-Dole Act, controlling allocation of rights to inventions made by employees of small business firms and domestic nonprofit organizations, including universities, in Federally assisted programs

(implementing regulations are contained in 37 CFR Part 401).

E. Confidential Aspects of Proposals and Awards

When a proposal results in a grant, it becomes a part of the record of CSREES transactions, available to the public upon specific request. Information that the Secretary determines to be of a confidential, privileged, or proprietary nature will be held in confidence to the extent permitted by law. Therefore, any information that the applicant wishes to have considered as confidential, privileged, or proprietary should be clearly marked within the proposal. The original copy of a proposal that does not result in a grant will be retained by the Agency for a period of one year. Other copies will be destroyed. Such a proposal will be released only with the consent of the applicant or to the extent required by law. A proposal may be withdrawn at any time prior to the final action thereon.

F. Regulatory Information

For the reasons set forth in the final Rule-related Notice to 7 CFR part 3015, subpart V (48 FR 29115, June 24, 1983), this program is excluded from the scope of the Executive Order 12372 which requires intergovernmental consultation with State and local officials. Under the provisions of the Paperwork Reduction Act of 1995, as amended (44 U.S.C. chapter 35), the collection of information requirements contained in this Notice have been approved under OMB Document No. 0524–0022.

Done at Washington, D.C., this 4th day of April 2000.

Charles W. Laughlin,

Administrator, Cooperative State Research, Education, and Extension Service.

Department of Agriculture

Cooperative State Research, Education and Extension Service

Integrated Research, Education, and Extension Competitive Grants Program—Water Quality: Request for Proposals and Request for Input; Notice

DEPARTMENT OF AGRICULTURE

Cooperative State Research, Education, and Extension Service

Integrated Research, Education, and Extension Competitive Grants Program—Water Quality: Request for Proposals and Request for Input

AGENCY: Cooperative State Research, Education, and Extension Service.

ACTION: Notice of request for proposals and request for input.

SUMMARY: The Cooperative State Research, Education and Extension Service (CSREES) announces the availability of grant funds and requests proposals for the Integrated Research, Education, and Extension Competitive Grants Program—Water Quality for fiscal year (FY) 2000 to support integrated, multifunctional agricultural research, extension, and education activities that address water quality priorities in United States agriculture. The amount available for support of this program in FY 2000 is approximately $12,400,000.

This notice sets out the objectives for these projects, the eligibility criteria for projects and applicants, the application procedures, and the set of instructions needed to apply for a Water Quality grant under this authority.

By this notice, CSREES additionally solicits stakeholder input from any interested party regarding the FY 2000 Integrated Research, Education, and Extension Competitive Grants Program—Water Quality for use in the development of any future requests for proposals for this program.

DATES: Proposals must be transmitted by June 6, 2000, as indicated by the postmark or date on courier bill of lading. Proposals transmitted after this date will not be considered for funding. Comments regarding this request for proposals are requested within six months from the issuance of this notice. Comments received after that date will be considered to the extent practicable.

ADDRESSES: The address for hand-delivered proposals or proposals submitted using an express mail or overnight courier service is: Integrated Research, Education, and Extension Competitive Grants Program—Water Quality; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; Room 303, Aerospace Center; 901 D Street, SW; Washington, DC 20024.

Proposals sent via the U.S. Postal Service must be sent to the following address: Integrated Research, Education, and Extension Competitive Grants Program—Water Quality; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2245; 1400 Independence Avenue, SW; Washington, DC 20250–2245.

Written user comments should be submitted by first-class mail to: Policy and Program Liaison Staff; Office of Extramural Programs; USDA–CSREES; STOP 2299; 1400 Independence Avenue, S.W.; Washington, D.C. 20250–2299; or via e-mail to: RFP–OEP@reeusda.gov. In your comments, please include the name of the program and the fiscal year of the RFP to which you are responding.

FOR FURTHER INFORMATION: Applicants and other interested parties are encouraged to contact Dr. Timothy C. Strickland; Water Quality Chair; Natural Resources and Environment Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2210; 1400 Independence Avenue, S.W.; Washington, D.C. 20250–2210; telephone: (202) 205–5952; fax: (202) 401–1706; email: tstrickland@reeusda.gov or Dr. Raymond Knighton; National Program Leader; Natural Resources and Environment Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2210; 1400 Independence Avenue, S.W.; Washington, D.C. 20250–2210; telephone: (202) 401–6417; fax: (202) 401–1706; email: rknighton@reeusda.gov.

Stakeholder Input

CSREES is soliciting comments regarding this solicitation of applications from any interested party. These comments will be considered in the development of any future RFP for the program. Such comments will be forwarded to the Secretary or his designee for use in meeting the requirements of section 103(c)(2) of the Agricultural Research, Extension, and Education Reform Act of 1998 (7 U.S.C. 7613(c)(2)). This section requires the Secretary to solicit and consider input on a current RFP from persons who conduct or use agricultural research, education and extension for use in formulating future RFPs for competitive programs. Comments should be submitted as provided for in the **ADDRESSES** and **DATES** portions of this Notice.

Catalog of Federal Domestic Assistance

This program is listed in the Catalog of Federal Domestic Assistance under 10.303, Integrated Research, Education, and Extension Competitive Grants Program.

Part I—General Information

A. Legislative Authority and Background

Section 406 of the Agricultural Research, Extension, and Education Reform Act of 1998 (AREERA) (7 U.S.C. 7626) authorized the Secretary of Agriculture to establish a research, education, and extension competitive grants program to provide funding for integrated, multifunctional agricultural research, extension, and education activities. Subject to the availability of appropriations to carry out this program, the Secretary may award grants to colleges and universities (as defined by 1404 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (NARETPA) (7 U.S.C. 3103)) on a competitive basis for integrated research, education, and extension projects. Grants are to be awarded to address priorities in United States agriculture that involve integrated research, education, and extension activities as determined by the Secretary in consultation with the National

Agricultural Research, Extension, Education, and Economics Advisory Board.

On November 19, 1999, the Secretary published in the **Federal Register** [64 FR 63560] a notice that the administration of this grant program had been delegated to the Cooperative State Research, Education, and Extension Service (CSREES). This notice also solicited public comment from persons who use or conduct research, extension, or education regarding the priorities to be addressed by this new program. In addition, this notice announced a public meeting to obtain comments to use in developing the proposed rule and requests for proposals for this new grant program. The public meeting was held on December 6, 1999. All the comments and the official transcript of the meeting have been made available for review on the CSREES web page (http://www.reeusda.gov/integrated/). This RFP was developed in consultation with the Advisory Board. In addition, the comments and testimonies from the December 6, 1999, public meeting were considered in the formulation of this RFP.

The entire program is funded in FY 2000 at $37,637,702 (after deduction for administrative expenses) for the following integrated activities: Water Quality ($12,374,115), Food Safety ($14,277,277), Pesticide Impact Assessment ($4,322,310), Crops at Risk from Food Quality and Protection Act (FQPA) Implementation ($952,000), FQPA Risk Mitigation Program for Major Food Crop Systems ($3,808,000), and Methyl Bromide Transition Program ($1,904,000). There will be three RFP's for this program. The Water Quality and Food Safety Programs will each have a separate RFP, while the latter four programs will be announced as one RFP. This notice announces and describes the Water Quality component of the Program.

CSREES will administer the Integrated Research, Education, and Extension Competitive Grants Program by determining priorities in United States agriculture through Agency stakeholder input processes and in consultation with the National Agricultural Research, Extension, Education, and Economics Advisory Board. Each RFP for the different program areas (*i.e.*, Water Quality, Food Safety, etc.) will be developed each fiscal year based on these established priorities and the resulting determined approaches to solving these critical agricultural issues. Although this overall grant program seeks to solve critical agricultural issues through an integration of research, education, and extension activities, a component of a RFP, depending on the priority being addressed and/or the stage at which the priority is being addressed, may request proposals that are research, education, or extension only, or a combination thereof. However, the overall overarching approach to solving the critical agricultural issue, priority, or problem will be through an integration of research, education, and extension activities within each individual program area.

B. Purpose, Priorities, and Fund Availability

The CSREES Water Quality Program is being enhanced by the establishment of a new water quality program authorized under section 406 of AREERA for an Integrated Research, Education, and Extension Competitive Grants Program. This program will bring university scientists, instructors, and extension educators into more effective and efficient partnerships with Federal interagency priority programs in addressing water quality issues in U.S. agriculture. This program will also provide the flexibility necessary for CSREES to bring the resources of researchers, instructors, and extension educators to national initiatives and programmatic partnerships that target evolving water quality needs.

The Water Quality Program is targeted directly to the identification and resolution of agriculturally-related degradation of water quality. Proposals are sought that will provide watershed-based information that can be used to: Assess sources of water quality impairment in targeted watersheds; develop and/or recommend options for continued improvement of water quality in targeted watersheds; and evaluate the relative costs and benefits associated with cleanup from all responsible sectors (*e.g.*, farming, processing, urban runoff, municipal waste treatment, etc.). The program will favor proposals that have a clear problem statement and that are "place-based." "Place-based" means that the proposers have identified a specific location where the work is to be conducted so that the results and implications of the work conducted can be associated with a specific, geo-referenced location. Categories of water quality needs that have been identified, both individually by USDA and in partnership with other Federal programs, include:

—Development and implementation of voluntary approaches that will enable producers to comply with newly developing Federal and State Total Maximum Daily Load regulations for non-point source pollutants.
—Coordination of targeted research, education, and extension activities to minimize any adverse impacts that agricultural, forest, and range management practices; food and agricultural product processing; and/or livestock production systems may have on the Nation's water quality.
—Applied research evaluating the efficacy of currently recommended management practices and strategies to improve water quality.
—Evaluation and error assessment of currently available data sets being used for Geographic Information Systems (GIS) based decision-support models for watershed management.
—Projects supporting the pilot activities of the National Science and Technology Council's National Environmental Monitoring Initiative. This initiative seeks to integrate the Nation's environmental monitoring and related research networks and programs. For more information, see (http://www.epa.gov/cludygxb/Pubs/factsheet.html).
—Development and validation of cost-effective means to reduce the contribution of agriculture to the development of harmful algal blooms and hypoxic conditions in coastal systems.
—Development and validation of cost-effective means to reduce the contribution of animal and food processing wastes to water quality degradation.
—Documenting the coincident status and trends of multiple resources and related water quality, demographic, and socioeconomic condition; relating status and trends to human and natural causes and consequences; predicting future trajectories and rates of change; assessing associated uncertainties; and identifying data, information and research needed to reduce future uncertainties.
—Evaluation of the efficacy of USDA conservation programs' implementation.
—Projects addressing the Action Items identified in the President's Clean Water Action Plan (February 1998), see (http://www.cleanwater.gov/) for more information.

There is no commitment by USDA to fund any particular proposal or to make a specific number of awards. Approximately $12.4 million will be available to fund proposals in FY 2000. Proposals are being solicited in each of four component areas: National Facilitation proposals, Regional Water Quality Coordination proposals,

Extension Education proposals, and Integrated Research, Education, and Extension proposals.

C. Definitions

For the purpose of awarding grants under this program, the following definitions are applicable:

(1) *Administrator* means the Administrator of the Cooperative State Research, Education, and Extension Service (CSREES) and any other officer or employee of the Department to whom the authority involved my be delegated.

(2) *Authorized departmental officer* means the Secretary or any employee of the Department who has the authority to issue or modify grant instruments on behalf of the Secretary.

(3) *Authorized organizational representative* means the president or chief executive officer of the applicant organization or the official, designated by the president or chief executive officer of the applicant organization, who has the authority to commit the resources of the organization.

(4) *Budget period* means the interval of time (usually 12 months) into which the project period is divided for budgetary and reporting purposes.

(5) *Cash contributions* means the applicant's cash outlay, including the outlay of money contributed to the applicant by non-Federal third parties.

(6) *Department* or *USDA* means the United States Department of Agriculture.

(7) *Education activity* means formal classroom instruction, laboratory instruction, and practicum experience in the food and agricultural sciences and other related matters such as faculty development, student recruitment and services, curriculum development, instructional materials and equipment, and innovative teaching methodologies.

(8) *Extension activity* means an act or process that delivers science-based knowledge and informal educational programs to people, enabling them to make practical decisions.

(9) *Grant* means the award by the Secretary of funds to an eligible organization or individual to assist in meeting the costs of conducting, for the benefit of the public, an identified project which is intended and designed to accomplish the purpose of the program as identified in these guidelines.

(10) *Grantee* means an organization designated in the grant award document as the responsible legal entity to which a grant is awarded.

(11) *Integrated* means to bring the three components of the agricultural knowledge system (research, education, and extension) together around a problem area or activity.

(12) *Matching* means that portion of allowable project costs not borne by the Federal Government, including the value of in-kind contributions.

(13) *Peer review* means an evaluation of a proposed project for scientific or technical quality and relevance performed by experts with the scientific knowledge and technical skills to conduct the proposed work or to give expert advice on the merits of a proposal.

(14) *Principal investigator/Project director* means the single individual designated by the grantee in the grant application and approved by the Secretary who is responsible for the direction and management of the project.

(15) *Prior approval* means written approval evidencing prior consent by an authorized departmental officer as defined in (2) above.

(16) *Project* means the particular activity within the scope of the program supported by a grant award.

(17) *Project period* means the period, as stated in the award document and modifications thereto, if any, during which Federal sponsorship begins and ends.

(18) *Research activity* means a scientific investigation or inquiry that results in the generation of knowledge.

(19) *Secretary* means the Secretary of Agriculture and any other officer or employee of the Department to whom the authority involved may be delegated.

(20) *Third party in-kind contributions* means non-cash contributions of property or services provided by non-Federal third parties, including real property, equipment, supplies and other expendable property, directly benefitting and specifically identifiable to a funded project or program.

(21) *Total integrated, multifunctional research, education, and extension approach* means that the combination of grants (although the individual grants may involve only research, education, or extension activities or a combination thereof) awarded under the fiscal year's program components will work together to address the priorities in United States agriculture as determined by the Secretary of Agriculture in consultation with the Advisory Board, that involve integrated research, extension, and education activities.

D. Eligibility

Proposals may be submitted by colleges and universities as defined in section 1404 of the National Agricultural research, Extension, and Teaching Policy Act of 1977 (NARETPA). The terms "college" and "university" mean an educational institution in any State which (1) admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate, (2) is legally authorized within such State to provide a program of education beyond secondary education, (3) provides an educational program for which a bachelor's degree or any other higher degree is awarded, (4) is a public or other nonprofit institution, and (5) is accredited by a nationally recognized accrediting agency or association. Although an applicant may be eligible based on its status as one of these entities, there are factors which may exclude an applicant from receiving Federal financial and nonfinancial assistance and benefits under this program (e.g., debarment or suspension of an individual involved or a determination that an applicant is not responsible based on submitted organizational management information). Eligible applicants may subcontract to organizations not eligible under these requirements.

Please note that a research foundation maintained by a college or university is not eligible to receive an award under this program.

E. Matching Requirements

1. General Requirement

If a grant provides a particular benefit to a specific agricultural commodity, the grant recipient is required to provide funds or in-kind support to match the amount of the grant funds provided. See section 10. c. on "Matching Funds" under Part III, B, "Content of Proposals" for more details.

2. Waiver

CSREES may waive the matching funds requirement specified in the above paragraph for a grant if CSREES determines that (a) the results of the project, while of particular benefit to a specific agricultural commodity, are likely to be applicable to agricultural commodities generally; or (b) the project involves a minor commodity, the project deals with scientifically important research, and the grant recipient is unable to satisfy the matching funds requirement.

F. Funding Restrictions

CSREES has determined that grant funds awarded under this authority may not be used for the renovation or refurbishment of research, education, or extension space; the purchase or

installation of fixed equipment in such space; or the planning, repair, rehabilitation, acquisition, or construction of buildings or facilities.

G. Types of Grant Instruments

In FY 2000 all projects will be awarded using a "New Grant" instrument. In future years, projects under the Integrated Research, Education, and Extension Competitive Grants Program authority can be awarded using one of the grant instruments described below:

(1) New grant. This is a grant instrument by which the Department agrees to support a specified level of effort for a project that generally has not been supported previously under this program. This type of grant is approved on the basis of peer review recommendations.

(2) Renewal grant. This is a grant instrument by which the Department agrees to provide additional funding for a project period beyond that approved in an original or amended award, provided that the cumulative period does not exceed the statutory limitation. When a renewal application is submitted, it should include a summary of progress to date from the previous granting period. A renewal grant shall be based upon new application, *de novo* peer review and staff evaluation, new recommendation and approval, and a new award instrument.

(3) Supplemental grant. This is an instrument by which the department agrees to provide small amounts of additional funding under a new or renewal grant as specified above and may involve a short-term (usually six months or less) extension of the project period beyond that approved in an original or amended award, but in no case may the cumulative period for the project exceed the statutory limitation. A supplement is awarded only if required to assure adequate completion of the original scope of work and if there is sufficient justification to warrant such action. A request of this nature normally will not require additional peer review.

H. Funding Mechanisms

The two mechanisms by which new, renewal, and supplemental grants shall be awarded are as follows:

(1) Standard grant. This is a funding mechanism whereby the Department agrees to support a specified level of effort for a predetermined time period without the announced intention of providing additional support at a future date.

(2) Continuation grant. This is a funding mechanism whereby the Department agrees to support a specified level of effort for a predetermined period of time with a statement of intention to provide additional support at a future date, provided that performance has been satisfactory, appropriations are available for this purpose, and continued support will be in the best interests of the Federal government and the public. This kind of mechanism normally will be awarded for an initial one-year period, and any subsequent continuation project grants will be awarded in one-year increments. The award of a continuation project grant to fund an initial or succeeding budget period does not constitute an obligation to fund any subsequent budget period. Unless prescribed otherwise by CSREES, a grantee must submit a separate application for continued support for each subsequent fiscal year. Requests for such continued support must be submitted in duplicate at least three months prior to the expiration date of the budget period currently being funded. Decisions regarding continued support and the actual funding levels of such support in future years usually will be made administratively after consideration of such factors as the grantee's progress and management practices and the availability of funds. Since initial peer reviews are based upon the full term and scope of the original application, additional evaluations of this type generally are not required prior to successive years' support. However, in unusual cases (*e.g.*, when the nature of the project or key personnel change or when the amount of future support requested substantially exceeds the grant application originally reviewed and approved), additional reviews may be required prior to approving continued funding.

Part II—Program Description

A. Project Types

Approximately $1,000,000 is available for National Facilitation proposals. The maximum total award is $400,000, with an annual funding limitation of $100,000. The project period may be one to four years in duration. It is anticipated that two to five grants will be awarded in this program component.

Approximately $5,000,000 is available for Regional Water Quality Coordination proposals. Projects will be supported at expected levels of up to $650,000 per year/per region for up to four years. Projects involving more than one region may be considered for larger funding. CSREES expects that some regions will request less funding due to a smaller number of states within the region. It is anticipated that ten grants will be awarded in this program component.

Approximately $1,400,000 is available for Extension Education proposals. The maximum total award is $300,000, with an annual funding limitation of $100,000. The project period may be one to three years in duration. It is anticipated that 12–15 grants will be awarded in this program component.

Approximately $3,600,000 is available for Integrated Research, Education and Extension proposals. The maximum total award is $600,000, with an annual funding limitation of $200,000. The project period may be one to three years in duration. It is anticipated that 5–15 grants will be awarded in this program component.

Applications received in any of the aforementioned program areas should include budgets commensurate with the activities proposed. Grants awarded under the Program Description Areas of National Facilitation, Extension Education, and Integrated Research, Education, and Extension (as described in this RFP) will be issued as "New Grant" instruments and will be awarded as "Standard Grants." Grants awarded under the Program Area Description of Regional Water Quality Coordination (as described in this RFP) will be issued as "New Grant" instruments and may be awarded as "Continuation Grants."

B. Program Area Description

1. National Facilitation Proposals (Program Area 110.1)

(Maximum award: $100,000/year for up to four years).

Proposals are invited for projects that develop and initiate nationally coordinated programs that will contribute to an increase in public understanding and involvement in community decision-making and that facilitate the development of public policy on water resources issues. Because protection of local watersheds and aquifers often requires community-based actions, decisions about land use, land management practices, waste water management alternatives for areas without sewers, storm water controls, and the protection and restoration of riparian zones are critical to individual and public planning. All proposals are required to include specific, measurable accomplishments for each project year and a projected time-line. While it is not required that projects be fully independent within the 4-year project period, it is expected that the timeline will culminate in the establishment of an independently supported national coordination effort.

This component of the CSREES Water Quality Program seeks to provide a common base of knowledge in support of individuals and communities grappling to formulate public policy and management strategies that will allow growth and increased profitability while protecting the water resource. Projects will be supported that facilitate the appropriate application of tools and techniques (*i.e.*, Geographic Information Systems, decision support systems, remote sensing, economic analysis, and world wide web technologies) to strengthen awareness of the water quality impacts of current and proposed land use activities by both community decision-makers and individual property owners. These tools can also be used to target specific problems and locations in need of additional attention. Projects should contribute to an increase in community partnerships and networks that develop solutions to particular concerns identified through the projects and in response to increased citizen awareness of local issues. The result will be more citizen involvement, wider dispersal of information, and more rational analysis of environmental decisions in the community and the nation. Metadata and accomplishment reports should be delivered annually to the appropriate regional coordination group (see Regional Water Quality Coordination Proposals below).

2. Regional Water Quality Coordination Proposals (Program Area 110.2)

(Maximum award: $650,000 per year/ per region for up to four years. Projects involving more than one region may be considered for larger funding. CSREES expects that some regions will request less funding due to a smaller number of states within the region).

CSREES invites proposals to ensure the integration of water quality efforts within the jurisdiction of each of the ten regions established by the U.S. Environmental Protection Agency (EPA). The EPA Regions are:

Region 1—Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

Region 2—New Jersey, New York, and the territories of Puerto Rico and the U.S. Virgin Islands.

Region 3—Delaware, Maryland, Pennsylvania, Virginia, West Virginia, and the District of Columbia.

Region 4—Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee.

Region 5—Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin.

Region 6—Arkansas, Louisiana, New Mexico, Oklahoma, and Texas.

Region 7—Iowa, Kansas, Missouri, and Nebraska.

Region 8—Colorado, Montana, North Dakota, South Dakota, Utah, and Wyoming.

Region 9—Arizona, California, Hawaii, Nevada, and the territories of Guam and American Samoa.

Region 10—Alaska, Idaho, Oregon, and Washington.

Proposals may be submitted for one or any combination of regions.

This component of the CSREES Water Quality Program is designed to make research, education, and extension resources of the university system more accessible to Federal, State, and local water quality improvement efforts, thus enhancing opportunities for agricultural producers and agriculturally impacted communities to adopt voluntary approaches for the improvement of water quality. Grantees are expected to facilitate the conceptualization and implementation of multi-partner efforts that minimize duplication of effort and that leverage multiple funding sources into a common collaborative effort. As such, it is expected that coordination grantees will initiate partnership activities with key water quality efforts in their region. Proposers should clearly identify the water quality issues and education, extension, and research efforts that are common to the region. A plan should be presented that lays out the approaches to be employed for regional resource sharing, communication, priority setting, and outreach. The proposal should also discuss Federal and State water quality activities in the region and present a strategy for establishing partnerships with appropriate programs.

Each proposal must include provision for a regional coordination mechanism (whether an individual, a committee, or an office) and for a Water Quality Research, Education, and Extension Coordinator in each State or Territory in the Region. Regional coordinators will be expected to work with CSREES National Program Leaders to provide liaison among Federal activities (e.g., U.S. Environmental Protection Agency (EPA) Regional Offices, U.S. Geological Survey National Water Quality Assessment Program (USGS NAWQA) Coordination Offices, USDA Agricultural Research Service(ARS) Regional Offices, USDA Forest Service (FS) Regional Offices, National Aeronautics and Space Administration (NASA), National Oceanic and Atmospheric Administration (NOAA), Bureau of Land Management (BLM), etc.), State environmental organizations, and the State Water Quality Research, Education, and Extension Coordinators within the Region. Successful projects will thus provide more efficient development, evaluation, and dissemination of information on watershed improvement, management, and monitoring, and in the development of comparable watershed sampling protocols, data, metadata, and reporting. Provision should be included in the budget request for the regional coordinator to participate in monthly conference calls as well as a national coordination meeting to be held annually in the Washington, D.C. area.

Each regional project must include a plan for the development and maintenance of a georeferenced, watershed-based reporting system. This reporting system will serve as the primary vehicle for reporting progress and accomplishments of the CSREES Water Quality Program. Regional projects are expected: (1) To serve as the repository for the reporting of all projects funded on an ad hoc basis by other components of the CSREES Water Quality Program; (2) to collaborate in the linkage of their databases and reporting systems to other funded regions; (3) to periodically conduct water quality needs assessments for the region and report on partnerships and progress in water quality improvement; (4) to facilitate the incorporation of relevant projects that may become funded in the region through CSREES programs (including other sections of the Water Quality Program, the National Research Initiative, the Animal Waste Center, the Initiative for Future Agriculture and Food Systems) or through other federal and state programs (e.g., EPA 319, EPA National Center for Environmental Research and Quality Assurance (NCERQA), National Science Foundation (NSF), NOAA, etc.); and (5) to be compatible with related information sources (e.g., USGS NAWQA Program, EPA Know Your Watershed, CSREES Integrated Pest Management Program, and the CSREES Pesticide Impact Assessment Program, etc.).

3. Extension Education Proposals (Program Area 110.3)

(Maximum award: $100,000/year for one to three years).

Proposals are invited for Extension Education projects to address water quality issues of State or local importance. One mission of the CSREES Water Quality Program is to provide leadership in extension education that will enable individuals, industry, and government to effect changes enhancing and protecting the Nation's water

resources for the public good. The vision is to be recognized as an important and effective partnership providing leadership for water quality education to help people, industry, and governments prevent and solve current and emerging water quality problems. Proposals for this program are expected to address one or more of the seven strategic extension priorities of the Water Quality Program (see http://www.reeusda.gov/nre/water/strategi.htm). The seven areas of emphasis for the education program are under-served audiences, watersheds and aquifers, surface water systems, public policy, individual actions, volunteerism,and partnership. All proposals are required to include specific, measureable accomplishments for each project year. Metadata and accomplishments reports will be delivered annually to the appropriate regional coordination group. See "Regional Water Quality Coordination Proposals" above.

4. Integrated Research, Education, and Extension Proposals (Program Area 110.4)

(Maximum award: $200,000/year up to three years).

Proposals are invited that integrate water quality research, education, and extension to solve water quality problems at the whole watershed. Proposals should: (a) Identify the cause of water quality degradation;

(b) conduct research filling the gaps that are critical to the development of water improvement practices and programs; (c) implement watershed-scale improvement programs; (d) evaluate and monitor the efficacy of the improvement programs implemented; (e) assess the costs and benefits of water quality management practices that are developed; and (f) conduct evaluations closing the loop and improving our understanding of the drivers of water quality degradation. Each proposal is expected to present a fully integrated research, education, and extension approach to accomplish the objectives listed in a–f above. CSREES also encourages the inclusion of a curriculum development component that takes advantage of the integrated watershed activities to enhance environmental education at all levels. The proposing investigators are expected to justify watershed selection (*e.g.*, the level of water quality degradation—chemical, physical, and biological; the relative distribution of agricultural, range or forestry land uses within the watershed; and/or proximity to coastal resources) and to demonstrate capacities for establishing and/or maintaining watershed-wide partnerships for the project's implementation. Preference will be given to proposals that: (1) Demonstrate a substantial potential to contribute long term information, existing opportunities for leveraging support and cost sharing, and active public and private sector participation; (2) take advantage of the participatory educational and extension opportunities engendered by the watershed's restoration and by its continued management; and/or (3) focus on watersheds where the project will better inform policy makers in developing the most equitable multistate and/or regional strategies for water quality improvement. All proposals are required to include specific, measurable accomplishments each project year. Metadata and accomplishments reports will be delivered annually to the appropriate regional coordination groups. See "Regional Water Quality Coordination Proposals" above.

C. Expected Program Outputs and Reporting Requirements

It is expected that outputs from successful projects will include: the development of watershed management partnerships, increased involvement of community and business sectors in watershed restoration and management, enhanced understanding of regionally-appropriate watershed management practices, increased coordination and partnership between universities and other Federal research and management agencies, and the establishment and maintenance of monitoring and assessment activities related to the agricultural-water quality interface.

All projects selected for award will be required to deliver metadata and annual reports, a final summary report, a bibliography of publications and training materials resulting from support, and an impacts analysis. All reports will be geo-referenced to the watersheds where activities were performed. The final summary report must include total funding (Federal, matching and other) and a listing of students who worked on the project (report graduate degrees awarded and undergraduates trained).

The grantee must prepare an annual report that details all significant activities towards achieving the goals and objectives of the project. The narrative should be succinct and be no longer than 10 pages, using 12-point, single-spaced type. A budget summary should be attached to this report, which will provide an overview of all monies spent during the reporting period.

Part III—Preparation of a Proposal

A. Program Application Materials

Program application materials are available at the Integrated Research, Education, and Extension Competitive Grants Program website (http://www.reeusda.gov/integrated/). If you do not have access to our web page or have trouble downloading material, you may contact the Proposal Services Unit, Office of Extramural Programs, USDA/CSREES at (202) 401–5048. When calling the Proposal Services Unit, please indicate that you are requesting forms for the Integrated Research, Education, and Extension Competitive Grants Program—Water Quality. These materials may also be requested via Internet by sending a message with your name, mailing address (not e-mail) and phone number to psb@reeusda.gov. State that you want a copy of the Program Description and application materials (orange book) for the Fiscal Year 2000 Integrated Research, Education, and Extension Competitive Grants Program—Water Quality.

B. Content of Proposals

1. General

The proposal should follow these guidelines, enabling reviewers to more easily evaluate the merits of each proposal in a systematic, consistent fashion:

(a) The proposal should be prepared on only one side of the page using standard size (8½″ x 11″) white paper, one inch margins, typed or word processed using no type smaller than 12 point font, and single or double spaced. Use an easily readable font face (*e.g.*, Geneva, Helvetica, Times Roman).

(b) Each page of the proposal, including the Project Summary, budget pages, required forms, and any appendices, should be numbered sequentially.

(c) The proposal should be stapled in the upper left-hand corner. Do not bind. An original and 14 copies (15 total) must be submitted in one package, along with 10 copies of the "Project Summary" as a separate attachment.

(d) If applicable, proposals should include original illustrations (photographs, color prints, etc.) in all copies of the proposal to prevent loss of meaning through poor quality reproduction.

2. Cover Page (Form CSREES–661)

Each copy of each grant proposal must contain an "Application for Funding", Form CSREES–661. One copy of the application, preferably the original, must contain the pen-and-ink

signature(s) of the proposing principal investigator(s)/project director(s)(PI/PD) and the authorized organizational representative who possesses the necessary authority to commit the organization's time and other relevant resources to the project. Any proposed PI/PD or co-PI/PD whose signature does not appear on Form CSREES–661 will not be listed on any resulting grant award. Complete both signature blocks located at the bottom of the "Application for Funding" form.

Form CSREES–661 serves as a source document for the CSREES grant database; it is therefore important that it be completed accurately. The following items are highlighted as having a high potential for errors or misinterpretations:

(a) Title of Project (Block 6). The title of the project must be brief (80-character maximum), yet represent the major thrust of the effort being proposed. Project titles are read by a variety of nonscientific people; therefore, highly technical words or phraseology should be avoided where possible. In addition, introductory phrases such as "investigation of" or "research on" "education for" or "outreach that" should not be used.

(b) Program to Which You Are Applying (Block 7). "Integrated Research, Education, and Extension Competitive Grants Program—Water Quality."

(c) Program Area and Number (Block 8). The name of the program component, *e.g.* National Facilitation Proposal, 110.1 or Regional Water Quality Coordination Proposal, 110.2 should be inserted in this block.

(d) Type of Award Request (Block 13). Check the block for "new."

(e) Principal Investigator(s)/Project Director(s) (PI/PD) (Block 15). The designation of excessive numbers of co-PI/PD's creates problems during final review and award processing. Listing multiple co-PI/PDs, beyond those required for genuine collaboration, is therefore discouraged. Note that providing a Social Security Number is voluntary, but is an integral part of the CSREES information system and will assist in the processing of the proposal.

(f) Type of Performing Organization (Block 18). A check should be placed in the box beside the type of organization which actually will carry out the effort. For example, if the proposal is being submitted by an 1862 Land-Grant Institution but the work will be performed in a department, laboratory, or other organizational unit of an agricultural experiment station, box "03" should be checked. If portions of the effort are to be performed in several departments, check the box that applies to the individual listed as PI/PD #1 in Block 15.a.

(g) Other Possible Sponsors (Block 22). List the names or acronyms of all other public or private sponsors including other agencies within USDA and other programs funded by CSREES to whom your application has been or might be sent. In the event you decide to send your application to another organization or agency at a later date, you must inform the identified CSREES program manager as soon as practicable. Submitting your proposal to other potential sponsors will not prejudice its review by CSREES; however, duplicate support for the same project will not be provided. Complete the "Application for Funding," Form CSREES–661, in its entirety.

(h) One copy of the "Application for Funding" form must contain the signatures (in ink) of the PI/PD's and authorized organizational representative for the applicant organization.

3. Table of Contents

For consistency and ease in locating information, each proposal must contain a detailed Table of Contents just after the cover page. The Table of Contents should contain page numbers for each component of the proposal. Page numbers should begin with the first page of the Project Description.

4. Project Summary

The proposal must contain a Project Summary of 250 words or less on a separate page which should be placed immediately after the Table of Contents and should not be numbered. The names and institutions of all PI/PD's and co-PI/PD's should be listed on this form, in addition to the title of the project. The summary should be a self-contained, specific description of the activity to be undertaken and should focus on: overall project goal(s) and supporting objectives; plans to accomplish project goal(s); and relevance of the project to regional, State, or local water quality efforts and/or list of CSREES Water Quality Program Priorities listed above. The importance of a concise, informative Project Summary cannot be overemphasized. Summaries for Regional Water Quality Coordination Proposals should also indicate all organizations participating in the effort, the organization that will house the database effort, and the mechanism that will be used to coordinate between organizations.

5. Project Description

For Regional Water Quality Coordination and for Integrated Research, Education, and Extension proposals, the project description may not exceed 15 single- or double-spaced pages of written text and may not exceed a total of 20 pages after inclusion of figures and tables.

For National Facilitation and for Extension Education proposals, the project description may not exceed 8 single- or double-spaced pages of written text and may not exceed a total of ten pages after inclusion of figures and tables.

The project description should include the following:

a. *Introduction and Rationale:* Include a clear statement of the problems to be addressed and goals expected to be accomplished. Describe the supporting objectives; questions; research, education and/or extension components to be included; and/or partners that will be used to accomplish the goal(s) set. If preparing a Regional Coordination proposal, describe the current limitations to effective regional water quality management and describe the key stakeholders that must be included to overcome these limitations.

b. *Approach:*

(1) Describe the activities to be performed, the means by which data and information will be analyzed and interpreted, the methods that will be used for information transfer, the methods that will be used to evaluate adoption and project impact, and the limitations and pitfalls to the approaches selected.

(2) A plan should be presented for coordination and communication between project collaborators.

(3) A project timeline.

(4) A description of outcomes and expected deliverables.

(5) Literature Review. All references cited should be complete, including titles and all co-authors, and should conform to an acceptable journal format.

In addition to the above, the National Facilitation and Regional Coordination proposals should describe the roles and responsibilities of central coordinators and should present a management plan for the administration of the project including facilitation of communication, planning, and annual report preparation.

6. Appendices to Project Description

Appendices to the Project Description are allowed if they are directly germane to the proposed project and are limited to a total of two of the following: reprints (papers that have been

published in peer reviewed journals) and preprints (manuscripts in press for a peer reviewed journal; these must be accompanied by a letter of acceptance from the publishing journal).

7. Key Personnel

All senior personnel who are expected to be involved in the effort must be clearly identified. For each person, the following should be included:

a. The roles and responsibilities of each PI/PD and/or collaborator should be clearly described;

b. An estimate of the time commitment involved for each PI/PD and/or collaborator; and

c. Vitae of each PI/PD, senior associate, and other professional personnel. This section should include vitae of all key persons who are expected to work on the project, whether or not CSREES funds are sought for their support. The vitae should be limited to two (2) pages each in length, excluding publications listings. A chronological list of all publications in refereed journals during the past four (4) years, including those in press, must be provided for each project member for which a curriculum vitae is provided. Also list those non-refereed technical publications that have relevance to the proposed project. All authors should be listed in the same order as they appear on each paper cited, along with the title and complete reference as these usually appear in journals.

8. Conflict-of-Interest List

A Conflict-of-Interest List must be provided for all individuals involved in the project (identified as key personnel). Each list should be on a separate page and include alphabetically the full names of the individuals in the following categories: (a) All collaborators on projects within the past four years, including current and planned collaborations; (b) all co-authors on publications within the past four years, including pending publications and submissions; (c) all persons in your field with whom you have had a consulting or financial arrangement within the past four years, who stand to gain by seeing the project funded; and (d) all thesis or postdoctoral advisees/advisors within the past four years (some may wish to call these life-time conflicts). This form is necessary to assist program staff in excluding from proposal review those individuals who have conflicts-of-interest with the personnel in the grant proposal. The Program Director must be informed of any additional conflicts-of-interest that arise after the proposal is submitted.

9. Collaborative and/or Subcontractual Arrangements

If it will be necessary to enter into formal consulting or collaborative arrangements with others, such arrangements should be fully explained and justified. In addition, evidence should be provided that the collaborators involved have agreed to render these services. If the need for consultant services is anticipated, the proposal narrative should provide a justification for the use of such services, a statement of work to be performed, and a resume or curriculum vita for each consultant. For purposes of proposal development, informal day-to-day contacts between key project personnel and outside experts are not considered to be collaborative arrangements and thus do not need to be detailed.

All anticipated subcontractual arrangements also should be explained and justified in this section. A proposed statement of work and a budget for each arrangement involving the transfer of substantive programmatic work or the providing of financial assistance to a third party must be provided. Agreements between departments or other units of your own institution and minor arrangements with entities outside of your institution (*e.g.*, requests for outside laboratory analyses) are excluded from this requirement.

If you expect to enter into subcontractual arrangements, please note that the provisions contained in 7 CFR Part 3019, USDA Uniform Administrative Requirements for Grant and Other Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations, and the general provisions contained in 7 CFR Part 3015.205, USDA Uniform Federal Assistance Regulations, flow down to subrecipients. In addition, required clauses from Sections 40–48 ("Procurement Standards") and Appendix A ("Contract Provisions") to 7 CFR Part 3019 should be included in final contractual documents, and it is necessary for the subawardee to make a certification relating to debarment/suspension.

10. Budget (Form CSREES–55)

a. Budget Form. Prepare the budget, Form CSREES–55, in accordance with instructions provided. A budget form is required for each year of requested support. In addition, a cumulative budget is required detailing the requested total support for the overall project period. The budget form may be reproduced as needed by applicants. Funds may be requested under any of the categories listed on the form, provided that the item or service for which support is requested is allowable under the authorizing legislation, the applicable Federal cost principles, and these program guidelines, and can be justified as necessary for the successful conduct of the proposed project. Applicants must also include a Budget Narrative to justify their budgets (see section b below.)

The following guidelines should be used in developing your proposal budget(s):

1. Salaries and Wages. Salaries and wages are allowable charges and may be requested for personnel who will be working on the project in proportion to the time such personnel will devote to the project. If salary funds are requested, the number of Senior and Other Personnel and the number of CSREES-Funded Work Months must be shown in the spaces provided. Grant funds may not be used to augment the total salary or rate of salary of project personnel or to reimburse them for time in addition to a regular full-time salary covering the same general period of employment. Salary funds requested must be consistent with the normal policies of the institution.

2. Fringe Benefits. Funds may be requested for fringe benefit costs if the usual accounting practices of your organization provide that organizational contributions to employee benefits (social security, retirement, etc.) be treated as direct costs. Fringe benefit costs may be included only for those personnel whose salaries are charged as a direct cost to the project.

3. Nonexpendable Equipment. Nonexpendable equipment means tangible nonexpendable personal property including exempt property charged directly to the award having a useful life of more than one year and an acquisition cost of $5,000 (or lower depending on institutional policy) or more per unit. As such, items of necessary instrumentation or other nonexpendable equipment should be listed individually by description and estimated cost in the Budget Narrative. This applies to revised budgets as well, as the equipment item(s) and amount(s) may change.

4. Materials and Supplies. The types of expendable materials and supplies which are required to carry out the project should be indicated in general terms with estimated costs in the Budget Narrative.

5. Travel. The type and extent of travel and its relationship to project objectives should be described briefly

and justified. If foreign travel is proposed, the country to be visited, the specific purpose of the travel, a brief itinerary, inclusive dates of travel, and estimated cost must be provided for each trip. Airfare allowances normally will not exceed round-trip jet economy air accommodations. U.S. flag carriers must be used when available. See 7 CFR Part 3015.205(b)(4) for further guidance.

6. Publication Costs/Page Charges. Include anticipated costs associated with publications in a journal (preparing and publishing results including page charges, necessary illustrations, and the cost of a reasonable number of coverless reprints) and audio-visual materials that will be produced. Photocopying and printing brochure, etc., should be shown in Section I., "All Other Direct Costs" of Form CSREES–55.

7. Computer (ADPE) Costs. Reimbursement for the costs of using specialized facilities (such as a university- or department-controlled computer mainframe or data processing center) may be requested if such services are required for completion of the work.

8. All Other Direct Costs. Anticipated direct project charges not included in other budget categories must be itemized with estimated costs and justified in the Budget Narrative. This also applies to revised budgets, as the item(s) and dollar amount(s) may change. Examples may include space rental at remote locations, subcontractual costs, and charges for consulting services, telephone, facsimile, shipping costs, and fees necessary for laboratory analyses. You are encouraged to consult the "Instructions for Completing Form CSREES–55, Budget," of the Application Kit for detailed guidance relating to this budget category. Form AD–1048 must be completed by each subcontractor or consultant and retained by the grantee.

9. Indirect Costs. Section 1462 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3310) limits indirect costs for this program to 19 percent of total Federal funds provided under each award. Therefore the recovery of indirect costs under this program may not exceed the lesser of the institution's official negotiated indirect cost rate or the equivalent of 19 percent of total Federal funds awarded. If no rate has been negotiated, a reasonable dollar amount (equivalent to less than 19 percent of total Federal funds requested) in lieu of indirect costs may be requested, subject to approval by USDA.

b. Budget Narrative. All budget categories, excluding Indirect Costs, for which support is requested must be individually listed (with costs) and justified on a separate sheet of paper and placed immediately behind the Budget Form. Explanations of matching funds or lack thereof on commodity-specific projects also are to be included in this section.

c. Matching Funds. If an applicant concludes that matching funds are not required as specified under Part I (e), a justification should be included in the Budget Narrative. CSREES will consider this justification when ascertaining final matching requirements or in determining if required matching can be waived. CSREES retains the right to make final determinations regarding matching requirements.

For those grants requiring matching funds as specified under Part I (e), proposals should include written verification of commitments of matching support (including both cash and in-kind contributions) from third parties. Written verification means:

(a) For any third party cash contributions, a separate pledge agreement for each donation, signed by the authorized organizational representatives of the donor organization and the applicant organization, which must include: (1) The name, address, and telephone number of the donor; (2) the name of the applicant organization; (3) the title of the project for which the donation is made; (4) the dollar amount of the cash donation; and (5) a statement that the donor will pay the cash contribution during the grant period; and

(b) For any third party in-kind contributions, a separate pledge agreement for each contribution, signed by the authorized organizational representatives of the donor organization and the applicant organization, which must include: (1) The name, address, and telephone number of the donor; (2) the name of the applicant organization; (3) the title of the project for which the donation is made; (4) a good faith estimate of the current fair market value of the third party in-kind contribution; and (5) a statement that the donor will make the contribution during the grant period.

The sources and amount of all matching support from outside the applicant institution should be summarized on a separate page and placed in the proposal immediately following the Budget Narrative. All pledge agreements must be placed in the proposal immediately following the summary of matching support.

The value of applicant contributions to the project shall be established in accordance with applicable cost principles. Applicants should refer to OMB Circulars A–21, Cost Principles for Educational Institutions, for further guidance and other requirements relating to matching and allowable costs.

11. Current and Pending Support (Form CSREES–663)

All proposals must contain Form CSREES–663 listing other current public or private support (including in-house support) to which key personnel identified in the proposal have committed portions of their time, whether or not salary support for person(s) involved is included in the budget. Analogous information must be provided for any pending proposals that are being considered by, or that will be submitted in the near future to, other possible sponsors, including other USDA Programs or agencies. Concurrent submission of identical or similar proposals to the possible sponsors will not prejudice proposal review or evaluation by the CSREES for this purpose. However, a proposal that duplicates or overlaps substantially with a proposal already reviewed and funded (or to be funded) by another organization or agency will not be funded under this program. Note that the project being proposed should be included in the pending section of the form.

12. Assurance Statement(s), (Form CSREES–662)

A number of situations encountered in the conduct of projects require special assurances, supporting documentation, etc., before funding can be approved for the project. In addition to any other situation that may exist with regard to a particular project, it is expected that some applications submitted in response to these guidelines will involve the following:

a. Recombinant DNA or RNA Research. As stated in 7 CFR Part 3015.205 (b)(3), all key personnel identified in the proposal and all endorsing officials of the proposing organization are required to comply with the guidelines established by the National Institutes of Health entitled, "Guidelines for Research Involving Recombinant DNA Molecules," as revised. If your project proposes to use recombinant DNA or RNA techniques, you must so indicate by checking the "yes" box in Block 19 of Form CSREES–661 (the Cover Page) and by completing Section A of Form CSREES–662. For applicable proposals recommended for

funding, Institutional Biosafety Committee approval is required before CSREES funds will be released.

b. Animal Care. Responsibility for the humane care and treatment of live vertebrate animals used in any grant project supported with funds provided by CSREES rests with the performing organization. Where a project involves the use of living vertebrate animals for experimental purposes, all key project personnel identified in a proposal and all endorsing officials of the proposing organization are required to comply with the applicable provisions of the Animal Welfare Act of 1966, as amended (7 U.S.C. 2131 *et seq.*) and the regulations promulgated thereunder by the Secretary in 9 CFR Parts 1, 2, 3, and 4 pertaining to the care, handling, and treatment of these animals. If your project will involve these animals, you should check "yes" in block 20 of Form CSREES–661 and complete Section B of Form CSREES–662. In the event a project involving the use of live vertebrate animals results in a grant award, funds will be released only after the Institutional Animal Care and Use Committee has approved the project.

c. Protection of Human Subjects. Responsibility for safeguarding the rights and welfare of human subjects used in any grant project supported with funds provided by CSREES rests with the performing organization. Guidance on this issue is contained in the National Research Act, Pub. L. No. 93–348, as amended, and implementing regulations promulgated by the Department under 7 CFR Part 1c. If you propose to use human subjects for experimental purposes in your project, you should check the "yes" box in Block 21 of Form CSREES–661 and complete Section C of Form CSREES–662. In the event a project involving human subjects results in a grant award, funds will be released only after the appropriate Institutional Review Board has approved the project.

13. Certifications

Note that by signing Form CSREES–661 the applicant is providing the certifications required by 7 CFR Part 3017, as amended, regarding Debarment and Suspension and Drug Free Workplace, and 7 CFR Part 3018, regarding Lobbying. The certification forms are included in the application package for informational purposes only. These forms should not be submitted with the proposal since by signing form CSREES–661 your organization is providing the required certifications. If the project will involve a subcontractor or consultant, the subcontractor/consultant should submit a form AD–1048 to the grantee organization for retention in their records. This form should not be submitted to USDA.

14. Compliance with the National Environmental Policy Act (NEPA) (Form CSREES–1234)

As outlined in 7 CFR Part 3407 (the Cooperative State Research, Education, and Extension Service regulations implementing NEPA), the environmental data for any proposed project is to be provided to CSREES so that CSREES may determine whether any further action is needed. In some cases, however, the preparation of environmental data may not be required. Certain categories of actions are excluded from the requirements of NEPA.

In order for CSREES to determine whether any further action is needed with respect to NEPA, pertinent information regarding the possible environmental impacts of a particular project is necessary; therefore, Form CSREES–1234, "NEPA Exclusions Form," must be included in the proposal indicating whether the applicant is of the opinion that the project falls within a categorical exclusion and the reasons therefore. If it is the applicant's opinion that the proposed project falls within the categorical exclusions, the specific exclusion must be identified. Form CSREES–1234 and supporting documentation should be included as the last page of this proposal.

Even though a project may fall within the categorical exclusions, CSREES may determine that an Environmental Assessment or an Environmental Impact Statement is necessary for an activity, if substantial controversy on environmental grounds exists or if other extraordinary conditions or circumstances are present which may cause such activity to have a significant environmental effect.

C. Submission of Proposals

1. When to Submit (Deadline Date)

Proposals must be transmitted by June 6, 2000, as indicated by postmark or date of courier bill of lading. Proposals transmitted after this date will not be considered for funding.

2. What to Submit

An original and 14 copies must be submitted. In addition submit 10 copies of the proposal's Project Summary. All copies of the proposals and the Project Summaries must be submitted in one package.

3. Where to Submit

Applicants are strongly encouraged to submit completed proposals via overnight mail or delivery service to ensure timely receipt by the USDA. The address for hand-delivered proposals or proposals submitted using an express mail or overnight courier service is: Integrated Research, Education, and Extension Competitive Grants Program—Water Quality; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; Room 303, Aerospace Center; 901 D Street, S.W.; Washington, D.C. 20024.

Proposals sent via the U.S. Postal Service must be sent to the following address: Integrated Research, Education, and Extension Competitive Grants Program—Water Quality; c/o Proposal Services Unit; Cooperative State Research, Education, and Extension Service; U.S. Department of Agriculture; STOP 2245; 1400 Independence Avenue, S.W.; Washington, D.C. 20250–2245.

D. Acknowledgment of Proposals

The receipt of all proposals will be acknowledged by e-mail. Therefore, applicants are encouraged to provide e-mail addresses, where designated, on the Form CSREES–661. If the applicant's email address is not indicated, CSREES will acknowledge receipt of the proposal by letter.

Once the proposal has been assigned an identification number, please cite that number on all future correspondence. If the applicant does not receive an acknowledgment within 60 days of the submission deadline, please contact the Program Director.

Part IV—Review Process

A. General

Each proposal will be evaluated in a 3-part process. First, each proposal will be screened to ensure that it meets the administrative requirements as set forth in this request for proposals. Second, proposals that meet these requirements will be technically evaluated by a peer review panel. Each program component will have a separate review panel. Third, proposals ranked highly by the technical peer review panel will be evaluated by a panel of experts that will select awardees based on an evaluation of: national coverage, topical coverage, level of participation from stakeholder community, likelihood for the implementation of voluntary approaches to water quality improvement, and convergence with USDA and federal partnership priorities.

Peer review panel members will be selected based upon their training and experience in relevant scientific, education or extension fields taking into account the following factors: (a) The level of formal scientific, technical education, and extension experience of the individual, as well as the extent to which an individual is engaged in relevant research, education and/or extension activities; (b) the need to include as peer reviewers experts from various areas of specialization within relevant scientific, education, and extension fields; (c) the need to include as reviewers other experts (producers, range or forest managers/operators, consumers, etc.) who can assess relevance of the proposals to targeted audiences and to program needs; (d) the need to include as peer reviewers experts from a variety of organizational types (e.g., colleges, universities, industry, state and Federal agencies, private profit and non-profit organizations), and geographic locations; (e) the need to maintain a balanced composition of peer review groups with regard to minority and female representation and an equitable age distribution; and (f) the need to include members that can judge the effective usefulness to producers and the general public of each proposal.

B. Evaluation Factors

The evaluation factors below will be used in reviewing applications submitted in response to this request for proposals:

(1) The proposal specifies realistic water quality-related outcomes and presents an approach with high technical and/or educational merit.

(2) The proposal identifies, documents, and addresses water quality problems of Federal, State, regional, or local importance.

(3) The proposal specifically addresses one or more of the program priorities identified in Part II.

(4) The proposal establishes the integrated nature of the Water Quality program and includes inter-disciplinary approaches.

(5) The proposal encompasses the development of partnerships among the various stakeholders to generate support and resources.

(6) The proposal includes a budget adequate to carry out project activities and which is cost-effective and justified.

(7) The proposal provides a clear plan for accomplishments reporting.

(8) The proposal clearly demonstrates that the investigators and institutions involved in the project exhibit that: (a) Project personnel have appropriate training and a demonstrated awareness of previous and alternative approaches to the problem identified in the proposal, and performance record and/or potential for future accomplishments; (b) appropriate time has been allocated for systematic attainment of objectives; (c) the participating institutions have experience and competence in subject areas appropriate to the successful completion of the project; and (d) adequate support personnel, facilities, and instrumentation are available or obtainable. For the National Facilitation proposals and Regional Water Quality Coordination proposals will also be judged on the quality of the management plan that is proposed. Priority will be given for integrated, multifunctional research, education, and extension projects.

C. Conflicts-of-Interest and Confidentiality

During the peer evaluation process, extreme care will be taken to prevent any actual or perceived conflicts-of-interest that may impact review or evaluation. For the purpose of determining conflicts-of-interest, the academic and administrative autonomy of an institution shall be determined by reference to the January 1998 issue of the Codebook for Compatible Statistical Reporting of Federal Support to Universities, Colleges, and Nonprofit Institutions, prepared by Quantum Research Corporation for the National Science Foundation.

Names of submitting institutions and individuals, as well as proposal content and peer evaluations, will be kept confidential, except to those involved in the review process, to the extent permitted by law. In addition, the identities of peer reviewers will remain confidential throughout the entire review process. Therefore, the names of the reviewers will not be released to applicants. At the end of the fiscal year, names of panelists will be made available in such a way that the panelists cannot be identified with the review of any particular proposal.

Part V—Additional Information

A. Access to Review Information

Copies of summary reviews, not including the identity of the reviewers, will be sent to all applicant PI/PD's automatically, after the review process has been completed.

B. Grant Awards

(1) General.

Within the limit of funds available for such purpose, the awarding official of CSREES shall make grants to those responsible, eligible applicants whose proposals are judged most meritorious under the procedures set forth in this RFP. The date specified by the awarding official of CSREES as the effective date of the grant shall be no later than September 30 of the Federal fiscal year in which the project is approved for support and funds are appropriated for such purpose, unless otherwise permitted by law. It should be noted that the project need not be initiated on the grant effective date, but as soon thereafter as practical so that project goals may be attained within the funded project period. All funds granted by CSREES under this RFP shall be expended solely for the purpose for which the funds are granted in accordance with the approved application and budget, the regulations, the terms and conditions of the award, the applicable Federal cost principles, and the Department's assistance regulations (parts 3015 and 3019 of 7 CFR).

(2) Organizational Management Information.

Specific management information relating to an applicant shall be submitted on a one-time basis as part of the responsibility determination prior to the award of a grant identified under this RFP, if such information has not been provided previously under this or another CSREES program. CSREES will provide copies of forms recommended for use in fulfilling these requirements as part of the preaward process.

(3) Grant Award Document and Notice of Grant Award.

The grant award document shall include at a minimum the following:

(a) Legal name and address of performing organization or institution to whom the Administrator has awarded a grant under the terms of this request for proposals;

(b) Title of project;

(c) Name(s) and address(es) of PI/PD's chosen to direct and control approved activities;

(d) Identifying grant number assigned by the Department;

(e) Project period, specifying the amount of time the Department intends to support the project without requiring recompetition for funds;

(f) Total amount of Departmental financial assistance approved by the Administrator during the project period;

(g) Legal authority(ies) under which the grant is awarded;

(h) Approved budget plan for categorizing allocable project funds to accomplish the stated purpose of the grant award; and

(i) Other information or provisions deemed necessary by CSREES to carry out its respective granting activities or

to accomplish the purpose of a particular grant.

The notice of grant award, in the form of a letter, will be prepared and will provide pertinent instructions or information to the grantee that is not included in the grant award document.

C. Use of Funds; Changes

(1) Delegation of Fiscal Responsibility

Unless the terms and conditions of the grant state otherwise, the grantee may not in whole or in part delegate or transfer to another person, institution, or organization the responsibility for use or expenditure of grant funds.

(2) Changes in Project Plans

(a) The permissible changes by the grantee, PI/PD(s), or other key project personnel in the approved project grant shall be limited to changes in methodology, techniques, or other aspects of the project to expedite achievement of the project's approved goals. If the grantee and/or the PI/PD(s) are uncertain as to whether a change complies with this provision, the question must be referred to the CSREES Authorized Departmental Officer (ADO) for a final determination.

(b) Changes in approved goals or objectives shall be requested by the grantee and approved in writing by the ADO prior to effecting such changes. In no event shall requests for such changes be approved which are outside the scope of the original approved project.

(c) Changes in approved project leadership or the replacement or reassignment of other key project personnel shall be requested by the grantee and approved in writing by the awarding official of CSREES prior to effecting such changes.

(d) Transfers of actual performance of the substantive programmatic work in whole or in part and provisions for payment of funds, whether or not Federal funds are involved, shall be requested by the grantee and approved in writing by the ADO prior to effecting such transfers, unless prescribed otherwise in the terms and conditions of the grant.

(e) Changes in Project Period: The project period may be extended by CSREES without additional financial support, for such additional period(s) as the ADO determines may be necessary to complete or fulfill the purposes of an approved project, but in no case shall the total project period exceed five years. Any extension of time shall be conditioned upon prior request by the grantee and approval in writing by the ADO, unless prescribed otherwise in the terms and conditions of a grant.

(f) Changes in Approved Budget: Changes in an approved budget must be requested by the grantee and approved in writing by the ADO prior to instituting such changes if the revision will involve transfers or expenditures of amounts requiring prior approval as set forth in the applicable Federal cost principles, Departmental regulations, or in the grant award.

D. Applicable Federal Statutes and Regulations

Several Federal statutes and regulations apply to grant proposals considered for review and to project grants awarded under this program. These include but are not limited to:

7 CFR Part 1.1—USDA implementation of the Freedom of Information Act.

7 CFR Part 3—USDA implementation of OMB Circular No. A–129 regarding debt collection.

7 CFR Part 15, subpart A—USDA implementation of Title VI of the Civil Rights Act of 1964, as amended.

7 CFR Part 3015—USDA Uniform Federal Assistance Regulations, implementing OMB directives (*i.e.*, Circular Nos. A–21 and A–122) and incorporating provisions of 31 U.S.C. 6301–6308 (the Federal Grant and Cooperative Agreement Act of 1977, Pub. L. No. 95–224), as well as general policy requirements applicable to recipients of Departmental financial assistance.

7 CFR Part 3017—USDA implementation of Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants).

7 CFR Part 3018—USDA implementation of Restrictions on Lobbying. Imposes prohibitions and requirements for disclosure and certification related to lobbying on recipients of Federal contracts, grants, cooperative agreements, and loans.

7 CFR Part 3019—USDA implementation of OMB Circular A–110, Uniform Administrative Requirements for Grants and Other Agreements With Institutions of Higher Education, Hospitals, and Other Nonprofit Organizations.

7 CFR Part 3052—USDA implementation of OMB Circular No. A–133, Audits of States, Local Governments, and Non-profit Organizations.

7 CFR Part 3407—CSREES procedures to implement the National Environmental Policy Act of 1969, as amended.

29 U.S.C. 794 (section 504, Rehabilitation Act of 1973) and 7 CFR Part 15B (USDA implementation of statute)—prohibiting discrimination based upon physical or mental handicap in Federally assisted programs.

35 U.S.C. 200 *et seq.*—Bayh-Dole Act, controlling allocation of rights to inventions made by employees of small business firms and domestic nonprofit organizations, including universities, in Federally assisted programs (implementing regulations are contained in 37 CFR Part 401).

E. Confidential Aspects of Proposals and Awards

When a proposal results in a grant, it becomes a part of the record of CSREES transactions, available to the public upon specific request. Information that the Secretary determines to be of a confidential, privileged, or proprietary nature will be held in confidence to the extent permitted by law. Therefore, any information that the applicant wishes to have considered as confidential, privileged, or proprietary should be clearly marked within the proposal. The original copy of a proposal that does not result in a grant will be retained by the Agency for a period of one year. Other copies will be destroyed. Such a proposal will be released only with the consent of the applicant or to the extent required by law. A proposal may be withdrawn at any time prior to the final action thereon.

F. Regulatory Information

For the reasons set forth in the final Rule-related Notice to 7 CFR part 3015, subpart V (48 FR 29115, June 24, 1983), this program is excluded from the scope of the Executive Order 12372 which requires intergovernmental consultation with State and local officials. Under the provisions of the Paperwork Reduction Act of 1995, as amended (44 U.S.C. chapter 35), the collection of information requirements contained in this Notice have been approved under OMB Document No. 0524–0022.

Done at Washington, D.C., this 4th day of April 2000.

Charles W. Laughlin,

Administrator, Cooperative State Research, Education, and Extension Service.

Department of the Treasury

Fiscal Service

31 CFR Part 210

Federal Government Participation in the Automated Clearing House; Interim Rule

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Part 210

RIN 1510–AA81

Federal Government Participation in the Automated Clearing House

AGENCY: Financial Management Service, Fiscal Service, Treasury.

ACTION: Interim Rule with request for comment.

SUMMARY: We're issuing an interim rule amending our regulation governing the use of the Automated Clearing House (ACH) system by Federal agencies. Our regulation generally adopts the ACH rules developed by NACHA—The Electronic Payments Association (NACHA) (ACH Rules) as the rules governing ACH transactions by Federal agencies. We're revising our regulation to reflect changes that NACHA has made to the ACH Rules since the publication of NACHA's 1999 rule book.

DATES: This interim rule is effective May 8, 2000. Comments must be received by June 6, 2000. The incorporation by reference of the publication listed in the rule is approved by the Director of the Federal Register as of May 8, 2000.

ADDRESSES: You can download this interim rule at the following World Wide Web address: http://www.fms.treas.gov/ach/.

You may also inspect and copy this interim rule at: Treasury Department Library, Freedom of Information Act (FOIA) Collection, Room 5030, Main Treasury Building, 1500 Pennsylvania Avenue, NW, Washington, DC 20220. Before visiting, you must call (202) 622–0990 for an appointment.

You may send comments electronically to the following address: 210comments@fms.treas.gov. You may also mail comments to Cynthia L. Johnson, Director, Cash Management Policy and Planning Division, Financial Management Service, 401 14th Street, SW, Room 420, Washington, DC 20227.

FOR FURTHER INFORMATION CONTACT:

Walt Henderson, Senior Financial Program Specialist, at (202) 874–6705 or walt.henderson@fms.treas.gov;
Natalie H. Diana at (202) 874–6590 or natalie.diana@fms.treas.gov;
Adam Martin, Financial Program Specialist, at (202) 874–6881 or adam.martin@fms.treas.gov;
Cynthia L. Johnson, Director, Cash Management Policy and Planning Division, at (202) 874–6590 or cindy.johnson@fms.treas.gov; or
Margaret Marquette, Deputy Chief Counsel, at (202) 874–6681.

SUPPLEMENTARY INFORMATION:

I. Background

On April 9, 1999, we published a final rule in the **Federal Register** (64 FR 17472). The final rule amended our regulations at 31 CFR Part 210 (Part 210), which govern the use of the ACH system by Federal agencies (agencies). The ACH system is a nationwide electronic funds transfer system that provides for the interbank clearing of credit and debit transactions and for the exchange of information among participating financial institutions. The final rule adopted the ACH Rules published in NACHA's 1999 rule book (including rule changes with an effective date on or before September 17, 1999) as the rules governing all Government ACH transactions, with 11 exceptions.

NACHA periodically updates the ACH Rules. Each year NACHA publishes a new rule book that reflects the changes to the ACH Rules that have been approved since the publication of the previous rule book. NACHA recently published its 2000 rule book.

Part 210 provides that any amendment to the ACH Rules, as published in the 1999 Rule Book, that takes effect after September 17, 1999, will not apply to Government ACH entries unless we publish notice of acceptance of the amendment in the **Federal Register**. 31 CFR 210.3(b)(2). We're publishing this interim rule in order to indicate which amendments to the ACH Rules we're accepting and which amendments we're rejecting, and to provide an opportunity for comment.

II. Summary of Rule Changes

A. Changes to ACH Rules

The ACH Rules published in NACHA's 2000 rule book reflect changes to the ACH Rules published in NACHA's 1999 rule book related to seven topics:

1. Self-Audit Requirements

NACHA has revised the self-audit provisions of the ACH Rules to require self-audits annually rather than every three years; to require third-party service providers to conduct self-audits; to require proof be retained that a self-audit was completed; and to require that originating depository financial institutions (ODFIs) and receiving depository financial institutions (RDFIs) specifically warrant that they have completed self-audits. The effective date of these changes was December 17, 1999.

2. Point-of-Purchase Electronic Check Transactions

NACHA has adopted an interim rule to provide a legal framework for the conversion of checks to ACH debit entries at the point-of-purchase. The interim rule expands the definition of Prearranged Payment and Deposit (PPD) format in the ACH Rules to allow this format to be used to initiate a one-time ACH debit entry to a Receiver's account for purchases made in person at the point-of-purchase. The implementation period for the interim rule began on September 17, 1999 and will continue through September 14, 2000.

NACHA also has adopted a final rule, which will take effect when the interim rule ends, that amends the ACH Rules by establishing a legal framework to allow for the conversion of checks to ACH debit entries at the point-of-purchase. The amendment creates a new Standard Entry Class (SEC) code, POP (Point-of-Purchase Entry), that will allow for an Originator to initiate a one-time ACH debit entry to a Receiver's account for purchases made in person at the point-of-purchase. This rule change will become effective as of September 15, 2000.

3. Accounts Receivable Check Truncation

NACHA has adopted an interim rule expanding the definition of the PPD format in the ACH Rules to allow Originators to utilize the PPD format to truncate checks received through the U.S. mail for payment for goods or services and convert them to ACH debit entries. The rule provides a legal framework to allow pilot tests of lockbox check truncation. The rule requires the Originator to provide the consumer with notice of the check truncation policy prior to receiving the first check payment that will be truncated. The consumer must authorize the entry in writing, signed or similarly authenticated, unless the notice to the consumer indicates that the item will be truncated if the consumer doesn't provide the Originator with written notice not to truncate. The implementation period for the interim rule began on December 17, 1999, and will continue through December 15, 2000.

4. ACH Operator Definition

NACHA has revised the definition of ACH Operator to more clearly define the role and functions assumed by ACH Operators when clearing and settling

ACH transactions. This revision became effective June 18, 1999.[1]

5. Cross-Border Payments

NACHA has amended the ACH Rules to establish two new SEC codes, CBR (Corporate Cross-Border Transactions) and PBR (Consumer Cross-Border Transactions), to be used for the origination and receipt of cross-border ACH entries. The amendment will become effective as of September 15, 2000.

6. Re-Presented Check Entries

NACHA has established a new SEC code to provide commercial depositors and their financial institutions with a legal framework and technical specifications to transmit ACH debit entries to collect checks that have been returned for insufficient or uncollected funds. The new code will become effective as of September 15, 2000.

7. Types of Accounts for ACH Transactions

NACHA has established two new sets of transaction codes to support the transmission of ACH credit and debit entries to financial institutions' general ledger accounts and the transmission of credit entries to loan accounts. This change to the ACH Rules will become effective as of September 15, 2000.

B. ACH Rule Changes That We Are Accepting

We are accepting all of the changes to the ACH Rules that are reflected in the 2000 Rule Book with two exceptions discussed in Section C below. Under the interim rule, there are still 11 provisions of the ACH Rules that Part 210 preempts, except that we are broadening our preemption of the ACH rules enforcement provisions to include the self-audit requirements (see 210.2(d)(3)). No change to the 11 preempted provisions is necessary to reflect our preemption of the changes related to types of accounts, because we were aware of NACHA's intention to permit the crediting of ACH credits to general ledger and loan accounts and had already preempted that provision of the ACH Rules for Federal payments other than vendor payments. See 64 FR 17474.

All of the ACH rule changes that we are accepting are effective as of the effective date of publication of this interim rule or NACHA's effective date for the rule change, whichever is later.

Point-of-Purchase Electronic Check Transactions

We're accepting both the interim and the final ACH rule changes that allow an Originator to initiate a one-time ACH debit entry to a Receiver's account for purchases made in person at the point-of-purchase.

We are currently engaged in pilot programs with several agencies to test the conversion of checks to ACH debit entries at the point-of-purchase. We believe that these transactions could expand the utility of the ACH system and might provide useful and cost-effective applications for Government agency collections. We also recognize, however, that the conversion of checks to ACH debits raises various issues, including the kind of disclosure and authorization that is appropriate for such transactions and the kinds of checks that can or should be converted.

While we believe that the establishment of a legal framework for such transactions is desirable, it's difficult to determine the appropriate responsibilities and liabilities of the parties before the application of this technology has been tested. Moreover, attempting to establish a definitive legal framework for point-of-purchase check conversion by agencies at this time could hamper innovation and impede operational flexibility. Because of the diversity and unique concerns of Government check collections, it's unclear whether the model of POP check conversion will be workable or appropriate on a Government-wide basis. Accordingly, although we're accepting the NACHA's interim and final rule changes in order to provide a basic legal foundation for these transactions, we anticipate that we would seek public comment on the rules governing POP check conversion before engaging in POP check conversion on anything other than a pilot basis. In addition, in view of the experimental nature of pilot programs, it is possible that our pilots may not conform to all of the requirements otherwise imposed under the ACH Rules. It is our intention, however, to ensure that any on-going Government POP check conversion programs that we might establish in the future will conform to the ACH Rules that we incorporate in Part 210.

Accounts Receivable Check Truncation

We're accepting the Interim Rule that provides a legal framework for Originators to truncate checks received through the mail in payment for goods or services and convert them to ACH debit entries. The rule requires the Originator to provide the consumer with notice of the check truncation policy prior to receiving the first check payment that will be truncated. The Receiver must authorize the truncation, either by "opting-in" (meaning that the Receiver must authorize the entry in writing, signed or similarly authenticated), or "opting-out" (meaning that the notice to the Receiver indicates that the Receiver may provide the Originator with written notice not to truncate the check).

Although we're not engaged in lockbox check truncation at this time, we are aware that lockbox check truncation could offer significant cost savings for Government collections. However, we're concerned that consumers understand and consent to such transactions. It is therefore our intention to seek public comment on the rules governing lockbox check truncation before engaging in lockbox check truncation other than on a pilot basis. As discussed above in the context of POP check conversion, pilot programs, by virtue of their very nature in exploring new or novel applications of technology, may not conform to all of the requirements otherwise imposed under the ACH Rules.

ACH Operator Definition

We are accepting the revisions to the ACH Operator definition.

Cross-Border Payments

We are accepting the rules establishing two new SEC codes to be used for the origination and receipt of cross-border ACH entries. We don't anticipate that agencies will be utilizing these codes for the origination or receipt of cross-border entries in the immediate future. However, it is possible that at some future time, agencies may wish to utilize these codes.

Re-Presented Check Entries

We're accepting the rule changes that establish a new SEC code to provide commercial depositors and their financial institutions with a legal framework and technical specifications to transmit ACH debit entries to collect checks that have been returned for insufficient or uncollected funds. We believe that the ability to use ACH debit entries in this manner may facilitate the Government's ability to collect on checks that have been returned unpaid.

[1] Part 210 adopted the ACH Rules published in NACHA's 1999 rule book (including rule changes with an effective date on or before September 17, 1999) as the rules governing all Government ACH transactions, with certain exceptions. Although NACHA's effective date for the ACH Operator definition was June 18, 1999, the changes to the definition were not published in the 1999 rule book and thus not previously incorporated in Part 210.

C. ACH Rule Changes That We Aren't Accepting

Self-Audit Requirements

We aren't accepting the ACH Rule changes related to the self-audit requirements. The purpose of the changes to the self-audit requirements is to promote better compliance with the ACH Rules. We believe that compliance with the ACH Rules is important and we are working with agencies to achieve Government-wide compliance with all ACH Rule requirements, including applicable time frames. Federal agencies are subject to oversight and audit requirements unique to the Federal Government. For example, the Office of the Inspector General and the General Accounting Office periodically review and audit various aspects of Federal agencies' operations. Accordingly, we believe that the imposition of a separate ACH compliance self-examination is both unnecessary and unlikely to significantly enhance the Government's compliance with Part 210.

Types of Accounts for ACH Transactions

We're not accepting, for Federal payments other than vendor payments, the changes to the ACH Rules that permit the crediting of ACH credits to a financial institution general ledger account or to a loan account. Section 210.5 provides that ACH credit entries representing Federal payments other than vendor payments must be deposited to an account at a financial institution in the name of the recipient, with three exceptions. As discussed in the rulemaking release that accompanied our adoption of this requirement, the term "account" for purposes of § 210.5 is intended to mean a deposit account and not a loan account or general ledger account. See 64 FR 17472, 17474 (1999). We believe that important consumer protections are associated with the crediting of Federal payments to a deposit account, including those available under Regulation E (12 CFR Part 205) and Regulation DD (12 CFR Part 230), as well as the availability of Federal deposit or share insurance. Therefore, we're not accepting this change to the ACH Rules with respect to payments other than vendor payments.

D. Section-by-Section Analysis

Section 210.2(a)

We are amending the definition of ACH Rules to reflect NACHA's name change from the National Automated Clearing House Association to NACHA—The Electronic Payments Association.

Section 210.2(d)

We are amending the definition of "applicable ACH Rules" at section 210.2(d) to reference the rules published in NACHA's 2000 rule book rather than the rules published in NACHA's 1999 rule book. In addition, we are amending section 210.2(d)(3) to exclude the self-audit requirements of the ACH Rules.

Section 210.3(b)

We are amending subsection 210.3(b), "Incorporation by reference—applicable ACH Rules," by replacing the references to the ACH Rules as published in the 1999 rule book with references to the ACH Rules as published in the 2000 rule book.

Section 210.5

We are revising section 210.5, "Account requirements for Federal payments," by specifically providing in subsection 210.5(a) that an ACH entry representing a Federal payment other than a vendor payment must be deposited into a deposit account at a financial institution. This revision of the regulatory language does not represent a substantive change from the existing rule since, as discussed above, the rulemaking release that accompanied our adoption of this requirement indicated that § 210.5 was intended to require that Federal payments other than vendor payments must be deposited to a deposit account and not a loan account or general ledger account. See 64 FR 17472, 17474 (1999).

We also are amending the first sentence of § 210.5 to read, "Notwithstanding ACH Rules 2.1.2, 4.1.3, and Appendix Two, section 2.2 (listing general ledger and loan accounts as permissible transaction codes) * * *" in order to clarify that the requirements of § 210.5 preempt the ACH Rules that would otherwise allow ACH credits generally to be sent to general ledger or loan accounts.

III. Procedural Requirements

A. Request for Comment

We invite comment on all aspects of the interim rule.

B. Request for Comment on Plain Language

On June 1, 1998, the President issued a memorandum directing each agency in the Executive branch to write its rules in plain language. This directive is effective for all new proposed and final rulemaking documents issued on or after January 1, 1999. We invite comment on how to make this interim rule clearer. For example, you may wish to discuss: (1) Whether we have organized the material to suit your needs; (2) whether the requirements of this interim rule are clear; or (3) whether there is something else we could do to make this rule easier to understand.

C. Notice and Comment; Effective Date

We find that good cause exists for issuing this interim rule without prior notice and comment. Under the Administrative Procedure Act, an agency is permitted to issue a rule without prior notice and comment when the agency for good cause finds that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B). We believe that it is important to address the publication of new ACH rules as quickly as possible in order to mitigate the uncertainty and inconvenience to financial institutions that would result from a time lag in responding to NACHA's rule changes. When we proposed to address changes to the ACH Rules by reviewing and responding to rule changes on an annual basis, we received many comments expressing concern over the potential consequences of such a time lag. For these reasons, we conclude that we have good cause for issuing this interim rule without prior notice and comment. Nevertheless, we are inviting comment and will consider the comments received. For these reasons we also find that good cause exists to make this interim rule effective without a delayed effective date.

D. Executive Order 12866

This interim rule does not meet the criteria for a "significant regulatory action" as defined in Executive Order 12866. Therefore, the regulatory review procedures contained therein do not apply.

E. Regulatory Flexibility Act

Because notice and public comment are not required, the Regulatory Flexibility Act (5 U.S.C. 601) does not apply.

F. Paperwork Reduction Act

We ask for no new collections of information in this final rule. Therefore, the Paperwork Reduction Act (44 U.S.C. 3501) does not apply.

List of Subjects in 31 CFR Part 210

Automated Clearing House, Electronic funds transfers, Financial institutions, Fraud, Incorporation by reference.

Authority and Issuance

For the reasons set out in the preamble, 31 CFR Part 210 is amended as follows:

PART 210—FEDERAL GOVERNMENT PARTICIPATION IN THE AUTOMATED CLEARING HOUSE

1. The authority citation for part 210 continues to read as follows:

Authority: 5 U.S.C. 5525; 12 U.S.C. 391; 31 U.S.C. 321, 3301, 3302, 3321, 3332, 3335, and 3720.

2. Revise § 210.2(a) and (d) to read as follows:

§ 210.2 Definitions.

* * * * *

(a) *ACH Rules* means the Operating Rules and the Operating Guidelines published by NACHA—The Electronic Payments Association (NACHA), a national association of regional member clearing house associations, ACH Operators and participating financial institutions located in the United States.

* * * * *

(d) *Applicable ACH Rules* means the ACH Rules with an effective date on or before September 15, 2000, as published in Parts I, II, and IV of the "2000 ACH Rules: A Complete Guide to Rules & Regulations Governing the ACH Network," except:

(1) ACH Rule 1.1 (limiting the applicability of the ACH Rules to members of an ACH association);

(2) ACH Rule 1.2.2 (governing claims for compensation);

(3) ACH Rule 1.2.4; 2.2.1.10; Appendix Eight and Appendix Eleven (governing the enforcement of the ACH Rules, including self-audit requirements);

(4) ACH Rules 2.2.1.8; 2.6; and 4.7 (governing the reclamation of benefit payments);

(5) ACH Rule 8.3 and Appendix Two (requiring that a credit entry be originated no more than two banking days before the settlement date of the entry—see definition of "Effective Entry Date" in Appendix Two).

* * * * *

3. Revise § 210.3(b) to read as follows:

§ 210.3 Governing law.

* * * * *

(b) *Incorporation by reference—applicable ACH Rules.* (1) This part incorporates by reference the applicable ACH Rules, including rule changes with an effective date on or before September 15, 2000, as published in Parts I, II, and IV of the "2000 ACH Rules: A Complete Guide to Rules & Regulations Governing the ACH Network." The Director of the Federal Register approves this incorporation by reference in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. Copies of the "2000 ACH Rules" are available from NACHA—The Electronic Payments Association, 13665 Dulles Technology Drive, Suite 300, Herndon, Virginia 20171. Copies also are available for public inspection at the Office of the Federal Register, 800 North Capitol Street, NW., Suite 700, Washington, D.C.

(2) Any amendment to the applicable ACH Rules that takes effect after September 15, 2000, shall not apply to Government entries unless the Service expressly accepts such amendment by publishing notice of acceptance of the amendment to this part in the **Federal Register**. An amendment to the ACH Rules that is accepted by the Service shall apply to Government entries on the effective date of the rulemaking specified by the Service in the **Federal Register** document expressly accepting such amendment.

4. Revise § 210.5 to read as follows:

§ 210.5 Account requirements for Federal payments.

(a) Notwithstanding ACH Rules 2.1.2, 4.1.3, and Appendix Two, section 2.2 (listing general ledger and loan accounts as permissible transaction codes), an ACH credit entry representing a Federal payment other than a vendor payment shall be deposited into a deposit account at a financial institution. For all payments other than vendor payments, the account at the financial institution shall be in the name of the recipient, except as provided in paragraph (b) of this section.

* * * * *

Dated: April 4, 2000.

Richard L. Gregg,

Commissioner.

INFORMATION ABOUT THE SUPERINTENDENT OF DOCUMENTS' SUBSCRIPTION SERVICE

Know when to expect your renewal notice and keep a good thing coming. To keep our subscription prices down, the Government Printing Office mails each subscriber *only one renewal notice*. You can learn when you will get your renewal notice by checking the number that follows month/year code on the top line of your label *as shown in this example:*

A renewal notice will be sent approximately 90 days **before the shown date.**

```
AFR SMITH212J                DEC97 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20704
```

A renewal notice will be sent approximately 90 days **before the shown date.**

```
AFRDO SMITH212J              DEC97 R 1
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20704
```

To be sure that your service continues without interruption, please return your renewal notice promptly. If your subscription service is discontinued, simply send your mailing label from any issue to the Superintendent of Documents, Washington, DC 20402–9372 with the proper remittance. Your service will be reinstated.

To change your address: Please SEND YOUR MAILING LABEL, along with your new address to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To inquire about your subscription service: Please SEND YOUR MAILING LABEL, along with your correspondence, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To order a new subscription: Please use the order form provided below.

Public Laws

106th Congress, 2nd Session, 2000

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 106th Congress, 2nd Session, 2000.

Individual laws also may be purchased from the Superintendent of Documents, U.S. Government Printing Office. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws or access the online database at http://www.access.gpo.gov/nara/index.html

Federal Register

4–10–00 Monday
Vol. 65 No. 69 Apr. 10, 2000
Pages 18871–19292

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512-1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $555, or $607 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $220. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 65 FR 12345.

Printed on recycled paper.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 18, 2000, at 9:00 a.m.
WHERE: Conference Room, Suite 700
Office of the Federal Register
800 North Capitol Street, NW.
Washington, DC
(3 blocks north of Union Station Metro)
RESERVATIONS: 202–523–4538

Rules and Regulations

Federal Register
Vol. 65, No. 69
Monday, April 10, 2000

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

Agricultural Marketing Service

7 CFR Part 989

[Docket No. FV00–989–4 IFR]

Raisins Produced From Grapes Grown in California; Final Free and Reserve Percentages for 1999–2000 Crop Natural (Sun-Dried) Seedless and Zante Currant Raisins

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This rule establishes final volume regulation percentages for 1999–2000 crop Natural (sun-dried) Seedless raisins (Naturals) and Zante Currant raisins (Zantes) covered under the Federal marketing order for California raisins (order). The volume regulation percentages are 85 percent free and 15 percent reserve for Naturals and 51 percent free and 49 percent reserve for Zantes. The order regulates the handling of raisins produced from grapes grown in California and is administered locally by the Raisin Administrative Committee (Committee). The volume regulation percentages are intended to help stabilize raisin supplies and prices, and strengthen market conditions.

DATES: Effective April 10, 2000. Comments received by June 9, 2000, will be considered prior to issuance of a final rule.

ADDRESSES: Interested persons are invited to submit written comments concerning this rule. Comments must be sent to the Docket Clerk, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, room 2525–S, P.O. Box 96456, Washington, DC 20090–6456; Fax: (202) 720–5698. All comments should reference the docket number and the date and page number of this issue of the Federal Register and will be made available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Maureen T. Pello, Marketing Specialist, California Marketing Field Office, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 2202 Monterey Street, suite 102B, Fresno, California 93721; telephone: (559) 487–5901, Fax: (559) 487-5906; or George Kelhart, Technical Advisor, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, room 2525–S, P.O. Box 96456, Washington, DC 20090–6456; telephone: (202) 720–2491, or Fax: (202) 720–5698.

Small businesses may request information on complying with this regulation by contacting Jay Guerber, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, P.O. Box 96456, room 2525–S, Washington, DC 20090–6456; telephone: (202) 720–2491, Fax: (202) 720–5698, or E-mail: Jay.Guerber@usda.gov.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement and Order No. 989 (7 CFR part 989), both as amended, regulating the handling of raisins produced from grapes grown in California, hereinafter referred to as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the "Act."

The Department of Agriculture (Department) is issuing this rule in conformance with Executive Order 12866.

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. Under the order provisions now in effect, final free and reserve percentages may be established for raisins acquired by handlers during the crop year. This rule establishes final free and reserve percentages for Naturals and Zantes for the 1999–2000 crop year, which began August 1, 1999, and ends July 31, 2000. This rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and request a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing, the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule establishes final volume regulation percentages for 1999–2000 crop Naturals and Zantes covered under the order. The volume regulation percentages are 85 percent free and 15 percent reserve for Naturals and 51 percent free and 49 percent reserve for Zantes. Free tonnage raisins may be sold by handlers to any market. Reserve raisins must be held in a pool for the account of the Committee and are disposed of through various programs authorized under the order. For example, reserve raisins may be sold by the Committee to handlers for free use or to replace part of the free tonnage raisins they exported; used in diversion programs; carried over as a hedge against a short crop the following year; or disposed of in other outlets not competitive with those for free tonnage raisins, such as government purchase, distilleries, or animal feed.

The volume regulation percentages are intended to help stabilize raisin supplies and prices, and strengthen market conditions. Final percentages for Zantes were recommended by the Committee on January 13, 2000, and for Naturals on February 11, 2000.

Computation of Trade Demands

Section 989.54 of the order prescribes the procedures and time frames to be followed in establishing volume regulation. This includes methodology used to calculate percentages. Pursuant to § 989.54(a) of the order, the Committee met on August 12, 1999, to review shipment and inventory data, and other matters relating to the supplies of raisins of all varietal types.

The Committee computed a trade demand for each varietal type for which a free tonnage percentage might be recommended. Trade demand is computed using a formula specified in the order and, for each varietal type, is equal to 90 percent of the prior year's shipments of free tonnage and reserve tonnage raisins sold for free use into all market outlets, adjusted by subtracting the carryin on August 1 of the current crop year and by adding the desirable carryout at the end of that crop year. As specified in § 989.154(a), the desirable carryout for each varietal type is equal to the shipments of free tonnage raisins of the prior crop year during the months of August, September, and one-half of October. In accordance with these provisions, the Committee computed and announced 1999–2000 trade demands for Naturals and Zantes at 254,475 and 1,855 tons, respectively, as shown below.

COMPUTED TRADE DEMANDS

[Natural condition tons]

	Naturals	Zantes
Prior year's shipments	[1] 314,013	3,542
Multiplied by 90 percent	0.90	0.90
Equals adjusted base	282,612	3,188
Minus carryin inventory	101,946	1,906
Plus desirable carryout	73,809	573
Equals computed trade demand	254,475	1,855

[1] Pursuant to § 989.54(a), 1996–97 shipments were utilized to compute trade demand because 1998–99 shipments were limited.

Computation of Preliminary Volume Regulation Percentages

As required under § 989.54(b) of the order, the Committee met on October 1, 1999, and announced a preliminary crop estimate of 294,519 tons for Naturals. This estimate was almost 15 percent lower than the 10-year average of 346,325 tons. Naturals are the major varietal type of California raisins. Combining the carryin inventory of 101,946 tons with the 294,519-ton crop estimate resulted in a total available supply of 396,465 tons, which was much higher than the 254,475-ton trade demand. Thus, the Committee determined that volume regulation for Naturals was warranted. The Committee announced preliminary free and reserve percentages for Naturals which released 65 percent of the computed trade demand since the field price had not yet been established. The preliminary percentages were 56 percent free and 44 percent reserve. The Committee authorized its staff to modify the preliminary percentages to release 85 percent of the trade demand once the field price was established. The field price was established on October 22, 1999, and the preliminary percentages were thus modified to 73 percent free and 27 percent reserve.

Also at its October 1, 1999, meeting, the Committee announced a preliminary crop estimate for Zantes at 4,187 tons, which is comparable to the 10-year average of 4,463 tons. Combining the carryin inventory of 1,906 tons with the 4,187-ton crop estimate resulted in a total available supply of 6,093 tons, which is significantly greater the 1,855-ton trade demand. Thus, the Committee determined that volume regulation for Zantes was warranted. The Committee announced preliminary free and reserve percentages for Zantes which released 65 percent of the computed trade demand since field price had not yet been established. The preliminary percentages were 29 percent free and 71 percent reserve. Like Naturals, the Committee authorized its staff to modify the preliminary percentages to release 85 percent of the trade demand once the field price was established. The field price was established on October 12, 1999, and the preliminary percentages were thus modified to 38 percent free and 62 percent reserve. As in past seasons, the Committee submitted its marketing policy to the Department for review. In addition, the Committee determined that volume regulation was not warranted for the other varietal types of raisins covered under the order.

Computation of Final Volume Regulation Percentages

Pursuant to §§ 989.54(c) and (d) of the order, the Committee met on January 12, 2000, and announced interim percentages for Zantes at 50.75 percent free and 49.25 percent reserve. These interim percentages were based on a revised Zante crop estimate of 3,650 tons. At that meeting, the Committee also computed final percentages for Zantes which, when applied to the final 3,650-ton crop estimate, tend to release the full Zante trade demand. Final percentages compute to 51 percent free and 49 percent reserve.

The Committee met on February 11, 2000, and announced interim percentages for Naturals at 84.75 percent free and 15.25 percent reserve. These interim percentages were based on a revised crop estimate of 298,477 tons. The Committee also computed final percentages for Naturals which, when applied to the final 298,477-ton crop estimate, tend to release the full trade demand. Final percentages compute to 85 percent free and 15 percent reserve. The Committee's calculations to arrive at final percentages for Naturals and Zantes are shown in the table below.

FINAL VOLUME REGULATION PERCENTAGES

[Tonnage as natural condition weight]

	Naturals	Zantes
Trade demand	254,475	1,855
Divided by crop estimate	298,477	3,650
Equals free percentage	85	51
100 minus free percentage equals reserve percentage	15	49

In addition, the Department's "Guidelines for Fruit, Vegetable, and Speciality Crop Marketing Orders" (Guidelines) specify that 110 percent of recent years' sales should be made available to primary markets each season for marketing orders utilizing reserve pool authority. This goal will be met for Naturals and Zantes by the establishment of final percentages which release 100 percent of the trade demand and the offer of additional reserve raisins for sale to handlers under the "10 plus 10 offers." As specified in § 989.54(g), the 10 plus 10 offers are two offers of reserve pool raisins which are made available to handlers during each season. For each such offer, a quantity of reserve raisins equal to 10 percent of the prior year's shipments is made available for free use. Handlers may sell their 10 plus 10 raisins to any market.

For Naturals, both 10 plus 10 offers will be held in June 2000 where a total of about 44,000 tons of raisins will be made available to handlers. This quantity is less than the amount specified in the order. As previously stated, the Committee utilized 1996–97 shipments of 314,013 tons as a base to compute trade demand because 1998–99 shipments were limited. Similarly, as specified in § 989.54(g), 1996-97 shipments were used as a base to compute the amount of tonnage to be made available in the 10 plus 10 offers. Thus, 31,402 tons should be made available in each of the 10 plus 10 offers (62,803 tons total). However, this amount is not available in the reserve. Thus, all of the reserve pool raisins will be made available to handlers for free use through the 10 plus 10 offers.

Adding the 44,000 tons of 10 plus 10 raisins to the 254,475-ton trade demand figure, plus 101,946 tons of 1998-99

carryin inventory equates to about 400,423 tons natural condition raisins, or 375,893 tons packed raisins, that will be made available for free use, or to the primary market. This is 136 percent of the quantity of Naturals shipped during the 1998–99 crop year (295,401 natural condition tons or 277,305 packed tons).

For Zantes, both Zante 10 plus 10 offers were made available simultaneously in early February 2000 and 708 tons of raisins were purchased by handlers. Adding the 708 tons of 10 plus 10 raisins to the 1,855 ton trade demand figure, plus 1,906 tons of 1998–99 carryin inventory equates to 4,469 tons natural condition raisins, or about 3,985 tons packed raisins, made available for free use, or to the primary market. This is 126 percent of the quantity of Zantes shipped during the 1998–99 crop year (3,542 natural condition tons or 3,158 packed tons).

In addition to the 10 plus 10 offers, § 989.67(j) of the order provides authority for sales of reserve raisins to handlers under certain conditions such as a national emergency, crop failure, change in economic or marketing conditions, or if free tonnage shipments in the current crop year exceed shipments of a comparable period of the prior crop year. Such reserve raisins may be sold by handlers to any market. When implemented, these additional offers of reserve raisins make even more raisins available to primary markets which is consistent with the Department's Guidelines.

Initial Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities. Accordingly, AMS has prepared this initial regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 20 handlers of California raisins who are subject to regulation under the order and approximately 4,500 raisin producers in the regulated area. Small agricultural service firms have been defined by the Small Business Administration (13 CFR 121.201) as those having annual receipts of less than $5,000,000, and small agricultural producers are defined as those having annual receipts of less than $500,000. Thirteen of the 20 handlers subject to regulation have annual sales estimated to be at least $5,000,000, and the remaining 7 handlers have sales less than $5,000,000, excluding receipts from any other sources. No more than 7 handlers, and a majority of producers, of California raisins may be classified as small entities.

Pursuant to § 989.54(d) of the order, this rule establishes final volume regulation percentages for 1999-2000 crop Natural and Zante raisins. The volume regulation percentages are 85 percent free and 15 percent reserve for Naturals and 51 percent free and 49 percent reserve for Zantes. Free tonnage raisins may be sold by handlers to any market. Reserve raisins must be held in a pool for the account of the Committee and are disposed of through certain programs authorized under the order.

Volume regulation is warranted this season for Naturals because the final crop estimate of 298,477 tons combined with the carryin inventory of 101,946 tons results in a total available supply of 400,423 tons, which is about 57 percent higher than the 254,475-ton trade demand. Volume regulation is warranted for Zantes this season because the crop estimate of 3,650 tons combined with the carryin inventory of 1,906 tons results in a total available supply of 5,556 tons which is about 200 percent higher than the 1,855-ton trade demand. The volume regulation percentages are intended to help stabilize raisin supplies and prices, and strengthen market conditions.

Many years of marketing experience led to the development of the current volume regulation procedures. These procedures have helped the industry address its marketing problems by keeping supplies in balance with domestic and export market needs, and strengthening market conditions. The current volume regulation procedures fully supply the domestic and export markets, provide for market expansion, and help prevent oversupplies in the domestic market.

Raisin-variety grapes can be marketed as fresh grapes, crushed for use in the production of wine or juice concentrate, or dried into raisins. Annual fluctuations in the fresh grape, wine, and concentrate markets, as well as weather-related factors, cause fluctuations in raisin supply. These supply fluctuations can cause producer price instability and disorderly market conditions. Volume regulation is helpful to the raisin industry because it lessens the impact of such fluctuations and contributes to orderly marketing. For example, excluding the 1997–98 season for which complete data is not yet available, producer prices for Naturals have remained fairly steady between the 1992–93 through the 1998–99 seasons, although production has varied. As shown in the table below, production has varied from a low of 240,469 tons in 1998–99 to a high of 387,007 tons in 1993–94, or 61 percent. According to Committee data, during years of Natural volume regulation, the total producer return per ton, which includes proceeds from both free tonnage plus reserve pool raisins, has varied from a low of $901 in 1992–93 to a high of $1,049 in 1996–97, or 16 percent.

NATURAL SEEDLESS PRODUCER PRICES

Crop year	Production (natural condition tons)	Producer prices
1998–99	240,469	[1] $1,290
1997–98	382,448	[2] 925.50
1996–97	272,063	1,049
1995–96	325,911	1,007
1994–95	378,427	928
1993–94	387,007	904
1992–93	371,516	901

[1] No volume regulation.
[2] Return to date, reserve pool still open.

In addition, the Committee is implementing an export program for Naturals. Through this program, the Committee hopes to export more Naturals thereby helping to build and maintain export markets, and ultimately improving producer returns. Volume regulation helps the industry not only to manage its supply of raisins, but also maintain market stability.

Regarding Zantes, Zante production is much smaller than that of Naturals. Volume regulation has been implemented for Zantes during the 1994–95, 1995–96, 1997–98, and 1998–99 seasons. Various programs to utilize reserve Zantes were implemented when volume regulation was in effect during the 1994–95, 1995–96, 1997–98, and 1998–99 seasons. As shown in the table following this paragraph, although production varied during those years, volume regulation helped to reduce inventories, and helped to strengthen total producer prices (free tonnage plus reserve Zantes) from $412.56 per ton in 1994–95 to an estimated high of $730 per ton in 1997–98. The Committee is implementing an export program for Zantes, in addition to Naturals. Through this program, the Committee hopes to export more Zantes, thereby continuing to reduce the industry's oversupply, helping to build export markets, and ultimately improving producer returns. Volume regulation helps the industry not only to manage oversupplies of raisins, but also maintain market stability.

ZANTE CURRANT INVENTORIES AND PRODUCER PRICES DURING YEARS OF VOLUME REGULATION

[* Natural condition tons]

Crop year	Production *	Inventory *		Total season average producer price (per ton)
		Desirable	Physical	
1998–99	3,880	573	1,906	(1)
1997–98	4,826	694	1,188	2 $730.00
1996–97	4,491	987	549	3 1,150.00
1995–96	3,294	782	2,890	711.32
1994–95	5,377	837	4,364	412.56

[1] Data not yet available, reserve pool open.
[2] Estimate.
[3] No volume regulation.

Free and reserve percentages are established by variety, and usually in years when the supply exceeds the trade demand by a large enough margin that the Committee believes volume regulation is necessary to maintain market stability. However, volume regulation may also be utilized in short crop years so that the industry may utilize its export program as described to maintain its export markets and provide stability in the domestic market. Accordingly, in assessing whether to apply volume regulation or, as an alternative, not to apply such regulation, the Committee recommended only two of the nine raisin varieties defined under the order for volume regulation this season.

The free and reserve percentages established by this rule release the full trade demands and apply uniformly to all handlers in the industry, regardless of size. For Naturals, with the exception of the 1998–99 crop year, small and large raisin producers and handlers have been operating under volume regulation percentages every year since 1983–84. There are no known additional costs incurred by small handlers that are not incurred by large handlers. All handlers are regulated based on the quantity of raisins which they acquire from producers. While the level of benefits of this rulemaking are difficult to quantify, the stabilizing effects of the volume regulations impact both small and large handlers positively by helping them maintain and expand markets even though raisin supplies fluctuate widely from season to season. Likewise, price stability positively impacts small and large producers by allowing them to better anticipate the revenues their raisins will generate.

There are some reporting, recordkeeping and other compliance requirements under the order. The reporting and recordkeeping burdens are necessary for compliance purposes and for developing statistical data for maintenance of the program. The requirements are the same as those applied in past seasons. Thus, this action will not impose any additional reporting or recordkeeping burdens on either small or large handlers. The forms require information which is readily available from handler records and which can be provided without data processing equipment or trained statistical staff. The information collection and recordkeeping requirements have been previously approved by the Office of Management and Budget (OMB) under OMB Control No. 0581–0178. As with other, similar marketing order programs, reports and forms are periodically studied to reduce or eliminate duplicate information collection burdens by industry and public sector agencies. In addition, the Department has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule. Finally, interested persons are invited to submit information on the regulatory and informational impacts of this action on small businesses.

Further, Committee and subcommittee meetings are widely publicized in advance and are held in a location central to the production area. The meetings are open to all industry members, including small business entities, and other interested persons who are encouraged to participate in the deliberations and voice their opinions on topics under discussion.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at the following web site: http://www.ams.usda.gov/fv/moab/html. Any questions about the compliance guide should be sent to Jay Guerber at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

After consideration of all relevant material presented, including the Committee's recommendation, and other information, it is found that this interim final rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

This rule invites comments for a 60-day period on the establishment of final volume regulation percentages for 1999–2000 crop Natural and Zante raisins covered under the order. All comments received within the comment period will be considered prior to finalization of this rule.

Pursuant to 5 U.S.C. 553, it is also found and determined upon good cause

that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice prior to putting this rule into effect, and that good cause exists for not postponing the effective date of this rule until 30 days after publication in the **Federal Register** because: (1) The relevant provisions of this part require that the percentages designated herein for the 1999–2000 crop year apply to all Natural and Zante raisins acquired from the beginning of that crop year; (2) handlers are currently marketing 1999–2000 crop Natural and Zante raisins and this action should be taken promptly to achieve the intended purpose of making the full trade demands available to handlers; (3) handlers are aware of this action, which the Committee recommended at open meetings, and need no additional time to comply with these percentages; and (4) this interim final rule provides a 60-day comment period and any comments received will be considered prior to finalization of this rule.

List of Subjects in 7 CFR Part 989

Grapes, Marketing agreements, Raisins, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 989 is amended to read as follows:

PART 989—RAISINS PRODUCED FROM GRAPES GROWN IN CALIFORNIA

1. The authority citation for 7 CFR part 989 continues to read as follows:

Authority: 7 U.S.C. 601–674.

2. Section 989.253 is added to Subpart—Supplementary Regulations to read as follows:

Note: This section will not appear in the annual Code of Federal Regulations.

§ 989.253 Final free and reserve percentages for the 1999–2000 crop year.

The final percentages for standard Natural (sun-dried) Seedless and Zante Currant raisins acquired by handlers during the crop year beginning on August 1, 1999, which shall be free tonnage and reserve tonnage, respectively, are designated as follows:

Varietal type	Free-percentage	Reserve-percentage
Natural (sun-dried) Seedless	85	15
Zante Currant	51	49

Dated: April 4, 2000.

Robert C. Keeney,

Deputy Administrator, Fruit and Vegetable Programs.

BILLING CODE 3410–02–P

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Parts 71 and 80

[Docket No. 98–037–2]

Johne's Disease in Domestic Animals; Interstate Movement

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations regarding the interstate movement of domestic animals that have reacted to a test for paratuberculosis. First, we are replacing all references to "paratuberculosis" with references to "Johne's disease" to reflect a change in nomenclature. Second, we are identifying an official test for the detection of Johne's disease in domestic animals. Third, we are amending the requirements for moving animals interstate. These actions will update the regulations and remove restrictions on the interstate movement of animals that are positive to an official Johne's disease test that do not appear necessary to prevent the interstate spread of Johne's disease.

EFFECTIVE DATE: May 10, 2000.

FOR FURTHER INFORMATION CONTACT: Dr. Joseph S. VanTiem, Senior Staff Veterinarian, National Animal Health Programs, VS, APHIS, 4700 River Road Unit 43, Riverdale, MD 20737–1231; (301) 734–7716.

SUPPLEMENTARY INFORMATION:

Background

Paratuberculosis, also known as Johne's disease, is a disease caused by *Mycobacterium paratuberculosis*. This disease primarily affects cattle, sheep, goats, and other domestic, exotic, and wild ruminants. Paratuberculosis is a chronic and contagious enteritis that results in progressive wasting and eventual death. Clinical signs are rarely evident until 2 or 3 years after the initial infection, which usually occurs soon after birth. The organism is shed in large numbers in the feces of infected animals, and infection can be acquired by ingestion of organisms from contaminated food and water sources. The organisms can also be present in colostrum and milk of infected cows. The disease is nearly always introduced into a clean herd by an infected animal that does not show symptoms of the disease. Our regulations are intended to control the interstate spread of the disease in the United States.

The regulations in subchapter C of chapter I, title 9, Code of Federal Regulations (CFR), govern the interstate movement of animals to prevent the dissemination of livestock and poultry diseases in the United States. Parts 71 and 80 (referred to below as the regulations) are included in subchapter C. Part 71 relates to the interstate transportation of animals, poultry, and animal products. Part 80 pertains to the interstate movement of domestic animals that are paratuberculosis reactors. A paratuberculosis reactor is a domestic animal that has reacted to a test recognized by the Secretary of Agriculture for paratuberculosis.

On March 22, 1999, we published in the **Federal Register** (64 FR 13726–13732, Docket No. 98–037–1) a proposal to amend the regulations regarding the interstate movement of domestic animals affected with Johne's disease. We proposed to replace references to "paratuberculosis" with references to "Johne's disease", to identify an official test for Johne's disease, and to allow the interstate movement of domestic animals that are positive to the official Johne's disease test for slaughter purposes or the collection of germ plasm.

We solicited comments concerning our proposal for 60 days ending May 21, 1999. We received six comments by that date. They were from a national veterinary medical association, a State veterinary association, a beef association, two dairy associations, and a State advisory committee on Johne's disease. Two commenters supported the proposed rule. One commenter stated that he could not support the proposed rule. This commenter and the remaining commenters expressed concerns that are discussed below.

Movement of Animals for the Collection of Germ Plasm

Several commenters raised concerns related to our proposed provisions to allow the interstate movement of positive animals for the collection of germ plasm (semen, embryos, and ova). We stated in our proposal that artificial insemination and embryo transfer were considered to present a low risk of transmitting Johne's disease, and that allowing interstate movement of positive animals for germ plasm collection would allow herd owners to

salvage valuable genetics and continue an animal's lineage. One commenter took issue with our statement about low risk, maintaining that there is insufficient research to support our contention. One commenter mentioned that semen, embryos, and ova are not the only genetic materials that could be considered germ plasm. One commenter recommended that we allow interstate movement of positive animals only from herds that have achieved a certain status level under the United States Animal Health Association's (USAHA) Voluntary Johne's Disease Herd Status Program for Cattle, and that germ plasm be collected from other animals in a sanitized station on the premises. One commenter stated that many breeders enrolled in various voluntary Johne's disease programs are not interested in having an animal from a herd positive for Johne's disease on their property.

Based on these comments, and because germ plasm from positive animals may be collected without restriction on the premises of origin, this final rule will not allow the interstate movement of positive animals for germ plasm collection. Our proposed rule did not place any restrictions on the collection of germ plasm at the premises of origin, and we are not adding such provisions in this final rule.

In addition, because we are removing the proposed requirements for the interstate movement of positive animals for the collection of germ plasm, we have removed the definitions of *accredited veterinarian*, *germ plasm*, *permit*, and *premises of origin* from the proposed list of definitions in § 80.1. These terms were used and referenced in the aforementioned proposed requirements.

One commenter took exception to a portion of the discussion under the heading, "Executive Order 12866 and Regulatory Flexibility Act," that stated, "However, for most producers, the impact may be insignificant." The commenter stated that the impact of the proposed rule on a substantial number of seed stock producers will be very significant if overly vigorous administration of testing programs puts a significant number of seed stock producers out of business or reduces them to producing commercial milk products, which could have an international impact. This commenter further stated that the premature restriction of the movement of breeding animals could affect the rate of genetic gain in the United States, especially if the incidence of Johne's disease is as high as estimated. This commenter also stated that seed stock herds cannot be destroyed or locked up during the process of controlling Johne's disease.

Approximately 22 percent (25,670 herds) of U.S. dairy herds are affected with Johne's disease. In developing our proposal, we considered how breeding programs, and genetic gains, could be affected by restrictions on the interstate movement of animals that are positive to an official Johne's disease test. We proposed to limit the interstate movement of these animals, but we did not propose any quarantine or related measures, and we did not propose to require testing before interstate movement because mandatory testing programs are not currently supported by a majority of the cattle industry, partially due to the effect that testing might have on some seed stock producers. Industry sources indicated that when removing positive animals from a herd, most producers would choose to move the positive animals for slaughter purposes. Because we will allow the interstate movement of positive animals for slaughter purposes in this rule, and remove, among other things, requirements for permits and branding, seed stock producers will be able to implement more efficient and accelerated herd cleanup programs, if desired, and, thus, reduce the economic effect Johne's disease could have on their operations.

This rule will allow domestic animals that are positive to an official test for Johne's disease to be moved interstate only to a recognized slaughtering establishment or to an approved livestock facility for sale to such an establishment. However, there may be circumstances, including pilot projects, where other interstate movements may be appropriate. Therefore, this final rule provides that the Administrator may, upon request in specific cases, allow animals that are positive to an official Johne's disease test to be moved interstate to other locations and for other purposes under such conditions as the Administrator may prescribe in each case to prevent the spread of Johne's disease. The Administrator must notify the State animal health officials of the States involved of any such action.

Other Comments

One commenter stated that we should require serological tests for herd screening and allow the interstate movement of an animal from a herd only if the animal is negative when tested by an organism identification test.

As noted previously in this document, mandatory testing programs are not currently supported by a majority of the cattle industry. We believe that requiring serological testing of a herd prior to the interstate movement of an individual animal would be too restrictive and put too many constraints on herd owners. Therefore, at this time, we are only restricting the interstate movement of animals that are positive to an official Johne's disease test.

One commenter had concerns regarding the identification of specific officially recognized tests. One commenter stated that our use of the term "polymerase chain reaction (PCR)" was confusing, and noted that PCR is a process. The commenter who had concerns regarding the identification of specific officially recognized tests did not elaborate further.

We continue to believe that a standard test for Johne's disease is necessary and that a test that detects the presence of the *M. paratuberculosis* organisms in fecal samples is the most specific and reliable index of infection in live animals. As to the comment regarding PCR, we agree that PCR is a process. In our proposal, we stated, "Organism detection tests, such as fecal culture or polymerase chain reaction (PCR), detect the presence of the *M. paratuberculosis* organism in fecal samples."

Two commenters stated that there were loopholes in the proposed regulations that could contribute to the spread of Johne's disease, and one of these commenters stated that the loopholes could affect various voluntary programs. One of these commenters had concerns regarding the structure of the proposed changes for interstate movement.

The commenters who stated that there were loopholes in the proposed regulations did not identify those areas of the proposed regulations that they thought might contribute to the spread of Johne's disease or affect voluntary programs. The commenter who had concerns regarding the structure of the proposed changes did not elaborate further. We assume that these commenters were referring to the proposed requirements that would have allowed sexually intact animals that are positive to an official Johne's disease test to be moved interstate for the collection of germ plasm. As stated previously in this document, this final rule will not allow the interstate movement of positive animals for germ plasm collection. This final rule will allow domestic animals that are positive to an official Johne's disease test to be moved interstate only to a recognized slaughtering establishment or to an approved livestock facility for sale to such an establishment, or elsewhere only with specific authorization from the Administrator.

One commenter stated that new regulations should not be finalized until States have standardized control and testing programs. This commenter further stated that it may be best to eliminate the current regulations, pending the development of an appropriate proposed rule, because they cannot be enforced. This commenter also stated that he was unable to endorse any particular animal movement control systems at this time. Another commenter expressed disapproval that this rulemaking exposed the public to the existing regulations, which he maintains are "obsolete and disregarded."

The current regulations are outdated, and this rulemaking is intended to remove language that hinders State and industry voluntary programs that are attempting to reduce the national prevalence of Johne's disease. Prior to this final rule, the regulations provided that cattle and other domestic animals that had reacted to a test for Johne's disease could be moved interstate only to a recognized slaughtering establishment or to a specifically approved stockyard for sale to a recognized slaughter establishment. Prior to movement, cattle and other domestic animals had to be identified with an approved metal eartag that was attached to their left ear and bore a serial number and the inscription, "U.S. Reactor," or a similar State reactor tag. Cattle also had to be: (1) Branded with the letter "J" on their left hip near the tailhead; or (2) accompanied directly to slaughter by an APHIS or State representative; or (3) moved in vehicles closed with official seals that were applied and removed by an APHIS representative, State representative, accredited veterinarian, or an individual authorized for this purpose by an APHIS representative.

Based on this final rule, domestic animals that are positive to an official Johne's disease test may be moved interstate to a recognized slaughtering establishment or to an approved livestock facility for sale to such an establishment if they bear an official eartag, are shipped with an owner-shipper statement, and are moved to the destination in one continuous movement without unloading. We believe that these changes will allow herd owners to remove infected animals from their premises sooner and decrease the possibility of these animals infecting other animals on the premises. We also believe that these changes, compared to the previous requirements, will allow APHIS to better enforce restrictions on interstate movement.

One commenter stated that there needs to be an effective program to raise the level of awareness of Johne's disease among producers because only with an understanding of the disease and the mode of its transmission can broad-based support for control and eradication be gained. One commenter stated that control and eradication of Johne's disease requires producer and veterinary education, development of adequate diagnostic tests, design and implementation of herd testing and classification systems, and design of appropriate animal movement controls. One commenter stated that the regulations may need to be amended in the future to promote uniformity as States develop and implement Johne's disease control programs and to incorporate recommendations from future Johne's disease studies. Another commenter said that we should have included the voluntary herd status programs developed by USAHA's Johne's Disease Committee.

We agree that educating the beef and dairy industry and the public about Johne's disease is essential to control and eradication efforts. Some beef and dairy associations have taken steps to provide educational material regarding Johne's disease and other diseases of livestock to their members. APHIS has distributed educational material on Johne's disease as well as conducted training courses for our field veterinary medical officers. In addition, a classification system—the "voluntary herd status program" mentioned by the commenter above—has been developed by USAHA's Johne's Disease Committee. While APHIS supports the U.S. Voluntary Johne's Disease Herd Status Program for Cattle, we do not believe it is appropriate at this time to make it a federally-regulated activity and, therefore, have not made it part of this rulemaking.

In the future, the regulations may be further amended to include new technologies (including diagnostic tests) and standards from voluntary programs and to incorporate changes that may be necessary as States develop and implement their own Johne's disease control programs.

Therefore, for the reasons given in the proposed rule and in this document, we are adopting the proposed rule as a final rule, with the changes discussed in this document.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. The rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

This rule will establish an official test for Johne's disease. It also will make it easier to move domestic animals that are positive to an official Johne's disease test interstate to slaughter.

However, we do not anticipate that these changes will have a significant economic effect on small entities. Under the regulations in effect before this final rule, animals moved interstate to slaughter had to bear an eartag with a serial number and the inscription "U.S. Reactor" and be transported with a certificate. In addition, cattle also had to be branded with the letter "J" on their left hip, accompanied directly to slaughter by an APHIS or State representative, or moved in vehicles closed with official seals. We are removing these requirements and will simply require positive animals moving interstate to slaughter to bear an official eartag and be shipped with an owner-shipper statement. There are no direct costs related to these requirements, so herd owners will not experience a savings from the removal of these requirements. However, this rule will expedite the movement of animals by 1 to 5 days because herd owners will not have to wait to obtain the services of an APHIS or State representative prior to the interstate movement of their animals to slaughter. This may result in some small savings to herd owners.

In a recent study, APHIS examined the cost of Johne's disease on U.S. dairy cattle producers.[1] The study found that infected herds with at least 10 percent of the culled cows showing clinical signs of Johne's disease had an average disease-related cost to producers of $227 for each cow in the herd per year. Therefore, the disease-related costs for a 100 cow dairy with at least 10 percent of culled cows showing clinical disease signs of Johne's disease would be approximately $22,700 per year. By amending the regulations, we may be able to strengthen detection and control of Johne's disease, which should reduce the producers' Johne's disease-related costs. However, the reduction in disease-related costs is not likely to be significant for the reasons provided in the next paragraph.

We anticipate that this rule will affect primarily U.S. dairy cattle producers. In 1997, there were 116,680 dairy herds or farms in the United States. We estimate that about 22 percent (25,670 herds) of the U.S. dairy herds are affected with Johne's disease. The Small Business

[1] See *Johne's disease on U.S. DairyOperations*, National Animal Health Monitoring System, Dairy 1996, October, 1997.

Administration (SBA) considers a dairy farm a small entity if its annual receipts are $0.5 million or less. According to the 1992 Census of Agriculture, 95 percent of dairy producers are considered small entities under SBA guidelines. This rule should benefit dairy cattle producers, but for most producers, the economic effect of the rule may be insignificant. This is because on a per head basis only about 10 percent of the cattle will test positive, not all positive animals are likely to be moved interstate for slaughter, and, as noted earlier, there are no direct costs associated with the requirements we are removing.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12988

This final rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are in conflict with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

In accordance with section 3507(d) of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the information collection or recordkeeping requirements included in this final rule have been approved by the Office of Management and Budget (OMB). The assigned OMB control number is 0579–0148.

Regulatory Reform

This action is part of the President's Regulatory Reform Initiative, which, among other things, directs agencies to remove obsolete and unnecessary regulations and to find less burdensome ways to achieve regulatory goals.

List of Subjects

9 CFR Part 71

Animal diseases, Livestock, Poultry and poultry products, Quarantine, Reporting and recordkeeping requirements, Transportation.

9 CFR Part 80

Animal diseases, Livestock, Transportation.

Accordingly, we are amending 9 CFR parts 71 and 80 as follows:

PART 71—GENERAL PROVISIONS

1. The authority citation for part 71 continues to read as follows:

Authority: 21 U.S.C. 111–113, 114a, 114a–1, 115–117, 120–126, 134b, and 134f; 7 CFR 2.22, 2.80, and 371.2(d).

2. Section 71.3 is amended as follows:

a. In paragraph (a), by removing the word "paratuberculosis" and adding the words "Johne's disease" in its place.

b. By revising paragraph (c)(1) to read as set forth below.

c. By redesignating paragraphs (c)(2), (c)(3), and (c)(4) as paragraphs (c)(3), (c)(4), and (c)(5), respectively, and adding a new paragraph (c)(2) to read as set forth below.

d. In newly redesignated paragraph (c)(3), remove "; and" and add a period in its place.

§ 71.3 Interstate movement of diseased animals and poultry generally prohibited.

* * * * *

(c) * * *

(1) Domestic animals that have reacted to an official test for brucellosis, are not affected with any other disease referred to in this section, and are not tick infested may be moved interstate in accordance with part 78 of this chapter.

(2) Domestic animals that are positive to an official Johne's disease test, are not affected with any other disease referred to in this section, and are not tick infested may be moved interstate in accordance with part 80 of this chapter.

* * * * *

3. Part 80 is revised to read as follows:

PART 80—JOHNE'S DISEASE IN DOMESTIC ANIMALS

Sec.

80.1 Definitions.
80.2 General restrictions.
80.3 Movement of domestic animals that are positive to an official Johne's disease test.
80.4 Segregation of animals positive to an official Johne's disease test during interstate movement.

Authority: 21 U.S.C. 111–113, 114a-1, 115, 117, 120, 121, and 125; 7 CFR 2.22, 2.80, and 371.2(d).

§ 80.1 Definitions.

The following definitions apply to this part:

Administrator. The Administrator, Animal and Plant Health Inspection Service, or any person authorized to act for the Administrator.

APHIS. The Animal and Plant Health Inspection Service of the United States Department of Agriculture.

APHIS representative. An individual employed by APHIS who is authorized to perform the function involved.

Approved livestock facility. A stockyard, livestock market, buying station, concentration point, or any other premises that has been approved under § 71.20 of this chapter.

Area veterinarian in charge. An APHIS veterinarian authorized by the Administrator to supervise and manage the animal health work of APHIS in a specified area of the United States.

Interstate. From one State into or through any other State.

Johne's disease. An infectious and communicable disease that primarily affects cattle, sheep, goats, and other domestic, exotic, and wild ruminants, also known as paratuberculosis, caused by *Mycobacterium paratuberculosis.*

Moved. Shipped, transported, delivered, or received for movement, or otherwise aided, induced, or caused to be moved.

Official eartag. An identification eartag approved by APHIS as being tamper-resistant and providing unique identification for each animal. An official eartag may conform to the alpha-numeric National Uniform Eartagging System, or it may bear a valid premises identification number that is used in conjunction with the producer's livestock production numbering system to provide a unique identification number.

Official Johne's disease test. An organism detection test approved by the Administrator and conducted in a laboratory approved by the Administrator.[1]

Owner-shipper statement. A statement signed by the owner or shipper of animals, which states: The number of animals to be moved, the official eartag number of each animal, the species of the animals, points of origin and destination, the consignor and consignee, a statement that the animals are positive to an official Johne's disease test, and any additional information required by this part.

Premises identification number. A unique number assigned by the State animal health official to a livestock production unit that is, in the judgment of the State animal health official or area veterinarian in charge, epidemiologically distinct from other livestock production units. A premises

[1] A list of currently approved laboratories and the requirements for obtaining approval are available from the Diagnostic Bacteriology Laboratory, National Veterinary Services Laboratories, P.O. Box 844, Ames, Iowa 50010. the Administrator will approve laboratories to conduct an official Johne's disease test only after determining that the laboratory meets the check test proficiency requirements prescribed by the National Veterinary Services Laboratories. Approval will continue as long as such check test proficiency requirements are met on an annual basis.

identification number shall consist of the State's two-letter postal abbreviation followed by the premises' assigned number. A premises identification number may be used in conjunction with a producer's own livestock production numbering system to provide a unique identification number for an animal.

Recognized slaughtering establishment. A slaughtering establishment [2] operating under the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) or a State inspected slaughtering establishment.

State. Any of the 50 States, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the District of Columbia, and any territories and possessions of the United States.

State animal health official. The State official responsible for livestock and poultry disease control and eradication programs.

State representative. An individual employed in animal health work by a State or political subdivision of a State, and who is authorized by the State or political subdivision to perform tasks required by this part.

§ 80.2 General restrictions.

Domestic animals that are positive to an official Johne's disease test may not be moved interstate except in compliance with this part.

§ 80.3 Movement of domestic animals that are positive to an official Johne's disease test.

(a) *Movement of domestic animals for slaughter.* Domestic animals that are positive to an official Johne's disease test may be moved interstate for slaughter if:

(1) The animals are moved directly to a recognized slaughtering establishment or to an approved livestock facility for sale to a recognized slaughtering establishment;

(2) An owner-shipper statement that identifies the animals as positive to an official Johne's disease test accompanies the animals during the movement and is delivered to the consignee;

(3) Each animal bears an official eartag; and

(4) The animals are moved to the destination in one continuous movement without unloading.

(b) *Other movements.* The Administrator may, upon request in specific cases, allow domestic animals that are positive to an official Johne's disease test to be moved interstate other than as provided in paragraph (a) of this section, under such conditions as the Administrator may prescribe in each case to prevent the spread of Johne's disease. The Administrator will promptly notify the State animal health officials of the States involved of any such action.

(c) *Cleaning and disinfecting.* Each means of conveyance used to transport the animals must be cleaned and disinfected in accordance with § 71.6 of this chapter. The facilities in which the animals were maintained must be cleaned and disinfected in accordance with § 71.7 of this chapter.

§ 80.4 Segregation of animals positive to an official Johne's disease test during interstate movement.

Animals that are positive to an official Johne's disease test may not be moved interstate in a railroad car, boat, truck, or other vehicle containing healthy animals susceptible to Johne's disease unless all of the animals are for immediate slaughter, or unless the positive animals are kept separate from the other animals by a partition that is securely affixed to the sides of the vehicle and prevents the transfer of fecal matter from the animals positive to an official Johne's disease test to the healthy animals in the vehicle.

Done in Washington, DC, this 5th day of April 2000.

Bobby R. Acord,

Acting Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 00–8780 Filed 4–7–00; 8:45 am]

BILLING CODE 3410–34–U

[2] A list of recognized slaughtering establishments in any State may be obtained from an APHIS representative, the State animal health official, or a State representative.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2000–NM–84–AD; Amendment 39–11663; AD 2000–07–09]

RIN 2120–AA64

Airworthiness Directives; Boeing Model 737–600, –700, and 800 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Boeing Model 737–600, –700, and 800 series airplanes. This action requires a one-time inspection to detect loose nuts installed on the bolts at each end of the input rods connected to each elevator power control unit (PCU), and corrective action, if necessary. This amendment is prompted by reports of loose nuts on the bolts that connect the lower input crank arm and the vernier adjustment input rod of the elevator PCU. The actions specified in this AD are intended to detect and correct loose nuts on the bolts of the input crank arms of the elevator PCU, which could result in the loss of pivot bolts on the PCU and consequent loss of control of the airplane during takeoff and landing.

DATES: Effective April 25, 2000.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 25, 2000.

Comments for inclusion in the Rules Docket must be received on or before June 9, 2000.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2000–NM–84–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the **Federal Register**, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Kenneth W. Frey, Aerospace Engineer, Systems and Equipment Branch, ANM–130S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2673; fax (425) 227–1181.

SUPPLEMENTARY INFORMATION: The FAA received several reports indicating that operators found loose nuts on the bolts that connect the lower input crank arm and the vernier adjustment input rod of the elevator power control unit (PCU). Apparently, maintenance had not been accomplished on the PCU's since delivery of the airplanes from the manufacturer. One of the loose PCU input rod nuts was found on a production airplane during a line check. The loose nuts reported had been finger tightened, but had not been properly torqued on the bolts.

Loose nuts on the bolts of the input rod of the elevator PCU could result in the loss of pivot bolts on the crank arms of the elevator PCU's, and consequent

loss of control of the airplane during takeoff and landing.

Explanation of Relevant Service Information

The FAA has reviewed and approved Boeing Telegraphic Service Letter 737–SL–27–150, dated February 14, 2000, which describes procedures for a one-time visual inspection to determine if the nuts installed on the bolts at each end of the input rods connected to each elevator power control unit (PCU) are installed correctly, and tightening of any loose nut that is found.

Explanation of the Requirements of the Rule

Since an unsafe condition has been identified that is likely to exist or develop on other Boeing Model 737–600, –700, and –800 series airplanes of the same type design, this AD is being issued to prevent loss of control of the airplane during takeoff and landing due to loose nuts on the bolts of the input crank arms of the elevator PCU, and consequent loss of pivot bolts on the PCU. This AD requires a one-time general visual inspection to determine if the nuts installed on the bolts at each end of the input rods connected to each elevator PCU are installed correctly, and corrective action, if necessary. The actions are required to be accomplished in accordance with the telegraphic service letter described previously.

This AD also requires that operators report findings of loose nuts to the FAA.

Determination of Rule's Effective Date

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2000–NM–84–AD." The postcard will be date stamped and returned to the commenter.

Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

2000–07–09 Boeing: Amendment 39–11663. Docket 2000–NM–84–AD.

Applicability: Model 737–600, –700, and –800 series airplanes, line numbers 1 through 477 inclusive, certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent loss of control of the airplane during takeoff and landing due to loose nuts on the bolts of the input crank arms of the elevator power control unit (PCU), and consequent loss of pivot bolts, accomplish the following:

Note 2: For the purposes of this AD, a general visual inspection is defined as: "A visual examination of an interior or exterior area, installation, or assembly to detect obvious damage, failure, or irregularity. This level of inspection is made under normally available lighting conditions such as daylight, hangar lighting, flashlight, or droplight, and may require removal or opening of access panels or doors. Stands, ladders, or platforms may be required to gain proximity to the area being checked."

(a) Within 30 days after the effective date of this AD, perform a one-time general visual inspection to determine if the nuts installed on the bolts at each end of the input rods connected to each elevator PCU are installed correctly, in accordance with Boeing Telegraphic Service Letter 737–SL–27–150, dated February 14, 2000.

(1) If all bolts are protruding through the nuts, no further action is required by this AD.

(2) If any bolt does not protrude through the nut, prior to further flight, tighten the nut in accordance with the telegraphic service letter.

(b) Within 10 days after accomplishing the inspection required by this AD; or within 10 days after the effective date of this AD if the inspection was accomplished prior to the

effective date of this AD: Submit a report of any findings of loose nuts to the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; fax (425) 227–1181. The report must include the operator's name, the date the inspection was accomplished, the airplane line number, and the number of loose nuts found on that airplane. Information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2120–0056.

Alternative Methods of Compliance

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle ACO, FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

Special Flight Permits

(d) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Incorporation by Reference

(e) The actions shall be done in accordance with Boeing Telegraphic Service Letter 737–SL–27–150, dated February 14, 2000. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(f) This amendment becomes effective on April 25, 2000.

Issued in Renton, Washington, on March 30, 2000.

Donald L. Riggin,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. 2000–NM–87–AD; Amendment 39–11664; AD 2000–07–10]

RIN 2120–AA64

Airworthiness Directives; Boeing Model 747–200B, –300, –400, –400D, and –400F Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Boeing Model 747–200B, –300, –400, –400D, and –400F series airplanes. This action requires repetitive inspections to detect cracking of fire extinguisher discharge tubes in certain engine struts, and corrective action, if necessary. For certain airplanes, this action also provides for a modification of the fire extinguisher discharge tubes, which constitutes terminating action for the repetitive inspections. This amendment is prompted by reports that cracked fire extinguisher discharge tubes have been found in the engine struts on certain airplanes. The actions specified in this AD are intended to detect and correct cracked fire extinguishing tubes in the engine struts. In the event of an engine fire, such cracked tubes could reduce the amount of fire extinguishing agent that can be delivered to the engine, and could result in a fire spreading from the engine to the wing of the airplane.

DATES: Effective April 25, 2000.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 25, 2000.

Comments for inclusion in the Rules Docket must be received on or before June 9, 2000.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–114, Attention: Rules Docket No. 2000–NM–87–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Sulmo Mariano, Aerospace Engineer, Propulsion Branch, ANM–140S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2686; fax (425) 227–1181.

SUPPLEMENTARY INFORMATION: The FAA has recently received reports indicating that several operators have found cracked fire extinguisher discharge tubes in the number 2 and number 3 struts on several Boeing Model 747–400 series airplanes that are equipped with General Electric (GE) CF6–80C2 series engines. Further investigation revealed similarly cracked fire extinguisher discharge tubes on Boeing Model 747–400 series airplanes equipped with Pratt & Whitney PW4000 series engines, which incorporate a similar tube installation. The cause of the cracking has been attributed to installation preload and flexing of the tube due to motion between the wing and the strut.

The subject fire extinguisher discharge tubes extend from the fire extinguisher bottles to the number 2 and number 3 engine struts, and are intended to deliver fire extinguishing agent to the engine in the event of an engine fire. Similar designs exist in Boeing Model 747–200B and –300 series airplanes equipped with GE CF6–80C2 series engines. A cracked tube could reduce the amount of fire extinguishing agent that can be delivered to the engine. In the worst case (a broken tube), no fire-extinguishing agent would be delivered to the engine. This condition, if not corrected, could result in a fire spreading from the engine to the wing of the airplane.

Explanation of Relevant Service Information

The FAA has reviewed and approved Boeing Alert Service Bulletin 747–26A2266, dated March 3, 2000. That alert service bulletin describes procedures for repetitive detailed visual inspections to detect cracking of fire extinguisher discharge tubes in the number 2 and number 3 engine struts. The alert service bulletin also describes procedures for replacement of any cracked tube with a new or serviceable tube.

The FAA also has reviewed and approved Boeing Service Bulletin 747–26–2233, dated May 11, 1995. That service bulletin applies to Model 747–400 series airplanes equipped with Pratt & Whitney PW4000 series engines and describes procedures for a modification

of the fire extinguisher discharge tubes in the number 2 and number 3 engine struts, and a post-modification test of the fire extinguishing system to ensure that it functions properly. The modification is intended to prevent cracked fire extinguishing tubes by rerouting the fire extinguisher discharge tubes along the front spar and changing the orientation of two wire bundle clamps in the number 2 engine strut. Accomplishment of the modification eliminates the need for the repetitive inspections described previously on the subject airplanes.

Explanation of the Requirements of the Rule

Since an unsafe condition has been identified that is likely to exist or develop on other Boeing Model 747–200B, –300, –400, –400D, and –400F series airplanes of the same type design, this AD is being issued to detect and correct cracked fire extinguishing tubes in the engine struts. In the event of an engine fire, such cracked tubes could reduce the amount of fire extinguishing agent that can be delivered to the engine, and could result in a fire spreading from the engine to the wing of the airplane. This AD requires repetitive detailed visual inspections to detect cracking of fire extinguisher discharge tubes in certain engine struts, and replacement of any cracked tube with a new or serviceable tube. These actions are required to be accomplished in accordance with Boeing Alert Service Bulletin 747–26A2266. For Boeing Model 747–400 series airplanes equipped with Pratt & Whitney PW4000 series engines, this AD also provides for a modification of the fire extinguisher discharge tubes, which constitutes terminating action for the repetitive inspections. If accomplished, that modification is required to be accomplished in accordance with Boeing Service Bulletin 747–26–2233.

Explanation of Applicability

Though Boeing Alert Service Bulletin 747–26A2266 specifies that it applies to airplanes having line numbers 679 through 1062 inclusive, this AD applies to airplanes having line numbers 679 through 1061 inclusive. The alert service bulletin states that the intent of Boeing Service Bulletin 747–26–2233 was accomplished (by service bulletin validation) prior to delivery on the airplane having line number 1062. As stated previously, accomplishment of Boeing Service Bulletin 747–26–2233 constitutes terminating action for the requirements of this AD for Boeing Model 747–400 series airplanes equipped with Pratt & Whitney PW4000 series engines. Therefore, the airplane with line number 1062 is not included in the applicability statement of this AD.

Determination of Rule's Effective Date

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and opportunity for prior public comment hereon are impracticable, and that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting flight safety and, thus, was not preceded by notice and an opportunity for public comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified under the caption **ADDRESSES**. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 2000–NM–87–AD." The postcard will be date stamped and returned to the commenter.

Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and that it is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

2000–07–10 Boeing: Amendment 39–11664. Docket 2000–NM–87–AD.

Applicability: Model 747–200B, –300 series airplanes equipped with General Electric (GE) CF6–80C2 series engines, and Model 747–400, 747–400D, and 747–400F series airplanes equipped with General Electric (GE) CF6–80C2 series engines or Pratt & Whitney PW4000 series engines; line numbers (L/N) 679 through 1061 inclusive; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of

the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To detect and correct cracked fire extinguishing tubes in the engine struts, which, in the event of an engine fire, could reduce the amount of fire extinguishing agent that can be delivered to the engine, and result in a fire spreading from the engine to the wing of the airplane, accomplish the following:

Repetitive Inspections and Corrective Actions

(a) Within 30 days after the effective date of this AD, perform a detailed visual inspection to detect cracking of the fire extinguisher discharge tubes in the number 2 and number 3 engine struts, in accordance with Boeing Alert Service Bulletin 747–26A2266, dated March 3, 2000.

Note 2: For the purposes of this AD, a detailed visual inspection is defined as: "An intensive visual examination of a specific structural area, system, installation, or assembly to detect damage, failure, or irregularity. Available lighting is normally supplemented with a direct source of good lighting at intensity deemed appropriate by the inspector. Inspection aids such as mirror, magnifying lenses, etc., may be used. Surface cleaning and elaborate access procedures may be required."

(1) If no cracking is detected, repeat the inspection thereafter at intervals not to exceed 18 months.

(2) If any cracking is detected, prior to further flight, replace the cracked tube with a new or serviceable part, in accordance with Boeing Alert Service Bulletin 747–26A2266, dated March 3, 2000. Repeat the inspection required by paragraph (a) of this AD within 18 months after the replacement and thereafter at intervals not to exceed 18 months.

Optional Terminating Action

(b) For Model 747–400 series airplanes, L/N 696 through 1061 inclusive, equipped with Pratt & Whitney PW4000 series engines: Modification of the fire extinguisher discharge tubes in the number 2 and number 3 struts, in accordance with Boeing Service Bulletin 747–26–2233, dated May 11, 1995, constitutes terminating action for the repetitive inspection requirements of this AD.

Alternative Methods of Compliance

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

Special Flight Permits

(d) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Incorporation by Reference

(e) The inspections and replacement shall be done in accordance with Boeing Alert Service Bulletin 747–26A2266, dated March 3, 2000. If accomplished, the optional terminating action shall be accomplished in accordance with Boeing Service Bulletin 747–26–2233, dated May 11, 1995. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Effective Date

(f) This amendment becomes effective on April 25, 2000.

Issued in Renton, Washington, on March 30, 2000.

Donald L. Riggin,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 99–NM–72–AD; Amendment 39–11659; AD 2000–07–05]

RIN 2120–AA64

Airworthiness Directives; Boeing Model 767 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to certain Boeing Model 767 series airplanes, that currently requires repetitive inspections to detect cracking or damage of the forward and aft lugs of the diagonal brace of the nacelle strut, and follow-on actions, if necessary. That AD also provides optional terminating action for the repetitive inspections. This amendment requires accomplishment of the previously optional terminating action. This amendment is prompted by a report that a fractured diagonal brace lug was found during a routine maintenance inspection. The actions specified by this AD are intended to prevent cracking of the diagonal brace of the nacelle strut, which could result in failure of the diagonal brace, and consequent fatigue failure of a strut secondary load path and separation of the engine and strut.

DATES: Effective May 15, 2000.

The incorporation by reference of Boeing Alert Service Bulletin 767–54A0094, dated May 22, 1998, was approved previously by the Director of the Federal Register as of April 12, 1999 (64 FR 14578, March 26, 1999).

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: James G. Rehrl, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Transport Airplane Directorate, Seattle Aircraft Certification Office, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–2783; fax (425) 227–1181.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) by superseding AD 99–07–06, amendment 39–11091 (64 FR 14578, March 26, 1999), which is applicable to certain Boeing Model 767 series airplanes, was published in the **Federal Register** on June 23, 1999 (64 FR 33437). The action proposed to supersede AD 99–07–06 to continue to require repetitive inspections to detect cracking or damage of the forward and aft lugs of the diagonal brace of the nacelle strut, and follow-on actions, if necessary. That action also proposed to require accomplishment of the previously optional terminating action.

Comments

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Support for the Proposal

Two commenters support the proposed rule.

Requests To Revise Compliance Time

One commenter requests that the compliance time for the repetitive inspection intervals specified in paragraph (b)(1) of the proposed AD be extended. The commenter suggests that the inspection intervals should coincide with its current heavy maintenance program, which specifies that inspections be performed between 1,200 and 1,300 flight cycles. The commenter further states that to carry out the inspection at intervals not to exceed 1,000 flight cycles would be considered punitive action as it is prior to the normally scheduled maintenance.

The FAA does not concur with the commenter's request to extend the compliance time for accomplishment of the repetitive inspection intervals to between 1,200 and 1,300 flight cycles after the initial inspection. In developing an appropriate compliance time for the repetitive inspections, the FAA considered not only the degree of urgency associated with addressing cracking or damage of the forward and aft lugs of the diagonal brace of the nacelle strut, but other factors as well. Those factors include the recommendations of the manufacturer, and the practical aspect of accomplishing the repetitive inspections within an interval of time coinciding with normally scheduled maintenance for the majority of affected operators. Considering those factors, the FAA has determined that the compliance time of 1,000 flight cycles after the accomplishment of the initial inspection represents the maximum interval in which the affected airlines can continue to operate without compromising safety. In view of those factors, and the amount of time that has already elapsed since issuance of the notice of proposed rulemaking, the FAA has determined that further delay of these inspections is, in general, not appropriate. The FAA may, however, approve a request for an adjustment of the compliance time under the provisions of paragraph (f) of this final rule if data are submitted to substantiate that such an adjustment would provide an equivalent level of safety. No change to the final rule is necessary in this regard.

Another commenter requests that the compliance times for the replacement of the diagonal brace specified in paragraphs (d) and (e) of the proposed rule be changed to reflect the flight cycle threshold formula specified in the structural inspection program service bulletin, 767–54–0081, Figure 1, which is to be released soon. The commenter also notes that the threshold formula could be placed in an appendix to the proposal.

The FAA does not concur with the commenter's request. Boeing Service Bulletin 767–54–0081 states that the threshold formula may be used in lieu of the calendar threshold specified in the identified service bulletins. The formula in service bulletin 767–54–0081 was FAA-approved based on the fact that certain airplanes (*e.g.*, those that have extended flights) would reach the 20-year calendar threshold long before they accumulated the flight cycle threshold of 37,500 total flight cycles specified in that service bulletin. The FAA notes that there is no comparable threshold in calendar time contained in this final rule for which the proposed threshold formula can be used as a substitute. The FAA considered many factors (as stated previously) before developing an appropriate compliance time for this AD, and the FAA has determined that the compliance time for the replacement required by paragraphs (d) and (e) of the final rule represents the maximum interval in which the affected airlines can continue to operate without compromising safety. Therefore, no change to the final rule is necessary.

Another commenter requests the compliance time in paragraph (b)(2) of the proposal be revised to read, "* * * diagonal brace has accumulated 24,000 flight cycles * * *" to agree with the alert service bulletin. The FAA does not concur. The alert service bulletin specifies that the initial inspection for Group 2 airplanes be performed prior to the accumulation of 24,000 flight cycles, or within 90 days after receipt of the service bulletin; and the repetitive inspections be performed at intervals not to exceed 3,000 flight cycles until the diagonal brace has accumulated 32,000 flight cycles. Therefore, the final rule agrees with the alert service bulletin and no change is necessary in this regard.

Request To Revise Paragraphs (a), (b), and (c) of the Proposed Rule

Three commenters request that the word "damage" be deleted from or clarified in paragraphs (a), (b), and (c) of the proposal.

The first commenter states that, if any damage is detected, even if it is minor and repairable, replacement of the diagonal brace is required, as specified in paragraph (c) of the proposal. The commenter further states that the alert service bulletin referenced in the proposal specifies an inspection to detect cracking of the diagonal brace lugs only, and does not specify inspecting for damage; therefore, the word "damage" should be deleted.

The second commenter states that if the words "or damage" are not removed, paragraphs (a), (b), and (c) of the proposal should specifically clarify what should be searched for (cracks, fracture) during the inspection. The same commenter requests the addition of a requirement in paragraph (c) of the proposal to specify that damage to the lug bores (including wear, cracks, or surface corrosion) be repaired in accordance with Part 2 of the Accomplishment Instructions of the alert service bulletin.

The third commenter states that the word "damage" is undefined in the proposed rule, and notes that the alert service bulletin specifies that cracks originated in the lug bore of the diagonal brace caused by bushing motion and subsequent fretting of the lug bore, indicating that the damage that caused the cracks was fretting of the lug bore. The commenter also notes that the detailed visual inspection required by paragraph (a) of the proposal does not inspect the lug bore; therefore, the fretting or "damage" will not be found. The commenter indicates that, without any damage limit guidelines, even very minor damage (tool marks, scratched paint) will make it necessary for operators to perform costly additional inspections. The commenter notes that the inspection should be limited to the unsafe condition that is caused by fretting of the lug bore, which can be found by crack indications.

The FAA does not concur with the commenters' requests concerning removal of the word "damage" as referenced in paragraphs (a), (b), and (c) of the final rule. The FAA has reviewed this issue and has determined that the inspection to detect cracks or damage as required by paragraphs (a) and (b) of the final rule, is necessary. Certain types of damage, if detected, specifically fretting and bushing motion, must be corrected in accordance with the Manager, Seattle Aircraft Certification Office. These types of damage are two links in a sequential chain of events that can ultimately result in a fractured lug, or other possible failure modes. Other types of damage (tool marks, scratched paint) are not related to the unsafe condition specified in this AD, and would be defined as superficial. The FAA has, however, added a "NOTE 2" to the final rule to define the word "damage."

The FAA concurs with the second commenter's request to add another requirement to paragraph (c) of the final rule, which states that damage can be repaired in accordance with the applicable service bulletin. Paragraph

(c) of the final rule has been revised to give the operator the option of either repair or replacement of the diagonal brace if any cracking or damage is detected, following accomplishment of any inspection required by paragraph (a) or (b) of the AD.

Request for Clarification of Paragraph (c) of the Proposed Rule

One commenter requests that the wording in paragraph (c) of the proposal be revised to read, "* * * and if one or more ligaments of the lugs are fractured perform additional inspections to detect damage of the strut secondary load paths * * *" The commenter notes that cracking, rather than fractures, will not increase the load in the secondary load path.

Another commenter requests clarification of the requirements in paragraph (c) of the proposal. The commenter questions which two lugs out of the four lugs (two lugs on the forward end and two lugs on the aft end) of the diagonal brace must be fractured before the extensive follow-on inspections of the secondary load path structure (Figure 8 of the service bulletin) are necessary. The commenter's interpretation is that the inspections specified in Figure 8 of the service bulletin are necessary only if both lugs on one of the ends of the diagonal brace are fractured, and if only one lug on each end of the diagonal brace is fractured, the inspections specified in Figure 7 of the service bulletin would be necessary.

The FAA agrees that clarification is necessary in order to better define the requirements in paragraph (c) of the AD. Paragraph (c) of the final rule has been revised to provide a detailed explanation of the inspection area and procedures.

Conclusion

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

Cost Impact

There are approximately 208 airplanes of the affected design in the worldwide fleet. The FAA estimates that 105 airplanes of U.S. registry will be affected by this AD.

The inspections that are currently required by AD 99–07–06, and retained in this AD, take approximately 1 work hour per airplane to accomplish, at an average labor rate of $60 per work hour. Based on these figures, the cost impact of the currently required inspections on U.S. operators is estimated to be $6,300, or $60 per airplane, per inspection cycle.

The replacement that is required in this AD action takes approximately 8 work hours (4 work hours for each strut) per airplane to accomplish, at an average labor rate of $60 per work hour. Required parts will cost approximately $50,000 per airplane. Based on these figures, the cost impact of the required replacement required by this AD on U.S. operators is estimated to be $5,300,400, or $50,480 per airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39–11091 (64 FR 14578, March 26, 1999), and by adding a new airworthiness directive (AD), amendment 39–11659, to read as follows:

2000–07–05 Boeing: Amendment 39–11659. Docket 99–NM–72–AD. Supersedes AD 99–07–06, amendment 39–11091.

Applicability: Model 767 series airplanes; as listed in Boeing Alert Service Bulletin 767–54A0094, dated May 22, 1998; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (f) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent cracking of the diagonal brace of the nacelle strut, which could result in failure of the diagonal brace, and consequent fatigue failure of a strut secondary load path and separation of the engine and strut, accomplish the following:

Initial Inspection

(a) Perform a detailed visual inspection to detect cracking or damage of the forward and aft lugs of the diagonal brace of the nacelle strut, on the left and right sides of the airplane, in accordance with Boeing Alert Service Bulletin 767–54A0094, dated May 22, 1998. Perform the inspection at the time specified in paragraph (a)(1) or (a)(2) of this AD, as applicable.

Note 2: The word "damage" as referenced in this AD, is defined as fretting and/or bushing motion.

(1) For airplanes in Groups 1, 3, and 4: Inspect prior to the accumulation of 12,000 total flight cycles, or within 90 days after April 12, 1999 (the effective date of AD 99–07–06, amendment 39–11091), whichever occurs later.

(2) For airplanes in Group 2: Inspect prior to the accumulation of 24,000 total flight cycles, or within 90 days after April 12, 1999, whichever occurs later.

Follow-On Actions

(b) If no cracking or damage is detected during the inspection required by paragraph

(a) of this AD, repeat the inspection thereafter at the interval specified in paragraph (b)(1) or (b)(2) of this AD, as applicable, in accordance with Boeing Alert Service Bulletin 767–54A0094, dated May 22, 1998. Repeat the inspection until the actions specified by paragraph (d) or (e) of this AD have been accomplished.

(1) For airplanes in Groups 1, 3, and 4; and for airplanes in Group 2 on which the diagonal brace has accumulated more than 32,000 total flight cycles: Repeat the inspection at intervals not to exceed 1,000 flight cycles.

(2) For airplanes in Group 2 on which the diagonal brace has accumulated 32,000 or fewer total flight cycles: Repeat the inspection at intervals not to exceed 3,000 flight cycles.

(c) If any cracking or damage is detected during any inspection required by paragraph (a) or (b) of this AD: Prior to further flight, remove the diagonal brace and perform additional inspections to detect damage of the strut secondary load paths, in accordance with Part 4 of Boeing Alert Service Bulletin 767–54A0094, dated May 22, 1998; and accomplish the requirements of paragraph (c)(1) or (c)(2) of this AD; as applicable.

(1) If any cracking is detected: Prior to further flight, accomplish the requirements of paragraph (c)(1)(i), (c)(1)(ii), or (c)(1)(iii) of this AD, as applicable.

(i) If one lug on one or both ends of the diagonal brace is fractured (Figure 7 of the alert service bulletin), or if two lugs on either end of the diagonal brace are fractured (Figure 8 of the alert service bulletin), prior to further flight: Rework the forward and aft lugs of the diagonal brace in accordance with the rework limits specified in Part 2 of the Accomplishment Instructions of the alert service bulletin.

(ii) Replace the one-piece diagonal brace with a new three-piece diagonal brace, in accordance with Part 3 of the Accomplishment Instructions of the alert service bulletin. Such replacement constitutes terminating action for the requirements of this AD.

(iii) If any additional damage of the alternate load paths is detected, repair in accordance with a method approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate; or in accordance with data meeting the type certification basis of the airplane approved by a Boeing Company Designated Engineering Representative (DER) who has been authorized by the Manager, Seattle ACO, to make such findings.

(2) If any damage is detected: Prior to further flight, repair in accordance with a method approved by the Manager, Seattle ACO; or in accordance with data meeting the type certification basis of the airplane approved by a Boeing Company DER who has been authorized by the Manager, Seattle ACO, to make such findings.

(d) For airplanes on which no cracking is detected during the inspection required by paragraph (a) of this AD, in lieu of accomplishing repetitive inspections in accordance with paragraph (b) of this AD, rework of the forward and aft lugs of the diagonal brace may be accomplished in accordance with Part 2 of the Accomplishment Instructions of Boeing Alert Service Bulletin 767–54A0094, dated May 22, 1998. If such rework is accomplished: Within 12,000 flight cycles after the rework, repeat the inspection required by paragraph (a) of this AD; and, prior to the accumulation of 37,500 total flight cycles on the diagonal brace, replace the one-piece diagonal brace with a new three-piece diagonal brace, in accordance with Part 3 of the Accomplishment Instructions of the alert service bulletin. Such replacement constitutes terminating action for the requirements of this AD.

Terminating Action

(e) Prior to the accumulation of 37,500 total flight cycles, or within 180 days after the effective date of this AD, whichever occurs later: Replace the one-piece diagonal brace with a new three-piece diagonal brace, in accordance with Part 3 of the Accomplishment Instructions of Boeing Alert Service Bulletin 767–54A0094, dated May 22, 1998. Such replacement constitutes terminating action for the requirements of this AD.

Alternative Methods of Compliance

(f) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Seattle ACO. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Seattle ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Seattle ACO.

Special Flight Permits

(g) Special flight permits may be issued in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Incorporation by Reference

(h) Except as provided by paragraphs (c)(1)(i) and (c)(3) of this AD, the actions shall be done in accordance with Boeing Alert Service Bulletin 767–54A0094, dated May 22, 1998. The incorporation by reference of this service bulletin was approved previously by the Director of the Federal Register as of April 12, 1999 (64 FR 14578, March 26, 1999). Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124–2207. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(i) This amendment becomes effective on May 15, 2000.

Issued in Renton, Washington, on March 31, 2000.

Donald L. Riggin,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 121

[Docket No. 27065, 25148 and 26620; Amendment No. 121–273]

Antidrug and Alcohol Misuse Prevention Programs for Personnel Engaged in Specified Aviation Activities

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; technical amendment.

SUMMARY: This action corrects FAA office addresses listed in the Code of Federal Regulations regarding Drug Testing Programs and Alcohol Misuse Prevention Programs. The action is necessary so that required notifications and reports are received by the FAA in a timely and efficient manner. The intended effect of this action is to ensure that the regulated public has correct information regarding FAA office addresses.

EFFECTIVE DATE: April 10, 2000.

FOR FURTHER INFORMATION CONTACT: Ralph Timmons, Acting Manager, Program Analysis Branch, AAM–810, Drug Abatement Division, Office of Aviation Medicine, Federal Aviation Administration, Washington, DC 20591, telephone (202) 267–8442.

SUPPLEMENTARY INFORMATION:

Background

On February 15, 1994, the FAA published a final rule, Alcohol Misuse Prevention Program (59 FR 7380). On August 19, 1994, the FAA published a final rule, Antidrug Program for Personnel Engaged in Specified Aviation Activities (59 FR 42922). These final rules specified the requirements for drug and alcohol testing of air carrier employees. Since the publication of the final rules, the FAA has identified several FAA office addresses specified in the final rules that have changed. This technical amendment updates office addresses specified in 14 CFR Part 121, Appendices I and J. The changes will facilitate notification, reporting, and submission requirements.

Because this action is merely a technical amendment reflecting the change to office addresses, the FAA finds that notice and public procedure under 5 U.S.C. 553(b) are unnecessary. For the same reason, the FAA finds that good cause exists under 5 U.S.C. 5553(d) for making this amendment effective upon publication.

Availability of Final Rule

An electronic copy of this document may be downloaded using a modem and suitable communications software from the FAA regulations section of the Fedworld electronic bulletin board service (telephone: (703) 321–3339), or the Government Printing Office's (GPO) electronic bulletin board service (telephone: (202) 512–1661).

Internet users may reach the FAA's web page at http://www.faa.gov/avr/arm/nprm/nprm.thm or the Government Printing Office's webpage at http://www.access.gpo.gov/nara for access to recently published rulemaking documents.

Any person may obtain a copy of this rule by submitting a request to the Federal Aviation Administration, Office of Rulemaking, ARM–1, 800 Independence Avenue, SW, Washington, DC 20591, or by calling (202) 267–9680. Communications must identify the amendment number or docket number of this rule.

Small Entity Inquiries

If you are a small entity and have a question, contact your local FAA official. If you do not know how to contact your local FAA official, you may contact Charlene Brown, Program Analysis Staff, Office of Rulemaking, ARM–27, Federal Aviation Administration, 800 Independence Avenue, SW, Washington, DC 20591, 1–888–551–1594. Internet users can find additional information on SBREFA in the "Quick Jump" section of the FAA's web page at http://www.faa.gov and may send electronic inquiries to the following Internet address: 9–AWA–SBREFA@faa.gov.

Agency Findings

This is a routine matter that will affect only changes to office addresses for notification, reporting, and submission purposes. The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this action does not warrant preparation of a regulatory evaluation since the anticipated impact is minimal. For the reasons discussed in the preamble, I certify that this regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Paperwork Reduction Act

Information collection requirements in the amendment to Part 121, Appendix I, Sections VI, VII, and IX and Appendix J, Sections V and VII have previously been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. section 3507(d)), and have been assigned OMB Control Numbers 2120–0535 and 2120–0571, respectively.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number.

List of Subjects in 14 CFR Part 121

Air carriers, Aircraft, Airmen, Alcohol abuse, Aviation safety, Drug abuse, Drug testing, Reporting and recordkeeping requirements, Safety, Transportation.

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 121, as follows:

PART 121—OPERATING REQUIREMENTS: DOMESTIC, FLAG, AND SUPPLEMENTAL OPERATIONS

1. The authority citation for part 121 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 40119, 44101, 44701–44702, 44705, 44709–44711, 44713, 44716–44717, 44722, 44901, 44903–44904, 44912, 46105.

2. In Appendix I to part 121:

A. In section VI.E., paragraph 1 is revised.

B. In section VII.B., paragraph 4 is revised.

C. In section IX.A., paragraph 1 is revised.

The revisions read as follows:

Appendix I to Part 121—Drug Testing Program

* * * * *

VI. * * *

E. * * * 1. Each employer shall notify the FAA within 5 working days of any employee who holds a certificate issued under part 61, part 63, or part 65 of this chapter who has refused to submit to a drug test required under this appendix. Notification should be sent to: Federal Aviation Administration, Office of Aviation Medicine, Drug Abatement Division (AAM–800), 800 Independence Avenue, SW., Washington, DC 20591.

* * * * *

VII. * * *

B. * * *

4. All reports required under this section shall be forwarded to the Federal Air Surgeon, Office of Aviation Medicine, Federal Aviation Administration, Attn: Drug Abatement Division (AAM–800), 800 Independence Avenue, SW., Washington, DC 20591.

* * * * *

IX. * * * A. * * * 1. Each employer shall submit an antidrug program plan to the Federal Aviation Administration, Office of Aviation Medicine, Drug Abatement Division (AAM–800), 800 Independence Avenue, SW., Washington, DC 20591.

* * * * *

3. In appendix J to part 121:

A. In section V.C., paragraph 3 is revised.

B. In section V.D., paragraph 1 is revised.

C. In section VII.A., paragraph 1 introductory text is revised.

The revision read as follows:

Appendix J to Part 121—Alcohol Misuse Prevention Program

* * * * *

V. * * *

C. * * *

3. All documents shall be sent to the Federal Air Surgeon, Office of Aviation Medicine, Federal Aviation Administration, Attn: Drug Abatement Division (AAM–800), 800 Independence Avenue, SW., Washington, DC 20591.

* * * * *

D. * * *

1. Except as provided in subparagraph 2 of this paragraph D, each employer shall notify the FAA within 5 working days of any covered employee who holds a certificate issued under 14 CFR part 61, part 63, or part 65 who has refused to submit to an alcohol test required under this appendix. Notifications should be sent to: Federal Aviation Administration, Office of Aviation Medicine, Drug Abatement Division (AAM–800), 800 Independence Avenue, SW., Washington, DC 20591.

BILLING CODE 4910–13–M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 242

[Release No. 34–42603A; File No. S7–12–98]

RIN 3235–AH41

Regulation of Alternative Trading Systems; Temporary Stay of Effectiveness

AGENCY: Securities and Exchange Commission.

ACTION: Temporary stay of effectiveness.

SUMMARY: The Securities and Exchange Commission stays the effectiveness of Rules 301(b)(5)(i)(D) and (E) and 301(b)(6)(i)(D) and (E) until December 1, 2000. This would provide sufficient time for a reporting system to be developed that would compile and publish data for investment grade and non-investment grade corporate market segments. These provisions relate to alternative trading systems that trade certain categories of debt securities. The other alternative trading system rules, which were published in 63 FR 70844 on December 22, 1998, remain effective as previously stated.

DATES: 17 CFR 242.301(b)(5)(i)(D) and (E) and 242.301(b)(6)(i)(D) and (E) are stayed until December 1, 2000.

FOR FURTHER INFORMATION CONTACT: Constance Kiggins, Senior Special Counsel, at (202) 942–0059, and Kevin Ehrlich, Attorney, at (202) 942–0778, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549–1001.

SUPPLEMENTARY INFORMATION:

I. Background

On December 8, 1998, the Securities and Exchange Commission ("Commission") adopted new rules and rule amendments to allow alternative trading systems to choose whether to register as national securities exchanges, or to register as broker-dealers and comply with additional requirements under Regulation ATS, depending on their activities and trading volume.[1] The effective date for most of these new rules and rule amendments was April 21, 1999. The Commission stated in the adopting release that Rules 301(b)(5)(i)(D) and (E) and 301(b)(6)(i)(D) and (E) would become effective on April 1, 2000. These rules relate to certain requirements for alternative trading systems that trade investment grade and non-investment grade corporate debt securities. For alternative trading systems trading 20 percent or more of the average daily trading volume over at least four of the preceding six months in either investment grade or non-investment grade corporate debt securities, the fair access and systems capacity, security, and integrity requirements were to take effect on April 1, 2000.

II. Temporary Stay of Effectiveness of Rules 301(b)(5)(i)(D) and (E) and 301(b)(6)(i)(D) and (E)

In the Adopting Release, we noted that volume data for investment grade and non-investment grade corporate debt was not being compiled or published. Accordingly, market participants and regulators had no mechanism to determine what the aggregate daily trading volume is for either investment grade corporate bonds or non-investment grade corporate bonds. The Commission had anticipated that a comprehensive reporting system for corporate debt would be in place by April 1, 2000 that would have allowed market participants to access aggregate data with which to determine their own compliance with the rules. While efforts are ongoing to complete such a system, no such comprehensive reporting system is currently in place. The Commission currently believes that staying the effectiveness of Rules 301(b)(5)(i)(D) and (E) and 301(b)(6)(i)(D) and (E) until December 1, 2000 would provide sufficient time for a system to be developed and implemented that would compile and publish data for both market segments.[2]

By the Commission.

Dated: March 31, 2000.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 00–8873 Filed 4–7–00; 8:45 am]

BILLING CODE 8010–01–U

[1] Securities Exchange Act Release 40760 (Dec. 8, 1998), 63 FR 70844 (Dec. 22, 1998) ("Adopting Release").

[2] The Commission, however, believes that good business practice dictates that alternative trading systems adopt the standards of systems capacity, security, and integrity regardless of their trading volume.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 211 and 720

[Docket No. 00N–1217]

Code of Federal Regulations; Technical Amendments

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; technical amendments.

SUMMARY: The Food and Drug Administration (FDA) is amending its regulations to reflect a correct footnote and a part heading. This action is being taken to improve the accuracy of the regulations.

EFFECTIVE DATE: April 10, 2000.

FOR FURTHER INFORMATION CONTACT: LaJuana D. Caldwell, Office of Policy, Planning, and Legislation (HF–27), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

SUPPLEMENTARY INFORMATION: FDA has discovered that errors have been incorporated into the agency's codified regulations for 21 CFR parts 211 and 720. This document corrects those errors. Publication of this document constitutes final action under the Administrative Procedure Act (5 U.S.C. 553). FDA has determined that notice and public comment are unnecessary because this amendment is nonsubstantive.

List of Subjects

21 CFR Part 211

Drugs, Labeling, Laboratories, Packaging and containers, Prescription drugs, Reporting and recordkeeping requirements, Warehouses.

21 CFR Part 720

Confidential business information, Cosmetics.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR parts 211 and 720 are amended as follows:

PART 211—CURRENT GOOD MANUFACTURING PRACTICE FOR FINISHED PHARMACEUTICALS

1. The authority citation for 21 CFR part 211 continues to read as follows:

Authority: 21 U.S.C. 321, 351, 352, 355, 360b, 371, 374.

§ 211.194 [Amended]

2. Section 211.194 *Laboratory records* is amended by removing in paragraph (a)(2) and its footnote the number "2" and by adding in their place the number "1".

PART 720—VOLUNTARY FILING OF COSMETIC PRODUCT INGREDIENT COMPOSITION STATEMENTS

3. The authority citation for 21 CFR part 720 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 361, 362, 371, 374.

4. The heading for part 720 is revised to read as set forth above.

Dated: March 31, 2000.

Margaret M. Dotzel,

Acting Associate Commissioner for Policy.

[FR Doc. 00–8716 Filed 4–7–00; 8:45 am]

BILLING CODE 4160–01–F

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 931

[SPATS No. NM–037–FOR]

New Mexico Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule; approval of amendment.

SUMMARY: The Office of Surface Mining Reclamation and Enforcement (OSM) is approving a proposed amendment to the New Mexico regulatory program (hereinafter, the "New Mexico program") under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). New Mexico proposed revisions about cross sections, maps, and plans required in a permit application; criteria for permit approval or denial; requirement to release performance bonds; timing of backfilling and grading; backfilling and grading requirements for the construction of small depressions; and design requirements for road embankments. New Mexico revised its program to be consistent with the corresponding Federal regulations.

EFFECTIVE DATE: April 10, 2000.

FOR FURTHER INFORMATION CONTACT: Willis L. Gainer, Telephone: (505) 248–5096, Internet address: WGAINER@OSMRE.GOV.

SUPPLEMENTARY INFORMATION:

I. Background on the New Mexico Program
II. Submission of the Proposed Amendment
III. Director's Findings
IV. Summary and Disposition of Comments
V. Director's Decision
VI. Procedural Determinations

I. Background on the New Mexico Program

On December 31, 1980, the Secretary of the Interior conditionally approved the New Mexico program. You can find background information on the New Mexico program, including the Secretary's findings, the disposition of comments, and conditions of approval in the December 31, 1980, **Federal Register** (45 FR 86459). You can also find later actions concerning New Mexico's program and program amendments at 30 CFR 931.11, 931.15, 931.16, and 931.30.

II. Submission of the Proposed Amendment

By letter dated March 11, 1996, New Mexico sent to us an amendment (SPATS No. NM–037–FOR, administrative record No. NM–773) to its program pursuant to SMCRA (30 U.S.C. 1201 *et seq.*). New Mexico submitted the proposed amendment to include changes made in response to the required amendment at 30 CFR 931.16(t) and at its own initiative.

We announced receipt of the amendment in the March 26, 1996 **Federal Register** (59 FR 13117), provided an opportunity for a public hearing or meeting on its substantive adequacy, and invited public comment on its adequacy (administrative record No. NM–802). Because no one requested a public hearing or meeting, none was held. The public comment period ended on April 25, 1996.

During our review of the amendment, we identified concerns and notified New Mexico of the concerns by letter dated May 15, 1996 (administrative record no. NM–785). New Mexico responded in a letter dated November 9, 1998, by submitting a revised amendment and additional explanatory information (administrative record no. NM–803).

We announced receipt of the proposed amendments in the December 3, 1998 **Federal Register** (63 FR 66774). In the same document, we opened the public comment period and provided an opportunity for a public hearing or meeting on the amendment's adequacy (administrative record No. NM–809). We did not hold a public hearing or meeting because no one requested one. The public comment period ended on December 18, 1998.

During our review of the revised amendment, we identified concerns and notified New Mexico of the concerns by letter dated December 21, 1998 (administrative record no. NM–814). New Mexico responded in a letter dated December 1, 1999, by sending us a revised amendment (administrative record no. NM–816).

Based upon New Mexico's revisions to its amendment, we reopened the public comment period in the December 22, 1999 **Federal Register** (64 FR 71698); administrative record no. NM–818). The public comment period ended on January 21, 2000.

III. Director's Findings

Following are the findings we made concerning the amendment under SMCRA and the Federal regulations at 30 CFR 732.15 and 732.17. We are approving the amendment.

1. Minor Revisions to New Mexico's Rules

New Mexico proposed minor wording, editorial, punctuation, grammatical, and recodification changes to the following previously-approved rules.

19 NMAC 8.2 813.L [30 CFR 779.25(b)] recodification concerning the requirement for maps, plans, and cross sections to be prepared by or under the direction of and certified by a qualified registered professional engineer;

19 NMAC 8.2 2054.A(2) [30 CFR 816.100] to refer to the term "open pit mining;" and

19 NMAC 8.2 2054.A(3) [30 CFR 816.100] to refer to the term "strip mining."

Because these changes are minor, we find that they will not make New Mexico's rules less effective than the corresponding Federal regulations.

2. Revisions to New Mexico's Rules That Have the Same Meaning as the Corresponding Provisions of the Federal Regulations

New Mexico proposed revisions to the following rules containing language that is the same as or similar to the corresponding sections of the Federal regulations.

19 NMAC 8.2 2055.C(1) [30 CFR 816.102(h)], concerning backfilling and grading requirements for the construction of small depressions, and

19 NMAC 8.2 1106.C [30 CFR 773.15(c)(5)], concerning permit approval or denial pertaining to the probable cumulative hydrological impacts.

Because these proposed rules contain language that is the same as or similar to the corresponding Federal regulations, we find that they are no less effective than the corresponding Federal regulations.

3. Revisions to New Mexico's Rules That Are Not the Same as the Corresponding Provisions of the Federal Regulations

A. 19 NMAC 8.2 2054.A(1), (2), (3), and (5), Timing of Backfilling and Grading

New Mexico proposed to revise 19 NMAC 8.2. 2054A(1), (2), and (3), concerning time requirements for backfilling and grading of contour mining, open pit mining, and strip mining, to add the allowance for the Director of the New Mexico program to approve additional distance, as well as additional time, for rough backfilling and grading if the permittee can demonstrate, on the basis of the materials submitted under 19 NMAC 8.2 906.B(3), that additional distance is necessary.

New Mexico also proposed to add at 19 NMAC 8.2 2054.A(5) the requirement that, at completion of mining, rough backfilling and grading shall occur in accordance with a time schedule approved by the Director of the New Mexico program based on materials submitted under 19 NMAC 8.2 906.B(3).

Existing 19 NMAC 8.2 906.B(3) requires that each permit application contain a reclamation plan including a plan for backfilling, soil stabilization, compacting, and grading, with contour maps or cross sections that show the anticipated final surface configuration of the proposed permit area.

On December 17, 1991, OSM promulgated new regulations, at 30 CFR 816.101, that provided national time and distance performance standards for rough backfilling and grading for surface mining operations. Those regulations were subsequently challenged in *National Coal Association and American Mining Congress* v. *U.S. Department of the Interior, et al.*, Civ. No. 92–0408–CRR (1992). This case was dismissed without prejudice by the U.S. District Court for the District of Columbia as the result of a joint stipulation of the parties that included OSM's agreement to suspend the regulation at 30 CFR 816.101.

The December 17, 1991, Federal regulations at 30 CFR 816.101 concerning time and distance performance standards for rough backfilling and grading were suspended by OSM on July 31, 1992. Therefore, in absence of a specific Federal regulation providing specific time and distance performance standards for rough backfilling and grading, the Federal standards against which State time and distance performance standards for rough backfilling and grading must be judged are section 515(b)(16) of SMCRA and 30 CFR 816.100.

Section 515(b)(16) of SMCRA requires that surface coal mining and reclamation operations be conducted so as to insure that all reclamation efforts proceed as contemporaneously as practicable with the surface coal mining operations. The Federal regulation at 816.100 similarly provides that backfilling and grading shall occur as contemporaneously as practicable with mining operations. In common usage, the term "practicable" means "possible to perform" or "feasible". Therefore, New Mexico's proposal to allow time and distance standards for backfilling and grading demonstrated as necessary by an applicant's reclamation plan, whether during active mining as proposed by New Mexico at 19 NMAC 8.2 2054.A (1), (2), and (3), or at the completion of mining, as proposed by New Mexico at 19 NMAC 8.2 2054.A(5), is equivalent in meaning to and consistent with section(b)(16) of SMCRA and the Federal regulation at 30 CFR 816.100. Accordingly, New Mexico's proposed rules at 19 NMAC 8.2 2054.A (1), (2), (3), and (5) are no less stringent than section 515(b)(16) of SMCRA and no less effective than the Federal regulations at 30 CFR 816.100 with respect to standards for rough backfilling and grading. The Director approves 19 NMAC 8.2 2054.A (1), (2), (3), and (5).

B. 19 NMAC 8.2 2076.B and 2077.A(5), Design of Primary Road Embankments

OSM required at 30 CFR 931.16(t) that New Mexico revise 19 NMAC 8.2 2076.B(9), concerning the requirement for all ancillary and primary roads to have (at a minimum) a static safety factor of 1.3 for all embankments, to reference 19 NMAC 8.2 2076.D instead of 19 NMAC 8.2 2076.C. (See finding No. 20(b), 58 FR 65907, 65923, December 17, 1993.)

New Mexico proposed to revise 19 NMAC 8.2 2076.B by deleting the general requirement at 19 NMAC 8.2 2076.B(9) that all roads have, at a minimum, a static factor of safety of 1.3 for all embankments, with the exception that the Director of the New Mexico program could determine a lesser static factor of safety on a site-specific basis with respect to an ancillary road. New Mexico also proposed to revise 19 NMAC 8.2 2077.A by adding the requirement at 19 NMAC 8.2 2077.A(5) that all primary roads have a static factor of safety of 1.3, at a minimum, for all embankments.

The Federal regulations at 30 CFR 816.150 and 817.150, concerning performance standards for all roads, do not specify a static safety factor for road embankments and the Federal regulations at 30 CFR 816.151(b) and 817.151(b), concerning performance standards for primary roads, require that each primary road embankment have a minimum static factor of 1.3.

Because New Mexico's proposed revisions cause its rules to be the same as the Federal regulations, the Director finds that New Mexico's proposed deletion at 19 NMAC 8.2 2076.B(9) and addition at 19 NMAC 8.2 2077.A(5) have resolved the required amendment and are no less effective than the Federal regulations at 30 CFR 816.150 and 151(b) and 817.150 and 151(b). The Director approves the proposed deletion of 19 NMAC 8.2 2076.B(9) and addition of 19 NMAC 8.2 2077.A(5) and is removing the required amendment at 30 CFR 931.16(t).

4. Revisions to New Mexico's Rules With No Corresponding Federal Regulations

A. 19 NMAC 8.2 813.K, Cross Sections, Maps, and Plans Required in a Permit Application

New Mexico proposed to revise 19 NMAC 8.2 813.K(1) through (3), concerning cross sections, maps, and plans required in a permit application, by (1) deleting specific slope measurement requirements paragraphs (1) through (3) so that proposed 19 NMAC 8.2 813.K requires that a map show the existing land surface configuration of the proposed permit area on contour maps of a maximum of 5 foot contour intervals.

The corresponding Federal regulation at 30 CFR 779.25(a) lists what is required to be shown by cross sections, maps, and plans required in a permit application. There is no counterpart to proposed 19 NMAC 8.2 813.K, pertaining to a map showing existing land surface configuration, in the corresponding Federal regulations at 30 CFR 779.25(a). However, the requirement at proposed 19 NMAC 8.2 813.K serves to aid the regulatory authority in a determination at phase I bond release concerning backfilling and grading to approximate original contours and is not inconsistent with the requirements of the Federal regulations at 30 CFR 779.25(a).

Therefore, the Director finds that proposed 19 NMAC 8.2 813.K is no less effective than the Federal regulations at 30 CFR 779.25(a). The Director approves proposed 19 NMAC 8.2 813.K.

B. 19 NMAC 8.2 1412, Requirement to Release Performance Bonds

New Mexico proposed to revise 19 NMAC 8.2 1412 by adding new 19 NMAC 8.2 1412.A(2) (i) through (vii), concerning minimum requirements for all bond release applications, and recodifying existing 19 NMAC 1412.A(2) as 19 NMAC 1412.A(3). New Mexico also proposed to revise 19 NMAC 1412.A(3) by deleting the requirement for bond release applications that the applicant submit copies of letters which he has sent to adjoining property owners, local governmental bodies, planning agencies, sewage and water treatment authorities, and water companies in the locality in which the surface coal mining and reclamation operation took place, notifying them of the intention to seek release from the bond. New Mexico deleted this requirement because it is proposed under the minimum requirements for a bond release application at 19 NMAC 1412.A(2)(v).

There are no specific counterparts setting forth minimum requirements for a bond release application in the corresponding Federal regulations at 30 CFR 800.40(a)(1). However, New Mexico's proposed minimum requirements at proposed 19 NMAC 1412.A(2)(i) through (vii) clarify what kinds of legal and technical information any bond release application must contain and are consistent with the Federal regulation at 30 CFR 800.40(a)(1). Recodified and revised 19 NMAC 1412.A(3), concerning the permittee's public notice of a bond release application, along with the requirement now codified at 19 NMAC 1412.A(2)(v) for copies of letters notifying specified individuals and governmental or private entities of the application for bond release, are substantively identical to the Federal regulation at 30 CFR 800.40(a)(2).

Therefore, the Director finds that proposed 19 NMAC 8.2 1412.A(2)(i) through (vii) and 1412.A(3) are no less effective than the Federal regulations at 30 CFR 800.40(a)(1) and (2). The Director approves proposed 19 NMAC 8.2 1412.A(2)(i) through (vii) and 1412.A(3).

IV. Summary and Disposition of Comments

Public Comments

We asked for public comments on the amendment (administrative record Nos. 776, 806, and 817).

The National Mining Association requested, by letter dated December 8, 1998 (administrative record No. NM–810), that OSM send copies of (1) the May 15, 1996, letter sent to New Mexico by OSM setting forth concerns with the proposed amendment and (2) the supplemental information OSM sent to New Mexico by letter dated February 26,1998. OSM sent the requested information by letter dated December 22, 1998 (administrative record No. NM–813).

The Navajo Nation commented, by letter dated January 21, 2000 (administrative record No. 821), that it was unclear from the two December 22, 1999, **Federal Register** notices (64 FR 71698 and 64 FR 71700), which published OSM's receipt of three New Mexico amendments (including the amendment that is the subject of this document), that there would be an opportunity for public comment prior to OSM's decision on the amendments. The text of December 22, 1999, **Federal Register** notices identified the changes proposed by New Mexico, notified the public of its right to comment and/or request a public hearing or meeting, and provided for a thirty day public comment period on the proposed New Mexico amendments. The public comment period for the New Mexico amendments closed on January 21, 2000. OSM explained to the Navajo Nation, in a letter dated February 7, 2000 (administrative record No. NM–823), the OSM's published **Federal Register** notices, as well as OSM's distribution of the proposed amendment to interested parties (which included the Navajo Nation) by letters dated April 1, 1996, November 23, 1998, and December 15, 1999, were the vehicles by which OSM provided for a public comment period and solicited public comments.

The Navajo Nation had two additional comments concerning New Mexico's March 11, 1996, amendment that is the subject of this notice. First, the Navajo Nation commented that the word "demonstrate" was missing from the text of 19 NMAC 8.2 2054.A(3), concerning the timing of backfilling and grading for strip mining. The amendment language at this rule as submitted by New Mexico to OSM on December 1, 1999, did not include the word demonstrate. However, this typographical error was corrected when New Mexico promulgated this rule and the word "demonstrate" is included in the published text of New Mexico's rules. Second, the Navajo Nation commented that New Mexico's proposed addition of 19 NMAC 2045.A(5), concerning the timing of backfilling and grading for the final pit at completion of mining, was less effective than SMCRA and the Federal regulations because it lacked a time factor. New Mexico's proposed rule at 19 NMAC 2045.A(5) requires that a permittee complete backfilling and grading of a final pit at the completion of mining in accordance with a time schedule approved by New Mexico based on materials submitted by the permittee in accordance with 19 NMAC 906.B(3). Although New Mexico did not specify in the rule a time factor such as 60 days, it does require that a specific time schedule be approved by New Mexico when mining is complete. And, as discussed in finding 3.A above, New Mexico's proposal to allow time (and distance) standards for backfilling and grading demonstrated as necessary by a permittee's reclamation plan, whether during active mining as proposed by New Mexico at 19 NMAC 8.2 2054.A(1), (2), and (3), or at the completion of mining, as proposed by New Mexico at 19 NMAC 8.2 2054.A(5), is equivalent in meaning to and consistent with section 515(b)(16) of SMCRA and the Federal regulation at 30 CFR 816.100. The Director is taking no further action in response to these comments in the Navajo Nation's January 21, 2000, letter.

Federal Agency Comments

Under 30 CFR 732.17(H)(11)(i), we requested comments on the amendment from various Federal agencies with an actual or potential interest in the New Mexico program (administrative record nos. 776, 806, and 817).

The U.S. Department of Agriculture, Natural Resources Conservation Service (NRCS), submitted the following comments by letter dated April 12, 1996 (administrative record No. NM–781).

New Mexico's recodified rule at 19 NMAC 8.2 1412.A(2)(v) requires that bond release application contain copies of letters which that have been sent to adjoining property owners, local governmental bodies, planning agencies, sewage and water treatment authorities, and water companies in the locality in which the surface coal mining and reclamation operation took place, notifying them of the intention to seek release from the bond. As discussed in finding No. 4.B above, 19 NMAC 8.2 1412.A(2)(v) is identical to the Federal regulation at 30 CFR 800.40(a)(3). NRCS questioned whether these groups will

have sufficient opportunity to respond, whether they will have information on where to send their response, and will the responses be included as part of the bond release application. New Mexico's rules at 19 NMAC 8.2 1412.A(3) require that the applicant for bond release advertise its intention to seek bond release and that the advertisement include, among other things, the name and address of the Director of the New Mexico to which written comments, objections, or requests for public hearings and informal conferences may be submitted. New Mexico's rules at 19 NMAC 8.2 1412.F provide for a person's right to file written objections until 30 days after the last publication of the advertisement required by 19 NMAC 8.2 1412.A(3). These rules are identical to the counterpart Federal regulations. All comments pertaining to a bond release application received by New Mexico will become part of the public record.

NRCS commented that New Mexico's proposed rule at 19 NMAC 8.2 1510, concerning minimum requirements for coal mine operations exclusively under reclamation, should also contain information and analysis that will define expected land use, capability, and productivity after reclamation is complete. As announced by OSM in the December 3, 1998, **Federal Register** notice (which reopened the comment period on New Mexico's November 9, 1998, revisions proposed to its March 11, 1996, amendment), New Mexico withdrew all proposed rules at 19 NMAC 8.2 Part 15 (administrative record No. NM–809). These rules had no counterpart in the Federal program and were repealed by New Mexico so that they no longer exist in its program.

NRCS commented that the timing of backfilling and grading, as proposed by New Mexico at 19 NMAC 8.2 2054.A(1) and (3), should not rely only on distance, but should include a time factor as well. New Mexico subsequently revised its proposed rules at 19 NMAC 8.2 2054.A, as discussed in finding 3.A above, to require that the timing of backfilling and grading be determined by both time and distance standards.

Based on the discussion above, the Director is taking no further action in response to the NRCS comments.

The Bureau of Land Management (BLM) submitted the following comments by letter dated April 17, 1996 (administrative record No. NM–782).

BLM recommended that New Mexico revise 19 NMAC 8.2 813.K, concerning a map showing the existing land surface configuration of the proposed permit area on contour maps of a maximum of 5 foot contour intervals, to require the map to show roads, rail lines, occupied dwellings, pipelines, power lines, and planned exploratory and development features on a scale of 1:24,000 or larger. As discussed at finding No. 4.A above, proposed 19 NMAC 8.2 813.K is not inconsistent with the requirements of the Federal regulations at 30 CFR 779.25(a). New Mexico's existing rules at 19 NMAC 8.2 812.D and E require a map showing the location of (1) all buildings on and within 1,000 feet of the proposed permit area, with identification of the current use of the buildings, and (2) surface and subsurface man-made features within, passing through, or passing over the proposed permit area, including, but not limited to major electric transmission lines, pipelines, and agricultural drainage tile fields. The counterpart Federal regulations, concerning map requirements at 30 CFR 779.24 and 779.25, do not otherwise include requirements similar to the ones recommended by BLM. OSM can only require that New Mexico's program contain rules that are no less effective than the Federal regulations.

BLM recommended New Mexico revise proposed 19 NMAC 8.2 2054.A to require that the permittee demonstrate that additional distance for backfilling and grading is necessary or conducive to greater recovery of coal. As discussed in finding No. 3.A above, New Mexico revised 19 NMAC 8.2 2054.A to provide for additional time and distance for the timing of backfilling and grading based on information submitted in the reclamation plan required at 19 NMAC 906.B(3). This information could include justification for additional distance based on the need to maximize coal recovery. OSM is approving proposed 19 NMAC 8.2 2054.A in part because OSM recognized that there may exist unique conditions at individual surface coal mining operations that require unique standards for the timing of backfilling and grading (see finding No. 3A above). However, the counterpart Federal regulations at 30 CFR 816.100 contain no requirement to the one recommended by BLM. OSM can only require that New Mexico's program contain rules that are no less effective than the Federal regulations.

BLM recommended New Mexico revise 19 NMAC 8.2 2076.B, concerning general road design requirements, to require that roads be maintained and reclaimed so as to be in compliance with any and all safety standards established or approved by the Director. As discussed at finding 3.B above, New Mexico's proposed revision of 19 NMAC 8.2 2076 and 2077 to require a 3.1 safety factor for primary road embankments, rather than for all road embankments, is identical to the requirements in the Federal regulations. New Mexico's existing rule at 19 NMAC 8.2 2076.C requires that the design and construction or reconstruction of roads shall incorporate appropriate limits for grade, width, surface materials, surface drainage control, culvert placement, culvert size, *and any necessary design criteria established by the Director* (emphasis added).

The counterpart Federal regulations, concerning general road design at 30 CFR 816.150, do not include a requirement similar to the one recommended by BLM. OSM can only require that New Mexico's program contain rules that are no less effective than the Federal regulations.

Based on the discussion above, the Director is taking no further action in response to BLM's comments.

The U.S. Department of Interior, Fish and Wildlife Service (FWS), submitted several comments, by letter dated April 30, 1996 (administrative record No. NM–784), pertaining to proposed 19 NMAC Part 15, concerning minimum requirements for coal mine operations exclusively under reclamation. As announced by OSM in the December 3, 1998, **Federal Register** notice (which reopened the comment period on New Mexico's November 9, 1998, revisions proposed to its March 11, 1996, amendment), New Mexico withdrew all proposed rules at 19 NMAC 8.2 Part 15 (administrative record No. NM–809). These rules had no counterpart in the Federal program and were repealed by New Mexico so that they no longer exist in its program. For this reason, the Director is taking no action in response to the FWS comments.

The U.S. Department of Agriculture, Forest Service, Southwestern Region, commented, by letter dated December 9, 1998 (administrative record No. NM–811), that it had no comments.

The U.S. Department of Army, Corps of Engineers, commented, by dated December 28, 1999 (administrative record No. NM–820), that it found the proposed changes to be satisfactory.

BLM also commented, by letter dated January 26, 2000 (administrative record No. NM–822) that New Mexico's proposed 19 NMAC 8.2 2054.A allows 60 days for rough backfilling and grading when contour mining, yet 180 days for strip mining. BLM commented that this difference indicates that 60 days is an insufficient time for such remediation and recommended either the 180 day, 1500 linear feet limit or limits determined by plans of operations. BLM further stated that it preferred tying time frames to plans

because specific seams may lend themselves to different backfilling and grading schedules.

As discussed in finding No. 3.A above, New Mexico proposed and OSM is approving, revisions to 19 NMAC 8.2 2054.A(1), (2), and (3), concerning time requirements for backfilling and grading of contour mining, open pit mining, and strip mining. New Mexico proposed to add the allowance for the Director of the New Mexico program to approve additional distance, as well as additional time, for rough backfilling and grading of contour mining, open pit mining, and strip mining, if the permittee can demonstrate, on the basis of the materials submitted that additional time or distance is necessary. Because New Mexico proposed (and OSM is approving) what BLM recommended in it's comment letter, the Director is taking no further action in response to this comment.

Environmental Protection Agency (EPA) Concurrence and Comments

Under 30 CFR 732.17(h)(11)(ii), we are required to get a written agreement from EPA for those provisions of the program amendment that relate to air or water quality standards issued under the authority of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or the Clean Air Act (42 U.S.C. 7401 *et seq.*).

None of the revisions that New Mexico proposed to make in this amendment pertain to air or water quality standards. Under 30 CFR 732.17(h)(11)(i), OSM requested comments on the amendment from EPA (administrative records Nos. 776, 806, and 817). EPA did not respond to our request.

State Historic Preservation Officer (SHPO) and the Advisory Council on Historic Preservation (ACHP)

Under 30 CFR 732.17(h)(4), we are required to request comments from the SHPO and ACHP on amendments that may have an effect on historic properties. We requested comments on New Mexico's amendment from the SHPO and ACHP (administrative record Nos. 776, 806, and 817); the ACHP did not respond to our request.

By letter dated April 19, 1996, the SHPO commented that it was unclear whether the protection from adverse effect of reclamation operations proposed at 19 NMAC 8.2 1517 (protection of public parks and historic places) included cultural resources identified at 19 NMAC 8.2 1510 (general environmental resources), and recommended that 19 NMAC 8.2 1517 be clarified to clearly include the cultural resources listed at 19 NMAC 8.2 1510.

As announced by OSM in the December 3, 1998, **Federal Register** notice (which reopened the comment period on New Mexico's November 9, 1998, revisions proposed to its March 11, 1996, amendment), New Mexico withdrew all proposed rules at 19 NMAC 8.2 Part 15 (administrative record No. NM–809). These rules concerned minimum requirements for coal mine operations exclusively under reclamation and had no counterpart in the Federal program; they were repealed by New Mexico and no longer exist in its program. Therefore, the Director is taking no action in response to this comment.

V. Director's Decision

Based on the above findings, we approved the March 11, 1996, amendment sent to us by New Mexico, as revised on November 9, 1998, and December 1, 1999.

We approved, as discussed in:

(1) Finding No. 1, 19 NMAC 8.2 813.L, 19 NMAC 8.2 2054.A(2), and 19 NMAC 8.2 2054.A(3), concerning minor wording, editorial, punctuation, grammatical, and/or recodification changes to previously-approved New Mexico rules;

(2) Finding No. 2, 19 NMAC 8.2 2055.C(1) and 19 NMAC 8.2 1106.C, revisions to New Mexico's rules that contain language that is the same as or similar to the corresponding sections of the Federal regulations concerning, respectively, backfilling and grading requirements for the construction of small depressions and permit approval or denial pertaining to the probable cumulative hydrological impacts;

(3) Finding No. 3.A, 19 NMAC 8.2 2054.A(1), (2), and (3), and 19 NMAC 8.2 2054.A(5), concerning time requirements for backfilling and grading of contour mining, open pit mining, and strip mining and the schedule for backfilling and grading at completion of mining;

(4) Finding No. 3.B, 19 NMAC 8.2 2076.B and 19 NMAC 8.2 2077.A, concerning the static factor of safety of 1.3 for road embankments;

(5) Finding No. 4.A, 19 NMAC 8.2 813.K(1) through (3), concerning cross sections, maps, and plans required in a permit application; and

(6) Finding No. 4.B, 19 NMAC 8.2 1412.A(2) (i) through (vii), concerning minimum requirements for all bond release applications.

To implement this decision, we are amending the Federal regulations at 30 CFR Part 931, which codify decisions concerning the New Mexico program. We are making this final rule effective immediately to expedite the State program amendment process and to encourage States to make their programs conform with the Federal standards. SMCRA requires consistency of State and Federal standards.

VI. Procedural Determinations

1. Executive Order 12866

This rule is exempted from review by the Office of Management and Budget (OMB) under Executive Order 12866 (Regulatory Planning and Review).

2. Executive Order 12988

The Department of the Interior has conducted the reviews required by section 3 of Executive Order 12988 (Civil Justice Reform) and has determined that this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments since each such program is drafted and promulgated by a specific State, not by OSM. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and the Federal regulations at 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR Parts 730, 731, and 732 have been met.

3. National Environmental Policy Act

This rule does not require an environmental impact statement because section 702(d) of SMCRA (30 U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act (42 U.S.C. 4332(2)(C)).

4. Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act (44 U.S.C. 3507 *et seq.*).

5. Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal that is the subject of this rule is based

upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Accordingly, this rule will ensure that existing requirements previously promulgated by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

6. Unfunded Mandates

OSM has determined and certifies under the Unfunded Mandates Reform Act (2 U.S.C. 1502 *et seq.*) that this rule will not impose a cost of $100 million or more in any given year on any local, State, or Tribal governments or private entities.

List of Subjects in 30 CFR Part 931

Intergovernmental relations, Surface mining, Underground mining.

Dated: March 21, 2000.

Brent T. Wahlquist,

Regional Director, Western Regional Coordinating Center.

For the reasons set out in the preamble, 30 CFR part 931 is amended as set forth below:

PART 931—NEW MEXICO

1. The authority citation for part 931 continues to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*

2. Section 931.15 is amended in the table by adding a new entry in chronological order by "Date of Final Publication" to read as follows:

§ 931.15 Approval of New mexico regulatory program amendments.

* * * * *

Original amendment submission date	Date of final publication	Citation/description
•	•	•
March 11, 1998	April 10, 2000	19 NMAC 8.2 813.K (1) through (3); 813.L; 1106.C; 1412.A(2) (i) through (vii); 2054.A (1), (2), (3), and (5); 2055.C(1); 2076.B; and 2077.A.

§ 931.16 [Amended]

3. Section 931.16 is amended by removing and reserving paragraph (t).

[FR Doc. 00–8666 Filed 4–7–00; 8:45 am]

BILLING CODE 4310–05–M

DEPARTMENT OF DEFENSE

Defense Threat Reduction Agency

32 CFR Part 318

Defense Threat Reduction Agency Privacy Program

AGENCY: Defense Threat Reduction Agency, DoD

ACTION: Final rule, with comments.

SUMMARY: 32 CFR part 318 is being revised to incorporate administrative changes made to the Defense Threat Reduction Agency Privacy Act Program Instruction.

DATES: This rule is effective January 18, 2000. Comments must be received by June 9, 2000.

ADDRESSES: Chief, FOIA and Privacy Division, FOIA/Privacy Act Division, Defense Threat Reduction Agency (ADF), 6801 Telegraph Road, Alexandria, VA 22310–3398.

FOR FURTHER INFORMATION CONTACT: Ms. Sandy Ford at (703) 325–1205.

SUPPLEMENTARY INFORMATION:

Executive Order 12866, "Regulatory Planning and Review"

It has been determined that 32 CFR part 318 is not a significant regulatory action. The rule does not:

(1) Have an annual effect to the economy of $100 million or more; or adversely affect in a material way the economy; a section of the economy; productivity; competition; jobs; the environment; public health or safety; or state, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another Agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof;

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.

Public Law 96–354, "Regulatory Flexibility Act" (5 U.S.C. 601)

It has been certified that this rule is not subject to the Regulatory Flexibility Act (5 U.S.C. 601) because it would not, if promulgated, have a significant economic impact on a substantial number of small entities.

Public Law 96–511, "Paperwork Reduction Act" (44 U.S.C. Chapter 35)

It has been certified that this part does not impose any reporting or record keeping requirements under the Paperwork Reduction Act of 1995.

List of Subjects 32 CFR part 318

Privacy.

Accordingly, Title 32 CFR part 318 is revised to read as follows:

PART 318—DEFENSE THREAT REDUCTION AGENCY PRIVACY PROGRAM

Sec.

318.1 Reissuance and purpose.
318.2 Application.
318.3 Definitions.
318.4 Policy.
318.5 Designations and responsibilities.
318.6 Procedures for requests pertaining to individual records in a record system.
318.7 Disclosure of requested information to individuals.
318.8 Request for correction or amendment to a record.
318.9 Agency review of request for correction or amendment of record.
318.10 Appeal of initial adverse Agency determination for access, correction or amendment
318.11 Disclosure of record to persons other than the individual to whom it pertains.
318.12 Fees.
318.13 Enforcement actions.
318.14 Blanket routine uses.
318.15 Rules of conduct.
318.16 Exemption rules.

Authority: Pub. L. 93–579, 88 Stat 1896 (5 U.S.C. 552a).

§ 318.1 Reissuance and purpose.

(a) This part updates the policies, responsibilities, and procedures of the DTRA Privacy Program under the Privacy Act of 1974, as amended (5

U.S.C. 552a), OMB Circular A–130,[1] and the DoD Privacy Program (32 CFR part 310).

(b) This rule establishes procedures whereby individuals can:

(1) Request notification of whether Defense Threat Reduction Agency (DTRA) maintains or has disclosed a record pertaining to them in any nonexempt system of records;

(2) Request a copy or other access to such a record or to an accounting of its disclosure;

(3) Request that the record be amended; and

(4) Appeal any initial adverse determination of any such request.

(c) Specifies those system of records which the Director, Defense Threat Reduction Agency has determined to be exempt from the procedures established by this rule and by certain provisions of the Privacy Act.

(d) DTRA policy encompasses the safeguarding of individual privacy from any misuse of DTRA records and the provides the fullest access practicable by individuals to DTRA records concerning them.

§ 318.2 Applicability.

(a) This part applies to all members of the Armed Forces and Department of Defense civilians assigned to the DTRA at any of its duty locations.

(b) This part shall be made applicable to DoD contractors who are operating a system of records on behalf of DTRA, to include any of the activities, such as collecting and disseminating records, associated with maintaining a system of records.

§ 318.3 Definitions.

Access. The review of a record or a copy of a record or parts thereof in a system of records by any individual.

Agency. For the purposes of disclosing records subject to the Privacy Act among DoD Components, the Department of Defense is considered a single agency. For all other purposes to include applications for access and amendment, denial of access or amendment, appeals from denials, and record keeping as regards release to non-DoD agencies; each DoD Component is considered an agency within the meaning of the Privacy Act.

Confidential source. A person or organization who has furnished information to the federal government under an express promise that the person's or the organization's identity will be held in confidence or under an implied promise of such confidentiality if this implied promise was made before September 27, 1975.

Disclosure. The transfer of any personal information from a system of records by any means of communication (such as oral, written, electronic, mechanical, or actual review) to any person, private entity, or government agency, other than the subject of the record, the subject's designated agent or the subject's legal guardian.

Individual. A living person who is a citizen of the United States or an alien lawfully admitted for permanent residence. The parent of a minor or the legal guardian of any individual also may act on behalf of an individual. Corporations, partnerships, sole proprietorships, professional groups, businesses, whether incorporated or unincorporated, and other commercial entities are not "individuals."

Law enforcement activity. Any activity engaged in the enforcement of criminal laws, including efforts to prevent, control, or reduce crime or to apprehend criminals, and the activities of prosecutors, courts, correctional, probation, pardon, or parole authorities.

Maintain. Includes maintain, collect, use or disseminate.

Official use. Within the context of this part, this term is used when officials and employees of a DoD Component have a demonstrated need for the use of any record or the information contained therein in the performance of their official duties, subject to DoD 5200.1–R,[2] "DoD Information Security Program Regulation".

Personal information. Information about an individual that identifies, relates or is unique to, or describes him or her; e.g., a social security number, age, military rank, civilian grade, marital status, race, salary, home/office phone numbers, etc.

Privacy Act request. A request from an individual for notification as to the existence of, access to, or amendment of records pertaining to that individual. These records must be maintained in a system of records.

Member of the public. Any individual or party acting in a private capacity to include federal employees or military personnel.

Record. Any item, collection, or grouping of information, whatever the storage media (e.g., paper, electronic, etc.), about an individual that is maintained by a DoD Component, including but not limited to, his or her education, financial transactions, medical history, criminal or employment history and that contains his or her name, or the identifying number, symbol, or other identifying particular assigned to the individual, such as a finger or voice print or a photograph.

Risk assessment. An analysis considering information sensitivity, vulnerabilities, and the cost to a computer facility or word processing activity in safeguarding personal information processed or stored in the facility or activity.

Routine use. The disclosure of a record outside the Department of Defense for a use that is compatible with the purpose for which the information was collected and maintained by the Department of Defense. The routine use must be included in the published system notice for the system of records involved.

Statistical record. A record maintained only for statistical research or reporting purposes and not used in whole or in part in making determinations about specific individuals.

System manager. The DoD Component official who is responsible for the operation and management of a system of records.

System of records. A group of records under the control of a DoD Component from which personal information is retrieved by the individual's name or by some identifying number, symbol, or other identifying particular assigned to an individual.

Word processing system. A combination of equipment employing automated technology, systematic procedures, and trained personnel for the primary purpose of manipulating human thoughts and verbal or written or graphic presentations intended to communicate verbally or visually with another individual.

Word processing equipment. Any combination of electronic hardware and computer software integrated in a variety of forms (firmware, programmable software, handwiring, or similar equipment) that permits the processing of textual data. Generally, the equipment contains a device to receive information, a computer-like processor with various capabilities to manipulate the information, a storage medium, and an output device

§ 318.4 Policy.

(a) It is DTRA policy that:

(1) The personal privacy of an individual shall be respected and protected. Personal information shall be collected, maintained, used, or disclosed to insure that:

(2) It shall be relevant and necessary to accomplish a lawful DTRA purpose

[1] Copies may be obtained: http://www.whitehouse.gov/OMB/circulars.

[2] Copies may be obtained: http://web7.whs.osd.mil/corres.htm.

required to be accomplished by Federal statute or Executive order;

(3) It shall be collected to the greatest extent practicable directly from the individual;

(4) The individual shall be informed as to why the information is being collected, the authority for collection, what uses will be made of it, whether disclosure is mandatory or voluntary, and the consequences of not providing the information;

(5) It shall be relevant, timely, complete and accurate for its intended use; and

(6) Appropriate administrative, technical, and physical safeguards shall be established, based on the media (e.g., paper, electronic, etc.) involved, to ensure the security of the records and to prevent compromise or misuse during storage or transfer.

(b) No record shall be maintained on how an individual exercises rights guaranteed by the First Amendment to the Constitution, except as specifically authorized by statute; expressly authorized by the individual on whom the record is maintained; or when the record is pertinent to and within the scope of an authorized law enforcement activity.

(c) Notices shall be published in the Federal Register and reports shall be submitted to Congress and the Office of Management and Budget, in accordance with, and as required by 5 U.S.C. 552a, OMB Circular A–130, and 32 CFR part 310, as to the existence and character of any system of records being established or revised by the DoD Components. Information shall not be collected, maintained, or disseminated until the required publication/review requirements are satisfied.

(d) Individuals shall be permitted, to the extent authorized by this part:

(1) To determine what records pertaining to them are contained in a system of records;

(2) Gain access to such records and obtain a copy of those records or a part thereof;

(3) Correct or amend such records on a showing the records are not accurate, relevant, timely, or complete.

(4) Appeal a denial of access or a request for amendment.

(e) Disclosure of records pertaining to an individual from a system of records shall be prohibited except with the consent of the individual or as otherwise authorized by 5 U.S.C. 552a and 32 CFR part 286. When disclosures are made, the individual shall be permitted, to the extent authorized by 5 U.S.C. 552a and 32 CFR part 310, to seek an accounting of such disclosures from DTRA.

(f) Computer matching programs between DTRA and Federal, State, or local governmental agencies shall be conducted in accordance with the requirements of 5 U.S.C. 552a, OMB Circular A–130, and 32 CFR part 310.

(g) DTRA personnel and Systems Managers shall conduct themselves, pursuant to established rules of conduct, so that personal information to be stored in a system of records shall only be collected, maintained, used, and disseminated as authorized by this part.

§ 318.5 Designations and responsibilities

(a) The Director, DTRA shall:

(1) Provide adequate funding and personnel to establish and support an effective Privacy Program.

(2) Appoint a senior official to serve as the Agency Privacy Act Officer.

(3) Serve as the Agency Appellate Authority.

(b) The Privacy Act Officer shall:

(1) Implement the Agency's Privacy Program in accordance with the specific requirements set forth in this part, 5 U.S.C. 552a, OMB Circular A–130, and 32 CFR part 310.

(2) Establish procedures, as well as rules of conduct, necessary to implement this part so as to ensure compliance with the requirements of 5 U.S.C. 552a, OMB Circular A–130, and 32 CFR part 310.

(3) Ensure that the DTRA Privacy Program periodically shall be reviewed by the DTRA Inspectors General or other officials, who shall have specialized knowledge of the DoD Privacy Program.

(4) Serve as the Agency Initial Denial Authority.

(c) *The Privacy Act Program Manager shall:*

(1) Manage activities in support of the DTRA Program oversight in accordance with part, 5 U.S.C. 552a, OMB Circular A–130, and 32 CFR part 310.

(2) Provide operational support, guidance and assistance to Systems Managers for responding to requests for access/amendment of records.

(3) Direct the day-by-day activities of the DTRA Privacy Program.

(4) Provide guidance and assistance to DTRA elements in their implementation and execution of the DTRA Privacy Program.

(5) Prepare and submit proposed new, altered, and amended systems of records, to include submission of required notices for publication in the Federal Register consistent with this part, 5 U.S.C. 552a, OMB Circular A–130, and 32 CFR part 310.

(6) Prepare and submit proposed DTRA privacy rulemaking, to include documentation for submission of the proposed rule to the Office of the Federal Register for publication. Additionally, provide required documentation for reporting to the OMB and Congress, consistent with this part, 5 U.S.C. 552a, OMB Circular A–130, and 32 CFR part 310.

(7) Provide advice and support to DTRA elements to ensure that:

(i) All information requirements developed to collect and/or maintain personal data conform to DoD Privacy Act Program standards;

(ii) Appropriate procedures and safeguards shall be developed, implemented, and maintained to protect personal information when it is stored in either a manual and/or automated system of records or transferred by electronic or non-electronic means; and

(iii) Specific procedures and safeguards shall be developed and implemented when personal data is collected and maintained for research purposes.

(8) Conduct reviews, and prepare and submit reports consistent with the requirements in this part, 5 U.S.C. 552a, OMB Circular A–130, and 32 CFR part 310, or as otherwise directed by the Defense Privacy Office.

(9) Conduct training for all assigned and employed DTRA personnel and for those individuals having primary responsibility for DTRA Privacy Act Record Systems consistent with requirements of this part, 5 U.S.C. 552a, OMB Circular A–130, and 32 CFR part 310.

(10) Serve as the principal points of contact for coordination of privacy and related matters.

(d) *The Directorate Heads and Office Chiefs shall:*

(1) Recognize and support the DTRA Privacy Act Program.

(2) Appoint an individual to serve as Privacy Act Point of Contact within their purview.

(3) Initiate prompt, constructive management actions on agreed-upon actions identified in agency Privacy Act reports.

(e) *The Chief, Information Systems shall:*

(1) Ensure that all personnel who have access to information from an automated system of records during processing or who are engaged in developing procedures for processing such information are aware of the provisions of this Instruction.

(2) Promptly notify automated system managers and the Privacy Act Officer whenever they are changes to Agency Information Technology that may require the submission of an amended system notice for any system of records.

(3) Establish rules of conduct for Agency personnel involved in the

design, development, operation, or maintenance of any automated system of records and train them in these rules of conduct.

(f) Agency System Managers shall exercise the Rules of Conduct as specified in 32 CFR part 310.

(g) Agency personnel shall exercise the Rules of Conduct as specified in 32 CFR part 310.

§ 318.6 Procedures for requests pertaining to individual records in a record system.

(a) An individual seeking notification of whether a system of records, maintained by the Defense Threat Reduction Agency, contains a record pertaining to himself/herself and who desires to review, have copies made of such records, or to be provided an accounting of disclosures from such records, shall submit his or her request in writing. Requesters are encourage to review the systems of records notices published by the Agency so as to specifically identify the particular record system(s) of interest to be accessed.

(b) In addition to meeting the requirements set forth in this section 318.6, the individual seeking notification, review or copies, and an accounting of disclosures will provide in writing his or her full name, address, Social Security Number, and a telephone number where the requester can be contacted should questions arise concerning the request. This information will be used only for the purpose of identifying relevant records in response to an individual's inquiry. It is further recommended that individuals indicate any present or past relationship or affiliations, if any, with the Agency and the appropriate dates in order to facilitate a more thorough search. A notarized statement or an unsworn declaration in accordance with 28 U.S.C. 1746 may also be required.

(c) An individual who wishes to be accompanied by another individual when reviewing his or her records, must provide the Agency with written consent authorizing the Agency to disclose or discuss such records in the presence of the accompanying individual.

(d) Individuals should mail their written request to the FOIA/Privacy Act Division, Defense Threat Reduction Agency, 45045 Aviation Drive, Dulles, VA 20166–7517 and indicate clearly on the outer envelope "Privacy Act Request."

§ 318.7 Disclosure of requested information to individuals.

(a) The Defense Threat Reduction Agency, upon receiving a request for notification of the existence of a record or for access to a record, shall acknowledge receipt of the request within 10 working days.

(b) Determine whether or not such record exists.

(c) Determine whether or not such request for access is available under the Privacy Act.

(d) Notify requester of determinations within 30 working days after receipt of such request.

(e) Provide access to information pertaining to that person which has been determined to be available within 30 working days.

(f) Notify the individual if fees will be assessed for reproducing copies of the records. Fee schedule and rules for assessing fees are contained in § 318.11.

§ 318.8 Request for correction or amendment to a record.

(a) An individual may request that the Defense Threat Reduction Agency correct, amend, or expunge any record, or portions thereof, pertaining to the requester that he/she believe to be inaccurate, irrelevant, untimely, or incomplete.

(b) Such requests shall specify the particular portions of the records in question, be in writing and should be mailed to the FOIA/Privacy Act Division, Defense Threat Reduction Agency, 45045 Aviation Drive, Dulles, VA 20166–7517.

(c) The requester shall provide sufficient information to identify the record and furnish material to substantiate the reasons for requesting corrections, amendments, or expurgation.

§ 318.9 Agency review of request for correction or amendment of record.

(a) The Agency will acknowledge a request for correction or amendment within 10 working days of receipt. The acknowledgment will be in writing and will indicate the date by which the Agency expects to make its initial determination.

(b) The Agency shall complete its consideration of requests to correct or amend records within 30 working days, and inform the requester of its initial determination.

(c) If it is determined that records should be corrected or amended in whole or in part, the Agency shall advise the requester in writing of its determination; and correct or amend the records accordingly. The Agency shall then advise prior recipients of the records of the fact that a correction or amendment was made and provide the substance of the change.

(d) If the Agency determines that a record should not be corrected or amended, in whole or in part, as requested by the individual, the Agency shall advise the requester in writing of its refusal to correct or amend the records and the reasons therefor. The notification will inform the requester that the refusal may be appealed administratively and will advise the individual of the procedures for such appeals.

§ 318.10 Appeal of initial adverse Agency determination for access, correction or amendment.

(a) An individual who disagrees with the denial or partial denial of his or her request for access, correction, or amendment of Agency records pertaining the himself/herself, may file a request for administrative review of such refusal within 30 days after the date of notification of the denial or partial denial.

(b) Such requests shall be made in writing and mailed to the FOIA/Privacy Act Division, Defense Threat Reduction Agency, 45045 Aviation Drive, Dulles, VA 20166–7517.

(c) The requester shall provide a brief written statement setting for the reasons for his or her disagreement with the initial determination and provide such additional supporting material as the individual feels necessary to justify the appeal.

(d) Within 30 working days of receipt of the request for review, the Agency shall advise the individual of the final disposition of the request.

(e) In those cases where the initial determination is reversed, the individual will be so informed and the Agency will take appropriate action.

(f) In those cases where the initial determination is sustained, the individual shall be advised:

(1) In the case of a request for access to a record, of the individual's right to seek judicial review of the Agency refusal for access.

(2) In the case of a request to correct or amend the record:

(i) Of the individual's right to file a concise statement of his or her reasons for disagreeing with the Agency's decision in the record,

(ii) Of the procedures for filing a statement of the disagreement, and

(iii) Of the individual's right to seek judicial review of the Agency's refusal to correct or amend a record.

§ 318.11 Disclosure of record to persons other than the individual to whom it pertains.

(a) General. No record contained in a system of records maintained by DTRA shall be disclosed by any means to any person or agency within or outside the

Department of Defense without the request or consent of the subject of the record, except as described in 32 CFR 310.41, Appendix C to part 310, and/or a Defense Threat Reduction Agency system of records notice.

(b) Accounting of disclosures. Except for disclosures made to members of the DoD in connection with their official duties, and disclosures required by the Freedom of Information Act, an accounting will be kept of all disclosures of records maintained in DTRA system of records.

(1) Accounting entries will normally be kept on a DTRA form, which will be maintained in the record file jacket, or in a document that is part of the record.

(2) Accounting entries will record the date, nature and purpose of each disclosure, and the name and address of the person or agency to whom the disclosure is made.

(3) Accounting records will be maintained for at least 5 years after the last disclosure, of for the life of the record, whichever is longer.

(4) Subjects of DTRA records will be given access to associated accounting records upon request, except for those disclosures made to law enforcement activities when the law enforcement activity has requested that the disclosure not be made, and/or as exempted under § 318.16.

§318.12 Fees.

Individuals may request copies for retention of any documents to which they are granted access in DTRA records pertaining to them. Requesters will not be charged for the first copy of any records provided; however, duplicate copies will require a charge to cover costs of reproduction. Such charges will be computed in accordance with 32 CFR part 310.

§318.13 Enforcement actions.

Procedures and sanctions are set forth in 5 U.S.C. 552a, OMB Circular A–130, and 32 CFR part 310.

§318.14 Blanket routine uses.

(a) *Blanket routine uses.* Certain 'blanket routine uses' of the records have been established that are applicable to every record system maintained within the Department of Defense unless specifically stated otherwise within a particular record system. These additional blanket routine uses of the records are published only once in the interest of simplicity, economy and to avoid redundancy.

(b) *Routine Use—Law Enforcement.* If a system of records maintained by a DoD Component, to carry out its functions, indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or by regulation, rule, or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the agency concerned, whether Federal, State, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation, or order issued pursuant thereto.

(c) *Routine Use—Disclosure When Requesting Information.* A record from a system of records maintained by a Component may be disclosed as a routine use to a Federal, State, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a Component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

(d) *Routine Use—Disclosure of Requested Information.* A record from a system of records maintained by a Component may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

(e) *Routine Use—Congressional Inquiries.* Disclosure from a system of records maintained by a Component may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

(f) *Routine Use—Private Relief Legislation.* Relevant information contained in all systems of records of the Department of Defense published on or before August 22, 1975, will be disclosed to the OMB in connection with the review of private relief legislation as set forth in OMB Circular A–19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

(g) *Routine Use—Disclosures Required by International Agreements.* A record from a system of records maintained by a Component may be disclosed to foreign law enforcement, security, investigatory, or administrative authorities to comply with requirements imposed by, or to claim rights conferred in, international agreements and arrangements including those regulating the stationing and status in foreign countries of DoD military and civilian personnel.

(h) *Routine Use—Disclosure to State and Local Taxing Authorities.* Any information normally contained in Internal Revenue Service (IRS) Form W–2 which is maintained in a record from a system of records maintained by a Component may be disclosed to State and local taxing authorities with which the Secretary of the Treasury has entered into agreements under 5 U.S.C. 5516, 5517, and 5520 and only to those State and local taxing authorities for which an employee or military member is or was subject to tax regardless of whether tax is or was withheld. This routine use is in accordance with Treasury Fiscal Requirements Manual Bulletin No. 76–07.

(i) *Routine Use—Disclosure to the Office of Personnel Management.* A record from a system of records subject to the Privacy Act and maintained by a Component may be disclosed to the Office of Personnel Management (OPM) concerning information on pay and leave, benefits, retirement deduction, and any other information necessary for the OPM to carry out its legally authorized government-wide personnel management functions and studies.

(j) *Routine Use—Disclosure to the Department of Justice for Litigation.* A record from a system of records maintained by this component may be disclosed as a routine use to any component of the Department of Justice for the purpose of representing the Department of Defense, or any officer, employee or member of the Department in pending or potential litigation to which the record is pertinent.

(k) *Routine Use—Disclosure to Military Banking Facilities Overseas.* Information as to current military addresses and assignments may be provided to military banking facilities who provide banking services overseas and who are reimbursed by the Government for certain checking and loan losses. For personnel separated, discharged, or retired from the Armed Forces, information as to last known residential or home of record address may be provided to the military banking facility upon certification by a banking facility officer that the facility has a returned or dishonored check negotiated by the individual or the individual has defaulted on a loan and that if restitution is not made by the individual, the U.S. Government will be

liable for the losses the facility may incur.

(l) *Routine Use—Disclosure of Information to the General Services Administration (GSA).* A record from a system of records maintained by this component may be disclosed as a routine use to the General Services Administration (GSA) for the purpose of records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

(m) *Routine Use—Disclosure of Information to the National Archives and Records Administration (NARA).* A record from a system of records maintained by this component may be disclosed as a routine use to the National Archives and Records Administration (NARA) for the purpose of records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

(n) Routine Use—Disclosure to the Merit Systems Protection Board. A record from a system of records maintained by this component may be disclosed as a routine use to the Merit Systems Protection Board, including the Office of the Special Counsel for the purpose of litigation, including administrative proceedings, appeals, special studies of the civil service and other merit systems, review of OPM or component rules and regulations, investigation of alleged or possible prohibited personnel practices; including administrative proceedings involving any individual subject of a DoD investigation, and such other functions, promulgated in 5 U.S.C. 1205 and 1206, or as may be authorized by law.

(o) *Routine Use—Counterintelligence Purpose.* A record from a system of records maintained by this component may be disclosed as a routine use outside the DoD or the U.S. Government for the purpose of counterintelligence activities authorized by U.S. Law or Executive Order or for the purpose of enforcing laws which protect the national security of the United States.

§ 318.15 Rules of conduct

(a) DTRA personnel shall:

(1) Take such actions, as considered appropriate, to ensure that personal information contained in a system of records, to which they have access or are using incident to the conduct of official business, shall be protected so that the security and confidentiality of the information shall be preserved.

(2) Not disclose any personal information contained in any system of records except as authorized by 32 CFR part 310 or other applicable law or regulation. Personnel willfully making such a disclosure when knowing the disclosure is prohibited are subject to possible criminal penalties and/or administrative sanctions.

(3) Report any unauthorized disclosure of personal information from a system of records or the maintenance of any system of records that are not authorized by the Instruction to the DTRA Privacy Act Officer.

(b) DTRA system managers for each system of records shall:

(1) Ensure that all personnel who either have access to the system of records or who shall develop or supervise procedures for the handling of records in the system of records shall be aware of their responsibilities for protecting personnel information being collected and maintained under the DTRA Privacy Program.

(2) Promptly notify the Privacy Act Officer of any required new, amended, or altered system notices for the system of records.

(3) Not maintain any official files on individuals, which are retrieved by name or other personal identifier without first ensuring that a notice for the system of records shall have been published in the "Federal Register." Any official who willfully maintains a system of records without meeting the publication requirements, as prescribed by 5 U.S.C. 552a, OMB Circular A–130, and 32 CFR part 310, is subject to possible criminal penalties and/or administrative sanctions.

§ 318.16 Exemption rules.

(a) *Exemption for classified material.* All systems of records maintained by the Defense Threat Reduction Agency shall be exempt under section (k)(1) of 5 U.S.C. 552a, to the extent that the systems contain any information properly classified under E.O. 12598 and that is required by that E.O. to be kept secret in the interest of national defense or foreign policy. This exemption is applicable to parts of all systems of records including those not otherwise specifically designated for exemptions herein which contain isolated items of properly classified information.

(b) *System identifier and name:* HDTRA 007, Security Operations.

(1) Exemption: Portions of this system of records may be exempt from the provisions of 5 U.S.C. 552a(c)(3), (d)(1) through (d)(4), (e)(1), (e)(4)(G), (H), (I), and (f).

(2) Authority: 5 U.S.C. 552a(k)(5).

(3) Reasons: (i) From subsection (c)(3) because it will enable DTRA to safeguard certain investigations and relay law enforcement information without compromise of the information, and protect the identities of confidential sources who might not otherwise come forward and who have furnished information under an express promise that the sources' identity would be held in confidence (or prior to the effective date of the Act, under an implied promise.)

(ii) From subsection (d)(1) through (d)(4) and (f) because providing access to records of a civil investigation and the right to contest the contents of those records and force changes to be made to the information contained therein would seriously interfere with and thwart the orderly and unbiased conduct of security investigations. Providing access rights normally afforded under the Privacy Act would provide the subject with valuable information that would allow interference with or compromise of witnesses or render witnesses reluctant to cooperate; lead to suppression, alteration, or destruction of evidence; and result in the secreting of or other disposition of assets that would make them difficult or impossible to reach in order to satisfy any Government claim growing out of the investigation or proceeding.

(iii) From subsection (e)(1), (e)(4)(G), (H), (I) because it will provide protection against notification of investigatory material including certain reciprocal investigations and counterintelligence information, which might alert a subject to the fact that an investigation of that individual is taking place, and the disclosure of which would weaken the on-going investigation, reveal investigatory techniques, and place confidential informants in jeopardy who furnished information; under an express promise that the sources' identity would be held in confidence (or prior to the effective date of the Act, under an implied promise.)

(c) *System identifier and name:* HDTRA 011, Inspector General Investigation Files.

(1) Exemption: Portions of this system of records may be exempt from the provisions of 5 U.S.C. 552a(c)(3); (d)(1) through (4); (e)(1); (e)(4)(G), (H), and (I); and (f).

(2) Authority: 5 U.S.C. 552a(k)(2).

(3) Reasons: (i) From subsection (c)(3) because it will enable DTRA to conduct certain investigations and relay law enforcement information without compromise of the information, protection of investigative techniques and efforts employed, and identities of confidential sources who might not otherwise come forward and who furnished information under an express promise that the sources' identity would

be held in confidence (or prior to the effective date of the Act, under an implied promise.)

(ii) From subsection (d)(1) through (d)(4) and (f) because providing access to records of a civil investigation and the right to contest the contents of those records and force changes to be made to the information contained therein would seriously interfere with and thwart the orderly and unbiased conduct of the investigation and impede case preparation. Providing access rights normally afforded under the Privacy Act would provide the subject with valuable information that would allow interference with or compromise of witnesses or render witnesses reluctant to cooperate; lead to suppression, alteration, or destruction of evidence; and result in the secreting of or other disposition of assets that would make them difficult or impossible to reach in order to satisfy any Government claim growing out of the investigation or proceeding.

(iii) From subsection (e)(1), (e)(4)(G), (H), and (I) because it will provide protection against notification of investigatory material including certain reciprocal investigations and counterintelligence information, which might alert a subject to the fact that an investigation of that individual is taking place, and the disclosure of which would weaken the on-going investigation, reveal investigatory techniques, and place confidential informants in jeopardy who furnished information under an express promise that the sources' identity would be held in confidence (or prior to the effective date of the Act, under an implied promise).

Dated: April 3, 2000.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–10–F

DEPARTMENT OF DEFENSE

Defense Logistics Agency

32 CFR Part 323

[Defense Logistics Agency Reg. 5400.21]

Defense Logistics Agency Privacy Program

AGENCY: Defense Logistics Agency, DoD

ACTION: Final rule.

SUMMARY: The Defense Logistics Agency is exempting a system of records (S500.30 CAAS, Incident Investigation/ Police Inquiry Files) from certain provisions of the Privacy Act. The exemptions are intended to increase the value of the system of records for law enforcement purposes, to comply with prohibitions against the disclosure of certain kinds of information, and to protect the privacy of individuals identified in the system of records.

EFFECTIVE DATE: March 21, 2000.

FOR FURTHER INFORMATION CONTACT: Ms. Susan Salus at (703) 767–6183.

SUPPLEMENTARY INFORMATION: The proposed rule was published on January 20, 2000 at 65 FR 3167. No comments were received, therefore, the Defense Logistics Agency is adopting the rule as final.

Executive Order 12866, 'Regulatory Planning and Review'

It has been determined that 32 CFR part 321 is not a significant regulatory action. The rule does not:

(1) Have an annual effect to the economy of $100 million or more; or adversely affect in a material way the economy; a section of the economy; productivity; competition; jobs; the environment; public health or safety; or state, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another Agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof;

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.

Public Law 96–354, "Regulatory Flexibility Act" (5 U.S.C. 601)

It has been certified that this rule is not subject to the Regulatory Flexibility Act (5 U.S.C. 601) because it would not, if promulgated, have a significant economic impact on a substantial number of small entities.

Public Law 96–511, "Paperwork Reduction Act" (44 U.S.C. Chapter 35)

It has been certified that this part does not impose any reporting or record keeping requirements under the Paperwork Reduction Act of 1995.

List of Subjects 32 CFR Part 323

Privacy.

Accordingly, 32 CFR part 323 is amended as follows:

PART 323—DEFENSE LOGISTICS AGENCY PRIVACY PROGRAM

1. The authority citation for 32 CFR Part 323 continues to read as follows:

Authority: Pub. L. 93–579, 88 Stat 1896 (5 U.S.C. 552a).

2. Appendix H to Part 323 is to be amended by adding paragraph f. as follows:

Appendix H to Part 323—DLA Exemption Rules.

* * * * *

f. ID: S500.30 CAAS *(Specific exemption).*

1. *System name:* Incident Investigation/ Police Inquiry Files.

2. *Exemption:* (i) Investigatory material compiled for law enforcement purposes may be exempt pursuant to 5 U.S.C. 552a(k)(2). However, if an individual is denied any right, privilege, or benefit for which he would otherwise be entitled by Federal law or for which he would otherwise be eligible, as a result of the maintenance of the information, the individual will be provided access to the information except to the extent that disclosure would reveal the identity of a confidential source.

(ii) Investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for federal civilian employment, military service, federal contracts, or access to classified information may be exempt pursuant to 5 U.S.C. 552a(k)(5), but only to the extent that such material would reveal the identity of a confidential source.

3. *Authority:* 5 U.S.C. 552a(k)(2) and (k)(5), subsections (c)(3), (d)(1) through (d)(4), (e)(1), (e)(4)(G), (H), and (I), and (f).

4. *Reasons:* (i) From subsection (c)(3) because to grant access to the accounting for each disclosure as required by the Privacy Act, including the date, nature, and purpose of each disclosure and the identity of the recipient, could alert the subject to the existence of the investigation or prosecutive interest by DLA or other agencies. This could seriously compromise case preparation by prematurely revealing its existence and nature; compromise or interfere with witnesses or make witnesses reluctant to cooperate; and lead to suppression, alteration, or destruction of evidence.

(ii) From subsections (d)(1) through (d)(4), and (f) because providing access to records of a civil or administrative investigation and the right to contest the contents of those records and force changes to be made to the information contained therein would seriously interfere with and thwart the orderly and unbiased conduct of the investigation and impede case preparation. Providing access rights normally afforded under the Privacy Act would provide the subject with valuable information that would allow interference with or compromise of witnesses or render witnesses reluctant to cooperate; lead to suppression, alteration, or destruction of evidence; enable individuals to conceal their wrongdoing or mislead the course of the investigation; and result in the secreting of or other disposition of assets that would make them difficult or impossible to reach in order to satisfy any Government claim growing out of the investigation or proceeding.

(iii) From subsection (e)(1) because it is not always possible to detect the relevance or

necessity of each piece of information in the early stages of an investigation. In some cases, it is only after the information is evaluated in light of other evidence that its relevance and necessity will be clear.

(iv) From subsections (e)(4)(G) and (H) because this system of records is compiled for law enforcement purposes and is exempt from the access provisions of subsections (d) and (f).

(v) From subsection (e)(4)(I) because to the extent that this provision is construed to require more detailed disclosure than the broad, generic information currently published in the system notice, an exemption from this provision is necessary to protect the confidentiality of sources of information and to protect privacy and physical safety of witnesses and informants. DLA will, nevertheless, continue to publish such a notice in broad generic terms as is its current practice.

Dated: April 3, 2000.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA231–0227a; FRL–6570–9]

Approval and Promulgation of Implementation Plans; California State Implementation Plan Revision, Antelope Valley Air Pollution Control District and Mojave Desert Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is taking direct final action on revisions to the California State Implementation Plan. The revisions concern rules from the Antelope Valley Air Pollution Control District (AVAPCD) and the Mojave Desert Air Quality Management District (MDAQMD). This approval action will incorporate these rules into the federally approved SIP. The intended effect of approving these rules is to regulate emissions of volatile organic compounds (VOCs) in accordance with the requirements of the Clean Air Act, as amended in 1990 (CAA or the Act). The revised rules control VOC emissions from Automotive Refinishing Operations and Motor Vehicle and Mobile Equipment Coatings Operations. Thus, EPA is finalizing the approval of these revisions into the California SIP under provisions of the CAA regarding EPA action on SIP submittals, SIPs for national primary and secondary ambient air quality standards and plan requirements for nonattainment areas.

DATES: This rule is effective on June 9, 2000 without further notice, unless EPA receives adverse comments by May 10, 2000. If EPA receives such comment, it will publish a timely withdrawal in the **Federal Register** informing the public that this rule will not take effect.

ADDRESSES: Written comments must be submitted to Andrew Steckel, Chief, Rulemaking Office at the Region IX office listed below. Copies of the rule revisions and EPA's technical support document for each rule are available for public inspection at EPA's Region IX office during normal business hours. Copies of the submitted rule revisions are available for inspection at the following locations:

Rulemaking Office (AIR–4), Air Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105;

Environmental Protection Agency, Ariel Rios Building, (Mail Code 6102), 1200 Pennsylvania Avenue, N.W., Washington, D.C. 20460;

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 2020 "L" Street, Sacramento, CA 95812;

Antelope Valley Air Pollution Control District, 43301 Division Street, Suite 206, Lancaster, CA 93539–4409;

Mojave Desert Air Quality Management District (formerly San Bernardino County Air Pollution Control District), 15428 Civic Drive, Suite 200, Victorville, CA 92392–2382

FOR FURTHER INFORMATION CONTACT: Julie A. Rose, Rulemaking Office, AIR–4, Air Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105, Telephone: (415) 744–1184.

SUPPLEMENTARY INFORMATION:

I. Applicability

The rules being approved into the California SIP include: Antelope Valley Air Pollution Control District (AVAPCD) Rule 1151, Motor Vehicle and Mobile Equipment Coatings Operations and Mojave Desert Air Quality Management District (MDAQMD) Rule 1116, Automotive Refinishing Operations. These rules were submitted by the California Air Resources Board to EPA on October 29, 1999 and July 23, 1999, respectively.

II. Background

On March 3, 1978, EPA promulgated a list of ozone nonattainment areas under the provisions of the Clean Air Act, as amended in 1977 (1977 Act or pre-amended Act), that included the portions of the San Bernardino County Air Pollution Control District [1] within the Southeast Desert Modified Air Quality Maintenance Area and the Los Angeles-South Coast Air Basin Area. 43 FR 8964, 40 CFR 81.305. On May 26, 1988, EPA notified the Governor of California, pursuant to section 110(a)(2)(H) of the 1977 Act, that the above districts' portions of the California SIP were inadequate to attain and maintain the ozone standard and requested that deficiencies in the existing SIP be corrected (EPA's SIP-Call). On November 15, 1990, the Clean Air Act Amendments of 1990 were enacted. Public Law 101–549, 104 Stat. 2399, codified at 42 U.S.C. 7401–7671q. In amended section 182(a)(2)(A) of the CAA, Congress statutorily adopted the requirement that nonattainment areas fix their deficient reasonably available control technology (RACT) rules for ozone and established a deadline of May 15, 1991 for states to submit corrections of those deficiencies.

Section 182(a)(2)(A) applies to areas designated as nonattainment prior to enactment of the amendments and classified as marginal or above as of the date of enactment. It requires such areas to adopt and correct RACT rules pursuant to pre-amended section 172 (b) as interpreted in pre-amendment guidance.[2] EPA's SIP-Call used that guidance to indicate the necessary corrections for specific nonattainment areas.

The AVAPCD portion of the Southeast Desert Modified Air Quality Maintenance Area (SDMAQMA) is classified as Severe-17, therefore, this area was subject to the RACT fix-up requirement and the May 15, 1991 deadline.

The MDAQMD portion of the SDMAQMA is classified as severe; [3] therefore, this area was subject to the RACT fix-up requirements and the May 15, 1991 deadline.

The AVAPCD was created pursuant to California Health and Safety Code (CHSC) section 40106 and assumed all

[1] On July 1, 1993, the San Bernardino County Air Pollution Control District was renamed the Mojave Desert Air Quality Management District.

[2] Among other things, the pre-amendment guidance consists of those portions of the proposed Post-1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987); "Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations, Clarification to Appendix D of November 24, 1987 **Federal Register** document" (Blue Book) (notice of availability was published in the **Federal Register** on May 25, 1988); and the existing control technique guidelines (CTGs).

[3] Southeast Desert Air Quality Management Area retained its designation of nonattainment and was classified by operation of law pursuant to sections 107(d) and 181(a) upon the date of enactment of the CAA. See 55 FR 56694 (November 6, 1991).

air pollution control responsibilities of the South Coast Air Quality Management District in the Antelope Valley region of Los Angeles County,[4] effective July 1, 1997. AVAPCD is the successor agency to SCAQMD in the Antelope Valley portion of the Southeast Desert Modified Air Quality Maintenance Area. The AVAPCD remains subject to the RACT requirements.

The State of California submitted many revised RACT rules for incorporation into its SIP on July 23, 1999 and October 29, 1999, including the rules being acted on in this document. This document addresses EPA's direct-final action for AVAPCD Rule 1151, Motor Vehicle and Mobile Equipment Coatings Operations and MDAQMD Rule 1116, Automotive Refinishing Operations. AVAPCD adopted Rule 1151 on July 20, 1999 and MDAQMD adopted Rule 1116 on February 22, 1995 and revised Rule 1116 on April 26, 1999. These submitted rules were found to be complete on December 16, 1999 and August 24, 1999, respectively, pursuant to EPA's completeness criteria that are set forth in 40 CFR part 51 Appendix V[5] and is being finalized for approval into the SIP.

AVAPCD Rule 1151 is a new rule for Antelope Valley. Rule 1151 limits emissions of volatile organic compounds (VOC) and stratospheric ozone-depleting and global warming compounds from coatings applied to Group I or Group II Vehicles and Mobile Equipment. The provisions of this rule apply to all commercial and non-commercial coating applications at facilities involved in the production, modification, or refinishing of motor vehicles and mobile equipment.

MDAQMD Rule 1116 limits emissions of VOC and stratospheric ozone-depleting and global warming compounds from coatings applied to Group I and Group II Vehicles and Mobile Equipment. VOCs contribute to the production of ground level ozone and smog. These rules were originally adopted as part of AVAPCD's and MDAQMD's efforts to achieve the National Ambient Air Quality Standard (NAAQS) for ozone and in response to EPA's SIP-Call and the section 182(a)(2)(A) CAA requirement. The following is EPA's evaluation and final action for these rules.

[4] The Antelope Valley region of Los Angeles County is contained within the Federal area known as the Southeast Desert Modified Air Quality Management Area and the region identified by the State of California as the Mojave Desert Air Basin.

[5] EPA adopted the completeness criteria on February 16, 1990 (55 FR 5830) and, pursuant to section 110(k)(1)(A) of the CAA, revised the criteria on August 26, 1991 (56 FR 42216).

III. EPA Evaluation and Action

In determining the approvability of a VOC rule, EPA must evaluate the rule for consistency with the requirements of the CAA and EPA regulations, as found in section 110 and part D of the CAA and 40 CFR part 51 (Requirements for Preparation, Adoption, and Submittal of Implementation Plans). The EPA interpretation of these requirements, which forms the basis for today's action, appears in the various EPA policy guidance documents listed in footnote 2. Among those provisions is the requirement that a VOC rule must, at a minimum, provide for the implementation of RACT for stationary sources of VOC emissions. This requirement was carried forth from the pre-amended Act.

For the purpose of assisting state and local agencies in developing RACT rules, EPA prepared a series of Control Technique Guideline (CTG) documents. The CTGs are based on the underlying requirements of the Act and specify the presumptive norms for what is RACT for specific source categories. Under the CAA, Congress ratified EPA's use of these documents, as well as other Agency policy, for requiring States to "fix-up" their RACT rules. See section 182(a)(2)(A). EPA has not yet issued a Control Techniques Guideline (CTG) for this source category, but has on December 30, 1997 amended 40 CFR Part 59, "National Volatile Organic Emission Standards for Consumer and Commercial Products" by adding Subpart E, "National Volatile Organic Compound Emission Standards for Automobile Refinishing Coatings," 62 FR 67784. This standard regulates the manufacture of automotive coatings and not the application of automobile refinishing coatings. Body shops nationwide are not directly affected by the regulation's requirements. EPA has used the proposed VOC standards for automotive coatings as guidance in evaluating the VOC limits of Rule 1151 and Rule 1116. Further interpretations of EPA policy are found in the Blue Book, referred to in footnote 2. In general, these guidance documents have been set forth to ensure that VOC rules are fully enforceable and strengthen or maintain the SIP.

There is currently no version of AVAPCD Rule 1151, Motor Vehicle and Mobile Equipment Coatings Operations in the SIP. The submitted rule includes the following provisions:

- Limits of 15 pounds per gallon of applied solids for the original production of motor homes;
- Limits emissions of VOCs from coatings applied to Group I and Group II Vehicles and Mobile Equipment;
- Applies to all commercial and non-commercial coating applications at facilities involved in the production, modification, or refinishing of motor vehicles and mobile equipment; and
- Includes test methods to determine compliance.

On June 13, 1995 (60 FR 31081), EPA approved into the SIP a version of MDAQMD Rule 1116, Automotive Refinishing Operations that had been adopted on February 22, 1995. Revisions to this rule were subsequently adopted on April 26, 1999. The submitted Rule 1116 includes the following significant changes from the current SIP:

- Delayed imposition of the 420 grams per liter VOC limit for multistage topcoat systems until July 1, 2000;
- Updated and streamlined VOC definition referencing the most recent federal list of exempt compounds;
- Removed of obsolete limits and language; and
- Specified exemptions to the "Prohibition of Sale" provision.

EPA has evaluated the submitted rules and has determined that they are consistent with the CAA, EPA regulations, and EPA policy. Therefore, AVAPCD Rule 1151, Motor Vehicle and Mobile Equipment Coatings Operations and MDAQMD Rule 1116, Automotive Refinishing Operations are being approved under section 110(k)(3) of the CAA as meeting the requirements of section 110(a) and part D.

EPA is publishing this rule without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in the proposed rules section of this **Federal Register** publication, EPA is publishing a separate document that will serve as the proposal to approve the SIP revision should adverse comments be filed. This rule will be effective June 9, 2000 without further notice unless the Agency receives adverse comments by May 10, 2000.

If the EPA receives such comments, then EPA will publish a timely withdrawal in the **Federal Register** informing the public that the rule will not take effect. All public comments received will then be addressed in a subsequent final rule based on the proposed rule. The EPA will not institute a second comment period. Any parties interested in commenting on this rule should do so at this time. If no such comments are received, the public is advised that this rule is effective on

June 9, 2000 and no further action will be taken on the proposed rule.

IV. Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. This action merely approves state law as meeting federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). For the same reason, this rule also does not significantly or uniquely affect the communities of tribal governments, as specified by Executive Order 13084 (63 FR 27655, May 10, 1998). This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely approves a state rule implementing a federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This rule also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. As required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996), in issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct. EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the executive order. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.).

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by June 9, 2000. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements.

(See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: March 15, 2000.

Felicia Marcus,

Regional Administrator, Region IX.

Part 52, Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

2. Section 52.220 is amended by adding paragraphs (c)(268)(i)(B) and (c)(270)(i)(E) to read as follows:

§ 52.220 Identification of plan.

* * * * *

(c) * * *

(268) * * *

(i) * * *

(B) Mojave Desert Air Quality Management District.

(*1*) Rule 1116 revised on April 26, 1999.

* * * * *

(270) * * *

(i) * * *

(E) Antelope Valley Air Pollution Control District.

(*1*) Rule 1151 adopted on July 20, 1999.

* * * * *

[FR Doc. 00–8526 Filed 4–7–00; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA–237–0221; FRL–6570–7]

Approval and Promulgation of State Implementation Plans; California—South Coast

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is taking final action to approve a state implementation plan (SIP) revision submitted by the State of California to provide for attainment of the 1-hour ozone national ambient air quality standard (NAAQS) in the Los Angeles-South Coast Air Basin Area (South Coast). EPA is approving the SIP revision under provisions of the Clean Air Act (CAA) regarding EPA action on SIP submittals, SIPs for national primary and secondary ambient air quality standards, and plan requirements for nonattainment areas.

DATES: This action is effective on May 10, 2000.

ADDRESSES: The rulemaking docket for this notice is available for public inspection during normal business hours at EPA's Region IX office. A reasonable fee may be charged for copying parts of the docket.

Copies of the SIP materials are also available for inspection at the following locations:

California Air Resources Board, 2020 L Street, Sacramento, California

South Coast Air Quality Management District, 21865 E. Copley Drive, Diamond Bar, California

The SIP materials are also electronically available at: http://www.aqmd.gov/aqmp/

FOR FURTHER INFORMATION CONTACT: Dave Jesson (AIR–2), EPA Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901, (415) 744–1288, or jesson.david@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Background

We are finalizing approval of the 1997 ozone plan for the South Coast, as revised by a 1999 amendment.[1] The South Coast Air Quality Management District (SCAQMD) adopted the 1997 plan on November 15, 1996, and the California Air Resources Board (CARB) submitted the plan to us on February 5, 1997. SCAQMD adopted the 1999 amendment on December 10, 1999, and CARB submitted the plan to us on February 4, 2000. EPA determined the submittal to be complete on March 15, 2000.[2] In this document, we refer to the 1997 plan and 1999 amendment as "the revised ozone plan," which is intended to replace the 1994 ozone SIP except for that portion of the SIP that consists of State control measures and EPA's commitment relating to a Public Consultative Process on national mobile sources.[3]

On February 8, 2000, we proposed approval of the revised ozone plan with respect to the revised emissions inventory, the modeled attainment demonstration, control measures, commitment to achieve specified emission reductions in future years, revised rate-of-progress (ROP) plan, and emissions budget. Please see that document (65 FR 6091–6102) for further details on our proposed action, applicable CAA requirements, and additional information on the affected area.

[1] The nonattainment area includes all of Orange County and the more populated portions of Los Angeles, San Bernardino, and Riverside Counties.

[2] We adopted the completeness criteria on February 16, 1990 (55 FR 5830) and, pursuant to section 110(k)(1)(A) of the CAA, revised the criteria on August 26, 1991 (56 FR 42216). CARB requested that we "parallel process" action on the 1997 plan and 1999 amendment before SIP submittal of the 1999 amendment.

[3] For information on the 1994 ozone SIP, see 62 FR 1150 (January 8, 1997). For information on the Public Consultative Process, see 64 FR 39923 (July 23, 1999).

II. Public Comments

We received 3 public comments. SCAQMD supported the proposed action, but requested a minor correction. The proposal stated that the South Coast Air Basin recorded the largest number of ozone violations in the country in 1999 based on preliminary data from EPA's Aerometric Information Retrieval System (AIRS). 65 FR 6092. We agree with SCAQMD that updated AIRS data now show that the basin had the second highest number of violations in 1999. Over the past three years (1997–1999), however, the South Coast Air Basin did have the largest number of ozone violations in the country.

A representative of the National Paint and Coatings Association commented regarding the purported technological and economic infeasibility of SCAQMD's coatings control measures, and issues regarding public notice and hearing requirements relative to SCAQMD's revisions to Rule 1113.

As noted by the commenter, we are barred from considering claims of economic or technological infeasibility in determining whether to approve a submitted SIP.

Union Electric Co. v. *U.S. EPA*, 429 U.S. 246, 255–66 (1976); 42 U.S.C. 7410(a)(2).

The comment regarding Rule 1113 is not germane to our proposed action on the revised ozone plan, which does not address any approval issues associated with revisions to Rule 1113. When we take action on the SIP revision to Rule 1113, we will determine whether or not SCAQMD met public notice and public hearing requirements when the rule was revised. If the commentor continues to believe that these requirements were not met, he must resubmit comments during the public comment period for our rulemaking on the revisions to SCAQMD Rule 1113.

A private citizen argued that the emissions inventory does not meet the CAA section 172(c)(3) requirements and should not be approved. The commenter stated that the control factors associated with California's enhanced motor vehicle inspection and maintenance (I/M) program are known to be bogus. The commenter referenced a CARB letter dated January 7, 2000, stating: "There have been a number of legislative and operational changes to the I/M program that have reduced its effectiveness and associated air quality benefits."

We addressed this issue in our proposed approval of the plan, noting that the revised ozone plan represents more current and accurate information than was used in the 1994 ozone SIP and complies with acceptable methodologies for inventory preparation, but that the responsible agencies are in the process of updating and refining emissions reductions, including those associated with the I/M program. 65 FR 6094, 6100.

When improved information is available to refine the estimate of emissions reductions associated with the I/M program, CARB and SCAQMD will use this information in a comprehensive ozone plan revision, scheduled for adoption and submittal as a SIP revision in 2001. As discussed in our proposed approval, this future revision will include a revised control strategy if needed to provide for expeditious attainment.

We reaffirm our finding that the emissions inventory portion of the revised ozone plan not only improves on the accuracy of the 1994 ozone SIP but also meets CAA requirements that the inventory be comprehensive, accurate, and current. Therefore, we are finalizing approval of the revised ozone plan with respect to the requirements of CAA sections 172(c)(3) and 182(a)(1).

III. EPA Final Action

In this document, we are finalizing the following actions on the revised ozone plan. For each action, we indicate the page on which the element is discussed in our proposal.

(1) Approval of the revised baseline and projected emissions inventories under CAA sections 172(c)(3) and 182(a)(1)—6094;

(2) Approval of the SCAQMD commitment to implement those measures that had been adopted in regulatory form between November 1994 and September 1999, by the dates specified to achieve the identified emission reductions, under CAA section 110(k)(3)—6095 (Table 1);

(3) Approval of the SCAQMD commitment to adopt and implement the short- and intermediate-term control measures in the revised ozone plan by the dates specified to achieve the identified emission reductions, under CAA section 110(k)(3)—6095 (Table 2);

(4) Approval of the SCAQMD commitment to adopt and implement control measures to achieve the identified emission reduction commitments[4] for 1999 to 2008, as specified in Table 2–6 of the 1999

[4] This approval makes enforceable the SCAQMD commitment to achieve the overall emission reduction schedule and thus creates the possibility of SCAQMD control measure adjustments and substitutions under the approved SIP, so long as the overall emission reduction obligations are met as described in Chapter 2 of the 1999 amendment.

amendment, under CAA section 110(k)(3)—6097 (Table 3);

(5) Deletion of 1994 ozone SIP control measures identified in the 1999 Amendment—6097 (Table 4);

(6) Approval of the SCAQMD commitment to adopt and implement the long-term control measures in the revised ozone plan by the dates specified to achieve the identified emission reductions, under CAA section 110(k)(3) and 182(e)(5)—6098 (Table 5);

(7) Approval of the revised rate-of-progress plan for the milestone years 1999, 2002, 2005, 2008, and 2010, under CAA sections 182(c)(2)—6099 (Table 6);

(8) Approval of the revised attainment demonstration under CAA sections 182(c)(2) and (e)—6100;

(9) Approval of the revised motor vehicle emissions budgets for purposes of transportation conformity under CAA section 176(c)(2)(A). Approval of the revised ozone plan also establishes new emissions budgets for ROP milestone years for purposes of general conformity under CAA section 176(c)(1)—6100–1 (Table 8).

Upon the effective date of our approval of the revised ozone plan, this plan replaces and supersedes the 1994 ozone SIP for the South Coast Air Basin with the exception of the State control measures for mobile sources, consumer products, and pesticides, and EPA's commitment. The State measures remain unchanged from those approved as part of the 1994 ozone SIP until we, in separate action, approve revised measures.

As discussed in our proposed action, CARB and SCAQMD intend to adopt and submit a comprehensive revision to the ozone plan in 2001. 65 FR 6101. We intend to work with CARB and SCAQMD to ensure the timely completion of this new comprehensive revision to refine and enhance the technical foundations of the attainment demonstration and update the control measures, as necessary.

IV. Administrative Requirements

A. Executive Order 12866

The Office of Management and Budget (OMB) has exempted this regulatory action from Executive Order 12866, entitled "Regulatory Planning and Review."

B. Executive Order 13045

Executive Order 13045, entitled Protection of Children from Environmental Health Risks and Safety Risks (62 FR 19885, April 23, 1997), applies to any rule that: (1) Is determined to be "economically significant" as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

This rule is not subject to Executive Order 13045 because it does not involve decisions intended to mitigate environmental health or safety risks.

C. Executive Order 13084

Under Executive Order 13084, Consultation and Coordination with Indian Tribal Governments, EPA may not issue a regulation that is not required by statute, that significantly affects or uniquely affects the communities of Indian tribal governments, and that imposes substantial direct compliance costs on those communities, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by the tribal governments. If the mandate is unfunded, EPA must provide to the Office of Management and Budget, in a separately identified section of the preamble to the rule, a description of the extent of EPA's prior consultation with representatives of affected tribal governments, a summary of the nature of their concerns, and a statement supporting the need to issue the regulation.

In addition, Executive Order 13084 requires EPA to develop an effective process permitting elected and other representatives of Indian tribal governments "to provide meaningful and timely input in the development of regulatory policies on matters that significantly or uniquely affect their communities." Today's rule does not significantly or uniquely affect the communities of Indian tribal governments. Accordingly, the requirements of section 3(b) of Executive Order 13084 do not apply to this rule.

D. Executive Order 13132

Executive Order 13121, entitled Federalism (64 FR 43255, August 10, 1999) revokes and replaces Executive Orders 12612, Federalism and 12875, Enhancing the Intergovernmental Partnership. Executive Order 13132 requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government." Under Executive Order 13132, EPA may not issue a regulation that has federalism implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments, or EPA consults with State and local officials early in the process of developing the proposed regulation. EPA also may not issue a regulation that has federalism implications and that preempts State law unless the Agency consults with State and local officials early in the process of developing the proposed regulation.

This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely approves a state rule implementing a federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. Thus, the requirements of section 6 of the Executive Order do not apply to this rule.

E. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and small governmental jurisdictions.

This final rule will not have a significant impact on a substantial number of small entities because SIP approvals under section 110 and subchapter I, part D of the Clean Air Act do not create any new requirements but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP approval does not create any new requirements, I certify that this action will not have a

significant economic impact on a substantial number of small entities.

Moreover, due to the nature of the Federal-State relationship under the Clean Air Act, preparation of flexibility analysis would constitute Federal inquiry into the economic reasonableness of state action. The Clean Air Act forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co., v. U.S. EPA*, 427 U.S. 246, 255–66 (1976); 42 U.S.C. 7410(a)(2).

F. Unfunded Mandates

Under section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must prepare a budgetary impact statement to accompany any proposed or final rule that includes a Federal mandate that may result in estimated annual costs to State, local, or tribal governments in the aggregate; or to private sector, of $100 million or more. Under section 205, EPA must select the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Section 203 requires EPA to establish a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule.

EPA has determined that the approval action promulgated does not include a Federal mandate that may result in estimated annual costs of $100 million or more to either State, local, or tribal governments in the aggregate, or to the private sector. This Federal action approves pre-existing requirements under State or local law, and imposes no new requirements. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action.

G. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This rule is not a "major" rule as defined by 5 U.S.C. 804(2).

H. National Technology Transfer and Advancement Act

Section 12 of the National Technology Transfer and Advancement Act (NTTAA) of 1995 requires Federal agencies to evaluate existing technical standards when developing a new regulation. To comply with NTTAA, EPA must consider and use "voluntary consensus standards" (VCS) if available and applicable when developing programs and policies unless doing so would be inconsistent with applicable law or otherwise impractical.

The EPA believes that VCS are inapplicable to this action. Today's action does not require the public to perform activities conducive to the use of VCS.

I. Petitions for Judicial Review

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by June 9, 2000. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Hydrocarbons, Incorporation by reference, Intergovernmental regulations, Nitrogen oxides, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: March 20, 2000.

David P. Howekamp,

Acting Regional Administrator, Region IX.

Part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

2. Section 52.220 is amended by adding paragraphs (c)(247)(i)(A)(*3*) and (c)(272) to read as follows:

§ 52.220 Identification of plan.

* * * * *

(c) * * *

(247) * * *

(i) * * *

(A) * * *

(3) Baseline and projected emissions inventories and ozone attainment demonstration, as contained in the South Coast 1997 Air Quality Management Plan for ozone.

* * * * *

(272) New and amended plan for the following agency was submitted on February 4, 2000, by the Governor's designee.

(i) Incorporation by reference.

(A) South Coast Air Quality Management District.

(1) SCAQMD commitment to adopt and implement short- and intermediate-term control measures; SCAQMD commitment to adopt and implement long-term control measures; SCAQMD commitment to achieve overall emissions reductions for the years 1999–2008; SCAQMD commitment to implement those measures that had been adopted in regulatory form between November 1994 and September 1999; rate-of-progress plan for the 1999, 2002, 2005, 2008, and 2010 milestone years; amendment to the attainment demonstration in the 1997 Air Quality Management Plan for ozone; and motor vehicle emissions budgets for purposes of transportation conformity, as contained in the 1999 Amendment to the South Coast 1997 Air Quality Management Plan.

* * * * *

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[AD–FRL–6570–4]

RIN 2060–AC42

Standards of Performance for New Stationary Sources and Guidelines for Control of Existing Sources: Municipal Solid Waste Landfills

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; technical corrections.

SUMMARY: Under the Clean Air Act (CAA), the EPA issued a final rule entitled "Standards of Performance for New Stationary Sources and Guidelines for Control of Existing Sources: Municipal Solid Waste Landfills," published in the **Federal Register** on March 12, 1996 (61 FR 9905). A subsequent direct final rule, published

on June 16, 1998 (63 FR 32743) corrected errors and clarified regulatory text of the final rule. These technical corrections will correct an error in the amendatory instructions and an inconsistency between the reportable exceedances and reporting of monitoring data. Section 553 of the Administrative Procedure Act, 5 U.S.C. 553(b)(B), provides that, when an agency for good cause finds that notice and public procedure are impracticable, unnecessary or contrary to the public interest, the agency may issue a rule without providing notice and an opportunity for public comment. The EPA has determined that there is good cause for making today's rule final without prior proposal and opportunity for comment because the changes to the rule are minor technical corrections, are noncontroversial in nature, and do not substantively change the requirements of the NSPS/EG rule. Thus, notice and public procedure are unnecessary. The EPA finds that this constitutes good cause under 5 U.S.C. 553(b)(B).

DATES: These technical corrections are effective April 10, 2000.

ADDRESSES: Docket No. A–88–09 contains the supporting information used in the development of this rulemaking. The docket is located at the U.S. Environmental Protection Agency in Room M–1500, Waterside Mall (ground floor), 401 M Street SW, Washington, DC 20460, and may be inspected from 8:30 a.m. to 5:30 p.m., Monday through Friday, excluding legal holidays. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Ms. Michele Laur, Waste and Chemical Processes Group, Emission Standards Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone (919) 541–5256, e-mail: laur.michele@epa.gov.

SUPPLEMENTARY INFORMATION: *Regulated Entities.* The entities potentially affected by this action include:

Category	SIC	Examples of regulated entities
Industry and Local Government Agencies	4953	Existing municipal solid waste landfills where solid waste from households is placed in or on land. Waste from commercial or industrial operations may be mixed with the household waste.

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. While the landfills EG and NSPS (40 CFR part 60, subparts Cc and WWW) will primarily impact facilities in the Standard Industrial Classification (SIC) code 4953, not all facilities in this code will be affected by this action. To determine if your landfill is affected by the landfills EG or NSPS, see 40 CFR part 60, subparts Cc and WWW, or the technical amendments published on June 16, 1998 (63 FR 37243).

Worldwide Web (WWW). In addition to being available in the docket, an electronic copy of today's action will be available on the WWW through the Technology Transfer Network (TTN). Following signature, a copy of this action will be posted on the TTN's policy and guidance page for newly proposed or promulgated rules *http://www.epa.gov/ttn/oarpg*. The TTN provides information and technology exchange in various areas of air pollution control. If more information regarding the TTN is needed, call the TTN HELP line at (919) 541–5384.

I. Background

On March 12, 1996, the EPA promulgated in the **Federal Register** (61 FR 9919) EG for existing municipal solid waste landfills and the NSPS for municipal solid waste landfills. These regulations and guidelines were promulgated as subparts Cc and WWW of 40 CFR part 60. This action corrects an error in the amendatory instructions, typographic and formatting errors, and it corrects three inconsistencies in the direct final action published on June 16, 1998.

II. Description of Corrections

A. Amendatory Instruction Error

Due to an error in the amendatory instructions for the direct final rule published in the **Federal Register** on June 16, 1998, § 60.752(b)(2)(ii) (A) and (B) and § 60.752(b)(2)(iii)(B) (1) and (2) were incorrectly removed. These technical corrections add those paragraphs back into the final rule.

B. Inconsistencies

An inconsistency exists between what constitutes a reportable exceedance for boilers and process heaters in § 60.758(c)(1)(i), and the monitoring (§ 60.756(b)(1)) and recordkeeping (§ 60.758(b)(2)) requirements for these devices. Boilers and process heaters with design heat input capacity less than or equal to 44 megawatts are required to monitor temperature and keep records. A reportable exceedance related to temperature can only occur for boilers and process heaters that are less than 44 megawatts. It was not our intent to require monitoring and recordkeeping for boilers and process heaters if their design heat input capacity is equal to or greater than 44 megawatts.

C. Typographical and Formatting Errors

A typographical error appearing in the equation in §§ 60.754(a)(1) (i), (ii) and 60.759(a)(3)(ii) is being corrected. The term "$CN_{NM}MOC$" is corrected to read "C_{NMOC}", meaning the concentration of non-methane organic compounds.

A typographical error appearing in § 60.754(a)(1)(ii) is being corrected. The paragraph immediately following the list of terms to the equation in this section was incorrectly duplicated from the paragraph in § 60.754(a)(1)(i). The paragraph is amended to correctly reflect the method for subtracting nondegradable solid waste when actual year-to-year solid waste acceptance rates are known.

A formatting error in § 60.756(a), introductory text, is being corrected. A comma was left out between the words "thermometer" and "other."

A typographical error appearing in § 60.757(c) is being corrected. Throughout the rule, various requirements are triggered by the emission rate cutoff of "equals or exceeds 50 megagrams per year." The term "equals or" was inadvertently omitted. This omission is being corrected to be consistent with the remainder of the rule and with our intent.

A typographical error appearing in § 60.758(c)(1)(ii) is being corrected. This section incorrectly references § 60.758(b)(3)(i) which does not exist. The correct reference is § 60.758(b)(3).

IV. Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and is therefore not subject to review by the Office of Management and Budget. Because the EPA has made a "good cause" finding that this action is not subject to notice and comment requirements under the Administrative Procedure Act or any other statute (see

Summary), it is not subject to the regulatory flexibility provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), or to sections 202 and 205 of the Unfunded Mandates Reform Act of 1995 (UMRA) (Pub. L. 104–4). In addition, this action does not significantly or uniquely affect small governments or impose a significant intergovernmental mandate as described in sections 203 and 204 of UMRA. This rule also does not significantly or uniquely affect the communities of tribal governments, as specified by Executive Order 13084 (63 FR 27655, May 10, 1998). This rule does not have substantial direct effects on the States, on the relationship between the national government and the States, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999). This rule also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant.

This technical correction action does not involve technical standards; thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. The rule also does not involve special consideration of environmental justice related issues as required by Executive Order 12898 (59 FR 7629, February 16, 1994). In issuing this rule, the EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct, as required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996). The EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings' issued under the executive order. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). The EPA's compliance with these statutes and Executive Orders for the underlying rule is discussed in the June 16, 1998 amendments to the final NSPS/EG rule **Federal Register** document.

The Congressional Review Act (5 U.S.C. 801 *et seq.*), as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. Section 808 allows the issuing agency to make a rule effective sooner than otherwise provided by the Congressional Review Act if the agency makes a good cause finding that notice and public procedure is impracticable, unnecessary or contrary to the public interest. This determination must be supported by a brief statement (5 U.S.C. 808(2)). As stated previously, the EPA has made such a good cause finding, including the reasons therefor, and established an effective date of April 10, 2000. The EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 60

Environmental protection, Administrative practice and procedure, Air pollution control, Hazardous waste, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: March 27, 2000.

Robert D. Brenner,

Acting Assistant Administrator, Office of Air and Radiation.

For the reasons stated in the preamble, title 40, chapter I, part 60, of the Code of Federal Regulations is amended as follows:

PART 60—[AMENDED]

1. The authority citation for part 60 continues to read as follows:

Authority: 42 U.S.C. 7401, 7411, 7414, 7416, 7429, and 7601.

Subpart WWW—[Amended]

2. Section 60.752 is amended by adding paragraphs (b)(2)(ii)(A), (b)(2)(ii)(B), (b)(2)(iii)(B)(1) and (b)(2)(iii)(B)(2) to read as follows:

§ 60.752 Standards for air emissions from municipal solid waste landfills.

* * * * *

(b) * * *

(2) * * *

(ii) * * *

(A) An active collection system shall:

(*1*) Be designed to handle the maximum expected gas flow rate from the entire area of the landfill that warrants control over the intended use period of the gas control or treatment system equipment;

(*2*) Collect gas from each area, cell, or group of cells in the landfill in which the initial solid waste has been placed for a period of:

(*i*) 5 years or more if active; or

(*ii*) 2 years or more if closed or at final grade.

(*3*) Collect gas at a sufficient extraction rate;

(*4*) Be designed to minimize off-site migration of subsurface gas.

(B) A passive collection system shall:

(*1*) Comply with the provisions specified in paragraphs (b)(2)(ii)(A)(*1*), (*2*), and (2)(ii)(A)(*4*) of this section.

(*2*) Be installed with liners on the bottom and all sides in all areas in which gas is to be collected. The liners shall be installed as required under § 258.40.

* * * * *

(iii) * * *

(B) * * *

(*1*) If a boiler or process heater is used as the control device, the landfill gas stream shall be introduced into the flame zone.

(*2*) The control device shall be operated within the parameter ranges established during the initial or most recent performance test. The operating parameters to be monitored are specified in § 60.756;

* * * * *

3. In § 60.754, in the equation in paragraph (a)(1)(i) the term "$C_{NM}OC$" is revised to read "C_{NMOC}" and paragraph (a)(1)(ii) is revised to read as follows:

§ 60.754 Test methods and procedures.

(a) * * *

(1) * * *

(ii) The following equation shall be used if the actual year-to-year solid waste acceptance rate is unknown.

$$M_{NMOC} = 2L_o R (e^{-kc} - e^{-kt}) C_{NMOC} (3.6 \times 10^{-9})$$

Where:

M_{NMOC}=mass emission rate of NMOC, megagrams per year

L_o=methane generation potential, cubic meters per megagram solid waste

R=average annual acceptance rate, megagrams per year

k=methane generation rate constant, $year^{-1}$

t = age of landfill, years

C_{NMOC}=concentration of NMOC, parts per million by volume as hexane

c=time since closure, years; for active landfill c=O and e^{-kc}1

3.6×10 − 9=conversion factor

The mass of nondegradable solid waste may be subtracted from the total mass of solid waste in a particular section of the landfill when calculating the value of R, if documentation of the nature and amount of such wastes is maintained.

* * * * *

4. Section 60.756 is amended in paragraph (a) introductory text by

adding a comma between the words "thermometer" and "other" and by revising paragraph (b)(1) to read as follows:

§ 60.756 Monitoring of operations.

* * * * *

(b) * * *

(1) A temperature monitoring device equipped with a continuous recorder and having a minimum accuracy of ±1 percent of the temperature being measured expressed in degrees Celsius or ±0.5 degrees Celsius, whichever is greater. A temperature monitoring device is not required for boilers or process heaters with design heat input capacity equal to or greater than 44 megawatts.

* * * * *

5. Section 60.757 is amended by revising paragraph (c) introductory text to read as follows:

§ 60.757 Reporting requirements.

* * * * *

(c) Each owner or operator subject to the provisions of § 60.752(b)(2)(i) shall submit a collection and control system design plan to the Administrator within 1 year of the first report required under paragraph (b) of this section in which the emission rate equals or exceeds 50 megagrams per year, except as follows:

* * * * *

6. Section 60.758 is amended by revising paragraphs (b)(2) introductory text and (c)(1)(ii) to read as follows:

§ 60.758 Recordkeeping requirements.

* * * * *

(b) * * *

(2) Where an owner or operator subject to the provisions of this subpart seeks to demonstrate compliance with § 60.752(b)(2)(iii) through use of an enclosed combustion device other than a boiler or process heater with a design heat input capacity equal to or greater than 44 megawatts:

* * * * *

(c) * * *

(1) * * *

(ii) For boilers or process heaters, whenever there is a change in the location at which the vent stream is introduced into the flame zone as required under paragraph (b)(3) of this section.

* * * * *

§ 60.759 [Amended]

7. In § 60.759 (a)(3)(ii), the term "$C_{NM}OC$" is revised to read "C_{NMOC}".

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 62

[AL52—200014; FRL–6568–6]

Approval and Promulgation of State Plans for Designated Facilities and Pollutants: Alabama

AGENCY: Environmental Protection Agency.

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving the section 111(d) Plan submitted by the Alabama Department of Environmental Management (ADEM) for the State of Alabama on April 20, 1999, to implement and enforce the Emissions Guidelines (EG) for existing Hospital/Medical/Infectious Waste Incinerator (HMIWI) units.

DATES: This direct final rule is effective on June 9, 2000, without further notice, unless EPA receives adverse comment by May 10, 2000. If EPA receives adverse comment, we will publish a timely withdrawal of the direct final rule in the **Federal Register** and inform the public that the rule will not take effect.

ADDRESSES: You should address comments on this action to Kimberly Bingham, EPA Region 4, Air Planning Branch, 61 Forsyth Street, SW, Atlanta, Georgia 30303–3104. Copies of all materials considered in this rulemaking may be examined during normal business hours at the following locations: EPA Region 4, Sam Nunn Atlanta Federal Center, 61 Forsyth Street, SW, Atlanta, Georgia 30303–3104; and at the Alabama Department of Environmental Management, Air Division, 1751 Congressman W.L. Dickinson Drive, Montgomery, Alabama 36109.

FOR FURTHER INFORMATION CONTACT: Kimberly Bingham at (404) 562–9038, Bingham.Kimberly@epa.gov or Scott Davis at (404) 562–9127, Davis.ScottR@epa.gov.

VI. Why Is the Alabama HMIWI State Plan approvable?
VII. Administrative Requirements.

I. What Action is Being Taken by EPA Today?

We are approving the Alabama State Plan, as submitted on April 20, 1999, for the control of air emissions from HMIWIs, except for those HMIWIs located in Indian Country. When EPA developed our New Source Performance Standard (NSPS) for HMIWIs, we also developed EG to control air emissions from older HMIWIs. (See 62 FR 48348–48391, September 15, 1997, 40 CFR part 60, subpart Ce [Emission Guidelines and Compliance Times for HMIWIs] and subpart Ec [Standards of Performance for HMIWIs for Which Construction is Commenced After June 20, 1996]). The ADEM developed a State Plan, as required by sections 111(d) and 129 of the Clean Air Act (the Act), to adopt the EG into their body of regulations, and we are acting today to approve it.

We are publishing this action without prior proposal because we view this as a noncontroversial amendment and anticipate no adverse comments. However, in a separate document in this **Federal Register** publication, we are proposing to approve the revision should significant, material, and adverse comments be filed. This action is effective June 9, 2000, unless by May 10, 2000, adverse or critical comments are received. If we receive such comments, this action will be withdrawn before the effective date by publishing a subsequent document that will withdraw the final action. All public comments received will be addressed in a subsequent final rule based on the proposed rule. We will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. If no such comments are received, this action is effective June 9, 2000.

II. The HMIWI State Plan Requirement

What is a HMIWI State Plan?

A HMIWI State Plan is a plan to control air pollutant emissions from existing incinerators which burn hospital waste or medical/infectious waste. The plan also includes source and emission inventories of these incinerators in the State.

Why Are We Requiring Alabama To Submit a HMIWI State Plan?

States are required under sections 111(d) and 129 of the Act to submit State Plans to control emissions from existing HMIWIs in the State. The State Plan requirement was triggered when

EPA published the EG for HMIWIs under 40 CFR part 60, subpart Ce (see 62 FR 48348, September 15, 1997).

Under section 129, EPA is required to promulgate EG for several types of existing solid waste incinerators. These EG establish the Maximum Achievable Control Technology (MACT) standards that States must adopt to comply with the Act. The HMIWI EG also establishes requirements for monitoring, operator training, permits, and a waste management plan that must be included in State Plans.

The intent of the State Plan requirement is to reduce several types of air pollutants associated with waste incineration.

Why Do We Need To Regulate Air Emissions From HMIWIs?

The State Plan establishes control requirements which reduce the following emissions from HMIWIs: particulate matter; sulfur dioxide; hydrogen chloride; nitrogen oxides; carbon monoxide; lead; cadmium; mercury; and dioxin/furans. These pollutants can cause adverse effects to the public health and the environment. Dioxin, lead, and mercury bioaccumulate through the food web. Serious developmental and adult effects in humans, primarily damage to the nervous system, have been associated with exposures to mercury. Exposure to dioxin and furans can cause skin disorders, cancer, and reproductive effects such as endometriosis. Dioxin and furans can also affect the immune system. Acid gases affect the respiratory tract, as well as contribute to the acid rain that damages lakes and harms forests and buildings. Exposure to particulate matter has been linked with adverse health effects, including aggravation of existing respiratory and cardiovascular disease and increased risk of premature death. Nitrogen oxide emissions contribute to the formation of ground level ozone, which is associated with a number of adverse health and environmental effects.

What Criteria Must a HMIWI State Plan Meet To Be Approved?

The criteria for approving a HMIWI State Plan include requirements from sections 111(d) and 129 of the Act and 40 CFR part 60, subpart B. Under the requirements of sections 111(d) and 129 of the Act, a State Plan must be at least as protective as the EG regarding applicability, emission limits, compliance schedules, performance testing, monitoring and inspections, operator training and certification, waste management plans, and recordkeeping and reporting. Under section 129(e), State Plans must ensure that affected HMIWI facilities submit Title V permit applications to the State by September 15, 2000. Under the requirements of 40 CFR part 60, subpart B, the criteria for an approvable section 111(d) plan include demonstration of legal authority, enforceable mechanisms, public participation documentation, source and emission inventories, and a State progress report commitment.

III. What Does the Alabama State Plan Contain?

The ADEM adopted the Federal EG into the ADEM Administrative Code, Rule 335–3–3–.04 and the Federal NSPS into the ADEM Administrative Code, Rule 335–3–10–.02(c). The State rules were effective on April 13, 1999. The Alabama State Plan contains:

1. A demonstration of the State's legal authority to implement the section 111(d) State Plan;
2. State rules, Rule 335–3–3–.04 and Rule 335–3–10–.02(c), as the enforceable mechanism;
3. An inventory of approximately 56 known designated facilities, along with estimates of their potential air emissions;
4. Emission limits that are as protective as the EG;
5. A compliance date of one year from the effective date of this State Plan approval;
6. Testing, monitoring, reporting and recordkeeping requirements for the designated facilities;
7. Records from the public hearing on the State Plan; and,
8. Provisions for progress reports to EPA.

IV. Is My HMIWI Subject to These Regulations?

The EG for existing HMIWIs affect any HMIWI built on or before June 20, 1996. If your facility meets this criterion, you are subject to these regulations.

V. What Steps Do I Need to Take?

You must meet the requirements listed in the ADEM Administrative Code, Rule 335–3–3–.04, summarized as follows:

1. Determine the size of your incinerator by establishing its maximum design capacity.
2. Each size category of HMIWI has certain emission limits established which your incinerator must meet. See Table 1 of Rule 335–3–3–.04 to determine the specific emission limits which apply to you. The emission limits apply at all times, except during startup, shutdown, or malfunctions, provided that no waste has been charged during these events.
3. There are provisions to address small rural incinerators (if your unit is applicable).
4. You must meet a 10% opacity limit on your discharge, averaged over a six-minute block.
5. You must have a qualified HMIWI operator available to supervise the operation of your incinerator. This operator must be trained and qualified through a State-approved program, or a training program that meets the requirements listed under 40 CFR part 60.53c(c).
6. Your operator must be certified, as discussed in 5 above, no later than one year after EPA approval of this Alabama State Plan.
7. You must develop and submit to ADEM a waste management plan. This plan must be developed under guidance provided by the American Hospital Association publication, An Ounce of Prevention: Waste Reduction Strategies for Health Care Facilities, 1993, and must be submitted to ADEM no later than 60 days following the initial performance test for the affected unit.
8. You must conduct an initial performance test to determine your incinerator's compliance with these emission limits. This performance test must be completed as required under 40 CFR 60.8.
9. You must install and maintain devices to monitor the parameters listed under Table 4 of Rule 335–3–3–.04.
10. You must document and maintain information concerning pollutant concentrations, opacity measurements, charge rates, and other operational data. This information must be maintained for a period of five years.
11. You must submit an annual report to ADEM containing records of site-specific operating parameters, performance test results, and exceedance information, and for small HMIWI units records of annual equipment inspections, any required maintenance, and unscheduled repairs. This annual report must be signed by the facilities manager.

VI. Why Is the Alabama HMIWI State Plan Approvable?

EPA compared the Alabama rules (ADEM Administrative Code, Rule 335–3–3–.04) against our HMIWI EG. EPA finds the Alabama rules to be at least as protective as the EG. The Alabama State Plan was reviewed for approval against the following criteria: 40 CFR 60.23 through 60.26, *Subpart B—Adoption and Submittal of State Plans for Designated Facilities;* and, 40 CFR 60, 60.30e through 60.39e, *Subpart Ce—Emission Guidelines and Compliance Times for Hospital/Medical/Infectious*

Waste Incinerators. The Alabama State Plan satisfies the requirements for an approvable section 111(d) plan under subparts B and Ce of 40 CFR part 60. For these reasons, we are approving the Alabama HMIWI State Plan.

VII. Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. This action merely approves state law as meeting federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). For the same reason, this rule also does not significantly or uniquely affect the communities of tribal governments, as specified by Executive Order 13084 (63 FR 27655, May 10, 1998). This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely approves a state rule implementing a federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This rule also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. As required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996), in issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct. EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings' issued under the executive order. This rule does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.).

The Congressional Review Act, 5 U.S.C. 801 et seq., as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by June 9, 2000. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 62

Environmental protection, Administrative practice and procedure, Air pollution control, Hospital/medical/infectious waste incineration, Intergovernmental relations, Reporting and recordkeeping requirements.

Dated: March 16, 2000.

A. Stanley Meiburg,

Acting Regional Administrator, Region 4.

40 CFR part 62 is amended as follows:

PART 62—[AMENDED]

1. The authority citation for part 62 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

Subpart B—Alabama

2. Section 62.100 is amended by adding paragraphs (b)(5) and (c)(5) to read as follows:

§ 62.100 Identification of plan.

* * * * *

(b) * * *

(5) Alabama Department of Environmental Management Plan for the Control of Hospital/Medical/Infectious Waste Incinerators, submitted on April 20, 1999, by the Alabama Department of Environmental Management.

(c) * * *

(5) Existing hospital/medical/infectious waste incinerators.

3. Subpart B is amended by adding a new § 62.104 and a new undesignated center heading to read as follows:

Air Emissions From Hospital/Medical/Infectious Waste Incinerators

§ 62.104 Identification of sources.

The plan applies to existing hospital/medical/infectious waste incinerators for which construction, reconstruction, or modification was commenced before June 20, 1996, as described in 40 CFR part 60, subpart Ce.

Transportation Conformity Amendment: Deletion of Grace Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: In this final rule we (EPA) are eliminating a provision of the transportation conformity rule that was overturned by the U.S. Court of Appeals for the District of Columbia Circuit (*Sierra Club* v. *EPA, et al.*, 129 F.3d 137 (D.C. Cir. 1997)). In compliance with the court's ruling, today's final rule formally deletes the 1995 amendment that allowed new nonattainment areas a one-year grace period before transportation conformity began applying.

In addition, we discuss in the preamble four issues that were raised in

a Petition for Reconsideration of the original transportation conformity rule that was finalized November 24, 1993. Although we are not taking any regulatory action in response to these issues at this time, the preamble clarifies our policies on the issues raised in the Petition.

Transportation conformity is a Clean Air Act requirement for transportation plans, programs, and projects to conform to state air quality plans. Conformity to a state air quality plan means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the national air quality standards.

Our transportation conformity rule establishes the criteria and procedures for determining whether or not transportation activities conform to the state air quality plan.

EFFECTIVE DATE: May 10, 2000.

ADDRESSES: Docket No. A–99–35 contains materials relevant to today's action and is located at the U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460 in Room M–1500, Waterside Mall (ground floor). The docket is open and supporting materials are available for review between 8:00 a.m. and 5:30 p.m. on all federal government workdays . You may have to pay a reasonable fee for copying docket materials.

FOR FURTHER INFORMATION CONTACT: Denise Kearns, Transportation and Market Incentives Group, Transportation and Regional Programs Division, U.S. Environmental Protection Agency, 2000 Traverwood Road, Ann Arbor, MI 48105, kearns.denise@epa.gov. (734–214–4240).

SUPPLEMENTARY INFORMATION: The text of this rulemaking and certain supporting documents used to develop the rule also can be accessed and downloaded from the Internet at http://www.epa.gov/docs/fedrgstr/EPA-AIR/ (either select desired date or use Search feature) OR http://www.epa.gov/OMSWWW/ (look in What's New or under the Conformity file area). Please note that there may be format changes in the documents on the web due to differences in software.

Regulated Entities

Entities potentially regulated by the conformity rule are those which adopt, approve, or fund transportation plans, programs, or projects under title 23 U.S.C. or title 49 U.S.C. Regulated categories and entities include:

Category	Examples of regulated entities
Local government	Local transportation and air quality agencies.
State government	State transportation and air quality agencies.
Federal government	Department of Transportation (Federal Highway Administration and Federal Transit Administration).

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this rule. This table lists the types of entities that EPA is now aware could potentially be regulated by the conformity rule. Other types of entities not listed in the table could also be regulated. To determine whether your organization is regulated by this action, you should carefully examine the applicability requirements in § 93.102 of the conformity rule. If you have questions regarding the applicability of this action to a particular entity, consult the person listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

I. Background

The original conformity rule was finalized on November 24, 1993 (58 FR 62188). That rule has been subsequently amended on August 7, 1995 (60 FR 40098), November 14, 1995 (60 FR 57179), and August 15, 1997 (62 FR 43780).

In 1998, we entered into a settlement with Environmental Defense (ED) in response to litigation. In that settlement, we agreed to repeal the grace period which had been established by the November 14, 1995 amendments and was permitted under 40 CFR 93.102(d) of the conformity rule. This grace period was overturned by the United States Court of Appeals in 1997.

We also agreed to respond to four issues raised in a Petition for Reconsideration that was submitted by the ED, Natural Resources Defense Council, and Sierra Club. That petition was filed with us on May 26, 1994 and addressed various provisions of the original conformity rule (58 FR 62188).

The Notice of Proposed Rulemaking for today's rule was published on November 30, 1999 (64 FR 66832). The comment period for the proposal ended December 30, 1999.

We received four comments on our proposal. Most commenters addressed issues relating to the rule's effect in areas subject to conformity. However, one commenter focused exclusively on our discussion of the four issues raised in the 1994 petition. Copies of the comments in their entirety can be obtained from the docket for this rule (see **ADDRESSES**).

This docket also includes a complete Response to Comments document for this rule. We summarize our response to comments below in parts III, IV and V of this preamble.

II. How Soon Does Conformity Apply to a New Nonattainment Area?

Conformity applies as soon as we formally designate an area nonattainment. In this final rule we are deleting § 93.102(d), which had provided a one-year grace period following nonattainment designation. On November 4, 1997, the U.S. Court of Appeals for the District of Columbia Circuit overturned § 93.102(d) of the conformity rule, and ruled that the

Clean Air Act requires conformity to apply upon designation. Because the court overturned § 93.102(d), we must delete this provision from our rules.

Therefore, as soon as a nonattainment designation is effective for your area, you must have a conforming transportation plan and transportation improvement plan (TIP) in order to approve transportation projects. This plan and TIP must conform with respect to all pollutants for which the area is designated nonattainment. You may have to delay approving projects until this is done.

III. What Are the Effects of Deleting the Grace Period and EPA's Response to Comments?

Under today's rule, new nonattainment areas must have a conforming plan and TIP in place as soon as their designations become effective. As a practical matter, this requirement has been in effect since November 14, 1997, when the court ruled to delete the one-hour grace period.

Two commenters expressed concern that transportation planning agencies will not have enough time to respond to a new nonattainment designation and ensure that their plans and TIPs conform. These commenters were concerned that without a grace period, virtually all transportation projects in new nonattainment areas could be stopped upon the effective date of a designation.

We believe that new nonattainment areas will have ample time to develop a conforming plan and TIP before nonattainment designations are final and effective. There are generally several opportunities for transportation agencies to become aware that we are preparing to designate an area nonattainment, and as a consequence to prepare for conformity as needed.

For example, on October 25, 1999, we published a proposal to reinstate the one-hour ozone standard in areas that had previously been designated nonattainment. In that proposal, we stated that designations would not become effective until 90 days after we publish the final rule reinstating our one-hour ozone standard. In these areas, state and local transportation agencies will have been notified more than six months in advance of our decision to reinstate the nonattainment designations.

In addition, we point out that we do pursue a public process before we formally designate an area as nonattainment for the first time. We seek recommendations from the state regarding nonattainment designations and boundaries. If we modify the state's recommendations, we notify the state at least 120 days before finalizing the designation.

State and local transportation agencies and air quality agencies also are working to coordinate their planning processes and avoid situations that would result in a conformity lapse. We and the U.S. Department of Transportation (DOT) will work with areas to process their conformity determinations expeditiously. Although we acknowledge the timing issues and other concerns expressed by commenters regarding the deletion of the grace period, we believe that all partners involved in the conformity process can share information and effectively find ways to avoid significant delays in transportation projects resulting from the court's interpretation of the Clean Air Act.

We also note some transportation projects can proceed in the absence of a conforming plan and TIP, including exempt projects (§§ 93.126 and 93.127) and transportation control measures in an approved state implementation plan. These projects would not be affected by a new nonattainment designation.

IV. What Are the Issues From the Petition for Reconsideration and EPA's Response to Comments?

On May 26, 1994, Environmental Defense (ED), Natural Resources Defense Council, and Sierra Club Legal Defense Fund submitted to us a Petition for Reconsideration of the November 1993 conformity rule. We have responded to all issues raised in this petition through previous conformity amendments, with the exception of four issues addressed in this preamble. In a 1998 court settlement, EPA and ED agreed to address these four issues through today's rulemaking. A copy of the 1998 settlement and the full Petition for Reconsideration are included in the docket for this rulemaking see (ADDRESSES). As proposed, we are not taking any regulatory action in today's rule in response to the four issues raised in the 1994 Petition. However, in the discussion below we do clarify certain existing EPA policies, where we feel such clarification is necessary to address concerns raised by commenters on our proposed response to the Petition for Reconsideration.

A. Fiscal Constraint

1. What Is the Issue?

As discussed in the November proposal, in issue 6 of the Petition for Reconsideration, the petitioners requested that we adopt our own regulatory language requiring transportation plans and TIPs to be fiscally constrained, rather than referencing the Department of Transportation's (DOT's) metropolitan planning regulations. The existing conformity rule requires plans and TIPs to be fiscally constrained as required by DOT's metropolitan planning rule at 23 CFR part 450. These DOT regulations require that proposed projects in plans and TIPs be consistent with already available or projected sources of revenue.

2. What Comments Did EPA Receive on Fiscal Constraint, and What Is EPA's Response?

In response to our proposal, one of the petitioners reiterates their position that by referencing DOT's planning regulations, we have unlawfully delegated our rulemaking authority to DOT. Another commenter on the issue concurs with our belief that it is not necessary for us to establish our own language regarding fiscal constraint.

As we discussed in the proposal, we believe it is appropriate to refer to DOT's regulations on fiscal constraint for several reasons. First, we believe DOT's definition of fiscal constraint substantively meets the goals of our conformity rule. We also maintain that by referencing DOT's definition, we have met our procedural obligation to provide criteria and procedures for determining conformity, as required under section 176(c)(4)(A) of the Clean Air Act. We disagree with the commenter's contention that the Clean Air Act directs us to issue regulations specifically regarding fiscal constraint.

Again, we note that we rely on many other DOT definitions and rules, including some that are even more fundamental to the implementation of conformity (*e.g.*, DOT definitions and requirements for plans and TIPs). We also note that the petitioner's comments agree with us that DOT's existing fiscal constraint definition is acceptable for the purposes of conformity.

The commenter's real concern seems to be that future changes to the definition may be unacceptable, and that the conformity rule will automatically incorporate any future changes without EPA action. To remedy this situation, the commenter suggests that we adopt by reference DOT's existing definition of fiscal constraint and specifically exclude any changes that may be made in future DOT rules.

Although we agree that we do not have a concurrence role on DOT's metropolitan planning rule, we point out that there are effective, non-

statutory mechanisms in place to ensure federal coordination. We are fully utilizing these mechanisms and actively working with DOT on their new metropolitan planning regulations, including those provisions that address the definition of fiscal constraint. DOT is proposing to amend these regulations under the Transportation Equity Act for the 21st Century. Petitioners will have an opportunity to comment directly on any changes DOT may propose to their regulation on fiscal constraint through DOT's regulatory process.

As described in the proposal, we also believe that it is appropriate and efficient to rely on DOT's definition of fiscal constraint. It would be impractical to require plans and TIPs to satisfy two different definitions of fiscal constraint. If we refer only to the current definition of fiscal constraint, to ensure consistency we would have to amend the conformity rule whenever DOT's regulations change.

In summary, we believe that by referencing DOT's fiscal constraint definition we are meeting our statutory duty under the Clean Air Act. We also believe that it is reasonable to rely on the framework for federal coordination to ensure that DOT's regulations are appropriate in the conformity context. Lastly, we also believe that wherever it makes sense, we have a responsibility to provide state and local agencies involved in transportation conformity with clear and consistent rules. By referencing DOT's regulations in this case, and coordinating with DOT on any changes they may be contemplating, we believe the goals of conformity and the needs of the public will be effectively met.

B. Horizon Years for Hot-Spot Analyses

1. What Is the Issue?

As discussed in the proposal, issue 9B of the Petition for Reconsideration requested that we require hot-spot analyses to examine the 20-year timeframe of the transportation plan. The existing transportation conformity rule does not clearly specify the horizon for hot-spot analyses.

2. What Comments Did We Receive on the Hot-Spot Analysis Issue?

One of the petitioners explained that their intention was to request that EPA require hot-spot reviews of transportation projects to be consistent with plan and TIP time horizons, and with the time horizons for emissions analyses required by our general conformity rule. To ensure that projects do not cause or worsen hot-spots during the timeframe of the transportation plan, the petitioner suggests that we require an analysis to be conducted for the year during which peak emissions from the action are expected.

3. What Is Our Policy on the Horizon for Hot-Spot Analysis?

As discussed in the proposal to this rule, the conformity rule allows flexibility for areas to decide through the interagency consultation process how to demonstrate that hot-spots are not caused or worsened in any area. Although most areas conduct hot-spot analyses for the year of project completion, many areas also examine other analysis years in the future. For example, some areas do analyze the last year of a currently conforming transportation plan, or another year within the timeframe of that plan, whichever year emissions are highest.

In response to comments on the proposal, we acknowledge the need to clarify that the hot-spot analysis must demonstrate that no hot-spots will be caused or worsened during the timeframe of the transportation plan. Nonetheless, we continue to believe that the specific year examined in the hot-spot analysis to make this demonstration should be decided through interagency consultation, as appropriate to the individual area, on a case-by-case basis. This is allowed by our conformity rule. We also reiterate that it is not necessary in all cases to model the last year of the transportation plan in a hot-spot analysis. Rather, the hot-spot analysis should examine the year in which peak emissions are expected, which may not necessarily be the last year of the conforming plan.

We believe that it would be useful for § 93.116 of the conformity rule to specify that a demonstration that local violations will not be caused or worsened should cover the timeframe of the transportation plan. We agree that without this clarification, it is difficult for implementers to decide which years to examine in order to demonstrate that the conformity requirement is satisfied. For example, some could read the existing requirement to mean that the demonstration regarding local violations must consider only the year of project completion, or in contrast that it consider all future years.

Because we need to propose a regulatory clarification before finalizing it, we are not making any changes to § 93.116 or § 93.123 in this rule. However, we will propose clarifying regulatory text on this issue in an upcoming proposal to amend the conformity rule in response to the March 2, 1999 court decision (*Environmental Defense Fund* v. *EPA, et al.*, 167 F. 3d 641, D.C. Cir. 1999). That proposal would codify existing EPA guidance, issued in a May 14, 1999 memorandum from Gay MacGregor, Director of the Regional and State Programs Division in the Office of Transportation and Air Quality, to Regional Air Division Directors, "Conformity Guidance on Implementation of March 2, 1999 Conformity Court Decision." Based on the court's decision that guidance outlines our approach for notifying and providing the public an opportunity to participate in the conformity process. It also provides criteria for transportation projects that may proceed during a conformity lapse.

In the interim, until this proposal is advanced, we believe our interpretation of § 93.116 and § 93.123 is consistent with our existing conformity rule, and that selection of the year of peak emissions should continue to be decided through the consultation process. We and DOT will implement the hot-spot requirements of the conformity rule as described in this preamble in all future conformity determinations.

C. Assumptions Regarding the Regional Distribution of Emissions

1. What Is the Issue?

In issue 12 of the Petition for Reconsideration, petitioners requested that we require metropolitan planning organizations (MPOs) to demonstrate that regional land use policies and proposed transportation plans achieve the same spatial distribution of motor vehicle emissions as was used in the state implementation plan (SIP) for demonstrating attainment. As discussed in the proposed rule, we had interpreted issue 12 of the Petition for Reconsideration to mean that the petitioners were in effect requesting that we should always require SIPs to establish subarea budgets that MPOs would have to conform to.

2. What Are the Conformity Rule's Requirements on the Use of Subarea Budgets?

Our existing conformity rule does not require states to establish subarea budgets in their SIPs. However, the conformity rule does support the development and use subarea budgets where states choose to do so, and it requires conformity to such budgets if they are established.

3. What Comments Did We Receive?

One commenter supported our current requirement that subarea budgets be established only at the state's

discretion. One of the petitioners commented that we had misconstrued this issue as presented in the Petition for Reconsideration.

The petitioner states that they did not mean to request that subarea budgets be established in all cases. Rather, the petitioner intended to request that we require MPOs to determine whether the emissions it projects for an area are going to be spatially distributed in the same way their distribution has been assumed in a SIP, whether or not there are subarea budgets. The petitioner also suggests that we develop screening criteria to help MPOs identify what is a significant magnitude of variance. In cases where the variance is significant, the petitioner believes we should require MPOs to perform an updated air quality analysis.

4. What Is Our Response to These Comments?

We do not believe that the Clean Air Act directs us to require analyses of spatial distribution or regional air quality analyses as a means for ensuring that transportation activities will not cause or contribute to new or increased violations, or delay timely attainment. The Clean Air Act simply requires a comparison with the SIP's estimates of emissions. We do not believe that the Clean Air Act ever intended MPOs to routinely perform regional air quality analyses, such as photochemical grid modeling, as part of a conformity determination.[1]

As a practical matter, we also note the SIP's assumptions about spatial distribution of emissions would not necessarily be clear to an MPO unless subarea budgets had been established. This is because not all SIPs are required to specifically document their assumptions about spatial distribution, and these assumptions are not always developed or presented in a form that is useful for other agencies, such as MPOs. Spatial distributions of emissions in SIPs are generally developed strictly to serve as an input to the SIP's dispersion modeling, and these emissions distributions are not designed or required to be used for any other purpose.

Again, neither the Clean Air Act nor the conformity rule requires states to develop subarea budgets. We have always interpreted the Clean Air Act to allow for a single budget for a nonattainment area for a given criteria pollutant or precursor, although states have the option to disaggregate and establish subarea budgets at their discretion (see our General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990 at 57 FR 13448, April 16, 1992).

To conclude, we do not believe that the Clean Air Act directs us to require the analysis suggested in the petitioner's comments as a means to ensuring that conformity is properly implemented. We also believe that the analysis suggested by petitioners would in effect require states to establish subarea budgets. Although EPA recognizes that there may be some areas that would benefit by conducting emissions analyses that rely on subarea budgets, we believe these areas will be identified through the interagency consultation process and that it is not necessary for us to issue regulations imposing these kinds of requirements.

D. Credit for Delayed TCMs

1. What Is the Issue?

As described in issue 15 of the Petition for Reconsideration, the petitioners believe that where a transportation control measure (TCM) has been delayed beyond the scheduled implementation date(s) in the SIP, an area's conformity determination should not be allowed to take emissions reduction credit for the TCM until after the TCM has actually been brought into service.

2. What Are the Conformity Rule's Requirements on the Timely Implementation of TCMs?

Under the current conformity rule, emission reduction credit may be taken at "such time as implementation has been assured" (see § 93.122(a)(2)). Once implementation has been assured, emissions analyses can take credit for the TCM in the analysis years during which the TCM would actually be in service (under the revised schedule). In the preamble discussion of the November 30, 1999 proposed rule, we clarified that an assurance of implementation would require at least the following: (a) Past obstacles to implementation of the TCM have been overcome; (b) state and local agencies are giving maximum priority to approval or funding of TCMs over other projects within their control; (c) funding for the TCM is identified and reasonably expected to be available; and (d) the legal or regulatory authority necessary to implement the TCM has been secured or appropriate commitments are in place.

3. What Comments Did EPA Receive on the Timely Implementation of TCMs, and What Is EPA's Response?

In response to our discussion on requirements for assuring the timely implementation of TCMs in the proposal, commenters seemed satisfied that EPA's existing requirements were appropriate. However, a petitioner suggested that we include the criteria listed in the November 1999 proposal as a regulatory definition for assurance of implementation.

EPA does not believe that it is necessary to amend the conformity rule to include such a regulatory definition. We believe that § 93.113 of the conformity rule as written is clear, and that this preamble is an appropriate place to elaborate on the rule. We note that a previous preamble discussion on the timely implementation of TCMs (58 FR 62197, November 24, 1993) has provided additional guidance on our implementation of the conformity rule to date. EPA and DOT have effectively used this 1993 preamble discussion to implement conformity, and we will continue to do so with the language in today's preamble.

V. How Would This Action Affect Conformity SIPs?

Clean Air Act section 176(c)(4)(C) requires states to submit revisions to their SIPs in order to include the criteria and procedures for determining conformity.

If we approved your area's conformity SIP and it includes a provision for a one-year grace period (§ 93.102(d)), that provision cannot be implemented. This has been the case ever since the November 4, 1997, court decision, which found such provisions to be inconsistent with the Clean Air Act. Future conformity SIP submissions may not include § 93.102(d).

If your area has submitted a conformity SIP to us that contains this provision (and we have not yet approved the conformity SIP), we will not approve such a provision as part of the SIP.

VI. Administrative Requirements and EPA's Response to Comments on Small Business and Environmental Justice Impacts of Rule

A. Executive Order 12866

Under Executive Order 12866, (58 FR 51735 (October 4, 1993)) the Agency must determine whether the regulatory action is "significant" and therefore subject to OMB review and the requirements of the Executive Order. The Order defines significant

[1] One state has opted to require dispersion modeling for conformity for its own purposes.

"regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more, or otherwise adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof;

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

It has been determined that this rule is not a "significant regulatory action" under the terms of Executive Order 12866 and is therefore not subject to OMB review.

B. Paperwork Reduction Act

This rule does not impose any new information collection requirements from EPA which require approval by OMB under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

C. Regulatory Flexibility Analysis and EPA's Response to Comments on Impact of Grace Period Deletion on Small Entities

The Regulatory Flexibility Act, as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, requires the agency to conduct a regulatory flexibility analysis of any significant impact a rule will have on a substantial number of small entities. Small entities include small businesses, small not-for-profit organizations and small government jurisdictions. EPA has determined that today's regulations will not have a significant impact on a substantial number of small entities.

One commenter questioned our determination that the proposal to delete the grace period will not have a significant impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act (RFA). We found no such impact because the conformity rules only apply directly to Federal agencies and metropolitan planning organizations (MPOs), which by definition are designated only for metropolitan areas with population of at least 50,000 and thus do not meet the definition of small entities under the RFA. The commenter alleged that both the RFA, the courts, and our own implementing guidance require us to consider the indirect impacts of a proposed rule as well.

We do not agree with the commenter that the agency must consider the indirect impacts of a regulation under the RFA. EPA has consistently interpreted the RFA as requiring the agency only to assess the impacts of proposed rules on the small entities directly regulated by the proposed rule, and this position has been upheld by the courts. See *Mid-Tex Electric Cooperative, Inc.* v. *FERC*, 773 F.2d 327 (D.C. Cir. 1985) (agency's certification need only consider the rule's impact on entities subject to the requirements of the rule); *American Trucking Associations, Inc., et al.*, v. *EPA, et al.*, 175 F.3d 1027 (D.C. Cir. 1999) (court has consistently interpreted RFA to impose no obligation on agency to assess impacts on entities it does not regulate).

In addition, the commenter misreads EPA's guidance concerning consideration of indirect impacts. The sentence the commenter quotes from EPA's guidance directs agency staff to consider indirect impacts as part of any broader economic analysis conducted for the rule, such as a Regulatory Impact Analysis if one is conducted. However, the immediately preceding sentence of the guidance clarifies that if a rule is applicable only to large entities but indirectly impacts small entities, the agency can still certify no significant impact on small entities under the RFA. See Revised Interim Guidance for EPA Rulewriters: Regulatory Flexibility Act, March 29, 1999, p. 17. In any event, the document to which the commenter refers is only guidance; it does not establish any legally binding requirements.

It is also clear that the conformity rule applies directly only to federal agencies and MPOs and does not directly regulate small entities, such as the road builders represented by the commenter. These entities will only be adversely effected by the deletion of the grace period if DOT and the MPOs fail to develop a conforming transportation plan and program by the effective date of a nonattainment designation. In light of the advance warning areas will have of pending designations during the notice and comment period, and the delayed effective date EPA intends to provide for such designations, EPA believes that DOT and MPOs will be able to develop conforming plans and programs in a timely fashion.

Finally, the commenter's allegation is incorrect that the court which ordered EPA to delete the grace period determined that such a change would adversely effect small entities. The court in *Sierra Club* did find that the fact that an intervening governmental agency could alleviate any potential impact on private individuals was not sufficient to deprive such individuals of standing to challenge the grace period in court. However, the standard for showing harm sufficient to support legal standing to sue has no bearing on the impact necessary to mandate a finding of significant impacts under the RFA. The RFA only requires an agency to assess the impacts of a proposed rule on entities directly subject to the proposed rule. The analysis under the RFA need not cover any entities not directly subject to the proposed rule notwithstanding any indirect impacts that may result to other entities, regardless of whether any such impacts could support legal standing to challenge the rule.

EPA therefore concludes that it correctly interpreted the RFA and correctly found that the proposal to delete the grace period would not have a significant impact on a substantial number of small entities. Therefore, as required under section 605 of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, I certify that this rule will not have a significant economic impact on a substantial number of small entities.

D. Unfunded Mandates

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules

with "Federal mandates" that may result in expenditures to State, local, and tribal governments, in the aggregate, or to the private sector, of $100 million or more in any one year. Before promulgating an EPA rule for which a written statement is needed, section 205 of the UMRA generally requires EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective or least burdensome alternative if the Administrator publishes with the final rule an explanation why that alternative was not adopted. Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of the UMRA a small government agency plan. The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

EPA has determined that this rule does not contain a Federal mandate that may result in expenditures of $100 million or more for State, local, and tribal governments, in the aggregate, or the private sector in any one year. Furthermore, this rule simply formalizes what the court has already decided as a legal matter, and which is already being implemented in practice.

This rule affects only those areas that are newly designated as nonattainment, and it simply applies conformity one year earlier than our previous rule had required. Therefore, this rule could require a limited number of areas to perform perhaps one additional transportation plan/TIP conformity determination each.

A 1992 DOT survey of metropolitan planning organizations (MPOs) found that most MPOs spend less than $50,000 per transportation plan/TIP conformity determination. The largest MPOs (serving a population over one million) spent up to $250,000. Thus, even if EPA were to designate 200 areas as nonattainment in one year and each one incurred the maximum costs, the expenditures would not exceed $100 million.

Thus, today's rule is not subject to the requirements of sections 202 and 205 of the UMRA.

E. National Technology Transfer and Advancement Act of 1995

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 ("NTTAA"), Public Law 104–113, section 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.*, materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

This proposed rulemaking does not involve technical standards. Therefore, EPA is not considering the use of any voluntary consensus standards.

F. Executive Order 13045

Executive Order 13045: "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997) applies to any rule that: (1) Is determined to be "economically significant" as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

This rule is not subject to Executive Order 13045 because it is not economically significant within the meaning of Executive Order 12866.

G. Executive Order 13084

Under Executive Order 13084, EPA may not issue a regulation that is not required by statute, that significantly or uniquely affects the communities of Indian tribal governments, and that imposes substantial direct compliance costs on those communities, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by the tribal governments, or EPA consults with those governments. If EPA complies by consulting, Executive Order 13084 requires EPA to provide to the Office of Management and Budget, in a separately identified section of the preamble to the rule, a description of the extent of EPA's prior consultation with representatives of affected tribal governments, a summary of the nature of their concerns, and a statement supporting the need to issue the regulation. In addition, Executive Order 13084 requires EPA to develop an effective process permitting elected officials and other representatives of Indian tribal governments "to provide meaningful and timely input in the development of regulatory policies on matters that significantly or uniquely affect their communities."

The Clean Air Act requires conformity to apply in nonattainment and maintenance areas, and the U.S. Court of Appeals for the District of Columbia Circuit has determined that the Clean Air Act requires conformity to apply immediately upon nonattainment designation. As a result, this regulatory change is required by statute. Furthermore, today's rule would not significantly or uniquely affect the communities of Indian tribal governments. Accordingly, the requirements of section 3(b) of Executive Order 13084 do not apply to this rule.

H. Executive Orders on Federalism

Executive Order 13132, Federalism (64 FR 43255, August 10, 1999), revokes and replaces Executive Orders 12612 (Federalism) and 12875 (Enhancing the Intergovernmental Partnership). Executive Order 13132 requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government." Under Executive Order 13132, EPA may not issue a regulation that has federalism implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments, or EPA consults with State and local officials early in the process of developing the regulation. EPA also may not issue a regulation that has federalism implications and that preempts State law unless the Agency

consults with State and local officials early in the process of developing the proposed regulation.

If EPA complies by consulting, Executive Order 13132 requires EPA to provide to the Office of Management and Budget (OMB), in a separately identified section of the preamble to the rule, a federalism summary impact statement (FSIS). The FSIS must include a description of the extent of EPA's Prior consultation with State and local officials, a summary of the nature of their concerns and the Agency's position supporting the need to issue the regulation, and a statement of the extent to which the concerns of State and local officials have been met. Also, when EPA transmits a draft final rule with federalism implications to OMB for review pursuant to Executive Order 12866, EPA must include a certification from the Agency's Federalism Official stating that EPA has met the requirements of Executive Order 13132 in a meaningful and timely manner.

This final rule, which is required by statute, will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. The Clean Air Act requires conformity to apply in nonattainment and maintenance areas, and the U.S. Court of Appeals for the District of Columbia Circuit has determined that the Clean Air Act requires conformity to apply immediately upon nonattainment designation. As a result, this rule is codifying in regulation the statutory interpretation by the court that is currently in effect. Consequently, this rule is required by statute, and by itself will not have substantial impact on States. Thus, the requirements of section 6 of the Executive Order do not apply to this rule.

I. Executive Order 12898 and EPA's Response to Comments on Environmental Justice Impacts of Grace Period Deletion

One commenter indicated that we failed to consider the disproportionate impact the deletion of the grace period would have on minority and low income groups as required by Executive Order 12898 on environmental justice. The commenter argued that we recently found that minorities and low income populations were disproportionately represented in nonattainment areas, and that we are required by the Executive Order to consider the economic impact on such populations of job loss resulting from deletion of the grace period.

We do not agree that Executive Order 12898 requires us to consider the economic impact of the grace period deletion on minorities and low income populations in this case. The Executive Order only requires agencies to assess adverse impacts on minorities and low income populations where the action the agency is taking will cause disproportionate human health or environmental impacts on such populations. In this case the regulatory action we are taking to delete the grace period from our conformity regulations will not have such impacts, since we are only formally correcting our regulations to reflect the action taken by the United States Court of Appeals in 1997. Any potential adverse impacts on minority and low income populations resulting from deletion of the grace period were caused by the court when it found the grace period to be illegal and overturned it. Since the court decision in 1997, the grace period has effectively been nullified and any areas newly redesignated to nonattainment have been subject to conformity requirements immediately upon the effective date of any redesignation. In addition, since this deletion is mandated by the court's ruling, we could not effectively address any potential adverse impacts from EPA action even if an environmental justice analysis disclosed any.

J. Submission to Congress and the Comptroller General

Under 5 U.S.C. 801(a)(1)(A), as added by the Small Business Regulatory Enforcement Fairness Act of 1996, EPA submitted a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to the publication of the rule in today's **Federal Register**. This rule is not a "major rule" as defined by 5 U.S.C 804(2).

K. Petitions for Judicial Review

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by June 9, 2000. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review, nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceeding to enforce its requirements. (See section 307(b)(2) of the Administrative Procedures Act.)

List of Subjects in 40 CFR Part 93

Environmental protection, Administrative practice and procedure, Air pollution control, Carbon monoxide, Intergovernmental relations, Nitrogen Dioxide, Ozone, Particulate matter, Transportation, Volatile organic compounds.

Dated: March 31, 2000.

Carol M. Browner,

Administrator.

For the reasons set out in the preamble, 40 CFR part 93 is amended as follows:

PART 93—[AMENDED]

1. The authority citation for part 93 continues to read as follows:

Authority: 42 U.S.C. 7401–7671q.

§ 93.102 [Amended]

2. In § 93.102, paragraph (d) is removed.

[FR Doc. 00–8712 Filed 4–7–00; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[SW–FRL–6570–2]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Final Exclusion

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The EPA is granting a petition submitted by Rhodia, Inc. (Rhodia), to exclude from hazardous waste control (or delist) a certain solid waste. This action responds to the petition originally submitted by Rhodia to delist the Filter Cake Sludge on a "generator specific" basis from the lists of hazardous waste.

After careful analysis, the EPA has concluded that the petitioned waste is not hazardous waste when disposed of in subtitle D landfills/surface impoundments. This exclusion applies to Filter Cake Sludge generated at Rhodia's Houston, Texas facility. Accordingly, this final rule excludes the petitioned waste from the requirements of hazardous waste regulations under the Resource Conservation and Recovery Act (RCRA) when disposed of in subtitle D landfills/surface impoundments but imposes testing conditions to ensure that the future-generated wastes remain qualified for delisting.

EFFECTIVE DATE: April 10, 2000.

ADDRESSES: The public docket for this final rule is located at the U.S. Environmental Protection Agency Region 6, 1445 Ross Avenue, Dallas, Texas 75202, and is available for viewing in the EPA Freedom of Information Act review room on the 7th floor from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding Federal holidays. Call (214) 665–6444 for appointments. The reference number for this docket is "F–99–TXDEL–RHODIA." The public may copy material from any regulatory docket at no cost for the first 100 pages and at a cost of $0.15 per page for additional copies.

FOR FURTHER INFORMATION CONTACT: For general information, contact Bill Gallagher, at (214) 665–6775. For technical information concerning this document, contact James Harris, U.S. Environmental Protection Agency, 1445 Ross Avenue, Dallas, Texas, (214) 665–8302.

SUPPLEMENTARY INFORMATION: The information in this section is organized as follows:

I. Overview Information
A. What action is EPA finalizing?
B. Why is EPA approving this delisting?
C. What are the limits of this exclusion?
D. How will Rhodia manage the waste if it is delisted?
E. When is the final delisting exclusion effective?
F. How does this action affect states?
II. Background
A. What is a delisting petition?
B. What regulations allow facilities to delist a waste?
C. What information must the generator supply?
III. EPA's Evaluation of the Waste Data
A. What wastes did Rhodia petition EPA to delist?
B. How much wastes did Rhodia propose to delist?
C. How did Rhodia sample and analyze the waste data in this petition?
IV. Public Comments Received on the Proposed Exclusion
Were Public Comments Submitted on the Proposed Rule?
V. Regulatory Impact
VI. Regulatory Flexibility Act
VII. Paperwork Reduction Act
VIII. Unfunded Mandates Reform Act
IX. Congressional Review Act
X. Executive Order 12875
XI. Executive Order 13045
XII. Executive Order 13084
XIII. National Technology Transfer and Advancements Act
XIV. Executive Order 13132 Federalism

I. Overview Information

A. What Action Is EPA Finalizing?

The EPA is finalizing the decision to grant Rhodia's petition to have their Filter Cake Sludge excluded, or delisted, from the definition of a hazardous waste.

After evaluating the petition, EPA proposed, on December 10, 1999 to exclude Rhodia's waste from the lists of hazardous wastes under §§ 261.31 and 261.32 (see 64 FR 8278).

B. Why Is EPA Approving This Delisting?

Rhodia petitioned to exclude the Filter Cake Sludge treatment residues because it does not believe that the petitioned waste meets the criteria for which it was listed.

Rhodia also believes that the waste does not contain any other constituents that would render it hazardous. Review of this petition included consideration of the original listing criteria, as well as the additional listing criteria and the additional factors required by the Hazardous and Solid Waste Amendments (HSWA) of 1984. *See*, section 222 of HSWA, 42 U.S.C. 6921(f), and 40 CFR 260.22(d)(2)–(4).

For reasons stated in both the proposal and this document, EPA believes that Rhodia' Filter Cake Sludge should be excluded from hazardous waste control. The EPA therefore is granting a final exclusion to Rhodia, located in Houston, Texas for its Filter Cake Sludge.

C. What Are the Limits of This Exclusion?

This exclusion applies to the waste described in the petition only if the requirements described in Table 1 of part 261 and the conditions contained herein are satisfied. The maximum annual volume of the Filter Cake Sludge is 1,200 cubic yards.

D. How Will Rhodia Manage the Waste if It Is Delisted?

Rhodia currently disposes of the petitioned waste (filter-cake Sludge) generated at its facility in off-site, RCRA permitted Treatment Storage or Disposal facilities which are not owned/operated by Rhodia. If the waste is delisted it will be disposed of in a subtitle "D" landfill.

E. When Is The Final Delisting Exclusion Effective?

This rule is effective April 10, 2000. The Hazardous and Solid Waste Amendments of 1984 amended section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six-month period to come into compliance. That is the case here because this rule reduces, rather than increases, the existing requirements for persons generating hazardous wastes. These reasons also provide a basis for making this rule effective immediately, upon publication, under the Administrative Procedure Act, pursuant to 5 U.S.C. 553(d).

F. How Does This Action Affect States?

Because EPA is issuing today's exclusion under the Federal RCRA delisting program, only States subject to Federal RCRA delisting provisions would be affected. This would exclude two categories of States: States having a dual system that includes Federal RCRA requirements and their own requirements, and States who have received our authorization to make their own delisting decisions.

We allow states to impose their own non-RCRA regulatory requirements that are more stringent than EPA's, under section 3009 of RCRA. These more stringent requirements may include a provision that prohibits a Federally issued exclusion from taking effect in the State. Because a dual system (that is, both Federal (RCRA) and State (non-RCRA) programs) may regulate a petitioner's waste, we urge petitioners to contact the State regulatory authority to establish the status of their wastes under the State law.

The EPA has also authorized some States (for example, Louisiana, Georgia, Illinois) to administer a delisting program in place of the Federal program, that is, to make State delisting decisions. Therefore, this exclusion does not apply in those authorized States. If Rhodia transports the petitioned waste to or manages the waste in any State with delisting authorization, Rhodia must obtain delisting authorization from that State before they can manage the waste as nonhazardous in the State.

II. Background

A. What Is a Delisting Petition?

A delisting petition is a request from a generator to EPA or another agency with jurisdiction to exclude from the list of hazardous wastes, wastes the generator does not consider hazardous under RCRA.

B. What Regulations Allow Facilities To Delist a Waste?

Under 40 CFR 260.20 and 260.22, facilities may petition the EPA to remove their wastes from hazardous waste control by excluding them from the lists of hazardous wastes contained in §§ 261.31 and 261.32. Specifically, section 260.20 allows any person to petition the Administrator to modify or revoke any provision of parts 260 through 265 and 268 of Title 40 of the

Code of Federal Regulations (CFR). Section 260.22 provides generators the opportunity to petition the Administrator to exclude a waste on a "generator-specific" basis from the hazardous waste lists.

C. What Information Must the Generator Supply?

Petitioners must provide sufficient information to EPA to allow the EPA to determine that the waste to be excluded does not meet any of the criteria under which the waste was listed as a hazardous waste. In addition, the Administrator must determine, where he/she has a reasonable basis to believe that factors (including additional constituents), other than those for which the waste was listed, could cause the waste to be a hazardous waste, that such factors do not warrant retaining the waste as a hazardous waste.

III. EPA's Evaluation of the Waste Data

A. What Waste Did Rhodia Petition EPA To Delist?

On November 4, 1997, Rhodia petitioned the EPA to exclude from the lists of hazardous waste contained in §§ 261.31 and 261.32, a waste by-product (Filter-Cake Sludge) which falls under the classification of listed waste because of the "derived from" rule in RCRA 40 CFR 260.3(c)(2)(i). Specifically, in its petition, Rhodia, Incorporated, located in Houston, Texas, requested that EPA grant an exclusion for 1,200 cubic yards per year of filter-cake sludge resulting from its treatment process which treats listed hazardous waste. The resulting waste is also listed, in accordance with § 261.3(c)(2)(i) (*i.e.*, the "derived from" rule).

The waste codes of the constituents of concern are EPA Hazardous Waste Numbers D001–D043, F001–F012, F019, F024, F025, F032, F034, F037–F039, K002–004, K006–K011, K013–K052, K060–K062, K064–K066, K069, K071, K073, K083–K088, K090–K091, K093–K118, K123–K126, K131–K133, K136, K141–K145, K147–K151, K156–K161, P001–P024, P026–P031, P033–P034, P036–P051, P054, P056–P060, P062–P078, P081–P082, P084–P085, P087–P089, P092–P116, P118–P123, P127–P128, P185, P188–P192, P194, P196–P199, P201–P205, U001–U012, U014–U039, U041–U053, U055–U064, U066–U099, U101–U103, U105–U138, U140–U174, U176–U194, U196–U197, U200–U211, U213–U223, U225–U228, U234–U240, U243–U244, U246–U249, U271, U277–U280, U328, U353, U359, U364–U367, U372–U373, U375–U379, U381–U396, U400–U404, U407, U409–U411.

B. How Much Waste Did Rhodia Propose To Delist?

Specifically, in its petition, Rhodia requested that EPA grant a standard exclusion for 1,200 cubic yards of Filter Cake Sludge generated per calender year.

C. How Did Rhodia Sample and Analyze the Waste Data in This Petition?

In support of its petition, which included the sampling and analysis plan, Rhodia analyzed the samples for the complete list of constituents included in 40 CFR part 264, appendix IX and the additional parameters for waste common to the petrochemical, oil and gas industries. The analyses was performed using EPA-approved methods. The analytical parameters and methods are provided in Table I.

TABLE I.—ANALYTICAL PARAMETERS AND METHODS

Parameter	Matrix	Method
GC/MS BNA, App IX List	Solid	SW846 Method 8270.
GC/MS VOA, App IX List	Solid	SW846 Method 8240.
Metals—App IX List	Solid	SW846 Methods 6010/7000 Series.
Herbicides—App IX List	Solid	SW846 Method 8150.
Pesticide/PCB, App IX List	Solid	SW846 Method 8080.
Organophoseporus Pesticides, App IX List	Solid	SW846 Method 8140.
Sulfide	Solid	EPA 376.1.
Cyanide, Total	Solid	SW846, Method 9010.
Dioxin/Furan—App IX List	Solid	SW846 Method 8280.

Neutral Leach Cyanide	Solid	SW846 Method 1311 (Modified).
Oil & Grease	Solid	EPA 413.1.
Reactive Cyanide	Solid	SW 846 Chapter 7.3.3.2.
Reactive Sulfide	Solid	SW846 Chapter 7.3.4.2.
Flash Point Closed Cup	Solid	SW846 Method 1010.
pH	Solid	SW846 Method 9045.

Note: Rhodia performed TCLP analyses for specific constituents detected in the total analyses for a given sample.

IV. Public Comments Received on the Proposed Exclusion

Were Public Comments Submitted on the Proposed Rule?

No public comments were received.

V. Regulatory Impact

Under Executive Order 12866, EPA must conduct an "assessment of the potential costs and benefits" for all "significant" regulatory actions.

The proposal to grant an exclusion is not significant, since its effect, if promulgated, would be to reduce the overall costs and economic impact of EPA's hazardous waste management regulations. This reduction would be achieved by excluding waste generated at a specific facility from EPA's lists of hazardous wastes, thus enabling a facility to manage its waste as nonhazardous.

Because there is no additional impact from today's proposed rule, this proposal would not be a significant regulation, and no cost/benefit assessment is required. The Office of Management and Budget (OMB) has also exempted this rule from the requirement for OMB review under section (6) of Executive Order 12866.

VI. Regulatory Flexibility Act

Under the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (that is, small businesses, small organizations, and small governmental jurisdictions). No regulatory flexibility analysis is required, however, if the Administrator or delegated representative certifies that the rule will not have any impact on a small entities.

This rule, if promulgated, will not have an adverse economic impact on small entities since its effect would be to reduce the overall costs of EPA's hazardous waste regulations and would be limited to one facility. Accordingly, I hereby certify that this proposed regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis.

VII. Paperwork Reduction Act

Information collection and recordkeeping requirements associated with this proposed rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511, 44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2050–0053.

VIII. Unfunded Mandates Reform Act

Under section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, which was signed into law on March 22, 1995, EPA generally must prepare a written statement for rules with Federal mandates that may result in estimated costs to State, local, and tribal governments in the aggregate, or to the private sector, of $100 million or more in any one year.

When such a statement is required for EPA rules, under section 205 of the UMRA EPA must identify and consider alternatives, including the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule. The EPA must select that alternative, unless the Administrator explains in the final rule why it was not selected or it is inconsistent with law.

Before EPA establishes regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must develop under section 203 of the UMRA a small government agency plan. The plan must provide for notifying potentially affected small governments, giving them meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising them on compliance with the regulatory requirements.

The UMRA generally defines a Federal mandate for regulatory purposes as one that imposes an enforceable duty upon state, local, or tribal governments or the private sector.

The EPA finds that today's delisting decision is deregulatory in nature and does not impose any enforceable duty on any State, local, or tribal governments or the private sector. In addition, the proposed delisting decision does not establish any regulatory requirements for small governments and so does not require a small government agency plan under UMRA section 203.

IX. Congressional Review Act

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, the Comptroller General of the United States prior to publication of the final rule in the **Federal Register**. This rule is not a "major rule" as defined by 5 U.S.C. 804(2). This rule will become effective on the date of publication in the **Federal Register**.

X. Executive Order 12875

Under Executive Order 12875, EPA may not issue a regulation that is not required by statute and that creates a mandate upon a state, local, or tribal government, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by those governments. If the mandate is unfunded, EPA must provide to the OMB a description of the extent of EPA's prior consultation with representatives of affected state, local, and tribal governments, the nature of their concerns, copies of written communications from the governments, and a statement supporting the need to issue the regulation. In addition, Executive Order 12875 requires EPA to develop an effective process permitting elected officials and other representatives of state, local, and tribal governments "to provide meaningful and timely input in the development of regulatory proposals containing significant unfunded mandates." Today's rule does not create a mandate on state, local or tribal governments. The rule does not impose any enforceable duties on these entities. Accordingly, the requirements of section 1(a) of Executive Order 12875 do not apply to this rule.

XI. Executive Order 13045

The Executive Order 13045 is entitled "Protection of Children from Environmental Health Risks and Safety Risks" (62 FR 19885, April 23, 1997). This order applies to any rule that EPA determines: (1) Is economically significant as defined under Executive Order 12866, and (2) the environmental health or safety risk addressed by the rule has a disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency. This proposed rule is not subject to Executive Order 13045 because this is not an economically significant regulatory action as defined by Executive Order 12866.

XII. Executive Order 13084

Because this action does not involve any requirements that affect Indian Tribes, the requirements of section 3(b) of Executive Order 13084 do not apply.

Under Executive Order 13084, EPA may not issue a regulation that is not required by statute, that significantly affects or uniquely affects that communities of indian tribal governments, and that imposes substantial direct compliance costs on those communities, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by the tribal governments.

If the mandate is unfunded, EPA must provide to the OMB, in a separately identified section of the preamble to the rule, a description of the extent of EPA's prior consultation with representatives of affected tribal governments, a summary of the nature of their concerns, and a statement supporting the need to issue the regulation.

In addition, Executive Order 13084 requires EPA to develop an effective process permitting elected and other representatives of Indian tribal governments "to meaningful and timely input" in the development of regulatory policies on matters that significantly or uniquely affect their communities of Indian tribal governments. This action does not involve or impose any requirements that affect Indian Tribes. Accordingly, the requirements of section 3(b) of Executive Order 13084 do not apply to this rule.

XIII. National Technology Transfer and Advancement Act

Under section 12(d) if the National Technology Transfer and Advancement Act (NTTAA), the Agency is directed to use voluntary consensus standards in its regulatory activities unless to do so

would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.*, materials specifications, test methods, sampling procedures, business practices, etc.) developed or adopted by voluntary consensus standard bodies. Where available and potentially applicable voluntary consensus standards are not used by EPA, the NTTAA requires that Agency to provide Congress, through the OMB, an explanation of the reasons for not using such standards.

This rule does not establish any new technical standards and thus, the Agency has no need to consider the use of voluntary consensus standards in developing this final rule.

XIV. Executive Order 13132 Federalism

Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999) requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government."

Under section 6 of Executive Order 13132, EPA may not issue a regulation that has federalism implications, that impose substantial direct compliance costs, and that is not required by statute, unless the Federal government provides the funds necessary to pay the direct compliance costs incurred by State and local governments, or EPA consults with State and local officials early in the process of developing the proposed regulation. The EPA also may not issue a regulation that has federalism implications and that preempts State law unless the Agency consults with State and local officials early in the process of developing the proposed regulation.

This action does not have federalism implication. It will not have a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, because it affects only one State.

List of Subjects 40 CFR Part 261

Environmental protection, Hazardous waste, Recycling, Reporting and recordkeeping requirements.

Authority: Sec. 3001(f) RCRA, 42 U.S.C. 6921(f).

Dated: March 17, 2000.

Carl E. Edlund,

P.E. Director, Multimedia Planning and Permitting Division, Region 6.

For the reasons set out in the preamble, 40 CFR part 261 is proposed to be amended as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for part 261 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6921, 6922, 6924(y) and 6938.

2. In Tables 1, 2, and 3 of appendix IX of part 261, add the following waste stream in alphabetical order by facility to read as follows:

Appendix IX to Part 261—Waste Excluded Under §§ 260.20 and 260.22

TABLE 1.—WASTE EXCLUDED FROM NON-SPECIFIC SOURCES

Facility	Address	Waste description
. . .	. . .	. . .
Rhodia	Houston,Texas	Filter-cake Sludge, (at a maximum generation of 1,200 cubic yards per calendar year) generated by Rhodia using the SARU and AWT treatment process to treat the filter-cake sludge (EPA Hazardous Waste Nos. D001–D43, F001–F012, F019, F024, F025, F032, F034, F037–F039) generated at Rhodia. Rhodia must implement a testing program that meets the following conditions for the exclusion to be valid: (1) *Delisting Levels:* All concentrations for the following constituents must not exceed the following levels (mg/l). For the filter-cake constituents must be measured in the waste leachate by the method specified in 40 CFR 261.24. (A) Filter-cake Sludge (i) Inorganic Constituents: Antimony-1.15; Arsenic-1.40; Barium-21.00; Beryllium-1.22; Cadmium-0.11; Cobalt-189.00; Copper-90.00; Chromium-0.60; Lead-0.75; Mercury-0.025; Nickel-9.00; Selenium-4.50; Silver-0.14; Thallium-0.20; Vanadium-1.60; Zinc-4.30 (ii) Organic Constituents: Chlorobenzene-Non Detect; Carbon Tetrachloride-Non Detect; Acetone-360; Chloroform-0.9 (2) *Waste Holding and Handling:* Rhodia must store in accordance with its RCRA permit, or continue to dispose of as hazardous waste all Filter-cake Sludge until the verification testing described in Condition (3)(A), as appropriate, is completed and valid analyses demonstrate that condition (3) is satisfied. If the levels of constituents measured in the samples of the Filter-cake Sludge do not exceed the levels set forth in Condition (1), then the waste is nonhazardous and may be managed and disposed of in accordance with all applicable solid waste regulations. (3) *Verification Testing Requirements:* Rhodia must perform sample collection and analyses, including quality control procedures, according to SW–846 methodologies. If EPA judges the process to be effective under the operating conditions used during the initial verification testing, Rhodia may replace the testing required in Condition (3)(A) with the testing required in Condition (3)(B). Rhodia must continue to test as specified in Condition (3)(A) until and unless notified by EPA in writing that testing in Condition (3)(A) may be replaced by Condition (3)(B).

TABLE 1.—WASTE EXCLUDED FROM NON-SPECIFIC SOURCES—Continued

Facility	Address	Waste description
		(A) *Initial Verification Testing:* At quarterly intervals for one year after the final exclusion is granted, Rhodia must collect and analyze composites of the filter-cake sludge. From Paragraph 1 TCLP must be run on all waste and any constituents for which total concentrations have been identified. Rhodia must conduct a multiple pH leaching procedure on samples collected during the quarterly intervals. Rhodia must perform the TCLP procedure using distilled water and three different pH extraction fluids to simulate disposal under three conditions. Simulate an acidic landfill environment, basic landfill environment and a landfill environment similar to the pH of the waste. Rhodia must report the operational and analytical test data, including quality control information, obtained during this initial period no later than 90 days after the generation of the waste. (B) *Subsequent Verification Testing:* Following termination of the quarterly testing, Rhodia must continue to test a representative composite sample for all constituents listed in Condition (1) on an annual basis (no later than twelve months after the final exclusion). (4) *Changes in Operating Conditions:* If Rhodia significantly changes the process which generate(s) the waste(s) and which may or could affect the composition or type waste(s) generated as established under Condition (1) (by illustration, but not limitation, change in equipment or operating conditions of the treatment process), or its NPDES permit is changed, revoked or not reissued, Rhodia must notify the EPA in writing and may no longer handle the waste generated from the new process or no longer discharge as nonhazardous until the waste meet the delisting levels set in Condition (1) and it has received written approval to do so from EPA. (5) *Data Submittals:* Rhodia must submit the information described below. If Rhodia fails to submit the required data within the specified time or maintain the required records on-site for the specified time, EPA, at its discretion, will consider this sufficient basis to reopen the exclusion as described in Paragraph 6. Rhodia must: (A) Submit the data obtained through Paragraph 3 to Mr. William Gallagher, Chief, Region 6 Delisting Program, EPA, 1445 Ross Avenue, Dallas, Texas 75202–2733, Mail Code, (6PD–O) within the time specified. (B) Compile records of operating conditions and analytical data from Paragraph (3), summarized, and maintained on-site for a minimum of five years. (C) Furnish these records and data when EPA or the State of Texas request them for inspection. (D) Send along with all data a signed copy of the following certification statement, to attest to the truth and accuracy of the data submitted: (i) Under civil and criminal penalty of law for the making or submission of false or fraudulent statements or representations (pursuant to the applicable provisions of the Federal Code, which include, but may not be limited to, 18 U.S.C. 1001 and 42 U.S.C. 6928), I certify that the information contained in or accompanying this document is true, accurate and complete. (ii) As to the (those) identified section(s) of this document for which I cannot personally verify its (their) truth and accuracy, I certify as the company official having supervisory responsibility for the persons who, acting under my direct instructions, made the verification that this information is true, accurate and complete. (iii) If any of this information is determined by EPA in its sole discretion to be false, inaccurate or incomplete, and upon conveyance of this fact to the company, I recognize and agree that this exclusion of waste will be void as if it never had effect or to the extent directed by EPA and that the company will be liable for any actions taken in contravention of the company's RCRA and CERCLA obligations premised upon the company's reliance on the void exclusion. (6) *Reopener Language* (A) If, anytime after disposal of the delisted waste, Rhodia possesses or is otherwise made aware of any environmental data (including but not limited to leachate data or groundwater monitoring data) or any other data relevant to the delisted waste indicating that any constituent identified for the delisting verification testing is at level higher than the delisting level allowed by the Regional Administrator or his delegate in granting the petition, then the facility must report the data, in writing, to the Regional Administrator or his delegate within 10 days of first possessing or being made aware of that data. (B) If the annual testing of the waste does not meet the delisting requirements in Paragraph 1, Rhodia must report the data, in writing, to the Regional Administrator or his delegate within 10 days of first possessing or being made aware of that data. (C) If Rhodia fails to submit the information described in paragraphs (5), (6)(A) or (6)(B) or if any other information is received from any source, the Regional Administrator or his delegate will make a preliminary determination as to whether the reported information requires Agency action to protect human health or the environment. Further action may include suspending, or revoking the exclusion, or other appropriate response necessary to protect human health and the environment.

TABLE 1.—WASTE EXCLUDED FROM NON-SPECIFIC SOURCES—Continued

Facility	Address	Waste description
		(D) If the Regional Administrator or his delegate determines that the reported information does require Agency action, the Regional Administrator or his delegate will notify the facility in writing of the actions the Regional Administrator or his delegate believes are necessary to protect human health and the environment. The notice shall include a statement of the proposed action and a statement providing the facility with an opportunity to present information as to why the proposed Agency action is not necessary. The facility shall have 10 days from the date of the Regional Administrator or his delegate's notice to present such information. (E) Following the receipt of information from the facility described in paragraph (6)(D) or (if no information is presented under paragraph (6)(D)) the initial receipt of information described in paragraphs (5), (6)(A) or (6)(B), the Regional Administrator or his delegate will issue a final written determination describing the Agency actions that are necessary to protect human health or the environment. Any required action described in the Regional Administrator or his delegate's determination shall become effective immediately, unless the Regional Administrator or his delegate provides otherwise. (7) *Notification Requirements:* Rhodia must do following before transporting the delisted waste: Failure to provide this notification will result in a violation of the delisting petition and a possible revocation of the decision. (A) Provide a one-time written notification to any State Regulatory Agency to which or through which they will transport the delisted waste described above for disposal, 60 days before beginning such activities. (B) Update the one-time written notification if they ship the delisted waste into a different disposal facility.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[FRL–6572–4]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List

AGENCY: Environmental Protection Agency.

ACTION: Direct final deletion of the Upper Deerfield Township Sanitary Landfill Superfund Site from the National Priorities List.

SUMMARY: The Environmental Protection Agency (EPA), Region II Office announces the deletion of the Upper Deerfield Township Sanitary Landfill Superfund Site (Site) from the National Priorities List (NPL) and requests public comment on this action. The NPL constitutes appendix B of 40 CFR part 300, which is the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), as amended. EPA and the New Jersey Department of Environmental Protection (NJDEP) have determined that all appropriate response actions under CERCLA have been implemented at the Site to protect human health and the environment.

DATES: This "direct final" action will be effective on June 9, 2000 unless EPA receives significant adverse or critical comments by May 10, 2000. If written significant comments are received, EPA will publish a timely withdrawal of the rule in the **Federal Register**, informing the public that the rule will not take effect.

ADDRESSES: Comments may be mailed to: Diego M. Garcia, Remedial Project Manager, Emergency and Remedial Response Division, U.S. Environmental Protection Agency, Region II, 290 Broadway, 19th Floor New York, New York 10007–1866.

Comprehensive information on this Site is available for viewing at the Upper Deerfield Township Sanitary Landfill Superfund Site information repositories at the following locations:

Upper Deerfield Municipal Building, Administrative Office, Building 1325, State Highway 77, Seabrook, New Jersey 08302, (609) 329–4000

and

U.S. EPA Records Center, 290 Broadway, Room 1828, New York, New York 10007–1866, Hours: 9:00 AM to 5:00 PM, Monday through Friday. Contact: Superfund Records Center (212) 637–4308.

FOR FURTHER INFORMATION CONTACT: Diego M. Garcia, Remedial Project Manager, U.S. Environmental Protection Agency, Region II, 290 Broadway, 19th Floor, New York, New York 10007–1866, (212) 637–4947, by FAX at (212) 637–4393 or via e-mail at garcia.diego@epamail.epa.gov.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. NPL Deletion Criteria
III. Deletion Procedures
IV. Basis for Intended Site Deletion
V. Action

I. Introduction

The United States Environmental Protection Agency (EPA) Region II announces the deletion of the Upper Deerfield Township Sanitary Landfill Superfund Site (the "Site"), which is located in Upper Deerfield Township, Cumberland County, New Jersey, from the National Priorities List (NPL). The NPL constitutes Appendix B of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), 40 CFR part 300. EPA identifies sites that appear to present a significant risk to public health or the environment and maintains the NPL as the list of these sites. Pursuant to 40 CFR 300.425(e)(3) of the NCP, any site or portions of a site deleted from the NPL remains eligible for Fund-financed remedial actions if future conditions at the site warrant such action.

EPA will accept comments concerning this document until May 10, 2000.

Section II of this document explains the criteria for deleting sites from the NPL. Section III discusses the procedures that EPA is using for this action. Section IV discusses the Upper Deerfield Township Sanitary Landfill Superfund Site and explains how the Site meets the deletion criteria.

II. NPL Deletion Criteria

As described in § 300.425(e) of the NCP, sites may be deleted from the NPL where no further response is appropriate. In making a determination to delete a site from the NPL, EPA, in consultation with NJDEP, shall consider whether any of the following have been met:

(i) Responsible parties or other persons have implemented all appropriate response actions required; or,

(ii) All appropriate Fund-financed response under CERCLA has been implemented, and no further response action by responsible parties is appropriate; or

(iii) The remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, taking of remedial measures is not appropriate.

Deletion of a site from the NPL does not preclude eligibility for subsequent Fund-financed actions at the Site if future Site conditions warrant such actions. Section 300.425(e)(3) of the NCP provides that Fund-financed actions may be taken at sites that have been deleted from the NPL. Further, deletion of a site from the NPL does not affect the liability of responsible parties or impede Agency efforts to recover costs associated with response efforts.

III. Deletion Procedures

The following procedures are being used for the intended deletion of this Site: (1) EPA Region II issued a Record of Decision (ROD) on September 30, 1991, which found that the release poses no significant threat to public health or the environment and therefore, taking remedial measures is not appropriate; (2) EPA Region II issued a Final Close-Out Report dated September 27, 1993; (3) NJDEP has concurred with the deletion decision in a letter dated March 4, 1998; (4) a five-year review was completed in September 1999, and determined that the remedy continues to be protective of public health and the environment; (5) a notice has been published in the local newspaper and has been distributed to appropriate federal, state and local officials and other interested parties announcing a 30-day dissenting public comment period on EPA's Direct Final Action to Delete; and (6) EPA Region II recommends deletion and has made all relevant documents available for public review in the regional office and local Site information repositories.

EPA is requesting public comments on the Direct Final Action to Delete. The NCP provides that EPA shall not delete a site from the NPL until the Public has been afforded an opportunity to comment on the proposed deletion.

Deletion of sites from the NPL does not itself create, alter, or revoke any individual's rights or obligations. The NPL is designed primarily for informational purposes and to assist Agency management of Superfund sites.

EPA Region II will accept and evaluate public comments before making a final decision to delete. If appropriate, the Agency will prepare a Responsiveness Summary to address

any significant public comments received.

If EPA does not receive significant adverse or critical comments and/or any significant new data submitted during the comment period, the Site will be deleted from the NPL effective June 9, 2000.

IV. Basis for Intended Site Deletion

The Upper Deerfield Sanitary Landfill Superfund Site is an inactive, 14-acre landfill located on a 22.72-acre tract of land in the rural farming community of Upper Deerfield Township, Cumberland County, New Jersey. The Site is located approximately two and one-half miles east-southeast of Seabrook, New Jersey and lies between Woodruff Husted Station Road (County Route 687) to the east and Centerton Road (County Route 553) to the west.

The 14-acre site was operated as a municipal landfill licensed to accept household waste until it closed in 1983. In response to complaints about water quality from residents using private ground water wells, ground water investigations were conducted in 1980. Volatile organic compounds (VOCs) and mercury were found in area wells. In 1983, NJDEP and the County advised residents to discontinue using their wells, and the Township began supplying the affected residents with bottled water. The Site was included on the NPL on September 1, 1983.

In 1986, utilizing funds provided by the State of New Jersey, the Township installed a public water supply well and distribution system to provide potable water to residents in the area. EPA conducted a remedial investigation at the Site from September 1987 through September 1990.

The results showed that the ground water and soil contamination associated with the Site no longer posed a health threat under current or likely future land use conditions. On September 30, 1991, EPA issued a ROD which called for no further action with a program to monitor the air and ground water.

In September 1994, EPA and Upper Deerfield Township signed an Administrative Order on Consent (ACO) which requires the Township to monitor the ground water for 30 years pursuant to the 1991 ROD. The ground water monitoring program began in December 1995. To date, ground water samples taken at the landfill, have not shown elevated levels of contaminants of concern. Air samples at the landfill and surrounding areas have not detected any airborne contaminants. Since airborne contaminants were not detected, the air monitoring program has been discontinued.

A five-year review was completed in September 1999, and found the remedy continues to be protective of public health and the environment. In accordance with § 300.430(f)(4)(ii) of the NCP, this site is subject to a review of the remedies selected under CERCLA every five years. The next five-year review will be conducted on or before September 2004.

All the completion requirements for this Site have been met as described in the Final Close-Out Report dated September 23, 1993. EPA and NJDEP have found that the release poses no significant threat to public health and the environment and, therefore, taking remedial measures is not appropriate. Documents supporting this action are available in the deletion docket.

V. Action

EPA and the NJDEP have found that the release poses no significant threat to public health and the environment and, therefore, taking remedial measures is not appropriate. Therefore, EPA is deleting the Site from the NPL.

This action will be effective on June 9, 2000. However, if EPA receives significant adverse or critical comments by May 10, 2000, EPA will publish a document that withdraws this action.

List of Subjects in 40 CFR Part 300

Environmental protection, Chemicals, Hazardous substances, Hazardous waste, Intergovernmental relations, Penalties, Superfund, Water pollution control, Water supply.

Dated: March 15, 2000.

William J. Muszynki,

Acting Regional Administrator, Region 2.

Part 300, title 40 of chapter I of the Code of Federal Regulations is amended as follows:

PART 300—[AMENDED]

1. The authority citation for Part 300 continues to read as follows:

Authority: 33 U.S.C. 1321(c)(2); 42 U.S.C. 9601–9657; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp.; p. 351; E.O. 12580, 52 FR 2923, 3 CFR, 1987 Comp.; p. 193.

Appendix B—[Amended]

2. Table 1 of Appendix B to part 300 is amended by removing the site for Upper Deerfield Township Sanit. Landfill, Upper Deerfield Township, New Jersey.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 43

[CC Docket No. 98–137, ASD File No. 98–91; FCC 99–397]

1998 Biennial Regulatory Review—Review of Depreciation Requirements for Incumbent Local Exchange Carriers

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document we address proposals set forth in our Notice of Proposed Rulemaking to reform our depreciation prescription process. With this Order, we greatly streamline the depreciation requirements for price cap incumbent local exchange carriers (LECs). We adopt proposals to permit summary filings, eliminate the prescription of depreciation rates for certain incumbent LECs, expand the prescribed range for the digital switching plant account, and eliminate the theoretical reserve study requirement for mid-sized incumbent LECs. These measures will minimize the regulatory burden on incumbent LECs and will provide them with greater flexibility to adjust their depreciation rates while allowing the Commission to maintain adequate oversight in order to promote competition and protect consumer.

DATES: These rules contain information collections that have not been approved by the Office of Management and Budget. The Commission will publish a document announcing the effective date of this rule. Written comments by the public on the new and/or modified information collections are due June 9, 2000.

ADDRESSES: Federal Communications Commission, 445—12th Street, SW., TW–A325, Washington, D.C. 20554. In addition to filing comments with the Office of the Secretary, a copy of any comments on the information collections contained herein should be submitted to Judy Boley, Federal Communications Commission, Room 1–C804, 445 12th Street, SW, Washington, DC 20554, or via the Internet to jboley@fcc.gov.

FOR FURTHER INFORMATION CONTACT: JoAnn Lucanik, Accounting Safeguards Division, Common Carrier Bureau at (202) 418–0800 or Andy Mulitz, Chief, Legal Branch, Accounting Safeguards Division, Common Carrier Bureau at (202) 418–0827. For additional information concerning the information collections contained in this document,

contact Judy Boley at 202–418–0214, or via the Internet at jboley@fcc.gov.

SUPPLEMENTARY INFORMATION: This *Report and Order* in CC Docket No. 98–137, ASD File No. 98–81, adopted on December 17, 1999 and released on December 30, 1999, is available for inspection and copying during normal business hours in the FCC Reference Information Center (RIC), 445 12th Street, SW, TW–A325, Washington, D.C. 20554. The complete text may be purchased from the Commission's copy contractor, International Transcription Service, Inc., 1231 20th Street, N.W., Washington, D.C. 20036 (202) 857–3800.

This Report and Order contains new or modified information collections subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. It will be submitted to the Office of Management and Budget (OMB) for review under Section 3507(d) of the PRA. OMB, the general public, and other Federal agencies are invited to comment on the new or modified information collections contained in this proceeding.

Paperwork Reduction Act

This R&O contains either a new or modified information collections. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public to comment on the information collection(s) contained in this R&O as required by the Paperwork Reduction Act of 1995, Public Law 104–13. Public and agency comments are due June 9, 2000. Comments should address: (a) Whether the new or modified collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

OMB Control Number: 3060–0168.

Title: Reports of Proposed Changes in Depreciation Rates—Section 43.43.

Form No.: N/A.

Type of Review: Revised Collection.

Respondents: Business or other for-profit.

Title	Number of respondents	Est. time per respondent	Total annual burden
Section 43.43	11	5970	60030
Waiver of Depreciation Process	5	100	500

Total Annual Burden: 60,030 Hours.

Cost to Respondents: $0.

Needs and Uses: The Commission streamlined its depreciation prescription process by permitting summary filings and eliminating the prescription of depreciation rates for certain incumbent LECs, expanding the prescribed range for the digital switching plant account, and eliminating the theoretical reserve study requirement for mid-sized incumbent LECs. The Commission also established a waiver process whereby price cap incumbent LECs can free themselves of depreciation regulation. Synopsis of *Report and Order:*

I. Background

The Commission prescribes depreciation factors for price cap incumbent LECs whose revenues exceed an indexed revenue threshold, currently set at $112 million in annual revenue. These carriers currently have investments in telephone plant totaling $288 billion and an accumulated depreciation balance totaling $146 billion. Depreciation constitutes 28 percent of incumbent LECs' total operating expenses, and is their largest single expense.

Over the years, the Commission has taken steps to streamline the depreciation requirements to keep pace with changes in communications technology and legal requirements. When incumbent LECs were regulated under cost-of-service (or rate-of-return) regulation, regulation and oversight of the depreciation process was a critical function because prices for incumbent LEC services were set based on costs, including depreciation expenses. Under this regulatory scheme, each carrier seeking to change its depreciation rates was required to submit a depreciation rate study that was reviewed both by the Commission staff and the representatives of the state regulatory authorities. This depreciation prescription process required carriers to submit extensive data for each plant category to support the projection life, survivor curve, and future net salvage estimates underlying their proposed depreciation rates. These data requirements often necessitated voluminous submissions, with up to 25 pages of analysis for each of 34 plant categories for each jurisdiction.

In 1980, the Commission departed from its previous practice of relying largely on historical experience to project equipment lives and began to rely on analysis of company plans, technological developments, and other future-oriented studies. In 1993, the Commission issued the *Depreciation Simplification Order* (See 58 FR 00530 January 6, 1993) that adopted a simplified depreciation prescription process for AT&T and incumbent LECs. With regard to incumbent LECs, that Order provided for the establishment of ranges for the life and salvage factors that carriers could use to compute their depreciation rates. Consequently, incumbent LECs that proposed life and salvage factors within the Commission-approved ranges no longer needed to file detailed cost support for those rates. In contrast, a carrier that chose to propose depreciation factors outside of the ranges would have to provide cost support to justify it. Today, incumbent LECs remain subject to the Commission's rules under §§ 32.2000(g) and 43.43 for purposes of establishing depreciation rates; however, the typical carrier's filing requirements have been reduced by 75 percent when its depreciation proposals are within the prescribed ranges.

The recent *Depreciation Notice* (63 FR 56900 September 23, 1998) sought comment on proposals that would further minimize the burden on incumbent LECs in the depreciation prescription process. We address the proposals set forth in the *Depreciation Notice* and take further steps to streamline the depreciation prescription process for incumbent LECs. In this action, we take the following actions to further simplify our depreciation prescription process. Filing Requirements in the *Depreciation Notice*, we sought comment on a proposal that would reduce price cap incumbent LECs' filing requirements to four summary exhibits, and the electronic data files used to generate them, provided carriers select depreciation factors from within the specified ranges for all accounts and certify that their selections are consistent with their operations. The four summary exhibits are a comparison of existing and proposed depreciation

rates; a comparison of existing and proposed annual depreciation expenses; a book and theoretical reserve summary; and the underlying depreciation factors. We conclude that we must balance the carriers' needs for simplification with the needs of this Commission, ratepayers, state regulatory missions, and competitors for sufficient information to assess claims the incumbent LECs' may make for regulatory relief. As noted, depreciation expense constitutes a large portion of a carrier's expenses and is significant in determining cost recovery. While we believe we can reduce the amount of information a carrier must file, we find certain basic information is still needed to allow us to adequately monitor a carrier's depreciation practices and amounts associated with these practices. The information that carriers will be required to file in the four summary exhibits, along with the underlying data used to generate them, will provide the depreciation factors (*i.e.*, life, salvage, curve shape, depreciation reserve) required to verify the calculation of the carriers' depreciation rates, estimate the changes in annual depreciation expenses, and monitor the adequacy of the depreciation reserve. This information is critical because it provides the minimum amount of data needed to maintain oversight of carriers' depreciation expenses and rates. We conclude that the proposal in the *Depreciation Notice* strikes an appropriate balance. It will minimize the burden on the carriers, since carriers will not be required to prepare extensive supporting documents for public filing, while providing the minimum amount of data needed to maintain oversight of carriers' depreciation expenses and rates. Thus, we will permit carriers that select depreciation factors from within the specified ranges for all accounts, and certify that their selections are consistent with their operations, to file four summary exhibits along with electronic data files used to generate the summary exhibits as described.

Reduction of Need for Prescription Orders

In the *Depreciation Notice* we proposed that, if a carrier selects depreciation factors from within the ranges for all of its accounts, the carrier's new depreciation rates could go into effect without a prescription order. Based on our review of the record in this proceeding, we will permit carriers to submit streamlined exhibits if they request depreciation factors for all accounts that are within the prescribed ranges. Carriers that request depreciation factors outside the ranges prescribed by the Commission must continue to submit exhibits for each account. In either case, however, the information filed by the incumbent LEC would contain life, salvage, reserve, rate, and expense information, which will be maintained in public files. Also, much of this data will be maintained in the ARMIS database, and therefore, will be readily available to the public via the Internet. We conclude, therefore, that we can eliminate prescriptions in the case where carriers select depreciation factors from within the prescribed ranges for all of its accounts, thereby further reducing the burden on these carriers, and still maintaining an adequate public record that all interested parties will be able to review.

Equipment Life Ranges

We proposed to expand the range of lives for digital switching equipment from a range of 16 to 18 years to 13 to 18 years. Based on our review of the record, we are persuaded that the lower limit of the life range for digital switching should be shortened from the current 16-year minimum to 12 years. We find that this reduction is justified by incumbent LEC accounting data that shows an upward trend in retirements of digital switching equipment in recent years. The increasing retirements are due, in part, to the modular nature of modern digital switches, which allows the incumbent LECs to retire portions of a switch on an interim basis as technology improves. Incumbent LECs also advocate shorter minimum lives for accounts other than digital switching and recommend lives projected by Technology Futures, Inc. (TFI). Based on our review, and given the significant uncertainty that even TFI acknowledges exists in forecasting plant replacement over the next fifteen years, we do not find that the carriers that advocate adoption of TFI's much shorter projection lives have met their burden. Depreciation reserves are at 51 percent, an all-time high, and have increased for each of the past five years. There is no evidence that the large wave of plant replacements forecast by TFI, which should result in increased retirements, has begun or is about to begin. If the carriers do begin to retire plant more rapidly, our depreciation prescription process is flexible enough to allow them shorter lives and faster depreciation. We conclude, therefore, that the TFI study fails to establish convincingly that current projection lives are inadequate.

Salvage and Cost of Removal

In order to calculate net salvage, carriers must estimate both gross salvage and cost of removal. Given the speculative nature of these estimates and the burdens associated with their calculation, the *Depreciation Notice* tentatively concluded that the prescription of net salvage no longer serves a regulatory purpose and that eliminating that factor from the formula would significantly reduce the regulatory burden of the depreciation prescription process. Accordingly, we proposed to eliminate the future net salvage factor from the depreciation formula and to record net salvage as a current expense in the period incurred. Alternatively, we proposed making the elimination of net salvage from the depreciation formula optional, and allowing each incumbent LEC the option to treat net salvage as either a current expense or a component of depreciation. The Financial Accounting and Standards Board (FASB) is currently conducting a proceeding that could change how firms must account for net salvage on their financial books. In light of the pending action by the FASB, we conclude that it is appropriate to defer action on this issue.

Reporting Requirements for Mid-Sized LECs

In the *Depreciation Notice*, we proposed that mid-sized incumbent LECs no longer be required to file annual theoretical reserve studies. Because the Commission would continue to receive theoretical reserve studies from the largest incumbent LECs, which serve approximately 90 percent of all access lines, this proposal would relieve these mid-sized companies of this regulatory burden without seriously encumbering the Commission's ability to monitor and evaluate the adequacy of the industry's reserves. Although a carrier's theoretical reserve studies allow us to monitor and evaluate the adequacy of a carrier's depreciation reserve, we recognize the burden these studies impose on mid-sized incumbent LECs. On balance, we believe that the benefits of streamlining depreciation reporting for mid-sized LECs outweighs the risks. We note that, if necessary, we can request a mid-sized carrier to provide a theoretical reserve study. Further, we note that incumbent LECs with individual annual operating revenues below the indexed revenue threshold continue to be exempt from the Commission's depreciation prescription process.

Confidentiality

The Commission's existing confidentiality procedures are contained in 47 CFR 0.457 and 0.459 of the Commission's rules. We sought comment on whether these rules are

adequate or whether additional safeguards need to be adopted to protect information that carriers regard as confidential. We find no reason to alter the policies we have in place to protect the confidentiality of carrier information.

Waivers

In the *Depreciation Notice*, we noted that even under price caps, depreciation had a potentially significant impact on a carrier's price cap indexes and its rates for some non-price cap services. We invited comment on ways that we might eliminate our need for depreciation prescription. In addition, the USTA forbearance petition raised issues concerning conditions under which the depreciation process might not be necessary. Based on our review, we believe that it would be appropriate to grant a waiver of our depreciation prescription process for certain price cap incumbent LECs in certain instances. Specifically, we find that such a waiver may be approved when an incumbent LEC, voluntarily, in conjunction with its request for waiver: (1) Adjusts the net book costs on its regulatory books to the level currently reflected in its financial books by a below-the-line write-off; (2) uses the same depreciation factors and rates for both regulatory and financial accounting purposes; (3) foregoes the opportunity to seek recovery of the write-off through a low-end adjustment, an exogenous adjustment, or an above-cap filing; and (4) agrees to submit information concerning its depreciation accounts, including forecast additions and retirements for major network accounts and replacement plans for digital central offices. Finally, the waiver request must comply with § 1.3 of the Commission's rules. We will consider alternative proposals by carriers seeking a waiver of our depreciation requirements. Such alternative proposals, however, must provide the same protections to guard against adverse impacts on consumers and competition as the conditions adopted in this Order provide.

The first and second conditions of the waiver process we establish in this Order require that carriers seeking a waiver of our depreciation prescription process adjust their regulatory net book costs to their financial net book costs and use the same depreciation factors and rates for both regulatory and financial accounting purposes. The first condition addresses the disparity that exists between the largest incumbent LECs' financial and regulatory books. In the early 1990's many of the largest incumbent LECs wrote off billions of dollars from their financial books through adjustments to their depreciation reserves. Because they did not make comparable write-offs on their regulatory books, there are significant differences in depreciation reserves between their financial and regulatory books. The first condition requires that the incumbent LEC eliminate this disparity by increasing the depreciation reserves on its regulatory books by a below-the-line write-off. The second condition then requires that carriers use the same depreciation factors and rates for both regulatory and financial purposes. Using the same factors and rates will ensure that established accounting procedures are being followed. These conditions are important because they provide assurance that carriers do not engage in a practice that would disadvantage consumers and competition by using high financial depreciation rates with high regulatory net book costs or by applying inappropriate depreciation rates to regulatory plant accounts.

The third condition requires that carriers obtaining a waiver forego the opportunity to recover any portion of the adjustment that results from conforming their regulatory net book costs to their financial net book costs (*i.e.*, through a below-the-line write-off). As a precondition to obtaining a waiver of the depreciation prescription process, a carrier would have to voluntarily forego its opportunity to recover any portion of the one-time adjustment to its regulatory books through a low-end adjustment, an exogenous adjustment or an above-cap filing. These are all mechanisms through which a price cap incumbent LEC can increase its prices by passing costs through to ratepayers. This third condition assures that a waiver from the depreciation prescription rules would not lead to unjust and unreasonable rates that would result from the inappropriate use of recovery mechanisms. Foregoing recovery of any portion of the write-off is necessary because the depreciation prescription process is the primary way in which we evaluate such claims for recovery. If, as a condition of obtaining a waiver, an incumbent LEC voluntarily foregoes any opportunity to assert such claims in connection with this adjustment to its regulatory net book costs, then our concerns would be mitigated and we could conclude that a waiver of our rules is consistent with the public interest.

These first three conditions are imposed in order to guard against adverse impacts on consumers and competition. Without these conditions, the largest incumbent LECs could use their high financial depreciation rates with their high regulatory net book costs, thereby drastically increasing their annual depreciation expenses. Large increases in depreciation expenses on the carrier's regulatory books would significantly reduce carrier's earnings, which in the case of most all the largest incumbent LECs, would be of such magnitude as to lower rates of return below 10.25%. This in turn could trigger a low-end adjustment, or could lead to carriers seeking recovery through exogenous cost treatment or above-cap filings. These recovery mechanisms, if granted, could enable incumbent LECs to increase prices they charge for access services and in rates they charge for unbundled network elements (UNEs) and interconnection. Increases in access service prices, which could be substantial, would be imposed on purchasers of access and passed on to their customers. The harmful impact that increased charges could have on competition is also substantial. State regulatory commissions have set rates for interconnection and UNEs, and in many instances, have based the rates on Commission-prescribed depreciation factors. Incumbent LECs, acting as wholesale providers of critical facilities to their competitors, could independently establish depreciation rates that could result in unreasonably high interconnection and UNE rates, which competitors would be compelled to pay in order to provide competing local exchange service.

In addition, allowing the largest incumbent LECs to select their own financial depreciation rates for regulatory purposes could have serious consequences for the universal service process. All the largest price cap incumbent LECs are classified as non-rural for universal service purposes. Under the rules we adopted in the recent federal high-cost support mechanism proceedings, each of the non-rural carriers' high cost support is the larger of: (1) An amount determined under our previous USF calculation method, i.e., by basing the amount of support on the relationship of the carrier's average cost per loop and the nationwide average cost per loop or (2) an amount determined under the new synthesis model. Our current depreciation prescription process is critical in the calculation of high cost support amounts determined under method (1) because it ensures that the depreciation expense component of the carriers' average costs per loop are reasonable. If we were to allow incumbent LECs to choose their own depreciation factors without review, we

could no longer ensure that the depreciation expense or the average cost per loop were reasonable. If these carriers were to use their financial depreciation factors for regulatory purposes, they would report major increases in their average costs per loop. This would increase substantially their high cost support under method (1). Under this method, however, because high cost support is subject to a cap, increases in the largest incumbent LECs' high cost support would not increase the fund. Instead, it would lead to substantial reductions in the high cost support for other, primarily rural, carriers, many of which rely to a great extent on high cost support to keep their local rates affordable.

In light of the significantly harmful impact that unrestricted changes in depreciation expenses could have on consumers and competition, we find the public interest is protected only if safeguards are in place that will negate such potential harm. We believe the first three conditions provide the appropriate safeguards and will ensure that carriers do not unreasonably increase depreciation expenses as a result of granting flexibility to establish their own depreciation rates.

The fourth condition requires that carriers who obtain a waiver of our depreciation process submit certain information about network retirement patterns and modernization plans related to their plant accounts so that we can maintain realistic ranges of depreciable life and salvage factors for each of the major plant accounts. This condition seeks to ensure that the Commission has the necessary data to periodically update depreciation factors (*i.e.*, life, salvage, curve shape, depreciation reserve) and to address issues in areas where reliance on the carriers' financial depreciation rates may be inconsistent with other regulatory policy goals. Maintaining appropriate depreciation ranges for the major plant accounts will continue to be critical even though some carriers may be granted relief from the Commission's prescribed depreciation process. This is especially true given the Commission's reliance on the prescribed depreciation ranges in the use of its cost models for universal service high cost support and UNE/interconnection prices.

As discussed, calculation of high cost support under method (2) uses the synthesis model. In this model, the Commission determined that it would rely on the weighted average of the prescribed lives and salvage percentages. If we were to discontinue depreciation prescription for most carriers, these weighted average factors would become less representative of the industry as a whole. In such a circumstance, in order to have representative depreciation factors, we would likely have to rely on the Commission's prescribed depreciation ranges. In order to do this successfully, however, we would have to require that all the major carriers continue to provide the data necessary to keep the ranges up-to-date.

Further, in the *Local Competition Proceeding*, (61 FR 45476 August 29, 1996) the Commission required the use of "economic depreciation" in calculating rates for interconnection and UNEs, but did not elaborate on how economic depreciation should be calculated. Based on our review to date, twenty-four states commissions have required incumbent LECs to use FCC-prescribed projection lives and salvage factors, or similar state-prescribed factors, to calculate their rates for UNEs. We are concerned that forbearance from depreciation regulation by the Commission might deprive state regulatory commissions of valuable information that they may want or need in setting rates for interconnection and UNEs, and might enable incumbent LECs to raise arbitrarily the rates for essential inputs that competitors must purchase from the incumbent LECs. This could have an adverse impact on the development of local competition.

Thus, in order to prevent any inappropriate and undesirable fluctuations in high cost support or the rates for interconnection and UNEs due to changes in depreciation rates caused by carriers receiving a waiver, we will continue to maintain realistic ranges of depreciable life and salvage factors for each of the major plant accounts. These ranges can be relied upon by federal and state regulatory commissions for determining the appropriate depreciation factors to use in establishing high cost support and interconnection and UNE prices. The information that carriers will be required to submit include: forecast additions and retirements for major network accounts; replacement plans for digital central offices; and information concerning relative investments in fiber and copper cable. This condition will assure that any increase in depreciation expense will not have a harmful effect on consumers or competition in rates calculated using reported costs or forward-looking cost models.

The four conditions outlined are intended to mitigate our concerns about the adverse impacts that could occur when carriers are given the freedom to select their own depreciation lives and procedures. The depreciation prescription process is our primary method of assessing the validity of the incumbent LECs' claims for reserve deficiencies and it would not be in the public interest to waive our depreciation rules with the issue of billions of dollars in potential claims unresolved. By establishing conditions pursuant to which a waiver from the depreciation prescription process would be granted, we are giving carriers the freedom from depreciation regulation that they seek. In exchange for that freedom, however, they would need to relinquish portions of the regulatory safety net that has protected them in the past.

USTA Petition for Forbearance

On September 21, 1998, USTA filed a petition for forbearance on behalf of the price cap incumbent LECs and requested that the Commission forbear from imposing §§ 32.2000(g) and 43.43 of the Commission's rules, and refrain from conducting depreciation prescription proceedings under section 220(b) of the Act. The USTA petition is filed under section 10 of the Act. We deny the USTA's petition. We find that USTA did not meet the requirements of Section 10 and that: Our depreciation prescription process is necessary to ensure just and reasonable charges; continuation of our depreciation prescription process is necessary for the protection of consumers; and that forbearance is not consistent with the public interest and the promotion of competition as it is likely to have an adverse effect on competition by raising the input prices that competitors must pay to provide local exchange service. We therefore find that none of the three prongs of the section 10 forbearance test is met. We thus deny USTA's petition for forbearance from the prescription of depreciation prescription.

IV. Procedural Issues

A. Regulatory Flexibility Act

Final Regulatory Flexibility Certification—Report and Order in CC Docket No. 98–81, RM–9341.

The Regulatory Flexibility Act (RFA), 5 USC 601 *et seq.*, amended by the Contract With America Advancement Act of 1996, Public Law 104–121, 110 Stat. 847 (1996) (CWAAA), requires that an agency prepare a regulatory flexibility analysis for notice-and-comment rulemaking proceedings, unless the agency certifies that "the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities." 5 U.S.C. 605(b). In the *NPRM*, 1998 Biennial Regulatory Review—Review of

Depreciation Requirements for Incumbent Local Exchange Carriers, CC Docket No. 98–137, *Notice of Proposed Rulemaking (NPRM)*, the Commission certified that the Regulatory Flexibility Act did not apply to this rulemaking because none of the proposed changes to our depreciation prescription process would have a significant economic impact on a substantial number of small entities. Pursuant to longstanding rules, the proposed changes would apply only to incumbent LECs with annual operating revenues exceeding the indexed revenue threshold. No comments were received concerning the proposed certification.

B. Paperwork Reduction Act

26. *Final Paperwork Reduction Act Analysis.*

C. Authority

This decision herein has been analyzed with respect to the Paperwork Reduction Act of 1995, Public Law 104–13, and has been approved in accordance with the provisions of that Act. The Office of Management and Budget (OMB) approved the proposed requirements under OMB control number 3060–0168, which expires December 31, 2001. The Report and Order contains new or modified information collections which are subject to the Paperwork Reduction Act of 1995.

D. Ordering Clauses

Pursuant to Sections 1, 2, 4, 11, 201–205, and 218–220 of the Communications Act of 1934, as amended, 47 USC 151, 152, 154, 161, 201–205, and 218–220, part 43 of the Commission's rules, 47 CFR part 43, is *Amended* as shown. Pursuant to Sections 1–4, 201–205, 220 and 303(r) of the Communications Act of 1934, as amended, 47 USC 151–154, 201–205, 220 and 303(r) that the *Report and Order is Adopted*. These rules contain information collections that have not been approved by OMB. The Commission will publish a document announcing the effective date of this rule.

Pursuant to Sections 1, 4, 10, and 220 of the Communications Act of 1934, as amended, 47 USC 151, 154, 160, and 220 that the Petition for Forbearance from Depreciation Regulation of Price Cap Local Exchange Carriers filed by the United States Telephone Association is hereby denied. The Commission's Office of Public Affairs, Reference Operations Division, shall send a copy of this Report and Order, including the Final Regulatory Flexibility Certification, to the Chief Counsel for Advocacy of the Small Business Administration.

Secretary.

Rule Changes

Part 43 of Title 47 of the CFR is amended as follows:

PART 43—REPORTS OF COMMUNICATION COMMON CARRIERS AND CERTAIN AFFILIATES

1. The authority citation for part 43 continues to read as follows:

Authority: 47 U.S.C. 154: Telecommunications Act 0f 1996, Public Law 104–104, sections 402 (b)(2)(B), (c), 110 Stat. 56 (1996) as amended unless otherwise noted. 47 U.S.C. 211, 219, 220 as amended.

2. In § 43.43 paragraph (c) and (e) are revised to read as follows:

§ 43.43 Reports of proposed changes in depreciation rates.

* * * * *

(c) Except as specified in paragraphs (c)(1) and (c)(3) of this section, when the change in the depreciation rate proposed for any class or subclass of plant (other than one occasioned solely by a shift in the relative investment in the several subclasses of the class of plant) amounts to twenty percent (20%) or more of the rate currently applied thereto, or when the proposed change will produce an increase or decrease of one percent (1%) or more of the aggregate depreciation charges for all depreciable plant (based on the amounts determined in compliance with paragraph (b)(2) of this section) the carrier shall supplement the data required by paragraph (b) of this section) with copies of the underlying studies, including calculations and charts, developed by the carrier to support service-life and net-salvage estimates. If a carrier must submit data of a repetitive nature to comply with this requirement, the carrier need only submit a fully illustrative portion thereof.

(1) A Local Exchange Carrier regulated under price caps, pursuant to §§ 61.41 through 61.49 of this chapter, is not required to submit the supplemental information described in paragraph (c) introductory text of this section for a specific account if: The carrier's currently prescribed depreciation rate for the specific accounts derived from basic factors that fall within the basic factor ranges established for that same account; and the carrier's proposed depreciation rate for the specific account would also be derived from basic factors that fall within the basic factor ranges for the same account.

(2) Local Exchange Carriers that are regulated under price caps, pursuant to §§ 61.41 through 61.49 of this chapter, and have selected basic factors that fall within the basic factor ranges for all accounts are exempt from paragraphs (b)(3), (b)(4), and (c) introductory text of this section. They shall instead comply with paragraphs (b)(1), (b)(2) and (b)(5) of this section and provide a book and theoretical reserve summary and a summary of basic factors underlying proposed rates by account.

(3) Interexchange carriers regulated under price caps, pursuant to §§ 61.41 through 61.49 of this chapter, are exempted from submitting the supplemental information as described in paragraph (c) introductory text of this section. They shall instead submit: Generation data, a summary of basic factors underlying proposed depreciation rates by account and a short narrative supporting those basic factors, including company plans of forecasted retirements and additions, recent annual retirements, salvage and cost of removal.

* * * * *

(e) Unless otherwise directed or approved by the Commission, the following shall be observed: Proposed changes in depreciation rates shall be filed at least ninety (90) days prior to the last day of the month with respect to which the revised rates are first to be applied in the accounts (*e.g.*, if the new rates are to be first applied in the depreciation accounts for September, they must be filed on or before July 1). Such rates may be made retroactive to a date not prior to the beginning of the year in which the filing is made: *Provided however*, that in no event shall a carrier for which the Commission has prescribed depreciation rates make any changes in such rates unless the changes are prescribed by the Commission. Carriers who select basic factors that fall within the basic factor ranges for all accounts are exempt from depreciation rate prescription by the Commission.

Proposed Rules

Federal Register
Vol. 65, No. 69
Monday, April 10, 2000

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 158

[Docket No. 27791; Notice No. 96–3]

RIN 2120–AF69

Passenger Facility Charges

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Advance notice of proposed rulemaking (ANPRM); withdrawal.

SUMMARY: The FAA is withdrawing the ANPRM, published on April 16, 1996, that proposed to amend provisions of the regulations on passenger facility charges (PFCs). These provisions address the collection, handling, and remittance of PFCs.

FOR FURTHER INFORMATION CONTACT: Joe Hebert, Passenger Facility Charge Branch (APP–530), Room 619, Airports Financial Assistance Division, Office of Airports Planning and Programming, Federal Aviation Administration, 800 Independence Avenue, SW, Washington, DC 20591; telephone (202) 267–8902.

SUPPLEMENTARY INFORMATION:

Background

On May 27, 1994, the Airport Transportation Association of America (ATA) petitioned for a rule change to 14 CFR 158.53(a) to extend the handling fee of $0.12 per each PFC remitted to a public agency, for an additional 3 years. Under the terms of § 158.53, the handling fee dropped to $0.08 per PFC remitted on June 28, 1994. The ATA also proposed that after the third year, they would file comments to determine if the entire airline industry had fully recovered the cost necessary to maintain the PFC collection system. Further, the ATA requested that § 158.53(a) be amended to allow air carriers to retain a handling fee for each refunded PFC. On June 24, 1994, the FAA published a summary of the ATA's petition in the **Federal Register** (59 FR 32668). Air carriers and public agencies were asked to provide specific data to the FAA, so that the agency could determine an adequate rate of airline compensation. The FAA received 12 comments in response to this notice, but determined that these comments did not constitute sufficient information to make a decision.

As a result, the FAA issued an ANPRM (61 FR 16678) on April 16, 1996, providing additional guidance on the quantity and quality of information that the FAA needed in order to make a decision regarding the ATA's petition on adequate compensation for PFC revenue collecting, handling, and remitting. The FAA also used the ANPRM to solicit comments on a number of ancillary issues pertaining to the handling and transfer of PFC revenues and on other changes in Part 158 to accommodate new legislation and industry practices. Specifically, these issues included the following proposals to amend sections of Part 158: require separate handling of PFC collections by air carriers to facilitate PFC remittance in the event of air carrier bankruptcy; implement the statutory prohibition on collection of PFCs from passengers traveling on frequent flyer awards; establish that PFC remittance occurs at the time that a public agency receives PFC collections from an air carrier; and codify current industry practice by providing for appropriate PFC adjustments when a trip itinerary change is initiated by the passenger.

To further analyze whether a change in PFC compensation is necessary, the FAA requested detailed and persuasive data from air carriers that, in total, represented at least 75 percent of enplanements at PFC locations. The FAA determined that information on 75 percent of total PFC enplanements was necessary to give an adequate view of current industry cost and would provide adequate cost data to determine if a change in collecting, handling, and remitting compensation is necessary. In particular, the PFC statute requires that the handling fee be a "uniform amount" that "reflects the average necessary and reasonable handling expenses (net of interest accruing to the carrier and agent after collection and before remittance)." A sample of less than 75 percent, if it included a disproportionate representation from carriers with higher PFC handling costs, would not yield an accurate average handling cost calculation for the industry. (61 FR 16678).

Reasons for Withdrawal

The FAA received responses with data from 10 air carriers. The FAA also received responses from 18 public agencies and 5 industry organizations. The airline responses represented 62 percent of the enplanements at PFC locations, which was 13 percent below the minimum response required by the FAA. As a result of the lack of information provided, the FAA cannot conclude that the current compensation level of $0.08 for each PFC remitted to a public agency does not provide adequate compensation to air carriers. The FAA has no justification to change the PFC collecting, handling, and remitting compensation level either by adjusting the uniform average handling fee itself or changing the basis on which the fee is paid from PFC remitted (which does not include refunded PFCs) to PFC collected (which would include refunded PFCs). Thus, the compensation level remains at $0.08 for each PFC remitted to a public agency, and this compensation cannot be claimed by the air carrier for refunded air travel tickets.

In addition, Congress recently passed H.R. 1000. When signed into law, this legislation, among other items, will establish higher PFC charge levels of $4 and $4.50, will set additional criteria for the review and approval of charges at the higher levels, and will make other miscellaneous changes to the prior PFC legislation. In the "Statement of Managers for the Conference Report accompanying H.R. 1000," the FAA was charged with reviewing the compensation level for air carriers collecting, handling, and remitting PFCs to airports. The FAA will shortly commence a new rulemaking to examine air carrier compensation in response to this requirement.

Many commenters addressed the three proposals the FAA made regarding bankruptcy. The first proposal would prohibit air carriers from commingling PFC revenue with other sources of revenue and require air carriers to establish separate trust accounts. Commenters viewed this proposal as the least costly of the three. The Metropolitan Washington Airports

Authority (MWAA) stated that establishing separate trust accounts would strengthen airport public agencies' claim to PFCs which had been collected. The MWAA preferred trust accounts to escrow accounts, if the PFC funds could be protected sufficiently through trust accounts. Other airports shared the MWAA's view. However, the commenters did not quantify the amount of additional cost that implementation of this proposal would entail to air carriers. Moreover, the degree of additional protection offered to public agencies from such trust accounts in the event of air carrier bankruptcy was not felt to be significantly greater than the current practice. Based on these comments, the FAA cannot determine if the benefits of implementing this proposal would justify higher costs to air carriers.

The second proposal was to require that carriers establish third-party escrow accounts to hold PFC revenue between collection of that revenue and remittance to the public agency. United Airlines indicated that this proposal would increase the air carrier's cost while reducing the compensation available to recover such cost. The FAA notes that public agencies, in their contractual arrangements with air carriers serving their airports, may require PFC escrow accounts or security deposits provided that such security requirements apply to the air carriers in a manner that is not unjustly discriminatory. However, the FAA does not have sufficient data on the costs or expected benefits of such accounts at this time to pursue mandatory implementation.

The third proposal concerning bankruptcy would require the Airline Reporting Corporation (ARC) clearinghouse to remit PFC revenue directly to the public agencies when travel agencies' tickets are processed through the clearinghouse. This proposal presented a problem to some commenters because the majority of travel agency ticket sales are purchased with credit cards, with no funds being collected from the purchaser at time of sale. Travel agents report these credit sales through ARC without remitting any funds to ARC. The ARC clearinghouse bills credit card sales on the air carriers' behalf and reports the amounts billed to the air carriers. However, credit card issuers remit directly to the air carrier. At no point in this credit sale cycle does ARC have liquid funds from the credit card sales. As with the other proposals, the FAA does not have sufficient data on the costs or expected benefits of this proposal to pursue its mandatory implementation.

In the ANPRM, the FAA proposed to implement the statutory prohibition on collection of PFCS from passengers traveling on frequent flyer awards that was promulgated in the Authorization Act of 1994. The FAA also proposed to change §§ 158.45(a)(3) and 158.47(c)(4) to delete a provision in the original PFC rule that is no longer applicable under current industry ticketing practice. The FAA did not receive any opposition on these issues from air carriers or airports. The FAA notes that it already imposes the statutory requirement pertaining to non-collection of PFCs on frequent flyer award tickets in its PFC Records of Decision and the presence of the obsolete provisions has not adversely affected ticketing and remittance practices. Consequently, a separate rulemaking to address these issues may be postponed until the changes may be combined with other changes to Part 158 when appropriate. The frequently flyer provision and technical correction to §§ 158.45(a)(3) and 158.47(c)(4) will be implemented as part of a future rulemaking on the PFC program when the need arises to address additional issues by rulemaking.

The final issue addressed changing the phrase "remitted to" to "received by" when addressing the deadline for monthly transfer of PFC revenue from air carriers to public agencies. Commenters contended that using the term "received by" would make it easier for them to enforce late payment penalties. However the term "remitted by" is common and effective in several U.S. tax laws, so the FAA has denied this request. The FAA notes that a public agency's authority to establish due dates for receipt of remitted monies and collect penalties and interest on PFC revenue that is past due depends on local law or the public agency's contractual relationship with the air carrier, although the due date cannot be in advance of the requirements of § 158.51. The FAA does not consider Part 158's silence on this subject to preclude the collection of penalties and interest based on local law or contract, and the FAA does not object to this practice as long it is applied in a manner that is not unjustly discriminatory.

Conclusion

Therefore, as a result of reviewing comments to the ANPRM Notice No. 96–3, regarding the collection, handling, and remittance of PFCs, the FAA has decided to withdraw this ANPRM. Accordingly, the ANPRM, Notice No. 96–3, published on April 16, 1996 (61 FR 16678), is withdrawn.

Issued in Washington, DC on March 31, 2000.

Catherine M. Lang,

Director, Office of Airport Planning and Programming.

BILLING CODE 4910–13–M

FEDERAL TRADE COMMISSION

16 CFR Part 250

Guides for the Household Furniture Industry

AGENCY: Federal Trade Commission.

ACTION: Request for public comments.

SUMMARY: The Federal Trade Commission ("Commission") requests public comments about the overall costs and benefits and the continuing need for its Guides for the Household Furniture Industry ("the Household Furniture Guides" or "the Guides"), as part of the Commission's systematic review of all current Commission regulations and guides.

DATES: Written comments will be accepted until June 9, 2000.

ADDRESSES: Comments should be directed to: Secretary, Federal Trade Commission, Room H–159, 600 Pennsylvania Avenue, N.W., Washington, D.C. 20580. Comments should be identified as "Household Furniture Industry Guides, 16 CFR Part 250—Comment."

FOR FURTHER INFORMATION CONTACT: Ingrid Whittaker-Ware, Attorney, Federal Trade Commission, Southeast Region, 60 Forsyth Street, S.W., Atlanta, Georgia 30303, telephone number (404) 656–1364, E-mail address: *"Furniture@FTC.gov"*.

SUPPLEMENTARY INFORMATION:

I. Background

The Commission promulgated the Guides for the Household Furniture Industry on December 21, 1973, 38 FR 34992 (1973), under the Federal Trade Commission Act ("FTC Act"), 15 U.S.C. 41–58. [1] The Guides became effective on March 21, 1974. Prior to promulgating the Guides, the Commission released proposed Guides to allow interested or affected parties an opportunity to inform the Commission of their views, suggestions, objections, or other information regarding the proposed

[1] The FTC Act makes it unlawful for one to engage in "unfair methods of competition and unfair or deceptive acts or practices in commerce."

Guides. Based on this information, the Commission determined that it was in the public interest to offer guidance to the industry thereby promoting a higher level of compliance with the laws administered by the Commission by adopting the Guides. The Guides are voluntary guidelines containing interpretations of acts or practices that the Commission has issued to assist members of the industry in complying with Section 5 of the FTC Act.

The Furniture Guides generally advise members of the industry to make affirmative disclosures for the benefit of consumers to ensure that the prospective purchaser is not misled into thinking that the product is different from that which is actually offered, because of the appearance, description, depictions or representations made about the product, in advertising, labeling or other promotional materials. The Guides also advise that advertisers making representations concerning (a) tests made on products, or (b) the performance characteristics of upholstery fabrics do in fact have a "reasonable basis" for such representations. Further, the guides also inform advertisers that the Commission may require documentation from them to substantiate their representations concerning the product. The Guides also provide several definitions for the industry, including definitions regarding certain types of wood. In summary, the Guides for the Household Furniture Industry, 16 CFR Part 250, advise members of the industry to:

(1) Make affirmative disclosures of material facts concerning merchandise, which if known to a purchaser, would influence his or her decision to purchase the merchandise:

(2) Attach an accurate tag or label in a prominent location on each product;

(3) Describe wood, wood imitations and color used in or on furniture only with qualified wood names or generally accepted wood names. The description shall not be deceptive;

(4) Identify certain woods as "walnut", "mahogany" and "mapel" only if such woods are derived from specified species;

(5) Refrain from making representations or misleading inferences about a product being made of leather, when in fact it is not;

(6) Refrain from making false or misleading representations concerning outer coverings of furniture or furniture stuffing;

(7) Accurately describe the origin of furniture, whether domestic or foreign; and whether the furniture is actually new, being made of parts and materials that were entirely unused;

(8) Refrain from describing as "floor sample" furniture that has been rented, repossessed or "traded-in";

(9) Refrain from using deceptive trademarks or claiming to be a manufacturer or wholesaler when in fact they are not; and

(10) Look to the applicable guides and rules for further guidance on guarantees, pricing and advertising.

II. Regulatory Review Program

The Commission has determined to review all current Commission rules and guides periodically. These reviews seek information about the costs and benefits of the Commission's rules and guides and their regulatory and economic impact. The information obtained assists the Commission in identifying rules and guides that warrant modification or rescission. Therefore, the Commission solicits comments on, among other things, the economic impact of and the continuing need for the Household Furniture Industry Guides; possible conflict between the Guides and state, local or other federal laws; and the effect on the Guides of any technological, economic, or other industry changes.

III. Request for Comments

The Commission solicits written public comments on the following questions:

1. Is there a continuing need for the Household Furniture Guides?

(a) What benefits have the Guides provided to purchasers of the products or services affected by the Guides?

(b) Have the Guides imposed costs on purchasers?

2. What changes, if any, should be made to the Guides to increase the benefits of the Guides to purchasers?

(a) How would these changes affect the costs the Guides impose on companies subject to their requirements?

3. What significant burdens or costs, including costs of adherence, have the Guides imposed on companies subject to their requirements?

(a) Have the Guides provided benefits to such companies?

4. What changes, if any, should be made to the Guides to reduce the burdens or costs imposed on companies subject to their requirements?

(a) How would these changes affect the benefits provided by the Guides?

5. Do the Guides overlap or conflict with other federal, state, or local laws or regulations?

6. Since the Guides were issued, what effects, if any, have changes in the relevant technology or economic conditions had on the Guides?

7. What effect, if any, has the use of modern technology such as the Internet and E-mail had on the Guides?

(a) How has the use of modern technology such as the Internet and E-mail affected the rights of consumers and the responsibilities of sellers?

8. Are there any abuses in the marketing of furniture products that are not addressed by the Guides?

(a) What mechanisms (*e.g.*, consumer education, self-regulation, amendment or rescission of the Guides) should be explored to deal with any marketing abuses that may exist?

9. What significant burdens or costs, including costs of adherence, have the Guides imposed on small companies subject to their requirements?

(a) How do these burdens or costs differ from those imposed on larger companies subject to the requirements of the Guides?

10. To what extent are the burdens or costs that the Guides impose on small companies similar to those that small companies would incur under standard and prudent business practices?

11. What changes, if any, should be made to the Guides to reduce the burdens or cost imposed on small companies?

(a) How would these changes affect the benefits of the Guides?

(b) Would such changes adversely affect the competitive position of larger companies?

[Docket No. 00N–0066]

Amendment of Regulations Regarding Certain Label Statements on Prescription Drugs

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to

amend its regulations to require the labels of prescription drugs to bear the statement "only" instead of the statement "Caution: Federal law prohibits dispensing without prescription" and to remove the requirement that certain habit-forming drugs bear the statement "Warning—May be habit forming." The agency is also proposing to add a new section to the regulations to make clear that these habit-forming drugs must be dispensed by prescription only. The agency is taking this action to implement changes made by the Food and Drug Administration Modernization Act of 1997 (FDAMA).

DATES: Submit written comments by June 26, 2000.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: For information regarding human drugs:

Jerry Phillips, Center for Drug Evaluation and Research (HFD–400), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–3246.

For information regarding biologics:

Robert A. Yetter, Center for Biologics Evaluation and Research (HFM–10), Food and Drug Administration, 1401 Rockville Pike, Rockville, MD 20852–1448, 301–827–0373.

SUPPLEMENTARY INFORMATION:

I. The Modernization Act

On November 21, 1997, President Clinton signed into law the Modernization Act (Public Law 105–115). Section 126 of the Modernization Act amended section 503(b)(4) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 353(b)(4)) to require, at a minimum, that, prior to dispensing, the label of prescription drugs bear the symbol "Rxonly" instead of the statement "Caution: Federal law prohibits dispensing without prescription." The new label statement may be printed as either "Rx only" or "℞ only."[1] Section 126 of the Modernization Act also repealed section 502(d) of the act (21 U.S.C. 352(d)), which provided that a drug or device containing certain enumerated narcotic or hypnotic (habit-forming) substances or their derivatives was misbranded unless its label bore the name and quantity of the substance and the statement "Warning—May be habit forming."

II. Description of the Proposed Rule

The proposed rule would amend parts 10, 201, 250, 310, 329, 361, 606, and 610 (21 CFR parts 10, 201, 250, 310, 329, 361, 606, and 610) by removing the requirement that prescription drugs be labeled with "Caution: Federal law prohibits dispensing without prescription" and adding in its place a requirement that prescription drugs be labeled with "Rx only" or "℞ only."

The proposed rule would amend parts 201 and 369 (21 CFR part 369) by removing the requirement that certain habit-forming drugs bear the statement "Warning—May be habit forming."

The proposed rule would remove part 329. Part 329 was issued under repealed section 502(d) of the act. Section 329.1 designates as habit-forming certain derivatives of the habit-forming substances listed in section 502(d) of the act. Section 329.10 elaborates on the labeling requirement of section 502(d) of the act.

Section 329.20 exempts certain habit-forming drugs from the prescription-dispensing requirements of the act. This section has not been substantively revised in more than 30 years. It is now out of date. Except as discussed elsewhere in this section, none of the drug ingredients listed as exempt in § 329.20 are currently marketed over-the-counter (OTC) or have any legal basis to be marketed OTC.

The proposed rule would amend part 290 (21 CFR part 290), by adding new §§ 290.1 and 290.2. Section 290.1 is being added to make clear the agency's determination that a drug that is a controlled substance listed in Schedule II, III, IV, or V of the Federal Controlled Substances Act (CSA) or implementing regulations must, unless otherwise determined by the agency, be dispensed by prescription only as required by section 503(b)(1) of the act. Section 503(b)(1) provides that a drug that "because of its toxicity or other potentiality for harmful effect, or the method of its use, or the collateral measures necessary to its use," or a drug which "is limited by an approved application under section 505 of the act to use under the professional supervision of a practitioner licensed by law to administer such drug," shall be dispensed only upon a prescription of a practitioner licensed by law to administer such drug. Generally, a drug that meets the criteria for control under Schedule II, III, IV, or V of the CSA (see 21 U.S.C. 812) would also meet the standard for prescription dispensing under section 503(b)(1) of the act. Drugs included in Schedule I of the CSA cannot be lawfully marketed in the United States.

Section 290.2 retains the exemption from the prescription-dispensing requirement in § 329.20 for small amounts of codeine in combination with other nonnarcotic active medicinal ingredients. Small amounts of codeine in combination with other nonnarcotic active medicinal ingredients, for example, cough syrup with codeine, may be marketed OTC under a final monograph for cold and cough products. (See § 341.14 (21 CFR 341.14)). For the reason stated above, no other exemptions are warranted at this time for the other narcotic drugs listed in § 329.20(a). Also, an exemption under § 290.2 is not needed for the chlorobutanol preparations described in § 329.20 because chlorobutanol is not a scheduled substance under the CSA. The epinephrine product described in § 329.20(c) cannot be lawfully marketed at this time.

The proposed rule would also revise § 341.14 to refer to the exemption at § 290.2, rather than § 329.20 which is being removed.

III. Implementation

A guidance for industry entitled "Implementation of Section 126 of the Food and Drug Administration Modernization Act of 1997—Elimination of Certain Labeling Requirements" (63 FR 39100, July 21, 1998) is available on the Internet at http://www.fda.gov/cder/guidance/index.htm or http://www.fda.gov/cber/guidelines.htm. The guidance indicates that, for the time periods and under the circumstances stated in this section, in the exercise of its enforcement discretion, FDA does not intend to object if a sponsor does not comply with the new labeling requirements of section 126 of the Modernization Act. The guidance advises that FDA does not intend to object if a sponsor of a currently approved product implements the new requirements of section 126 of the Modernization Act at the time of the next revision of its labels, or by February 19, 2003, whichever comes first, and reports these minor changes in the next annual report. For pending (unapproved) full or abbreviated applications received by the agency prior to February 19, 1998, sponsors should comply with the new labeling requirements by the time of the next revision of their labels or by February 19, 2003, whichever comes first. The guidance also advises that full or abbreviated applications received by FDA after February 19, 1998, should provide labels and labeling in

[1] The ℞ symbol appears in bold in this document because of type-setting limitations, however, it should not be bolded when used on the product's label.

compliance with the new labeling requirements.

IV. Environmental Impact

The agency has determined under 21 CFR 25.30(h) through (k) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

V. Analysis of Impacts

FDA has examined the impacts of the proposed rule under Executive Order 12866 and the Regulatory Flexibility Act (5 U.S.C. 601–612), and the Unfunded Mandates Reform Act of 1995 (Public Law 104–4). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). The agency believes that this proposed rule is consistent with the regulatory philosophy and principles identified in the Executive Order. The agency's guidance document explains that FDA will exercise its enforcement discretion in a manner that will permit companies to implement the required label changes at the time of the next revision of their labels, or by February 19, 2003, whichever comes first. Because almost all labels would typically be reprinted within this timeframe, this enforcement strategy will eliminate any significant costs that would otherwise be associated with the rule. As a result, the proposed rule is not a significant action as defined by the Executive Order.

The Regulatory Flexibility Act requires agencies to analyze regulatory options to minimize any significant impact on a substantial number of small entities. The agency certifies that the proposed rule would not have a significant impact on a substantial number of small entities because the 5-year implementation period will allow companies to make the necessary label changes during the normal course of business. Therefore, under the Regulatory Flexibility Act, no further analysis is required. The Unfunded Mandates Reform Act (in section 202) requires that agencies prepare an assessment of anticipated costs and benefits before proposing any rule that may result in an expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year (adjusted annually for inflation). Because this rule does not impose any mandates on State, local, or tribal governments, or the private sector that will result in an expenditure of $100 million or more in any one year, FDA is not required to perform a cost-benefit analysis under the Unfunded Mandates Reform Act.

VI. Paperwork Reduction Act of 1995

FDA tentatively concludes that this proposed rule contains no collections of information. Therefore, clearance by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (Public Law 104–13) is not required. The revised labeling information is supplied by the Modernization Act (changing "Caution: Federal law prohibits dispensing without prescription" to "℞ only" or "℞ only"). According to 5 CFR 1320.3(c)(2), the public disclosure of information originally supplied by the Federal Government to the recipient for the purpose of disclosure to the public is not considered a collection of information.

VII. Request for Comments

Interested persons may, on or before June 26, 2000, submit to the Dockets Management Branch (address above) written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

VIII. Proposed Effective Date

FDA proposes that any final rule that may issue based on this proposal become effective 60 days after publication of the final rule. For information on implementation, see the discussion in section III of this document.

List of Subjects

21 CFR Part 10

Administrative practice and procedure, News media.

21 CFR Part 201

Drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Part 250

Drugs.

21 CFR Parts 290 and 329

Drugs, Labeling.

21 CFR Part 310

Administrative practice and procedure, Drugs, Labeling, Medical devices, Reporting and recordkeeping requirements.

21 CFR Part 341

Labeling, Over-the-counter drugs.

21 CFR Part 610

Biologics, Labeling, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act, and the Food and Drug Administration Modernization Act, and under authority delegated to the Commissioner of Food and Drugs, it is proposed that chapter I of Title 21 be amended as follows:

PART 10—ADMINISTRATIVE PRACTICES AND PROCEDURES

1. The authority citation for 21 CFR part 10 is revised to read as follows:

Authority: 5 U.S.C. 551–558, 701–706; 15 U.S.C. 1451–1461; 21 U.S.C. 141–149, 321–397, 467f, 679, 821, 1034; 28 U.S.C. 2112; 42 U.S.C. 201, 262, 263b, 264.

§ 10.50 [Amended]

2. Section 10.50 *Promulgation of regulations and orders after an opportunity for a formal evidentiary public hearing* is amended by removing and reserving paragraph (c)(7).

PART 201—LABELING

3. The authority citation for 21 CFR part 201 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 351, 352, 353, 355, 358, 360, 360b, 360gg-360ss, 371, 374, 379e; 42 U.S.C. 216, 241, 262, 264.

§ 201.10 [Amended]

4. Section 201.10 *Drugs; statement of ingredients* is amended in paragraph (a) by removing the phrase "as 'Warning—May be habit forming' ".

5. Section 201.16 is revised to read as follows:

§ 201.16 Drugs; Spanish-language version of certain required statements.

An increasing number of medications restricted to prescription use only are being labeled solely in Spanish for

distribution in the Commonwealth of Puerto Rico where Spanish is the predominant language. Such labeling is authorized under § 201.15(c). One required warning, the wording of which is fixed by law in the English language, could be translated in various ways, from literal translation to loose interpretation. The statutory nature of this warning requires that the translation convey the meaning properly to avoid confusion and dilution of the purpose of the warning. Section 503(b)(4) of the Federal Food, Drug, and Cosmetic Act requires, at a minimum, that the label bear the statement "Rx only." The Spanish-language version of this must be "SoAE1lamente Rx".

§ 201.100 [Amended]

6. Section 201.100 *Prescription drugs for human use* is amended in paragraph (b)(1) by removing the phrase " 'Caution: Federal law prohibits dispensing without prescription' " and adding in its place the phrase " 'Rx only' ".

§ 201.120 [Amended]

7. Section 201.120 *Prescription chemicals and other prescription components* is amended in paragraph (b)(2) by removing the phrase " 'Caution: Federal law prohibits dispensing without prescription' " and adding in its place the phrase " 'Rx only' ".

§ 201.122 [Amended]

8. Section 201.122 *Drugs for processing, repacking, or manufacturing* is amended in the introductory text, first sentence, by removing the phrase " 'Caution: Federal law prohibits dispensing without prescription' " and adding in its place the phrase " 'Rx only' ".

§ 201.306 [Amended]

9. Section 201.306 *Potassium salt preparations intended for oral ingestion by man* is amended in paragraph (b)(1) by removing the word "caution".

PART 250—SPECIAL REQUIREMENTS FOR SPECIFIC HUMAN DRUGS

10. The authority citation for 21 CFR part 250 continues to read as follows:

Authority: 21 U.S.C. 321, 336, 342, 352, 353, 355, 361(a), 362(a) and (c), 371, 375(b).

§ 250.100 [Amended]

11. Section 250.100 *Amyl nitrite inhalant as a prescription drug for human use* is amended in paragraph (b) by removing the phrase "legend 'Caution: Federal law prohibits dispensing without prescription.' " and adding in its place the phrase "statement 'Rx only.' ".

§ 250.101 [Amended]

12. Section 250.101 *Amphetamine and methamphetamine inhalers regarded as prescription drugs* is amended in paragraph (b) by removing the phrase "legend 'Caution: Federal law prohibits dispensing without prescription.' " and adding in its place the phrase "statement 'Rx only.' ".

§ 250.105 [Amended]

13. Section 250.105 *Gelsemium-containing preparations regarded as prescription drugs* is amended by removing the phrase " 'Caution: Federal law prohibits dispensing without prescription.' " from the last sentence and adding in its place the phrase " 'Rx only.' ".

§ 250.108 [Amended]

14. Section 250.108 *Potassium permanganate preparations as prescription drugs* is amended in paragraph (c)(1) by removing the phrase "legend, 'Caution: Federal law prohibits dispensing without prescription. ' " and adding in its place the phrase "statement 'Rx only.' " and in paragraph (c)(2) by removing the phrase ", 'Caution: Federal law prohibits dispensing without prescription.' " and adding in its place the phrase " 'Rx only.' ".

§ 250.201 [Amended]

15. Section 250.201 *Preparations for the treatment of pernicious anemia* is amended in paragraph (d) by removing the phrase "legend 'Caution—Federal law prohibits dispensing without prescription.' " and adding in its place the phrase "statement 'Rx only.' ".

§ 250.250 [Amended]

16. Section 250.250 *Hexachlorophene, as a component of drug and cosmetic products* is amended in the last sentence of paragraph (c)(1) by removing the phrase "legend 'Caution: Federal law prohibits dispensing without a prescription,' " and adding in its place the phrase "statement 'Rx only,' " and in paragraph (c)(4)(i) by removing the phrase "prescription legend" and adding in its place the phrase "statement 'Rx only'.".

PART 290—CONTROLLED DRUGS

17. The authority citation for 21 CFR part 290 continues to read as follows:

Authority: 21 U.S.C. 352, 353, 355, 371.

18. Section 290.1 is added to subpart A to read as follows:

§ 290.1 Controlled substances.

Any drug that is a controlled substance listed in schedule II, III, IV, or V of the Federal Controlled Substances Act or implementing regulations must be dispensed by prescription only as required by section 503(b)(1) of the Federal Food, Drug, and Cosmetic Act unless specifically exempted in § 290.2.

19. Section 290.2 is added to subpart A to read as follows:

§ 290.2 Exemption from prescription requirements.

The prescription-dispensing requirements of section 503(b)(1) of the Federal Food, Drug, and Cosmetic Act are not necessary for the protection of the public health with respect to a compound, mixture, or preparation containing not more than 200 milligrams of codeine per 100 milliliters or per 100 grams that also includes one or more nonnarcotic active medicinal ingredients in sufficient proportion to confer upon the compound, mixture, or preparation valuable medicinal qualities other than those possessed by codeine alone.

PART 310—NEW DRUGS

20. The authority citation for 21 CFR part 310 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 351, 352, 353, 355, 360b-360f, 360j, 361(a), 371, 374, 375, 379e; 42 U.S.C. 216, 241, 242(a), 262, 263b-263n.

§ 310.103 [Amended]

21. Section 310.103 *New drug substances intended for hypersensitivity testing* is amended in paragraph (a)(3)(i) by removing the phrase " 'Caution: Federal law prohibits dispensing without a prescription' " and adding in its place the phrase " 'Rx only' ".

PART 329—HABIT-FORMING DRUGS

22. Part 329 is removed.

PART 341—COLD, COUGH, ALLERGY, BRONCHODILATOR, AND ANTIASTHMATIC DRUG PRODUCTS FOR OVER-THE-COUNTER HUMAN USE

23. The authority citation for 21 CFR part 341 continues to read as follows:

Authority: 21 U.S.C. 321, 351, 352, 353, 355, 360, 371.

§ 341.14 [Amended]

24. Section 341.14 *Antitussive active ingredients* is amended in paragraph (a)(2) by removing "§§ 329.20(a) and 341.40" and adding in its place "§ 290.2".

PART 361—PRESCRIPTION DRUGS FOR HUMAN USE GENERALLY RECOGNIZED AS SAFE AND EFFECTIVE AND NOT MISBRANDED: DRUGS USED IN RESEARCH

25. The authority citation for 21 CFR part 361 continues to read as follows:

Authority: 21 U.S.C. 321, 351, 352, 353, 355, 371; 42 U.S.C. 262.

§ 361.1 [Amended]

26. Section 361.1 *Radioactive drugs for certain research uses* is amended in paragraph (f)(1) by removing the phrase " 'Caution: Federal law prohibits dispensing without prescription' " and adding in its place the phrase " 'Rx only' ".

PART 369—INTERPRETATIVE STATEMENTS RE WARNINGS ON DRUGS AND DEVICES FOR OVER-THE-COUNTER SALE

27. The authority citation for 21 CFR part 369 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 351, 352, 353, 355, 371.

§ 369.22 [Removed]

28. Section 369.22 is removed.

PART 606—CURRENT GOOD MANUFACTURING PRACTICE FOR BLOOD AND BLOOD COMPONENTS

29. The authority citation for 21 CFR part 606 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 351, 352, 355, 360, 360j, 371, 374; 42 U.S.C. 216, 262, 263a, 264.

30. Section 606.121 is amended by revising paragraph (c)(8)(i) to read as follows:

§ 606.121 Container label.

* * * * *

(c) * * *

(8) * * *

(i) "Rx only."

* * * * *

PART 610—GENERAL BIOLOGICAL PRODUCTS STANDARDS

31. The authority citation for 21 CFR part 610 continues to read as follows:

Authority: 21 U.S.C. 321, 351, 352, 353, 355, 360, 371; 42 U.S.C. 216, 262, 263, 263a, 264.

§ 610.60 [Amended]

32. Section 610.60 *Container label* is amended in paragraph (a)(6) by removing the phrase " 'Caution: Federal law prohibits dispensing without prescription,' " and adding in its place the phrase " 'Rx only' ".

§ 610.61 [Amended]

33. Section 610.61 *Package label* is amended in paragraph (s) by removing the phrase " 'Caution: Federal law prohibits dispensing without prescription,' " and adding in its place the phrase " 'Rx only' ".

Dated: March 31, 2000.

Margaret M. Dotzel,

Acting Associate Commissioner for Policy.

[FR Doc. 00–8737 Filed 4–7–00; 8:45 am]

BILLING CODE 4160–01–F

DEPARTMENT OF DEFENSE

Defense Commissary Agency

32 CFR Part 327

Defense Commissary Agency Privacy Act Program

AGENCY: Defense Commissary Agency, DOD

ACTION: Proposed rule.

SUMMARY: This proposed rule establishes the Defense Commissary Agency Privacy Act Program. This rule establishes policies and procedures for implementing the DeCA Privacy Program, and delegates authorities and assigns responsibilities for the administration of the DeCA Privacy Program.

DATES: Comments must be received by June 9, 2000, to be considered by the agency.

ADDRESSES: Defense Commissary Agency, 1300 E. Avenue, Fort Lee, VA 23801-1800.

FOR FURTHER INFORMATION CONTACT: Ms. Carole Marsh at (804) 734-8841.

SUPPLEMENTARY INFORMATION: Executive Order 12866. It has been determined that this Privacy Act rule for the Department of Defense does not constitute 'significant regulatory action'. Analysis of the rule indicates that it does not have an annual effect on the economy of $100 million or more; does not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; does not materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; does not raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in Executive Order 12866.

Regulatory Flexibility Act. It has been determined that this Privacy Act rule for the Department of Defense does not have significant economic impact on a substantial number of small entities because it is concerned only with the administration of Privacy Act systems of records within the Department of Defense.

Paperwork Reduction Act. It has been determined that this Privacy Act rule for the Department of Defense imposes no information requirements beyond the Department of Defense and that the information collected within the Department of Defense is necessary and consistent with 5 U.S.C. 552a, known as the Privacy Act of 1974.

List of subjects in CFR 32 CFR Part 327

Privacy.

Accordingly, Title 32 of the CFR is proposed to be amended in Chapter I, subchapter O, by adding part 327 to read as follows:

PART 327 - DEFENSE COMMISSARY AGENCY PRIVACY ACT PROGRAM

Sec.

327.1 Purpose.
327.2 Applicability.
327.3 Responsibilities.
327.4 Definitions.
327.5 Systems of records
327.6 Collecting personal information.
327.7 Access by individuals.
327.8 Disclosure of personal information to other agencies and third parties.
Appendix A to part 327 - Sample DeCA response letter.
Appendix B to part 327 - Internal management control review checklist.
Appendix C to part 327 - DeCA blanket routine uses.

Authority: Pub. L. 93-579, 88 Stat 1896 (5 U.S.C. 552a).

§ 327.1 Purpose.

This part implements the basic policies and procedures for the implementation of the Privacy Act of 1974, as amended (5 U.S.C. 552a); OMB Circular A-130 [1]; and 32 CFR part 310; and to promote uniformity in the DeCA Privacy Act Program.

§ 327.2 Applicability.

This part applies to Headquarters, Field Operating Activities (FOA), Regions, Zones, Central Distribution Centers (CDC), Commissaries of DeCA, and contractors during the performance of a contract with DeCA. All personnel are expected to comply with the procedures established herein.

§ 327.3 Responsibilities.

(a) *The Director, DeCA:*

(1) Supervises the execution of the Privacy Act and this part within the DeCA, and serves as the DeCA Privacy Act Appeal Authority.

[1] Copies may be obtained: http://www.whitehouse.gov/OMB/circulars

(2) Appoints:

(i) The Executive Director for Support as the DeCA Initial Denial Authority for the DeCA Privacy Act Program.

(ii) The Records Manager, Office of Safety, Security, and Administration as the DeCA Privacy Act Officer.

(b) *The Privacy Act Officer, DeCA:*

(1) Establishes and manages the PA program for DeCA.

(2) Provides guidance, assistance and training.

(3) Controls and monitors all requests received and prepares documentation to the office of primary responsibility (OPR) for response.

(4) Prepares response to requester based on information provided by the OPR.

(5) Signs all response requests for releasable information to the requester after coordination through the General Counsel. Ensures that all denied requests for information are released by the DeCA Initial Denial Authority.

(6) Publishes instructions to contractors that:

(i) Provide DeCA Privacy Program guidance to their personnel who solicit, award, or administer government contracts;

(ii) Inform prospective contractors of their responsibilities regarding the DeCA Privacy Program; and.

(iii) Establish an internal system of contractor performance review to ensure compliance with DeCA's Privacy Program.

(iv) Prepare and submit System Notices to the Defense Privacy Office for publication in the Federal Register.

(7) Maintain Privacy Case files and records of disclosure accounting.

(8) Submit the DeCA Annual Privacy Act Report (RCS: DD-DA&M(A)1379) to the Defense Privacy Office.

(c) *DeCA Directorates/Staff Offices:*

(1) Provide response and the information requested to the PA Officer for release to the individual.

(2) In the event the information is to be denied release, the requested information and rationale for denial will be forwarded to the PA Officer for denial determination.

(d) *Regions:*

(1) Regional Directors will appoint a Regional PA Coordinator who will maintain suspense control of PA actions, prepare documentation to the OPR for response, forward the information to the DeCA PA Officer for release determination, and notify the requester that the response will be received from the DeCA PA Officer using the format in Appendix A to this part.

(e) *DeCA Field Operating Activities (FOAs):*

(1) Upon receipt of a PA request that has not been received from the DeCA PA Officer, notify the DeCA PA Officer within 2 days.

(2) Collect all information available and forward to the DeCA PA Officer. If the requested information is not available, provide the DeCA PA Officer the rationale to respond to the requester.

(f) *Central Distribution Centers (CDCs) and Commissaries:*

(1) Upon receipt of a PA request, not received from the Region Coordinator, notify the Region Coordinator within 2 days.

(2) Collect all information available and forward it to the Region Coordinator for submission to DeCA PA Officer. If requested information is not available, provide the Region Coordinator the rationale so they can prepare a response to the DeCA PA Officer. If the information is available but determined to be exempt, provide the Region Coordinator with the requested information and specific reasons why the request should be denied. The Region Coordinator will formalize a reply to the DeCA PA Officer, forwarding requested information and reasons for denial. The DeCA PA Officer will prepare the response to the requester with coordination by the General Counsel and signature by the IDA.

§ 327.4 Definitions.

Access. The review of a record or a copy of a record or parts thereof in a system of records by any individual.

Agency. For the purposes of disclosing records subject to the Privacy Act among DoD Components, the Department of Defense is considered a single agency. For all other purposes to include applications for access and amendment, denial of access or amendment, appeals from denials, and record keeping as regards release to non-DoD agencies; each DoD Component is considered an agency within the meaning of the Privacy Act.

Computer room. Any combination of electronic hardware and software integrated in a variety of forms (firmware, programmable software, hard wiring, or similar equipment) that permits the processing of textual data. The equipment contains device to receive information and other processors with various capabilities to manipulate the information, store and provide input.

Confidential source. A person or organization who has furnished information to the federal government under an express promise that the person's or the organization's identity will be held in confidence or under an implied promise of such confidentiality if this implied promise was made before September 27, 1975.

Disclosure. The transfer of any personal information from a system of records by any means of communication (such as oral, written, electronic, mechanical, or actual review) to any person, private entity, or government agency, other than the subject of the record, the subject's designated agent or the subject's legal guardian.

Federal Register system. Established by Congress to inform the public of interim, proposed, and final regulations or rulemaking documents having substantial impact on the public. In this case, DeCA directives have the same meaning as regulations or rulemaking documents. The secondary role of the **Federal Register** system is to publish notice documents of public interest.

Individual. A living person who is a citizen of the United States or an alien lawfully admitted for permanent residence. The parent of a minor or the legal guardian of any individual also may act on behalf of an individual. Corporations, partnerships, sole proprietorships, professional groups, businesses, whether incorporated or unincorporated, and other commercial entities are not 'individuals.'

Individual access. Access to information pertaining to the individual by the individual or his or her designated agent or legal guardian.

Law enforcement activity. Any activity engaged in the enforcement of criminal laws, including efforts to prevent, control, or reduce crime or to apprehend criminals, and the activities of prosecutors, courts, correctional, probation, pardon, or parole authorities.

Maintain. Includes maintain, collect, use or disseminate.

Official use. Within the context of this part, this term is used when officials and employees of a DoD Component have a demonstrated need for the use of any record or the information contained therein in the performance of their official duties, subject to DoD 5200.1–R [2], 'DoD Information Security Program Regulation'.

Personal information. Information about an individual that identifies, relates or is unique to, or describes him or her; *e.g.*, a social security number, age, military rank, civilian grade, marital status, race, salary, home/office phone numbers, etc.

Privacy Act. The Privacy Act of 1974, as amended, (5 U.S.C. 552a).

Privacy Act request. A request from an individual for notification as to the

[2] Copies may be obtained: http://www.whs.osd.mil/corres.htm.

existence of, access to, or amendment of records pertaining to that individual. These records must be maintained in a system of records.

Member of the public. Any individual or party acting in a private capacity to include federal employees or military personnel.

Record. Any item, collection, or grouping of information, whatever the storage media (*e.g.*, paper, electronic, etc.), about an individual that is maintained by a DoD Component, including but not limited to, his or her education, financial transactions, medical history, criminal or employment history and that contains his or her name, or the identifying number, symbol, or other identifying particular assigned to the individual, such as a finger or voice print or a photograph.

Risk assessment. An analysis considering information sensitivity, vulnerabilities, and the cost to a computer facility or word processing activity in safeguarding personal information processed or stored in the facility or activity.

Routine use. The disclosure of a record outside the Department of Defense for a use that is compatible with the purpose for which the information was collected and maintained by the Department of Defense. The routine use must be included in the published system notice for the system of records involved.

Statistical record. A record maintained only for statistical research or reporting purposes and not used in whole or in part in making determinations about specific individuals.

System manager. The DoD Component official who is responsible for the operation and management of a system of records.

System of records. A group of records under the control of a DoD Component from which personal information is retrieved by the individual's name or by some identifying number, symbol, or other identifying particular assigned to an individual.

Word processing system. A combination of equipment employing automated technology, systematic procedures, and trained personnel for the primary purpose of manipulating human thoughts and verbal or written or graphic presentations intended to communicate verbally or visually with another individual.

Word processing equipment. Any combination of electronic hardware and computer software integrated in a variety of forms (firmware, programmable software, hard wiring, or similar equipment) that permits the processing of textual data. Generally, the equipment contains a device to receive information, a computer-like processor with various capabilities to manipulate the information, a storage medium, and an output device.

§ 327.5 Systems of records.

(a) *System of records.* To be subject to the provisions of this part, a 'system of records' must:

(1) Consist of 'records' that are retrieved by the name of an individual or some other personal identifier, and

(2) Be under the control of DeCA.

(b) *Retrieval practices.* Records in a group of records that may be retrieved by a name or personal identifier are not covered by this part even if the records contain personal data and are under the control of DeCA. The records MUST BE, in fact, retrieved by name or other personal identifier to become a system of records for DeCA.

(c) *Relevance and necessity.* Only those records that contain personal information which is relevant and necessary to accomplish a purpose required by Federal statute or an Executive Order will be maintained by DeCA.

(d) *Authority to establish systems of records.* Director, DeCA has the authority to establish systems of records; however, each time a system of records is established, the Executive Order or Federal statute that authorizes maintaining the personal information must be identified.

(1) DeCA will not maintain any records describing how an individual exercises his or her rights guaranteed by the First Amendment of the U.S. Constitution.

(2) These rights include, but are not limited to, freedom of religion, freedom of political beliefs, freedom of speech, freedom of the press, the right to assemble, and the right to petition.

(e) *System manager's evaluation.* Systems managers, along with the DeCA Privacy Officer, shall evaluate the information to be included in each new system before establishing the system and evaluate periodically the information contained in each existing system of records for relevancy and necessity. Such a review will also occur when a system notice amendment or alteration is prepared. Consider the following:

(1) The relationship of each item of information retained and collected to the purpose for which the system is maintained.

(2) The specific impact on the purpose or mission of not collecting each category of information contained in the system.

(3) The possibility of meeting the informational requirements through use of information not individually identifiable or through other techniques, such as sampling.

(4) The length of time each item of personal information must be retained.

(5) The cost of maintaining the information.

(6) The necessity and relevancy of the information to the purpose for which it was collected.

(f) *Discontinued information requirements.*

(1) When notification is received to stop collecting any category or item of personal information, the DeCA PA Officer will issue instructions to stop immediately and also excise this information from existing records, when feasible, and amend existing notice.

(2) Disposition of these records will be provided by the DeCA PA Officer in accordance with the DeCA Filing System [3].

(g) *Government contractors.*

(1) When DeCA contracts for the operation or maintenance of a system of records or a portion of a system of records by a contractor, the record system or the portion affected are considered to be maintained by DeCA and are subject to this part. DeCA is responsible for applying the requirements of this part to the contractor. The contractor and its employees are to be considered employees of DeCA for the purposes of the approved provisions of the Privacy Act during the performance of the contract. Consistent with the Defense Acquisition Regulation, contracts requiring the maintenance of a system of records or the portion of a system of records shall identify specifically the record system and the work to be performed and shall include in the solicitation and resulting contract such terms as are prescribed in the Defense Acquisition Regulation (DAR). [4]

(2) If the contractor must use or have access to individually identifiable information subject to this part to perform any part of a contract, and the information would have been collected and maintained by DeCA but for the award of the contract, these contractor activities are subject to this part.

(3) The restrictions in paragraphs (g)(1) and (g)(2) of this section do not apply to records:

(i) Established and maintained to assist in making internal contractor

[3] Copies may be obtained: Defense Commissary Agency, ATTN: FOIA/Privacy Officer, 1300 E. Avenue, Fort Lee, VA 23801-1800

[4] See foonote 3 to § 327.5

management decisions such as those maintained for use in managing the contract.

(ii) Those maintained as internal contractor employee records even when used in conjunction with providing goods and services to DeCA.

(4) Disclosure of records to contractors. Disclosure of personal records to a contractor for the use in the performance of any DeCA contract is considered a disclosure within the Department of Defense (DoD). The contractor is considered the agent of DeCA and is to be maintaining and receiving the records for DeCA.

(h) *Safeguarding personal information.* DeCA personnel will protect records in every system of records for confidentiality against alteration, unauthorized disclosure, embarrassment, or unfairness to any individual about whom information is kept.

(1) Supervisor/Manager paper records maintained by DeCA personnel will be treated as 'For Official Use Only' (FOUO) documents and secured in locked file cabinets, desks or bookcases during non-duty hours. During normal working hours, these records will be out-of-sight if the working area is accessible to non-government personnel.

(2) Personnel records maintained by DeCA computer room or stand alone systems, will be safeguarded at all times. Printed computer reports containing personal data must carry the markings FOUO. Other media storing personal data such as tapes, reels, disk packs, etc., must be marked with labels which bear FOUO and properly safeguarded.

(3) Adherence to paragraphs (h)(1) and (h)(2) of this section, fulfills the requirements of 32 CFR part 285.

(i) *Records disposal.*

(1) DeCA records containing personal data will be shredded or torn to render the record unrecognizable or beyond reconstruction.

(2) The transfer of large quantities of DeCA records containing personal data to disposal activities is not considered a release of personal information under this part. The volume of such transfers makes it difficult or impossible to identify easily specific individual records. Care must be exercised to ensure that the bulk is maintained so as to prevent specific records from becoming readily identifiable. If the bulk is maintained, no special procedures are required. If the bulk cannot be maintained, dispose of the records by shredding or tearing to render the record unrecognizable or beyond reconstruction.

§ 327.6 Collecting personal information

(a) *Collect directly from the individual.* To the greatest extent practicable, collect personal information directly from the individual to whom it pertains if the information may be used in making any determination about the rights, privileges, or benefits of the individual under any Federal program.

(b) *Collecting personal information from third parties.* It may not be practical to collect personal information directly from an individual in all cases. Some examples of this are:

(1) Verification of information through third party sources for security or employment suitability determinations;

(2) Seeking third party opinions such as supervisory comments as to job knowledge, duty performance, or other opinion-type evaluations;

(3) When obtaining the needed information directly from the individual is exceptionally difficult or may result in unreasonable costs; or

(4) Contacting a third party at the request of the individual to furnish certain information such as exact periods of employment, termination dates, copies of records, or similar information.

(c) *Collecting social security numbers (SSNs).*

(1) It is unlawful for DeCA to deny an individual any right, benefit, or privilege provided by law because an individual refuses to provide his or her SSN. Executive Order 9397 authorizes solicitation and use of SSNs as numerical identifiers for individuals in most Federal record systems, however, it does not provide mandatory authority for soliciting.

(2) When an individual is requested to provide their SSN, they must be told:

(i) The uses that will be made of the SSN;

(ii) The statute, regulation, or rule authorizing the solicitation of the SSN; and

(iii) Whether providing the SSN is voluntary or mandatory.

(3) Once the SSN has been furnished for the purpose of establishing a record, the notification in paragraph (c)(2) of this section is not required if the individual is only requested to furnish or verify the SSNs for identification purposes in connection with the normal use of his or her records.

(d) *Privacy act statements.* When a DeCA individual is requested to furnish personal information about himself or herself for inclusion in a system of records, a Privacy Act Statement is required regardless of the medium used to collect the information, *e.g.* forms, personal interviews, telephonic interviews. The statement allows the individual to make a decision whether to provide the information requested. The statement will be concise, current, and easily understood and must state whether providing the information is voluntary or mandatory. If furnishing the data is mandatory, a Federal statute, Executive Order, regulation or other lawful order must be cited. If the personal information solicited is not to be incorporated into a DeCA system of records, a PA statement is not required. This information obtained without the PA statement will not be incorporated into any DeCA systems of records.

(1) The DeCA Privacy Act Statement will include:

(i) The specific Federal statute or Executive Order that authorized collection of the requested information;

(ii) The principal purpose or purposes for which the information is to be used;

(iii) The routine uses that will be made of the information;

(iv) Whether providing the information is voluntary or mandatory; and

(v) The effects on the individual if he or she chooses not to provide the requested information.

(2) Forms. When DeCA uses forms to collect personal information, placement of the Privacy Act advisory statement should be in the following order of preference:

(i) Below the title of the form and positioned so the individual will be advised of the requested information,

(ii) Within the body of the form with a notation of its location below the title of the form,

(iii) On the reverse of the form with a notation of its location below the title of the form,

(iv) Attached to the form as a tear-off sheet, or

(v) Issued as a separate supplement to the form.

(3) Forms issued by non-DoD activities. Ensure that the statement prepared by the originating agency on their forms is adequate for the purpose for which DeCA will use the form. If the statement is inadequate, DeCA will prepare a new statement before using the form. Forms issued by other agencies not subject to the Privacy Act but its use requires DeCA to collect personal data, a Privacy Act Statement will be added.

§ 327.7 Access by individuals

(a) *Individual access to personal information.* Release of personal information to individuals whose records are maintained in a systems of records under this part is not considered public release of information. DeCA will

release to the individual all of the personal information, except to the extent the information is contained in an exempt system of records.

(1) Requests for access.

(i) Individuals in DeCA Headquarters and FOAs will address requests for access to their personal information to the DeCA Privacy Act Officer. Individuals in Regions, CDCs, and commissaries, will address requests to their respective Region Privacy Act Coordinator. The individual is not required to explain or justify why access is being sought.

(ii) If an individual wishes to be accompanied by a third party when seeking access to his or her records or to have the records released directly to the third party, a signed access authorization granting the third party access is required.

(iii) A DeCA individual will not be denied access to his or her records because he or she refuses to provide his or her SSN unless the SSN is the only way retrieval can be made.

(2) Granting access.

(i) If the record is not part of an exempt system, DeCA personnel will be granted access to the original record or an exact copy of the original record without any changes or deletions. Medical records will be disclosed to the individual to whom they pertain unless an individual fails to comply with the established requirements. This includes refusing to name a physician to receive medical records when required, refusing to pay fees, or when a judgment is made that access to such records may have an adverse effect on the mental or physical health of the individual. Where an adverse effect may result, a release will be made in consultation with a physician.

(ii) DeCA personnel may be denied access to information compiled in reasonable anticipation of a civil action or proceeding. The term 'civil proceeding' is intended to include quasi-judicial and pretrial judicial proceedings. Information prepared in conjunction with the quasi-judicial, pretrial and trial proceedings to include those prepared by DeCA legal and non-legal officials of the possible consequences of a given course of action are protected from access.

(iii) Requests by DeCA personnel for access to investigatory records pertaining to themselves, compiled for law enforcement purposes, are processed under this part and that of 32 CFR part 310. Those requests by DeCA personnel for investigatory records pertaining to themselves that are in records systems exempt from access provisions shall be processed under this part or 32 CFR part 285, depending upon which provides the greatest degree of access.

(3) Non agency records.

(i) Uncirculated personal notes and records that are not given or circulated to any person or organization (example, personal telephone list) that are kept or discarded at the author's discretion and over which DeCA exercises no direct control, are not considered DeCA records. However, if personnel are officially directed or encouraged, either in writing or orally, to maintain such records, they may become 'agency records' and may be subject to this part.

(ii) Personal uncirculated handwritten notes of team leaders, office supervisors, or military supervisory personnel concerning subordinates are not a system of records within the meaning of this part. Such notes are an extension of the individual's memory. These notes, however, must be maintained and discarded at the discretion of the individual supervisor and not circulated to others. Any established requirement to maintain such notes (written or oral directives, regulation or command policy) make these notes 'AGENCY RECORDS'. If the notes are circulated, they must be made a part of a system of records. Any action that gives personal notes the appearance of official agency records is prohibited unless they have been incorporated into a DeCA system of records.

(b) *Relationship Between the Privacy Act and the Freedom of Information Act (FOIA).*

(1) Requests from DeCA individuals for access to a record pertaining to themselves made under the FOIA are processed under the provisions of this part, 32 CFR part 310 and DeCA Directive 30-12, Freedom of Information Act (FOIA) Program [5].

(2) Request from DeCA individuals for access to a record pertaining to themselves are processed under this part and 32 CFR part 310.

(3) Requests from DeCA individuals for access to records about themselves that cite both Acts or the DeCA implementing directives for both Acts are processed under this part except:

(i) When the access provisions of the FOIA provide a greater degree of access process under the FOIA, or

(ii) When access to the information sought is controlled by another Federal statute process access procedures under the controlling statute.

(4) Requests from DeCA individuals for access to information about themselves in a system of records that do not cite either Act or DeCA implementing directive are processed under the procedures established by this part.

(5) DeCA requesters will not be denied access to personal information concerning themselves that would be releasable to them under either Act because they fail to cite either Act or the wrong Act. The Act or procedures used in granting or denying access will be explained to requesters.

(6) DeCA requesters should receive access to their records within 30 days.

(7) Records in all DeCA systems maintained in accordance with the Government-wide systems notices are in temporary custody of DeCA; and all requests to access or amend these records will be processed in accordance with this part.

(c) *Denial of individual access.*

(1) A DeCA individual may be denied formal access to a record pertaining to him/her only if the record:

(i) Was compiled in reasonable anticipation of civil action.

(ii) Is in a system of records that has been exempt from access provisions of this part.

(iii) All systems of records maintained by the Defense Commissary Agency shall be exempt from the requirements of 5 U.S.C. 552a(d) pursuant to 5 U.S.C. 552a(k)(1) to the extent that the system contains any information properly classified under Executive Order 12958 and which is required by the Executive Order to be withheld in the interest of national defense or foreign policy. This exemption, which may be applicable to parts of all systems of records, is necessary because certain record systems not otherwise specifically designated for exemptions herein may contain items of information that have been properly classified.

(iv) Is contained in a system of records for which access may be denied under some other Federal statute.

(v) All systems of records maintained by the DeCA shall be exempt from the requirements of 5 U.S.C. 552a(d) pursuant to 5 U.S.C. 552a(k)(1) to the extent that the system contains any information properly classified under Executive Order 12958 and which is required by the Executive Order to be withheld in the interest of national defense of foreign policy. This exemption, which may be applicable to parts of all systems of records, is necessary because certain record systems not otherwise specifically designated for exemptions herein may contain items of information that have been properly classified.

(2) DeCA individuals will only be denied access to those portions of the records from which the denial of access

[5] See foonote 3 to § 327.5.

serves some legitimate governmental purpose.

(3) Other reasons to refuse DeCA individuals are:

(i) The request is not described well enough to locate it within a reasonable amount of effort by the PA Officer or PA Coordinator; or

(ii) An individual fails to comply with the established requirements including refusing to name a physician to receive medical records when required or to pay fees.

(4) Only the DeCA IDA can deny access. This denial must be in writing and contain:

(i) The date of the denial, name, title of position, and signature of the DeCA Initial Denial Authority.

(ii) The specific reasons for the denial, including specific reference to the appropriate sections of the PA, other statutes, this part or the Code of Federal Regulations (CFR);

(iii) Information providing the right to appeal the denial through the DeCA appeal procedure within 60 days, and the title, position and address of the DeCA PA Appellate Authority.

(5) DeCA Appeal Procedures. The Director of DeCA, or the designee, will review any appeal by an individual from a denial of access to DeCA records. Formal written notification will be provided to the individual explaining whether the denial is sustained totally or in part. The DeCA PA Officer will:

(i) Assign a control number and process the appeal to the Director, DeCA or the designee appointed by the Director.

(ii) Provide formal written notification to the individual by the appeal authority explaining whether the denial is sustained totally or in part and the exact reasons for the denial to include provisions of the Act, other statute, this part or the CFR whichever the determination is based, or

(iii) Provide the individual access to the material if the appeal is granted.

(iv) Process all appeals within 30 days of receipt unless the appeal authority determines the review cannot be made within that period and provide notification to the individual the reasons for the delay and when an answer may be expected.

(d) *Amendment of records.*

(1) DeCA employees are encouraged to review the personal information being maintained about them periodically. An individual may request amendment of any record contained in a system of records unless the system of records has been exempt specifically from the amendment procedures by the Director, DeCA. A request for amendment must include:

(i) A description of the item or items to be amended.

(ii) The specific reason for the amendment.

(iii) The type of amendment action such as deletion, correction or addition.

(iv) Copies of evidence supporting the request.

(v) DeCA employees may be required to provide identification to make sure that they are indeed seeking to amend a record pertaining to themselves.

(2) The amendment process is not intended to permit the alteration of evidence presented in the course of judicial or quasi-judicial proceedings. Amendments to these records are made through specific procedures established for the amendment of these records.

(i) Written notification will be provided to the requester within 10 working days of its receipt by the DeCA PA Officer. No notification will be provided to the requester if the action is completed within the 10 days. Only under exceptional circumstances will more than 30 days be required to reach the decision to amend a request. If the decision is to grant all or in part of the request for amendment, the record will be amended and the requester informed and all other offices/personnel known to be keeping the information.

(ii) If the request for amendment is denied in whole or in part, the PA Officer will notify the individual in writing and provide the specific reasons and the procedures for appealing the decision.

(iii) All appeals are to be processed within 30 days. If additional time is required, the requester will be informed and provided when a final decision may be expected.

(e) *Fee assessments.*

(1) DeCA personnel will only be charged the direct cost of copying and reproduction, computed using the appropriate portions of the fee schedule in DeCA Directive 30-12 [6]. Normally, fees are waived automatically if the direct costs of a given request are less than $30. This fee waiver provision does not apply when a waiver has been granted to the individual before, and later requests appear to be an extension or duplication of that original request. Decisions to waive or reduce fees that exceed the automatic waiver threshold will be made on a case-by-case basis. Fees may not be charged when:

(i) Copying is performed for the convenience of the Government or is the only means to make the record available for the individual.

(ii) No reading room is available for the individual to review the record or a copy is made to keep the original in DeCA files.

(iii) The information may be obtained without charge under any other regulation, directive, or statute.

(2) No fees will be collected for search, retrieval, and review of records to determine releasability, copying of records when the individual has not requested a copy, transportation of records and personnel, or normal postage.

§ 327.8 Disclosure of personal information to other agencies and third parties

(a) *Disclosures and nonconsensual disclosures.*

(1) All requests made by DeCA individuals for personal information about other individuals (third parties) will be processed under DeCA Directive 30-12 [7] except when the third party personal information is contained in the Privacy record of the individual making the request.

(2) For the purposes of disclosure and disclosure accounting, the Department of Defense (DoD) is considered a single agency.

(3) Personal information from DeCA systems of records will not be disclosed outside the DoD unless:

(i) The record has been requested by the individual to whom it pertains

(ii) Written consent has been given by the individual to whom the record pertains for release to the requesting agency, activity, or individual, or

(iii) The release is pursuant to one of the specific nonconsensual purposes set forth in the Act.

(4) Records may be disclosed without the consent of a DeCA individual to any DoD official who has need for the record in the performance of their assigned duties. Rank, position, or title alone does not authorize this access. An official need for this information must exist.

(5) DeCA records must be disclosed if their release is required by 32 CFR part 285, which is implemented by DeCA Directive 30-12 [8]. 32 CFR part 285 requires that records be made available to the public unless exempt from disclosure under the FOIA.

(b) *Normally releasable information.* Personal information that is normally releasable without the consent of a DeCA individual that does not imply a clearly unwarranted invasion of personal privacy:

(1) Civilian employees

(i) Name

(ii) Present and past position titles

(iii) Present and past grades

[6] See foonote 3 to § 327.5.

[7] See foonote 3 to § 327.5.

[8] See foonote 3 to § 327.5.

(iv) Present and past salaries
(v) Present and past duty stations
(vi) Office or duty telephone numbers
(2) Military members
(i) Full name
(ii) Rank
(iii) Date of rank
(iv) Gross salary
(v) Past duty assignments
(vi) Present duty assignments
(vii) Future assignments that are officially established
(viii) Office or duty telephone numbers
(ix) Source of commission
(x) Promotion sequence number
(xi) Awards and decorations
(xii) Attendance at professional military schools
(xiii) Duty status at any given time
(3) All disclosures of personal information on civilian employees shall be made in accordance with the Office of Personnel Management (OPM) and all disclosures of personal information on military members shall be made in accordance with the standards established by 32 CFR part 285.
(4) The release of DeCA employees' home addresses and home telephone numbers is considered a clearly unwarranted invasion of personal privacy and is prohibited; however, these may be released without prior consent of the employee if:
(i) The employee has indicated previously that he or she consents to their release,
(ii) The releasing official was requested to release the information under the provisions of 32 CFR part 285.
(5) Before listing home addresses and home telephone numbers in any DeCA telephone directory, give the individuals the opportunity to refuse such a listing.
(c) *Disclosures for established routine uses.*
(1) Records may be disclosed outside of DeCA without consent of the individual to whom they pertain for an established routine use.
(2) A routine use shall:
(i) Be compatible with the purpose for which the record was collected;
(ii) Indicate to whom the record may be released;
(iii) Indicate the uses to which the information may be put by the receiving agency; and
(iv) Have been published previously in the **Federal Register**.
(3) A routine use will be established for each user of the information outside DeCA who need official access to the records. This use may be discontinued or amended without the consent of the individual/s involved. Any routine use that is new or changed is published in the **Federal Register** 30 days before actually disclosing the record. In addition to routine uses established by DeCA individual system notices, blanket routine uses have been established. See Appendix C to this part.
(d) Disclosures without Consent. DeCA records may be disclosed without the consent of the individual to whom they pertain to another agency within or under the control of the U.S. for a civil or criminal law enforcement activity if:
(1) The civil or criminal law enforcement activity is authorized by law (Federal, State, or local); and
(2) The head of the agency or instrumentality (or designee) has made a written request to the Component specifying the particular record or portion desired and the law enforcement activity for which it is sought.
(3) Blanket requests for any and all records pertaining to an individual shall not be honored. The requesting agency or instrumentality must specify each record or portion desired and how each relates to the authorized law enforcement activity.
(4) This disclosure provision applies when the law enforcement agency or instrumentality requests the record. If the DoD Component discloses a record outside the DoD for law enforcement purposes without the individual's consent and without an adequate written request, the disclosure must be pursuant to an established routine use, such as the blanket routine use for law enforcement.
(e) *Disclosures to the public from health care records.*
(1) The following general information may be released to the news media or public concerning a DeCA employee treated or hospitalized in DoD medical facilities and non-Federal facilities for whom the cost of the care is paid by DoD:
(i) Personal information concerning the patient that is provided in section 327.8 and under the provisions of 32 CFR part 285.
(ii) The medical condition such as the date of admission or disposition and the present medical assessment of the individual's condition in the following terms if the medical doctor has volunteered the information:
(A) The individual's condition is presently (stable) (good) (fair) (serious) or (critical) and,
(B) Whether the patient is conscious, semi-conscious or unconscious.
(2) Detailed medical and other personal information may be released on a DeCA employee only if the employee has given consent to the release. If the employee is not conscious or competent, no personal information, except that required by 32 CFR part 285, will be released until there has been enough improvement in the patient's condition for them to give informed consent.
(3) Any item of personal information may be released on a DeCA patient if the patient has given consent to its release.
(4) This part does not limit the disclosure of personal medical information for other government agencies' use in determining eligibility for special assistance or other benefits provided disclosure is pursuant to a routine use.

Appendix A to part 327-Sample DeCA response letter

Mrs. Floria Employee
551 Florida Avenue
Oakland, CA 94618
Dear Mrs. Employee:
This responds to your Privacy Act request dated (enter date of request), in which you requested (describe requested records).
Your request has been referred to our headquarters for further processing. They will respond directly to you. Any questions concerning your request may be made telephonically (enter Privacy Officer's telephone number) or in writing to the following address:
Defense Commissary Agency, Safety, Security, and Administration, Attention: FOIA/PA Officer, Fort Lee, VA 23801-1800.
I trust this information is responsive to your needs.
(Signature block)

Appendix B to part 327-Internal management control review checklist.

(a) *Task:* Personnel and/or Organization Management
(b) *Subtask:* Privacy Act (PA) Program
(c) *Organization:*
(d) *Action officer:*
(e) *Reviewer:*
(f) *Date completed:*
(g) *Assessable unit:* The assessable units are HQ, DeCA, Regions, Central Distribution Centers, Field Operating Activities, and commissaries. Each test question is annotated to indicate which organization(s) is (are) responsible for responding to the question(s). Assessable unit managers responsible for completing this checklist are shown in the DeCA MCP, DeCA Directive 70–2[1].
(h) *Event cycle 1:* Establish and implement a Privacy Act Program

[1] Copies may be obtained: Defense Commissary Agency, ATTN: FOIA/Privacy Officer, 1300 E. Avenue, Fort Lee, VA 23801–1800.

(1) Risk: If prescribed policies, procedures and responsibilities of the Privacy Act Program are not adhered to, sensitive private information on individuals can be given out to individuals.

(2) Control Objectives: The prescribed policies, procedures and responsibilities contained in 5 U.S.C. 552a are followed to protect individual privacy and information release.

(3) Control Techniques: 32 CFR part 310 and DeCA Directive 30–13 [2], Privacy Act Program.

(i) Ensure that a PA program is established and implemented.

(ii) Appoint an individual with PA responsibilities and ensure the designation of appropriate staff to assist.

(4) Test Questions: Explain rationale for YES responses or provide cross-references where rationale can be found. For NO responses, cross-reference to where corrective action plans can be found. If response is NA, explain rationale.

(i) Is a PA program established and implemented in DeCA to encompass procedures for subordinate activities? (DeCA HQ/SA, Region IM). Response: Yes / No / NA. Remarks:

(ii) Is an individual appointed PA responsibilities? (DeCA HQ/SA, Region IM). Response: Yes / No / NA. Remarks:

(iii) Are the current names and office telephone numbers furnished OSD, Privacy Act Office of the PA Officer and the IDA? (DeCA HQ/SA). Response: Yes / No / NA. Remarks:

(iv) Is the annual PA report prepared and forwarded to OSD, Defense Privacy Office? (DeCA HQ/SA). Response: Yes / No / NA. Remarks:

(v) Is PA awareness training/ orientation provided? Is in-depth training provided for personnel involved in the establishment, development, custody, maintenance and use of a system of records? (DeCA HQ/SA, Region). Response: Yes / No / NA. Remarks:

(vi) Is the PA Officer consulted by information systems developers for privacy requirements which need to be included as part of the life cycle management of information consideration in information systems design? (DeCA HQ/SA, Region). Response: Yes / No / NA. Remarks:

(vii) Is each system of records maintained by DeCA supported by a Privacy Act System Notice and has the systems notice been published in the Federal Register? (DeCA HQ/SA). Response: Yes / No / NA. Remarks:

(i) *Event cycle 2:* Processing PA Requests

(1) Risk: Failure to process PA requests correctly could result in privacy information being released which subjects the Department of Defense, DeCA or individuals to criminal penalties.

(2) Control Objective: PA requests are processed correctly

(3) Control Technique:

(i) Ensure PA requests are logged into a formal control system.

(ii) Ensure PA requests are answered promptly and correctly.

(iii) Ensure DeCA records are only withheld when they fall under the general and specific exemptions of 5 U.S.C. 552a and one or more of the nine exemptions under DeCA Directive 30–12 [3], Freedom of Information Act (FOIA) Program.

(iv) Ensure all requests are coordinated through the General Counsel

(v) Ensure all requests are denied by the DeCA IDA.

(vi) Ensure all appeals are forwarded to the Director DeCA or his designee.

(4) Test Questions:

(i) Are PA requests logged into a formal control system? (DeCA HQ/SA, Region IM). Response: Yes / No / NA. Remarks:

(ii) Are individual requests for access acknowledged within 10 working days after receipt? (DeCA HQ/SA, Region IM). Response: Yes / No / NA. Remarks:

(iii) When more than 10 working days are required to respond to a PA request, is the requester informed, explaining the circumstances for the delay and provided an approximate date for completion? (DeCA HQ/SA, Region IM). Response: Yes / No / NA. Remarks:

(iv) Are DeCA records withheld only when they fall under one or more of the general or specific exemptions of the PA or one or more of the nine exemptions of the FOIA? (DeCA HQ/SA, Region IM). Response: Yes / No / NA. Remarks:

(v) Do denial letters contain the name and title or position of the official who made the determination, cite the exemption(s) on which the denial is based and advise the PA requester of their right to appeal the denial to the Director DeCA or designee? (DeCA HQ/SA). Response: Yes / No / NA. Remarks:

(vi) Are PA requests denied only by the HQ DeCA IDA? (All). Response: Yes / No / NA. Remarks:

(vii) Is coordination met with the General Counsel prior to forwarding a PA request to the IDA? (DeCA HQ/SA). Response: Yes / No / NA. Remarks:

(j) *Event cycle 3:* Requesting PA Information

(1) Risk: Obtaining personal information resulting in a violation of the PA.

(2) Control Objective: Establish a system before data collection and storage to ensure no violation of the privacy of individuals.

(3) Control Technique: Ensure Privacy Act Statement to obtain personal information is furnished to individuals before data collection.

(4) Test Questions:

(i) Are all forms used to collect information about individuals which will be part of a system of records staffed with the PA Officer for correctness of the Privacy Act Statement? (DeCA HQ/SA, Region). Response: Yes / No / NA. Remarks:

(ii) Are Privacy Statements prepared and issued for all forms, formats and questionnaires that are subject to the PA, coordinated with the DeCA forms manager? (DeCA HQ/SA, Region). Response: Yes / No / NA. Remarks:

(iii) Do Privacy Act Statements furnished to individuals provide the following:

(A) The authority for the request.

(B) The principal purpose for which the information will be used.

(C) Any routine uses.

(D) The consequences of failing to provide the requested information. Response: Yes / No / NA. Remarks:

(k) *Event cycle 4:* Records Maintenance

(1) Risk: Unprotected records allowing individuals without a need to know access to privacy information

(2) Control Objective: PA records are properly maintained throughout their life cycle

(3) Control Technique: Ensure the prescribed policies and procedures are followed during the life cycle of information.

(4) Test Questions:

(i) Are file cabinets/containers that house PA records locked at all times to prevent unauthorized access? (All). Response: Yes / No / NA. Remarks:

(ii) Are personnel with job requirement (need to know) only allowed access to PA information? (All). Response: Yes / No / NA. Remarks:

(iii) Are privacy act records treated as unclassified records and designated 'For Official Use Only'? (All). Response: Yes / No / NA. Remarks:

(iv) Are computer printouts that contain privacy act information as well as disks, tapes and other media marked 'For Official Use Only'? (All). Response: Yes / No / NA. Remarks:

(v) Is a Systems Manager appointed for each automated/manual PA systems of records? (DeCA HQ/SA, Region). Response: Yes / No / NA. Remarks:

[2] See footnote 1 to this Appendix B.

[3] See footnote 1 to this Appendix B.

(vi) Are PA records maintained and disposed of in accordance with DeCA Directive 30-2 [4], The Defense Commissary Agency Filing System? (All). Response: Yes / No / NA. Remarks:

(l) I attest that the above listed internal controls provide reasonable assurance that DeCA resources are adequately safeguarded. I am satisfied that if the above controls are fully operational, the internal controls for this sub-task throughout DeCA are adequate.

Safety, Security and Administration FUNCTIONAL PROPONENT

I have reviewed this sub-task within my organization and have supplemented the prescribed internal control review checklist when warranted by unique environmental circumstances. The controls prescribed in this checklist, as amended, are in place and operational for my organization (except for the weaknesses described in the attached plan, which includes schedules for correcting the weaknesses).

ASSESSABLE UNIT MANAGER (Signature)

Appendix C to part 327-DeCA Blanket Routine Uses

(a) *Routine Use--Law Enforcement.* If a system of records maintained by a DoD Component, to carry out its functions, indicates a violation or potential violation of law, whether civil, criminal, or regulatory in nature, and whether arising by general statute or by regulation, rule, or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the agency concerned, whether Federal, State, local, or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, rule, regulation, or order issued pursuant thereto.

(b) *Routine Use-Disclosure when Requesting Information.* A record from a system of records maintained by a Component may be disclosed as a routine use to a Federal, State, or local agency maintaining civil, criminal, or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a Component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

(c) *Routine Use--Disclosure of Requested Information.* A record from a system of records maintained by a Component may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

(d) *Routine Use--Congressional Inquiries.* Disclosure from a system of records maintained by a Component may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

(e) *Routine Use--Private Relief Legislation.* Relevant information contained in all systems of records of the Department of Defense published on or before August 22, 1975, will be disclosed to the OMB in connection with the review of private relief legislation as set forth in OMB Circular A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

(f) *Routine Use--Disclosures Required by International Agreements.* A record from a system of records maintained by a Component may be disclosed to foreign law enforcement, security, investigatory, or administrative authorities to comply with requirements imposed by, or to claim rights conferred in, international agreements and arrangements including those regulating the stationing and status in foreign countries of DoD military and civilian personnel.

(g) *Routine Use--Disclosure to State and Local Taxing Authorities.* Any information normally contained in Internal Revenue Service (IRS) Form W-2 which is maintained in a record from a system of records maintained by a Component may be disclosed to State and local taxing authorities with which the Secretary of the Treasury has entered into agreements under 5 U.S.C., sections 5516, 5517, and 5520 and only to those State and local taxing authorities for which an employee or military member is or was subject to tax regardless of whether tax is or was withheld. This routine use is in accordance with Treasury Fiscal Requirements Manual Bulletin No. 76-07.

(h) *Routine Use--Disclosure to the Office of Personnel Management.* A record from a system of records subject to the Privacy Act and maintained by a Component may be disclosed to the Office of Personnel Management (OPM) concerning information on pay and leave, benefits, retirement deduction, and any other information necessary for the OPM to carry out its legally authorized government-wide personnel management functions and studies.

(i) *Routine Use--Disclosure to the Department of Justice for Litigation.* A record from a system of records maintained by this component may be disclosed as a routine use to any component of the Department of Justice for the purpose of representing the Department of Defense, or any officer, employee or member of the Department in pending or potential litigation to which the record is pertinent.

(j) *Routine Use--Disclosure to Military Banking Facilities Overseas.* Information as to current military addresses and assignments may be provided to military banking facilities who provide banking services overseas and who are reimbursed by the Government for certain checking and loan losses. For personnel separated, discharged, or retired from the Armed Forces, information as to last known residential or home of record address may be provided to the military banking facility upon certification by a banking facility officer that the facility has a returned or dishonored check negotiated by the individual or the individual has defaulted on a loan and that if restitution is not made by the individual, the U.S. Government will be liable for the losses the facility may incur.

(k) *Routine Use--Disclosure of Information to the General Services Administration (GSA).* A record from a system of records maintained by this component may be disclosed as a routine use to the General Services Administration (GSA) for the purpose of records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

(l) *Routine Use--Disclosure of Information to the National Archives and Records Administration (NARA).* A record from a system of records maintained by this component may be disclosed as a routine use to the National Archives and Records Administration (NARA) for the purpose of records management inspections conducted under authority of 44 U.S.C. 2904 and 2906.

(m) *Routine Use--Disclosure to the Merit Systems Protection Board.* A record from a system of records maintained by this component may be disclosed as a routine use to the Merit Systems Protection Board, including the Office of the Special Counsel for the purpose of litigation, including

[4] See foonote 2 to this Appendix B.

administrative proceedings, appeals, special studies of the civil service and other merit systems, review of OPM or component rules and regulations, investigation of alleged or possible prohibited personnel practices; including administrative proceedings involving any individual subject of a DoD investigation, and such other functions, promulgated in 5 U.S.C. 1205 and 1206, or as may be authorized by law.

(n) *Routine Use--Counterintelligence Purpose.* A record from a system of records maintained by this component may be disclosed as a routine use outside the DoD or the U.S. Government for the purpose of counterintelligence activities authorized by U.S. Law or Executive Order or for the purpose of enforcing laws which protect the national security of the United States.

Dated: April 3, 2000.

BILLING CODE 5001–10–F

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA231–0227b; FRL–6571–1]

Approval and Promulgation of State Implementation Plans; California State Implementation Plan Revision, Antelope Valley Air Pollution Control District and Mojave Desert Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing revisions to the California State Implementation Plan (SIP) which concern the control of volatile organic compound (VOC) emissions from Automotive Refinishing Operations and Motor Vehicle and Mobile Equipment Coatings Operations.

The intended effect of this action is to regulate emissions of VOCs in accordance with the requirements of the Clean Air Act, as amended in 1990 (CAA or the Act). In the Final Rules Section of this **Federal Register**, the EPA is approving the state's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision and anticipates no adverse comments. A detailed rationale for this approval is set forth in the direct final rule. If no adverse comments are received, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period. Any parties interested in commenting should do so at this time.

DATES: Written comments must be received by May 10, 2000.

ADDRESSES: Comments should be addressed to: Andrew Steckel, Rulemaking Office (AIR–4), Air Division, U.S. Environmental Protection Agency, Region IX, 75 Hawthorne Street, San Francisco, CA 94105–3901.

Copies of the rule revisions and EPA's technical support document for each rule are available for public inspection at EPA's Region 9 office during normal business hours. Copies of the submitted rule revisions are also available for inspection at the following locations:

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 2020 "L" Street, Sacramento, CA 95812;

Antelope Valley Air Pollution Control District, 43301 Division Street, Suite 206, Lancaster, CA 93539–4409;

Mojave Desert Air Quality Management District (formerly San Bernardino County Air Pollution Control District), 15428 Civic Drive, Suite 200, Victorville, CA 92392–2382.

FOR FURTHER INFORMATION CONTACT: Julie Rose, Rulemaking Office, (AIR–4), Air Division, U.S. Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, CA 94105–3901, Telephone: (415) 744–1184.

SUPPLEMENTARY INFORMATION: This document concerns Antelope Valley Air Pollution Control District, Rule 1151, Motor Vehicle and Mobile Equipment Coatings Operations and Mojave Desert Air Quality Management District Rule 1116, Automotive Refinishing Operations. These rules were submitted by the California Air Resources Board to EPA on October 29, 1999 and July 28, 1999, respectively. For further information, please see the information provided in the direct final action that is located in the rules section of this **Federal Register**.

Dated: March 15, 2000.

Felicia Marcus,

Regional Administrator, Region IX.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[GA54–200017; FRL–6574–9]

Approval and Promulgation of Implementation Plans, Georgia: Approval of Revisions for a Transportation Control Measure

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA is proposing to approve revisions to the Georgia State Implementation Plan (SIP) submitted by the State through the Department of Natural Resources on March 29, 2000, requesting incorporation of the Atlantic Steel Transportation Control Measure (TCM) into the SIP.

DATES: Comments on EPA's proposed action must be received on or before May 10, 2000.

ADDRESSES: All comments should be addressed to: Kay T. Prince, Chief, Regulatory Planning Section at the EPA, Region 4 Air Planning Branch, 61 Forsyth Street, SW, Atlanta, Georgia 30303.

Copies of the state submittal(s) are available at the following addresses for inspection during normal business hours:

Environmental Protection Agency, Region 4, Air Planning Branch, 61 Forsyth Street, SW, Atlanta, Georgia 30303–8960. Contact Dr. Robert W. Goodwin at 404/562–9044.

Georgia Department of Natural Resources, Environmental Protection Division, Air Protection Branch, 4244 International Parkway, Suite 136, Atlanta, Georgia 30354. 404/363–7000.

FOR FURTHER INFORMATION CONTACT: Dr. Robert W. Goodwin at 404/562-9044, E-mail: *Goodwin.Robert@epa.gov.* Information regarding Project XL and the Atlantic Steel Final Project Agreement is available via the Internet at the following location: "http://www.epa.gov/ProjectXL".

SUPPLEMENTARY INFORMATION:

I. Background

EPA, with the cooperation of State and local authorities, has initiated Project XL to work with interested companies to develop innovative approaches for addressing environmental issues. Project XL encourages companies and communities to come forward with new approaches that have the potential to advance environmental goals more effectively

and efficiently than have been achieved using traditional regulatory tools.

Atlantis 16th, L.L.C. (hereafter referred to as Jacoby or the developer), a developer in Atlanta, Georgia, has proposed redevelopment of a 138-acre site previously owned by Atlantic Steel near Atlanta's central business district. The proposed redevelopment is a mix of residential and business uses. Project plans include a new 17th Street multi-modal (cars, pedestrians, bicycles, transit linkage) bridge that would cross over and provide access ramps to and from Interstate-75/85 (I–75/85) and connect the site to a nearby Metropolitan Atlanta Rapid Transit Authority (MARTA) rapid rail mass transit station. Jacoby worked intensively with representatives of EPA, the State of Georgia, the City of Atlanta, other local authorities, and public stakeholders to develop a site-specific Project XL Agreement that will allow implementation of the redevelopment. The XL Final Project Agreement was signed September 7, 1999.

A. Why Is Project XL Necessary?

The project site currently suffers from poor accessibility due to the lack of a linkage to and across I–75/85 and to the existing MARTA transit system in Atlanta. Construction of an interchange and multi-modal bridge across I–75/85 at or near 17th Street would improve access to the site. The bridge would also serve as a vital linkage between the Atlantic Steel redevelopment and the MARTA Arts Center station. In addition, construction of the 17th Street bridge was one of the City of Atlanta's zoning requirements for the redevelopment.

Jacoby is participating in Project XL for the Atlantic Steel redevelopment because neither the 17th Street bridge nor the associated I–75/85 access ramps would be able to proceed without the regulatory flexibility being allowed by EPA under Project XL. Atlanta is currently out of compliance with federal transportation conformity requirements because it has not demonstrated that its transportation activities will not exacerbate existing air quality problems or create new air quality problems in the region. The Clean Air Act (CAA) generally prohibits construction of new transportation projects that use federal funds or require federal approval in areas where compliance with conformity requirements has lapsed. However, projects which are approved as Transportation Control Measures (TCMs) in the SIP can proceed—even during a conformity lapse. EPA reviews and takes rulemaking action on proposed revisions to SIPs, including proposed TCMs to be included in SIPs.

B. What Is a TCM?

A TCM is any measure that is specifically identified and committed to in the applicable SIP that is either one of the types listed in section 108 of the CAA, or any other measure for the purpose of reducing emissions or concentrations of air pollutants from transportation sources by reducing vehicle use or changing traffic flow or congestion conditions.

C. What Flexibility Is EPA Granting?

The flexibility Jacoby and the City of Atlanta are seeking through Project XL is to regard the entire redevelopment project, including the 17th Street bridge, as a TCM. The flexibility under Project XL is necessary because the redevelopment likely would not qualify as a TCM in the traditional sense. There are two components to the flexibility.

1. The first part of the flexibility is to consider the entire Atlantic Steel redevelopment to be a TCM. That is, the redevelopment's location, transit linkage, site design, and other transportation elements (*e.g.*, provisions for bicyclists, participation in a transportation management association (TMA)) are viewed together as the TCM. Section 108 of the CAA lists several types of projects that can be TCMs, but its language does not limit TCMs to the measures listed.

2. The second aspect of the flexibility sought under Project XL concerns use of an innovative approach to estimate the air quality benefit of the Atlantic Steel redevelopment. The redevelopment's air quality benefit is estimated relative to an equivalent amount of development at other likely sites in the region. This type of comparison is available only to this particular redevelopment through the Project XL process. The entire Atlantic Steel redevelopment would attract new automobile trips and result in new emissions. Therefore, redevelopment of the site when considered in isolation would not qualify as a TCM in the traditional sense. EPA believes, however, that the Atlanta region will continue to grow, and that redevelopment of the Atlantic Steel site will produce fewer air pollution emissions than an equivalent quantity of development that likely would occur at other potential sites in the region, if the Atlantic Steel redevelopment were not to occur.

D. Why Is This Flexibility Appropriate?

EPA believes the flexibility described above is appropriate for this project because of the combination of unique elements of the site and the redevelopment listed below. In the absence of these elements, EPA would be unlikely to approve this project as a TCM.

1. The site is a brownfield. An accelerated clean-up of the site will occur if this TCM is implemented. The clean-up and redevelopment of the former industrial site aligns with EPA's general efforts to encourage clean-up and reuse of urban brownfields.

2. The site has a regionally central, urban location. Redeveloping this property will result in a shift of growth to Midtown Atlanta from the outer reaches of the metropolitan area. Because of the site's central location, people taking trips to and from the site will be driving shorter average distances than those taking trips to and from a development on the edge of the city. Shorter driving distances will result in fewer emissions.

3. The redevelopment plan includes a linkage to MARTA. This linkage would make it possible for those who work at the site to commute without a car and would serve residents of Atlantic Steel as well as residents of surrounding neighborhoods. In addition, the transit link is valuable for those coming to the site for non-work purposes, such as dining, shopping, and entertainment.

4. The redevelopment plan incorporates many "smart growth" site design principles. These principles include features which promote pedestrian and transit access rather than exclusive reliance on the car. The redevelopment will avoid creating areas that are abandoned and unsafe in the evening, hotels and offices will be within walking distance of shops and restaurants, shops that serve local needs will be within walking distance of both the Atlantic Steel site and the adjacent neighborhoods, and wide sidewalks will encourage walking and retail use. Jacoby has also responded to the adjacent neighborhood's request for public parks, designating public space to central locations rather than relegating it to the edge.

5. The redevelopment plan incorporates many elements that could qualify as TCMs by themselves. In addition to other features, such as the linkage to mass transit, the redevelopment will participate in a TMA. The TMA may participate with the City of Atlanta and Jacoby in monitoring the transportation performance of the redevelopment by collecting travel-related data on an annual basis.

With the exception of the site's accelerated clean-up, all of these elements will have an impact on transportation decisions of people who begin and/or end trips in the Atlantic

Steel site. The combination of the site's location in a central urban area, connection to the existing transit system, design that promotes pedestrian access, participation in a TMA, and provision of bicycle and pedestrian conveniences are expected to work together to reduce growth in auto traffic in the Atlanta region. The redevelopment could demonstrate that the application of smart growth concepts can make a difference in travel patterns. Therefore, EPA is proposing to use the regulatory flexibility under Project XL to approve the Atlantic Steel redevelopment and its associated transportation projects as a TCM.

II. Analysis of State's Submittal

On March 29, 2000, the State of Georgia through the Department of Natural Resources submitted to EPA a request to approve the Atlantic Steel TCM into the SIP. A public hearing on the proposed SIP revision was held on September 30, 1999.

EPA's policy establishes six criteria that a TCM must meet before it can be considered for approval in the SIP. These criteria are contained in the September 1990 report entitled "Transportation Control Measures: State Implementation Plan Guidance." These six criteria are addressed in the following six sections.

A. Complete Description of the Measure and Its Estimated Emissions Reduction Benefits

Current plans for redevelopment of the 138-acre Atlantic Steel site include 1.6 million ft^2 of retail space, 4.0 million ft^2 of office space, 2885 residential units, 1150 hotel rooms, and 1.5 million ft^2 of high tech office space to be built in three phases over approximately ten years. The final site design may change from the current design site provided in the March 29, 2000, submittal, however the SIP revision requires the final site design to meet or exceed certain criteria for overall density, transit-oriented density, activity diversity, and external street connectivity.

The City of Atlanta has established 27 zoning conditions on the Atlantic Steel property that are included as part of the SIP revision, requiring Jacoby to complete certain activities, several of which are related to implementation of the TCM. Relevant conditions include: development and appropriate phasing of residential and non-residential components of the project; development of 17th Street as a mixed use street; construction of bicycle lanes; creation of and maintenance of open space; incorporation of a transit connection to the MARTA Arts Center station from the site; development of a transportation management plan, including support for and participation in a TMA; and the necessity of having the 17th Street bridge under contract for construction before building permits are issued for the site. The SIP revision requires that the zoning conditions apply to the current developer and all subsequent developers of the property. The conditions help ensure that the site design maximizes pedestrian and bicycle connectivity, transit connections, and activity diversity. Before construction occurs, the zoning conditions require Jacoby to submit a site plan to the Bureau of Buildings of the City of Atlanta for approval. The zoning conditions are described in more detail in section II.E below.

A multi-modal bridge will be constructed that will connect the site to Midtown Atlanta and the MARTA Arts Center station on the east side of I–75/85 at or near 17th Street. The SIP revision requires the bridge to be designed to accommodate potential future rail transit, with dedicated transit lanes and adequate widths for dedicated sidewalks and bicycle lanes. The bridge will also include ramps connecting to I–75/85.

The SIP revision requires Jacoby to provide an interim rubber tire shuttle service connecting the Atlantic Steel site with the MARTA Arts Center Station utilizing the multi-modal bridge. The SIP revision requires the service to begin operation immediately after construction of the 17th Street bridge. The SIP revision requires that the duration of this obligation is for ten years from the date that the 17th Street bridge opens to traffic or until an appropriate entity operates a fixed mass transit link providing a similar level of service, whichever occurs first. The SIP revision requires the shuttle to complement the hours of service and headways of fixed transit serving the MARTA Arts Center station, operating on a dedicated transit lane with a projected minimum headway of four minutes and a projected maximum headway of eight minutes, and that it will be designed to reduce the number of single occupant trips made to the site. The SIP revision requires the shuttle to provide the most direct and closest access practicable to the anticipated on-site high-density office building development, and, at a minimum, comply with all requirements of the Americans with Disabilities Act related to operation of a transit system. The shuttle system may consist of electric and alternatively fueled buses.

To estimate the air emissions impacts of the Atlantic Steel TCM, EPA, in consultation with stakeholders including the Federal Highway Administration (FHWA), the Atlanta Regional Commission (ARC), and local citizen's groups, undertook three analyses: Regional transportation and air emissions impacts; local hot spot impacts; and site level travel impacts. The results of these analyses are included in the SIP revision in the May 10, 1999, report entitled "Transportation and Environmental Analysis of the Atlantic Steel Development Proposal." The ARC Interagency Consultation Group, comprised of staff from Federal, state, and local transportation and air quality planning agencies in the Atlanta nonattainment area, approved the modeling methodology EPA used to estimate the emissions benefits of the proposed Atlantic Steel TCM at its February 12, 1999, and May 5, 1999, meetings.

To analyze the transportation and air emissions impacts of locating new development at the Atlantic Steel site, EPA used ARC's regional transportation model and the MOBILE5 emissions factor model to compare the Atlantic Steel site to three other possible development locations for similar-scale development in the Atlanta region. EPA's evaluation of the Atlantic Steel site's impacts is predicated on two assumptions: First, Atlanta will continue to grow over the next 20 years. Second, without redeveloping the 138-acre Atlantic Steel site, more of this growth will locate in outlying areas.

Analysis of regional transportation and air impacts of the proposed Atlantic Steel redevelopment indicates that absorbing a portion of Atlanta's future growth at the Atlantic Steel site would create less travel and fewer emissions than developing likely alternative sites. The study estimates that by the year 2015 the Atlantic Steel redevelopment would generate roughly 0.2–0.3 tons per day fewer emissions of oxides of nitrogen, and 1.1–1.2 tons per day fewer emissions of volatile organic compounds, both precursors to ground-level ozone formation, than comparable developments at other likely sites in the Atlanta region. However, no emissions credit is being claimed by the State of Georgia in the SIP revision for the Atlantic Steel TCM relative to current emissions levels.

EPA analyzed whether additional traffic resulting from the redevelopment of Atlantic Steel would cause carbon monoxide hot spots, *i.e.*, localized levels of carbon monoxide exceeding the National Ambient Air Quality

Standards. The analysis indicates that the redevelopment would create no violations of the standards.

Finally, EPA analyzed the transportation and air emissions impacts of the proposed redevelopment's site design. EPA evaluated three designs for the Atlantic Steel site: The design submitted at the time of the Project XL application by Jacoby; a design commissioned by EPA and created by Duany Plater-Zyberk & Co. (DPZ), a leading town planning firm; and a redesign by Jacoby that incorporates aspects of the DPZ design. The designs differ substantially in ways that affect travel behavior and therefore emissions. Compared to Jacoby's original design, the DPZ design and Jacoby's redesign excel in three areas in particular. First, they improve the mix of uses on-site by integrating them at a finer scale. Second, they provide better connectivity both on- and off-site. Third, the pedestrian environment is improved through street design that includes more direct routing and slower traffic speeds. The current site design is essentially Jacoby's redesign.

In summary, EPA analyzed the impacts of development location and design on regional vehicle miles traveled (VMT) and emissions. EPA found that the most regionally central, most transit-accessible, and most pedestrian-friendly location and site design combinations—those at the Atlantic Steel location—produced the least VMT, emissions, and other environmental impacts. The SIP revision requires the final site design to meet or exceed certain criteria that were derived, in part, from EPA's analysis. The site design criteria help ensure that the redevelopment will contain the high density, mixed use, transit- and pedestrian-friendly components EPA studied.

EPA finds that the City of Atlanta and State of Georgia have met this criterion by providing a complete description of the measure and its estimated emissions reduction benefits.

B. Evidence That the Measure Was Properly Adopted by a Jurisdiction With Legal Authority To Commit to and Execute the Measure

The City of Atlanta is the sponsor of the Atlantic Steel TCM and is responsible for implementing and monitoring the project according to the criteria and schedule in the SIP revision. This commitment is evidenced by a letter contained in the SIP revision dated June 22, 1999, from the Honorable Michael A. Dobbins, Commissioner of Planning, Development, and Neighborhood Conservation for the City of Atlanta, to Mr. Harry West, Executive Director of ARC.

In addition, the SIP revision contains a copy of the resolution approved by the ARC Board on June 23, 1999, in which the proposed Atlantic Steel TCM was adopted as part of the Interim Atlanta Region Transportation Improvement Program, Fiscal Years 2000–2002.

EPA finds that the City of Atlanta and State of Georgia have met this criterion by providing sufficient evidence that the measure was properly adopted by a jurisdiction with legal authority to commit to and execute the measure.

C. Evidence That Funding Has Been (Or Will Be) Obligated To Implement the Measure

Although not a direct transportation/air quality component, remediation of the site is a necessary precondition for development. Presently, the estimated cost of remediation is $10 million, which will be paid by the sellers of the property with funds from the purchase price.

The value of the land after remediation is conservatively estimated at $1 million per acre. Of the 138 acres, 47 acres to the west of I–75/85 are scheduled for right-of-way acquisition. The SIP revision requires that, as appropriate, right-of-way for streets, sidewalks, transit, bicycle lanes and open space will be dedicated by Jacoby without cost. The SIP revision requires Jacoby to provide right-of-way in the development to MARTA or other acceptable entity for the construction of a transit linkage connecting the Atlantic Steel site to the MARTA Arts Center station. The estimated value of the right-of-way dedication is $47 million.

The SIP revision identifies several financing mechanisms available to assist with funding for construction of roads, sidewalks and bicycle lanes. The SIP revision includes an ordinance adopted by the City of Atlanta calling for the collection of Transportation Impact Fees. Fees are based upon a cost per peak hour VMT less property tax credit assessed on an amount of square feet for different building types. Jacoby can request a waiver of impact fees of similar magnitude provided the improvements are made as part of the project. Fees are collected at the time a building permit is issued. Appropriate expenditures of fees include projects that promote pedestrian activity, bicycling, mass transit and other alternatives to automobile transportation. As per the current site plan, Transportation Impact Fees for phase one of the project are approximately $2.8 million. Estimates based upon phase two and phase three development plans are approximately $9.7 million.

An alternative method of financing improvements identified and included in the SIP revision is the Atlantic Steel Brownfield Area and Tax Allocation District Number Two (BATAD#2). The BATAD#2 was approved by the Atlanta City Council on October 4, 1999, and signed by the Mayor of the City of Atlanta on October 5, 1999. The BATAD#2 will issue bonds against anticipated revenues to pay for infrastructure improvements. The BATAD#2 will continue in existence for 25 years. The estimated tax increment base set by the City of Atlanta is $7.5 million. This leverages approximately $75 million.

Current estimates for the construction of roads, sidewalks and sewers to the west of I–75/85 are $15 million; preliminary architectural and engineering costs are estimated to be $12 million. The SIP revision establishes that funding for the various infrastructure improvements associated with redevelopment of the Atlantic Steel site will be achieved through either imposition of Transportation Impact Fees or by the BATAD#2, as described above.

The cost of the 17th Street bridge is estimated to be approximately $53 million, with an additional $25 million to purchase required right-of-way and easement for that area of the project beyond the Atlantic Steel development site. The Georgia Department of Transportation (GDOT) has committed to fund all construction costs (which includes the local matching funds) for the western section of 17th Street starting at the railroad bridge and extending to Northside Drive, the 17th Street bridge interchange, including the bridge ramps, frontage road relocations, associated intersections and approaches for 17th Street at Spring Street and West Peachtree Street, and the possible reconstruction of the 14th Street bridge over I–75/85. GDOT will reserve and assign funding to ARC and provide the local match for construction of the 17th Street bridge. GDOT will also fund utility relocations. In addition, GDOT will place the 17th Street corridor from Northside Drive to Spring Street and West Peachtree Street on the temporary state system. This will enable GDOT to finance the purchase of the required right-of-way and easement for that area of the project beyond the Atlantic Steel development site. These commitments by GDOT are part of the SIP revision and are evidenced by: (1) A letter from GDOT Commissioner Wayne Shackelford to City of Atlanta Commissioner Michael A. Dobbins

dated February 5, 1999; (2) a GDOT interdepartment correspondence from Joseph P. Palladi to Commissioner Wayne Shackelford dated January 31, 2000; and (3) a letter from Commissioner Wayne Shackelford to City of Atlanta Mayor Bill Campbell dated March 7, 2000.

There are also operating costs associated with the development of the TCM. This includes the cost of operating an interim shuttle service to satisfy transit obligations. Exclusive of right-of-way, hard costs associated with the shuttle service are estimated at $2.68 million; annual operations are estimated to be approximately $1.88 million. The SIP revision requires the cost of the shuttle to be borne by Jacoby.

A TMA is to be formed for the Midtown area of the City of Atlanta. The purpose of the TMA is to gather information on performance measures to be submitted to ARC for evaluation of emissions benefits, as well as to manage alternative transportation programs within the Atlantic Steel site. Start-up costs for the TMA are estimated to be $150,000. Annual operating costs will be in the range of $250,000. The SIP revision requires Jacoby to assist with initial financial support for the TMA. As the TMA progresses, participants (i.e. employers, property managers) will pay dues to support the operation of the organization. The TMA may also be funded by the BATAD #2.

Estimated project costs and funding sources identified in the SIP revision are included in Tables 1 through 4 below.

TABLE 1.—ON-SITE TRANSPORTATION INFRASTRUCTURE COST ESTIMATES

Component	Estimate (in millions)	Funding source(s)
Streets, Sidewalks, Transit Lanes (Right of Way)	$40	Developer.
Streets, Sidewalks, Transit Lanes (Construction)	15	BATAD #2 Impact Fees.
Utilities	9	BATAD #2 Impact Fees.
Public Amenities	24	BATAD #2 Impact Fees.
Total	88	

TABLE 2.—17TH STREET BRIDGE COST ESTIMATES

Phase	Estimate (In millions)	Funding source(s)
Right of Way (Off Site)	$25	GDOT, Federal.
Preliminary Engineering and Design	4	Developer.
Construction	53	GDOT, Federal.
Total	82	

TABLE 3.—TRANSIT CAPITAL COST ESTIMATES

Component	Estimate (In millions)	Funding source(s)
Shuttle Stations	$0.52	Developer.
Shuttle Stops	0.36	Developer.
Fleet	1.8	Developer.
Total	2.68	

TABLE 4.—TRANSIT ANNUAL OPERATING COST ESTIMATE

Component	Estimate (in millions)	Funding source
Annual Operating Cost	$1.88	Developer.

EPA finds that the City of Atlanta and State of Georgia have met this criterion by providing sufficient evidence that funding has been (or will be) obligated to implement the measure.

D. Evidence That All Necessary Approvals Have Been Obtained From All Appropriate Government Entities

The Georgia Environmental Protection Division (EPD) finalized approval of the site remediation plan as evidenced by a letter from the Director of EPD, Mr. Harold F. Reheis, to Mr. Jesse J. Webb, Chief Executive Officer of Atlantic Steel Industries, and Mr. Hilburn O. Hillstead, Vice President of Atlantis 16th, L.L.C., dated December 10, 1999.

The City of Atlanta approved the rezoning of the Atlantic Steel property on April 13, 1998. The City approved the Transportation Impact Fees ordinance on June 12, 1994. The City approved the BATAD #2 on October 5, 1999. Fulton County approved the BATAD #2 on November 3, 1999. The Atlanta Board of Education approved the BATAD #2 on December 13, 1999. These approvals are evidenced by copies of the relevant ordinances and the BATAD#2, which are included in the SIP revision.

Implementation of the TCM will require approval of an Interchange Modification Report for the 17th Street bridge and approval of the National Environmental Policy Act document by FHWA. Because Atlanta is currently in a transportation conformity lapse, these approvals cannot take place until EPA approves the Atlantic Steel TCM SIP revision. FHWA is committed to working with all appropriate agencies to approve these documents once this SIP is approved.

EPA finds that the City of Atlanta and State of Georgia have met this criterion by providing sufficient evidence that all necessary approvals have been or will be obtained from all appropriate government entities.

E. Evidence That a Complete Schedule To Plan, Implement, and Enforce the Measure Has Been Adopted by the Implementing Agency or Agencies

The SIP revision contains the TCM implementation schedule listed in Table 5.

TABLE 5.—IMPLEMENTATION SCHEDULE

Timeframe and activity
01/01/2000–12/31/2000:
Complete remediation and infrastructure.
Begin design of bridge.
Begin Phase I vertical development.
01/01/2001–12/31/2001:
Complete bridge design.
Begin bridge construction.
01/01/2002–12/31/2003:
Complete bridge construction.
Complete Phase I vertical development.
Retail—1.2 million ft².
Office—1.0 million ft².
Residential—1,000 units.
Hotel—383 rooms.
High Tech—0.5 million ft².
01/01/2004–12/31/2005:
Complete Phase II vertical development:
Retail—0.3 million ft²—Total: 1.5 million ft².
Office—0.5 million ft²—Total: 1.5 million ft².
Residential—600 units—Total: 1,600 units.
Hotel—192 rooms—Total: 575 rooms.
High Tech—0.5 million ft²—Total: 1.0 million ft².
01/01/2006–build-out[1]:
Complete Phase III vertical development:
Retail—0.1 million ft²—Total: 1.6 million ft².
Office—2.5 million ft²—Total: 4.0 million ft².
Residential—1285 units—Total: 2885 units.
Hotel—575 rooms—Total: 1150 rooms.
High Tech—0.5 million ft²—Total: 1.5 million ft².

[1] The build out projections will vary. These numbers relate to the BATAD#2 projections.

This is a non-traditional TCM. It includes aspects which, if considered alone, may qualify as TCMs and other aspects which would not by themselves qualify as TCMs, but contribute to anticipated air quality benefits through this project. The resulting TCM is complex and requires a non-traditional analysis by EPA. Normally, EPA's review would focus on whether a sponsoring agency of a proposed TCM has sufficient legal authority, procedures and resources to complete a particular project. For a vanpool or high occupancy vehicle lane project, for example, this inquiry is fairly straightforward. For this project, with its overlap of land use, site design, mass transit and pedestrian elements, the inquiry is broadened considerably.

All of the parts of this TCM cannot be accomplished with a single piece of legislation or a single agreement. The City of Atlanta has therefore adopted a multi-faceted approach which has been tailored to accomplish the goal of turning an urban brownfield site into a mixed-use community which encourages and facilitates alternative modes of transportation. The two central pieces of this strategy are the zoning conditions applicable to this site adopted by the City and the creation of the BATAD#2, which allows for the reinvestment of tax revenues from the site to pay for the necessary infrastructure improvements. The following is a discussion of how the BATAD#2 and zoning conditions will allow the City of Atlanta to plan, implement, and enforce the necessary components of this TCM.

At the request of Jacoby, and with the support of the affected neighborhood groups, on April 13, 1998, the City of Atlanta adopted 27 special zoning conditions for the Atlantic Steel site that go beyond the zoning conditions typically adopted by the City. The SIP revision contains evidence that these conditions have been fully adopted by the City. Specific conditions which EPA believes support this project being classified a TCM include the following:

1. Rezone the property to C–4–C (mixed use) classification. By allowing a mix of uses the site design will limit trips as persons who work or live at the site will have retail and entertainment opportunities nearby.

2. The property will be developed in accordance with the "Use Diagram" filed with the City which includes right-of-way for bicycle lanes, sidewalks, mass transit lines and greenspace. It also limits the uses available in certain sensitive areas of the site to help maintain a desirable quality of life for residents.

3. The development will be subject to restrictive covenants which will provide for maintenance of open space areas and architectural control on all buildings through an architectural review board, which will include representatives from neighboring Home Park and Loring Heights. This condition will help provide and keep up greenspace as well as ensure a desirable quality of life for residents and visitors.

4. The developer will work with the City and neighborhood groups to limit cut-through traffic in designated areas by use of cul-de-sacs and traffic calming devices. This condition will promote pedestrian activity.

5. There will be at least seven acres of open space which will include a lake and landscaped areas as indicated in the "Primary Residential" area of the diagram. This condition will help create a pedestrian-friendly atmosphere.

6. Design standards with dimensions for streetscape, pedestrian and bike paths will be implemented as depicted on the drawing and will be installed concurrently with the street system. This condition will help ensure that non-automobile access is prioritized concurrently with road construction.

7. No "at-grade" crossing over the railroad line at Mecaslin Street will be utilized and the developer will not pursue any other crossing of Mecaslin Street north of the railroad line, except to provide a trail link and crossing for bikes and pedestrians. The developer also will construct a 12-feet wide concrete, multi-use trail connection to this crossing from the bike lanes on 17th Street and the multi-use trail. This condition will encourage pedestrian and bicycle activity.

8. The developer will incorporate people movers and other alternative forms of public transportation into its plans, subject to state, local and Federal approvals, including plans for access to the MARTA Arts Center station as well as provision for a rail corridor to the west and use its best efforts to see that such transportation is provided. This condition will contribute to the transit and pedestrian orientation of the project.

9. Only retail shops will be allowed in all buildings facing 17th street in the "Mixed Use" area. This will encourage pedestrian activity by creating a pedestrian friendly atmosphere and destinations for pedestrians.

10. The developer will use best efforts to ensure that development is phased so that proposed residential is completed before or concurrently with proposed retail/commercial. This will help ensure development of the mixed-use attributes of the site, which relates to the pedestrian orientation of the project.

11. Primary pedestrian entrances shall face public sidewalks. This condition will enhance the pedestrian friendly design of the site.

12. In the 17th Street "Mixed Use" area, no parking or driveways shall be permitted between any building and the sidewalk (with the exception of parking

garages and hotels with circular driveways). This condition will enhance the pedestrian friendly design of the site.

13. In the 17th Street "Mixed Use" area, curb cuts will be limited to one per building (except for parking garages and hotels, which may have two). This condition will enhance the pedestrian friendly design of the site.

14. In the 17th Street "Mixed Use" area, buildings shall be set back no more than 25 feet from edge of the curb, except to provide public plazas, greenspace or pedestrian space. This condition will enhance the pedestrian friendly design of the site.

15. No temporary or permanent Certificates of Occupancy will be provided by the city until the Bureau of Buildings certifies that entire landscape plan for that phase of the development has been fully implemented. This condition will help ensure that landscape, pedestrian and greenspace designs receive priority from the developer.

16. All proposed pedestrian and open space improvements must be fully implemented for that phase of development before any temporary or permanent Certificates of Occupancy shall be issued. This condition will help ensure that landscape, pedestrian and greenspace designs receive priority from the developer.

17. The Bureau of Buildings shall not issue a building permit until such time as the applicant has submitted a Transportation Management Plan for all non-residential components. This condition is designed to ensure that an important focus of the development remains consideration of pedestrians and mass transit.

18. The developer is required to meet with the local neighborhood planning unit on an annual basis to report on the status of the project. This condition will help ensure that the developer stays in communication with affected residents and gives the public an opportunity to stay involved and monitor progress at the site.

The City of Atlanta has the legal authority to enact, implement and enforce the zoning conditions described above. Further, affected citizens and businesses also have standing under Georgia law to bring a lawsuit and enforce specific zoning conditions, provided they can meet the standing requirements. By proposing this project as a TCM , adopting these zoning conditions, and by committing to implement this project as part of the SIP revision, the City of Atlanta is demonstrating that it is willing to implement and enforce the necessary measures to complete this project.

The City of Atlanta's commitment to this project is also evident by the creation of the BATAD#2. The BATAD#2, created pursuant to Georgia law, allows Atlanta to commit anticipated public tax revenues to the necessary infrastructure improvements to accomplish the goals set forth in the proposed Redevelopment Plan by the City for the site. The City will contract with the Atlanta Development Authority to serve as the City's "Redevelopment Agent" responsible for implementing the proposed Redevelopment Plan. An important consideration for EPA in analyzing a TCM proposal includes whether or not there is sufficient financial support to implement the project as well as whether there is sufficient political means to complete a project. By creating the BATAD#2, Atlanta ensures that not only will there be sufficient funds and an enforcement mechanism for them, but the BATAD#2 also contributes additional mechanisms for assisting the implementation of mass transit and pedestrian orientation at the site.

The BATAD#2 will provide funding for the construction and maintenance of sidewalks, bike-paths, open space and other quality of life attributes of the site. Jacoby will donate the right-of-way for streets, sidewalks, bike-lanes and open space consistent with the Site Plan filed under the zoning conditions. The BATAD#2 will then ensure that funding is available for transportation and other important infrastructure improvements such as waste and stormwater controls.

The BATAD#2 will be able to provide some funding for the study and implementation of mass transit service to the Atlantic Steel site and connectivity to existing MARTA rail (i.e, contribute towards a local match for securing federal transit support). As with sidewalks, bike-paths and roads, Jacoby will donate the right-of-way to either the City or MARTA (or another suitable entity) to ensure that land acquisition of the necessary right-of-way is not an impediment to the success of the transit/pedestrian orientation of the site.

The BATAD#2 will provide the City with the financial wherewithal to coordinate development activities at the site with the various stakeholders, most important, the residents, neighbors and business owners in the area. The BATAD#2 may also provide the necessary funding for the creation of a TMA for the area. A TMA can play a crucial role in developing and implementing methods to reduce congestion, VMT and unnecessary automobile trips.

Despite the non-traditional aspects of this TCM, it is still subject to the same enforceability considerations and constraints applicable to any TCM as required by the Clean Air Act and its implementing regulations. Control measures adopted into a SIP are enforceable by EPA pursuant to section 113 of the CAA (42 U.S.C. 7413). That section provides for the assessment by the Administrator of civil penalties of up to $27,500 per day per violation against a person who has violated any requirement or prohibition of an applicable implementation plan. An "applicable implementation plan" is defined as that portion of a state implementation plan, which has been approved by the Administrator. (CAA Section 302(q) (42 U.S.C. 7602(q)). Once the SIP revision is approved by the EPA, it becomes part of the State's "applicable implementation plan" or SIP, and enforceable by EPA as well as by the State. Violations of SIP measures relating to TCMs are also enforceable by citizen suit under section 304(a)(1) and (f)(3).

Given the extraordinary zoning conditions placed on the site, and the creation of the BATAD#2 with the specific objective of providing the necessary funding for requisite infrastructure improvements, EPA finds that the City of Atlanta and State of Georgia have met this criterion by providing sufficient evidence that a schedule to plan, implement, and enforce the measure has been adopted by the City.

F. Description of the Monitoring Program To Assess the Measure's Effectiveness and To Allow for Necessary In-Place Corrections or Alterations

The implementation and performance of the Atlantic Steel TCM will be monitored in accordance with the following seven main components:

1. The City of Atlanta has established zoning conditions on the Atlantic Steel property that require the project developer to complete certain activities that are also related to implementation of the TCM. (See section II.E above.) Compliance with zoning conditions is enforceable by law.

2. The SIP revision requires that the 17th Street bridge must be designed as a multi-modal facility that will provide a connection to the MARTA Arts Center station, accommodate future rail transit, and provide adequate widths dedicated for sidewalks and bicycle lanes. The SIP revision requires GDOT to ensure that the bridge will not be constructed

without these elements. In addition, there are a number of design-specific measures that will be considered in the next phase of bridge and intersection design to ensure that bicycle and pedestrian needs are met. These include: construction of narrower lanes to shorten the length of the intersection crossing; develop wider medians to provide islands; consideration of prioritized signal timing for pedestrians; use of special surface treatments for cross walks; consideration of elimination of turn lanes; and consideration of phased construction of 17th Street to provide for optimal pedestrian improvements. The SIP revision requires the City of Atlanta and GDOT to commit to work with affected stakeholders of the project to ensure that pedestrian needs are considered and a continuous flow of pedestrian movement is maintained in the design of roadways and intersections connecting the 17th Street bridge into Midtown Atlanta.

3. The SIP revision requires Jacoby to submit copies of the site plan, with revisions, to the City of Atlanta, ARC, EPD, and EPA Region 4 annually after the 17th Street bridge opens to traffic until the project is built-out. The SIP revision requires that when the project reaches two thirds build-out or after six years from the date that the bridge opens to traffic, whichever comes first, the site design will be compared to the four site design criteria targets listed in Table 6. The site design criteria will be evaluated consistent with the definitions and methodologies contained in the EPA report entitled "Transportation and Environmental Analysis of the Atlantic Steel Development Proposal," dated May 10, 1999. The comparison will evaluate whether the site meets or will meet the criteria. If the site design at this time does not meet or exceed the target values in Table 6, Jacoby must submit and receive approval from the City of Atlanta, ARC, EPD, and EPA for a revised final site plan that does. Project build-out is defined as the amount of development allowed under the conditions of zoning for the Atlantic Steel project.

TABLE 6.—ATLANTIC STEEL TCM SITE DESIGN CRITERIA

Criterion	Description	Target value
Overall density	Total number of residents + employees on site	≥12,000
Transit-oriented density [1]	Total number of residents + employees per net acre within ¼-mile of an on-site transit stop.	≥180
Activity diversity	Percent of blocks with mixed uses [2]	≥33
External street connectivity	Average distance (in feet) between site ingress/egress streets.	≤1,000—unless the City of Atlanta specifies otherwise [3]

[1] Transit-oriented density around any individual transit stop may vary significantly, but the average density around all transit stops must be equal to or greater than 180 people per net acre within ¼ mile of the stop. This measure only includes on-site acreage.

[2] Percent of blocks with mixed use. A block is defined traditionally by the area contained within streets. Classification of uses will be according to major Standard Industrial Classification codes.

[3] This is calculated by dividing the length of the site's perimeter in feet by the number of ingress/egress streets. It is possible that the City of Atlanta would prevent connectivity of some streets or close access to some streets after they are built at the request of adjacent neighborhoods. Because this would be beyond the control of developers of the Atlantic Steel property, if such an event occurs, the target value is no longer effective.

4. The SIP revision requires that the TCM be monitored annually, beginning in the year following the opening of the 17th Street bridge to traffic and biennially after the project has reached two-thirds build-out. As part of the monitoring effort, the City of Atlanta will be responsible for collecting and maintaining the following data, at a minimum:

a. Average daily VMT per resident;

b. Average daily VMT per employee working at the site;

c. The percent of all combined trips made to, from and on the site by residents and employees in modes other than single occupancy vehicles (modal splits); and

d. Origin and destination data for trips made to, from and on the site by residents and employees.

The SIP revision requires the City of Atlanta and Jacoby, through a contractor or through the TMA, to develop a plan for data collection and submit it to ARC, EPD, and EPA Region 4 for approval prior to opening of the 17th Street bridge to traffic. The SIP revision specifies that data collection will continue until ten years following redesignation by EPA of the Atlanta area to attainment under the National Ambient Air Quality Standards for ozone. The SIP revision requires that the data be evaluated consistent with the definitions and methodologies contained in the EPA report entitled "Transportation and Environmental Analysis of the Atlantic Steel Development Proposal," dated May 10, 1999. ARC will be responsible for deriving mobile source emissions obtained from the data. At any time, the City of Atlanta may choose to solicit other transportation information such as travel cost and transit patronage that are beneficial for devising strategies to reduce VMT and single occupancy automobile travel.

This data collection requirement may necessitate that EPA submit an Information Collection Request (ICR) to the Office of Management and Budget. EPA will submit the ICR at a later date. Until EPA receives approval of the ICR, any component of the monitoring of this TCM that requires a survey of ten or more people may not be enforceable.

5. The SIP revision requires that at two, three and a half, and five years after the 17th Street bridge opens to traffic, the City of Atlanta, EPD, and EPA Region 4 will compare the observed average daily VMT per resident, the observed average daily VMT per employee working at the site, and the observed percent of all combined trips made to, from and on the site by residents and employees in modes other than single occupancy vehicles with ARC's most recent estimates of the regional (Atlanta 13-county nonattainment area) averages for these measures. If either of the observed VMT measures for the site is greater than or equal to the corresponding regional average, or if the observed mode split for the site is less than or equal to the regional average, then Jacoby will identify funding or fund the creation of a TMA for a period of twenty years from the applicable date, if employers and property managers are not participating in a TMA at that time. (The SIP revision requires that employers on the Atlantic Steel site participate in a TMA and that Jacoby assist with initial financial support for the TMA.) The TMA will consult with the City of Atlanta concerning implementation of additional alternative

transportation programs that achieve the performance standards stipulated in Table 7. The SIP revision requires the City of Atlanta to ensure that these programs will be developed and implemented, as appropriate, by the TMA.

TABLE 7.—ATLANTIC STEEL TCM PERFORMANCE MEASURES

Performance measure	Description	Target value
VMT per resident	Average daily VMT for all trips made by residents of the site.	≤27.
VMT per employee	Average daily VMT for trips to and from work for employees working on site.	≤11.
Mode Split	Percent of all trips to, from and on the site made by residents and employees combined, using non-SOV modes.	≥25.

6. The SIP revision requires that starting at six years after the 17th Street bridge opens to traffic or at two-thirds build-out, whichever occurs first, and at any time thereafter, if the site is not meeting or exceeding the performance targets contained in Table 7, Jacoby will identify funding or fund the creation of a TMA for a period of twenty years from the applicable date, if employers and property managers are not participating in a TMA at that time. (The SIP revision requires that employers on the Atlantic Steel site participate in a TMA and that Jacoby assist with initial financial support for the TMA.) The SIP revision requires the TMA to consult with the City of Atlanta concerning implementation of additional alternative transportation programs that achieve the performance standards stipulated in Table 7. The SIP revision requires the City of Atlanta to ensure that these programs will be developed and implemented, as appropriate, by the TMA. Examples of suggested programs are:

a. Transit discounts for on-site employees.

b. Increased provision of shuttle bus service or other transit service.

c. Increased parking rates, by time-of-day, by facility, and by parking type, as needed.

d. Reduction of available parking facilities or spaces.

e. Carpool/vanpool matching services.

f. Providing free or highly discounted annual regional transit passes with each residential unit (included in leases and property covenants).

g. Addition of traffic calming measures, such as raised pedestrian crosswalks, sidewalk bump-outs, diagonal on-street parking, or pedestrian islands.

h. Provisions and support for neighborhood car rental, car sharing systems, and real-time ridesharing services for residents and visitors.

i. Provision of additional facilities and amenities for non-SOV users such as bus shelters, bike racks and lockers, sidewalks, bike paths, park-and-ride facilities, telephones at shelters, newsstands, convenience retail, and daycare facilities.

j. Provision of guidance for telecommuting and alternative work schedules.

k. Employee Commuter Choice incentives—employees would be given the opportunity to purchase employer-discounted transit passes and vanpool benefits using pre-tax dollars.

EPA finds that the City of Atlanta and State of Georgia have met this criterion by providing sufficient evidence that a monitoring program to assess the measure's effectiveness and to allow for necessary in-place corrections or alterations has been included in the TCM.

III. Proposed Action

EPA finds that the Atlantic Steel TCM SIP revision satisfies EPA's six TCM criteria, and therefore EPA is proposing approval of the aforementioned changes to the Georgia SIP.

IV. Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. This action merely proposes to approve state law as meeting federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule proposes to approve pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). For the same reason, this rule also does not significantly or uniquely affect the communities of tribal governments, as specified by Executive Order 13084 (63 FR 27655, May 10, 1998). This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely approves a state rule implementing a federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This rule also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. As required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996), in issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct. EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of

Unanticipated Takings" issued under the executive order. The data collection requirement may necessitate that EPA submit an ICR to the Office of Management and Budget. EPA will submit the ICR at a later date. Until EPA receives approval of the ICR, any component of the monitoring of a TCM that requires a survey of ten or more people may not be enforceable.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 62

[AL52–200014; FRL–6568–5]

Approval and Promulgation of State Plans for Designated Facilities and Pollutants: Alabama

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is approving the Section 111(d) Plan for the State of Alabama submitted by the Alabama Department of Environmental Management (ADEM) on April 20, 1999, for implementing and enforcing the Emissions Guidelines applicable to existing Hospital/Medical/Infectious Waste Incinerators. The Plan was submitted by the ADEM to satisfy certain Federal Clean Air Act requirements. In the Final Rules Section of this **Federal Register**, EPA is approving the Alabama State Plan submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates that it will not receive any significant, material, and adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no significant, material, and adverse comments are received in response to this rule, no further activity is contemplated in relation to this proposed rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period on this action.

DATES: Comments must be received in writing by May 10, 2000.

ADDRESSES: Written comments should be addressed to Kimberly Bingham at the EPA Regional Office listed below. Copies of the documents relevant to this rule are available for public inspection during normal business hours at the following locations. The interested persons wanting to examine these documents should make an appointment with the appropriate office at least 24 hours before the day of the visit.

Environmental Protection Agency, Region 4, Air Planning Branch, 61 Forsyth Street, SW, Atlanta, Georgia 30303–3014. Ms. Bingham can be reached at (404) 562–9038 and Bingham.Kimberly@epa.gov.

Alabama Department of Environmental Management, Air Division, 1751 Congressman W.L. Dickinson Drive, Montgomery, Alabama 36109.

FOR FURTHER INFORMATION CONTACT: Kimberly Bingham at (404) 562–9038 or Scott Davis at (404) 562–9127.

SUPPLEMENTARY INFORMATION: See the information provided in the Direct Final action which is located in the Rules Section of this **Federal Register**.

Dated: March 16, 2000.

A. Stanley Meiburg,

Acting Regional Administrator, Region 4.

[FRL–6572–3]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List

AGENCY: Environmental Protection Agency.

ACTION: Proposed deletion of the Upper Deerfield Township Sanitary Landfill Superfund Site from the National Priorities List.

SUMMARY: The Environmental Protection Agency (EPA), Region II Office proposes to delete the Upper Deerfield Township Sanitary Landfill Superfund Site (Site), which is located in Upper Deerfield Township, Cumberland County, New Jersey, from the National Priorities List (NPL) and requests public comment on this action. The NPL constitutes appendix B of 40 CFR part 300, which is the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) as amended. EPA and the New Jersey Department of Environmental Protection have determined that the Site poses no significant threat to public health or the environment, as defined by CERCLA; and therefore, further remedial measures pursuant to CERCLA are not appropriate.

We are publishing a direct final action along with this proposed deletion without a prior proposal because the Agency views this as a noncontroversial revision and anticipates no significant adverse or critical comments. A detailed rationale for this approval is set forth in the direct final rule. If no significant adverse or critical comments are received, no further activity is contemplated. If EPA receives significant adverse or critical comments, the direct final action will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period. Any parties interested in commenting should do so at this time.

DATES: Comments concerning this action must be received by May 10, 2000.

ADDRESSES: Comments may be mailed to: Diego M. Garcia, Remedial Project Manager, Emergency and Remedial Response Division, U.S. Environmental Protection Agency, Region II, 290 Broadway, 19th Floor, New York, New York 10007–1866.

Comprehensive information on this Site is available for viewing at the Upper Deerfield Township Sanitary Landfill Superfund Site information repositories at the following locations: Upper Deerfield Municipal Building, Administrative Office, Building 1325, State Highway 77, Seabrook, New Jersey 08302, (609) 329–4000, and, U.S. EPA Records Center, 290 Broadway, Room 1828, New York, New York 10007–1866,Hours: 9 AM to 5 PM, Monday through Friday. Contact: Superfund Records Center, (212) 637–4308

[Docket No. MARAD–2000–7147]

RIN 2133–AB41

Appeal Procedures for Determinations Concerning Compliance With Service Obligations, Deferments, and Waivers

AGENCY: Maritime Administration, Transportation.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The Maritime Administration (MARAD) is soliciting public comment on proposed revisions to the procedures for reviewing: Determinations that a student or graduate of the U. S. Merchant Marine Academy (USMMA) or a State maritime academy that receives student incentive payments has breached the service obligation; denials of requests for deferment of the service obligation; and denials of requests for waivers of the service obligation contract. Currently, the regulations call for review by a panel composed of a representative of MARAD and representatives from the Department of the Navy, the National Oceanographic and Atmospheric Administration (NOAA), and the United States Coast Guard. The proposed revisions provide for an appeal to the Maritime Administrator, the head of the agency, rather than review by the panel. The intended effect of this regulation is to streamline the process of reaching a final agency decision and allow for timely action on requests for review.

DATES: You should submit your comments early enough to ensure that Docket Management receives them not later than May 10, 2000. Comments filed late will be considered to the extent practicable.

ADDRESSES: Comments should refer to docket number MARAD–2000–7147. Written comments may be submitted by hand or mail to the Docket Management Facility, U.S. DOT Dockets, Room PL–401, Department of Transportation, 400 7th St., SW., Washington, DC 20590–0001. You may also send comments electronically via the Internet at http://dmses.dot.gov/submit. All comments will become part of this docket and will be available for inspection and copying at the above address between 10 a.m. and 5 p.m., E.T., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available on the World Wide Web at http://dms.dot.gov.

FOR FURTHER INFORMATION CONTACT: Jay Gordon of the Office of Chief Counsel at (202) 366–5191. You may send mail to Jay Gordon, Maritime Administration, Office of Chief Counsel, Room 7228, MAR–226, 400 7th St., SW, Washington, DC, 20590–0001, or you may send e-mail to jay.gordon@marad.dot.gov.

SUPPLEMENTARY INFORMATION:

Who May File Comments?

Anyone may file written comments about proposals made in any rulemaking document that requests public comments, including, but not limited to, any state government agency, any political subdivision of a State, or any person.

How Do I Prepare and Submit Comments?

To ensure that your comments are correctly filed in the Docket, please include the docket number of this NPRM in your comments. In addition, your comments must be written in English.

We encourage you to write your primary comments in a concise fashion. You may, however, attach necessary additional documents to your comments. There is no limit on the length of the attachments. Please submit two copies of your comments, including the attachments, to the Docket Management Facility at the address given above under **ADDRESSES.** If possible, one copy should be in an unbound format to facilitate copying and electronic filing.

How Can I Be Sure That My Comments Were Received?

If you want Docket Management to notify you upon its receipt of your comments, enclose a self-addressed, stamped postcard in the envelope containing your comments. Upon receiving your comments, Docket Management will return the postcard by mail. If you send comments by e-mail, you will receive a message by e-mail confirming receipt of your comments. Your e-mail address should be noted with your comments.

Is Information That I Submit to MARAD Made Available to the Public?

When you submit information to us as part of this NPRM, during any rulemaking proceeding, or for any other reason, we may make that information publicly available unless you ask that we keep the information confidential. If you wish to submit any information under a claim of confidentiality, you should submit three copies of your complete submission, including the information you claim to be confidential business information, to the Chief Counsel, Maritime Administration, at the address given above under **FOR FURTHER INFORMATION CONTACT** You should mark "CONFIDENTIAL" on each page of the original document that you would like to keep confidential.

In addition, you should submit two copies, from which you have deleted the claimed confidential business information, to the Docket Management Facility at the address given above under **ADDRESSES.** When you send comments containing information claimed to be confidential business information, you should also include a cover letter setting forth with specificity the basis for any such claim (for example, it is exempt from mandatory public disclosure under the Freedom of Information Act, 5 U.S.C. 552).

We will decide whether or not to treat your information as confidential. You will be notified in writing of our decision to grant or deny confidentiality before the information is publicly disclosed and you will be given an opportunity to respond.

How Can I Read the Comments Submitted by Other People?

You may read the comments received by the Docket Management Facility at the address and during the hours provided above under **ADDRESSES.**

Comments may also be viewed on the Internet. To read the comments on the Internet, take the following steps: Go to the Docket Management System ("DMS") Web page of the Department of Transportation (http://dms.dot.gov). On that page, click on "search." On the next page (http://dms.dot.gov/search), type in the four-digit docket number shown on the first page of this document. The docket number for this NPRM is 7147. After typing the docket number, click on "search." On the next page, which contains docket summary information for the docket you selected, click on the desired comments. You may download the comments.

Please note that even after the comment closing date, we will continue to file relevant information in the Docket as it becomes available. Accordingly, we recommend that you periodically check the Docket for new material.

Background

Since 1980, each individual U.S. citizen who enters the USMMA and each student at a State maritime academy who receives Federal student incentive payments is required pursuant to statute (46 U.S.C. App. 1295b(e) and 1295c(g)) to sign an agreement committing: (A) To complete the course of instruction at the relevant academy, unless the individual is separated by such institution; (B) to fulfill the requirements for a license as an officer in the merchant marine of the United States on or before the date of graduation from the USMMA or, if a student incentive payment recipient, to take the examination for a license as an officer in the merchant marine of the United States on or before the date of graduation and to fulfill the requirements for such a license not later than 3 months after the date of graduation from a State maritime academy; (C) to maintain a license as an officer in the merchant marine of the United States for at least 6 years following the date of graduation from the relevant academy; (D) to apply for an appointment as, to accept if tendered an appointment as, and to serve as a commissioned officer in the United States Naval Reserve (including the Merchant Marine Reserve, United States Naval Reserve), the United States Coast Guard Reserve, or any other Reserve unit of an armed force of the United States, for at least 6 years following the date of graduation from the relevant academy; (E) to serve the foreign and domestic commerce and the national defense of the United States for at least 5 years following the date of graduation from the USMMA or for at least 3 years following the date of graduation from a State maritime academy; and (F) to report to the Maritime Administrator on the compliance by the individual. If the official designated by the Maritime Administrator determines that the individual has breached the service obligation contract, denies a request for a deferment of the service obligation, or denies a request for a waiver of the service obligation contract, the individual may seek review of that determination(s).

Currently, review of said determination(s) is by a panel composed of a representative of MARAD and representatives from the Department of the Navy, the National Oceanographic and Atmospheric Administration, and the United States Coast Guard. There is no standing panel and, when requested in writing by the individual, the panel must be convened on an ad hoc basis. These revisions would remove the panel as the reviewing authority and provide for direct appeal to the Maritime Administrator, the head of MARAD. These revisions are designed to streamline the process of reaching a final agency decision and allow for timely review of the decisions of the designated official. It also recognizes that the fundamental concerns involved in breach determinations and waiver and deferment decisions are central to the statutory purposes of the authority and responsibility of MARAD to operate the USMMA and administer the program for incentive payments to students at State maritime academies. These programmatic concerns do not necessarily involve areas of concern to organizations, such as NOAA and the United States Coast Guard, currently designated to sit on the panel.

This NPRM is being published with an abbreviated comment period of 30 days because the proposed amendments are limited to procedural changes, affect a relatively small segment of the public, and are not technical or complex.

Rulemaking Analyses and Notices

Executive Order 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

This rulemaking has been reviewed under Executive Order 12866, and it has been determined that this is not a significant regulatory action. The rule is not likely to result in an annual effect on the economy of $100 million or more. Also, it has been determined to be a nonsignificant rule under the Department's Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Because the economic impact, if any, should be minimal, further regulatory evaluation is not necessary. These amendments are intended only to simplify and clarify the procedural requirements for appeals of determinations concerning breaches of service obligations, deferments, and waivers.

Federalism

We analyzed this rulemaking in accordance with the principles and criteria contained in E.O. 13132 ("Federalism") and have determined that it does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement. The regulations have no substantial effects on the States, or on the current Federal-State relationship, or on the current distribution of power and responsibilities among the various local officials. Therefore, consultation with State and local officials was not necessary.

Executive Order 13084

The Maritime Administration does not believe that the revised regulations evolving from this NPRM will significantly or uniquely affect the communities of Indian tribal governments when analyzed under the principles and criteria contained in Executive Order 13084 ("Consultation and Coordination with Indian Tribal Governments"). Therefore, the funding and consultation requirements of this Executive Order would not apply. Nevertheless, this NPRM specifically requests comments from affected persons, including Indian tribal governments, as to its potential impact.

Regulatory Flexibility Act

The Maritime Administration certifies that this rulemaking will not have a significant economic impact on a substantial number of small entities. This NPRM only proposes new procedural rules for students and graduates of the USMMA or State maritime academies to appeal determinations regarding breaches of service obligations, deferments, and waivers.

Environmental Impact Statement

We have analyzed this NPRM for purposes of compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) and have concluded that under the categorical exclusions provision in section 4.05 of Maritime Administrative Order ("MAO") 600–1, "Procedures for Considering Environmental Impacts," 50 FR 11606 (March 22, 1985), the preparation of an Environmental Assessment, and an Environmental Impact Statement, or a Finding of No Significant Impact for this rulemaking is not required. This rulemaking involves administrative and procedural regulations that have no environmental impact.

Paperwork Reduction Act

This rulemaking contains no reporting requirement that is subject to OMB approval under 5 CFR part 1320, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Regulation Identifier Number (RIN)

The Department of Transportation assigns a regulation identifier number (RIN) to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. You may use the RIN contained in the heading of this document to cross-reference this action with the Unified Agenda.

Unfunded Mandates Reform Act of 1995

This proposed rule would not impose an unfunded mandate under the Unfunded Mandates Reform Act of 1995. It would not result in costs of $100 million or more, in the aggregate, to any of the following: State, local, or Native American tribal governments, or the private sector. This proposed rule is the least burdensome alternative that achieves the objective of the rule.

List of Subjects 46 CFR Part 310

Grant programs—education, Reporting and recordkeeping requirements, Schools, Seamen.

Accordingly, MARAD proposes to amend 46 CFR Part 310 as follows:

PART 310—MERCHANT MARINE TRAINING

1. The authority citation for Part 310 continues to read as follows:

Authority: 46 App. U.S.C. 1295; 49 CFR 1.66.

2. Section 310.7 is amended by revising paragraph (b)(10) heading paragraph (b)(10)(ii), paragraph (b)(10)(iii) and adding a new paragraph (b)(10)(iv) to read as follows:

§ 310.7 Federal student subsistence allowances and student incentive payments.

* * * * *

(b) * * *

(10) *Determination of compliance with service obligation contract; deferment; waiver; and appeal procedures.*

* * * * *

(ii)(A) If a student or graduate disagrees with the decision of the designated official, the student or graduate may appeal that decision to the Maritime Administrator. The appeal shall set forth all the legal and factual grounds on which the student or graduate bases the appeal. Any grounds not set forth in the appeal are waived.

(B) Appeals must be filed with the Maritime Administrator within 30 calendar days of the date of receipt by such student or graduate of the written decision of the designated official. Appeals must be filed at the Office of the Secretary, Maritime Administration, Room 7210, 400 7th St., SW., Washington, DC 20590. Each decision will include a notice of appeal rights.

(C) A decision is deemed to be received by a student or graduate five (5) working days after the date it is mailed by first class mail, postage prepaid, to the address for such student or graduate listed with the Office of Maritime Labor, Training, and Safety. It is the responsibility of such student or graduate to insure that their current mailing address is on file with the Office of Maritime Labor, Training, and Safety, Room 7302, 400 7th St., SW., Washington, DC 20590.

(D) If the appeal is sent by conventional mail (through the United States Postal Service), the date of filing is determined by the postmark date. If no legible postmark date appears on the mailing, the appeal is deemed to be filed five (5) working days before the date of its receipt in the Office of the Secretary. If delivered by other than the United States Postal Service, an appeal is filed with the Maritime Administrator on the date it is physically delivered to the Office of the Secretary at the address referenced in paragraph (b)(10)(ii)(B) of this section. The date of filing by commercial delivery (not United States Postal Service) is the date it is received at the address for the Office of the Secretary set forth in paragraph (b)(10)(ii)(B) of this section. Appeals may not be submitted by facsimile or by electronic mail. Requests for extension of the time to file an appeal may be submitted by facsimile or electronic mail to the Office of the Secretary. Requests for extension of time do not stop or toll the running of the time for filing an appeal. Appeals may only be filed after the deadline if the Maritime Administrator or his designee, in their sole discretion, grants an extension.

(E) In computing the number of days, the first day counted is the day after the event from which the time period begins to run. If the date that ordinarily would be the last day for filing falls on a Saturday, Sunday, or Federal holiday, the filing period will include the first workday after that date.

Example to paragraph (b) (10) (ii)(E): If a graduate receives a decision on July 1, the 30-day period for filing an appeal starts to run on July 2. The appeal would ordinarily be timely only if postmarked on or physically delivered by July 31. If July 31 is a Saturday, however, the last day for obtaining a postmark by mailing or physical delivery would be Monday, August 2.

(iii) The Maritime Administrator shall issue a written decision for each timely appeal. This decision constitutes final agency action.

(iv) If a student or graduate fails to appeal within the time set forth in paragraph (b)(10)(ii) of this section, the decision of the designated official shall be final and constitute final agency action.

3. Section 310.58 is amended by revising paragraph (h) heading, paragraphs (h)(2), (h)(3), and (h)(4) to read as follows:

§ 310.58 Service obligation for students enrolled after April 1, 1982.

* * * * *

(h) *Determination of compliance with service obligation contract; deferment; waiver; and appeal procedures.*

* * * * *

(2)(i) If a student or graduate disagrees with the decision of the designated official, the student or graduate may appeal that decision to the Maritime Administrator. The appeal shall set forth all the legal and factual grounds on which the student or graduate bases the appeal. Any grounds not set forth in the appeal are waived.

(ii) Appeals must be filed with the Maritime Administrator within 30 calendar days of the date of receipt by such student or graduate of the written decision of the designated official. Appeals must be filed at the Office of the Secretary, Maritime Administration, Room 7210, 400 7th St. SW., Washington, DC 20590. Each decision will include a notice of appeal rights.

(iii) A decision is deemed to be received by a student or graduate five (5) working days after the date it is mailed by first class mail, postage prepaid, to the address for such student or graduate listed with the Office of Maritime Labor, Training, and Safety. It is the responsibility of such student or graduate to insure that their current mailing address is on file with the Office of Maritime Labor, Training, and Safety, Room 7302, 400 7th St., SW., Washington, DC 20590.

(iv) If the appeal is sent by conventional mail (through the United States Postal Service), the date of filing is determined by the postmark date. If no legible postmark date appears on the mailing, the appeal is deemed to be filed five (5) working days before the date of its receipt in the Office of the Secretary. If delivered by other than the United States Postal Service, an appeal is filed with the Maritime Administrator on the date it is physically delivered to the Office of the Secretary at the address referenced in paragraph (h)(2)(ii) of this section. The date of filing by commercial delivery (not United States Postal Service) is the date it is received

at the address for the Office of the Secretary set forth in paragraph (h)(2)(ii) of this section. Appeals may not be submitted by facsimile or by electronic mail. Requests for extension of the time to file an appeal may be submitted by facsimile or electronic mail to the Office of the Secretary. Requests for extension of time do not stop or toll the running of the time for filing an appeal. Appeals may only be filed after the deadline if the Maritime Administrator or his designee, in their sole discretion, grants an extension.

(v) In computing the number of days, the first day counted is the day after the event from which the time period begins to run. If the date that ordinarily would be the last day for filing falls on a Saturday, Sunday, or Federal holiday, the filing period will include the first workday after that date.

Example to paragraph (b)(10)(v): If a graduate receives a decision on July 1, the 30-day period for filing an appeal starts to run on July 2. The appeal would ordinarily be timely only if postmarked on or physically delivered by July 31. If July 31 is a Saturday, however, the last day for obtaining a postmark by mailing or physical delivery would be Monday, August 2.

(3) The Maritime Administrator shall issue a written decision for each timely appeal. This decision constitutes final agency action.

(4) If a student or graduate fails to appeal within the time set forth in paragraph (h)(2) of this section, the decision of the designated official shall be final and constitute final agency action.

Dated: April 3, 2000.

By Order of the Maritime Administrator.

Joel C. Richard,

Secretary, Maritime Administration.

[Docket No. 000323080–0080–01; I.D. 031500A]

RIN 0648–AN97

Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Angling Category

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Advance notice of proposed rulemaking (ANPR); request for comments.

SUMMARY: NMFS is requesting public comments regarding the geographical division of the Atlantic bluefin tuna (BFT) Angling category fishery and whether an adjustment of the north-south division line and an associated adjustment of the BFT subquota percentages allocated to each area is warranted. Over the last several BFT fishing seasons, fishery participants have stated to NMFS that the division line needs to be adjusted to increase the extent of recreational fishing opportunities and to divide the northern and southern areas in a manner consistent with current fishing patterns. NMFS wants to determine if a change to the current division line and subsequent reallocation of quota is needed to better coordinate domestic conservation and management of the fishery consistent with the objectives of the Fishery Management Plan for Atlantic Tunas, Swordfish, and Sharks (HMS FMP).

DATES: Written comments on this ANPR are invited and must be received on or before May 22, 2000.

ADDRESSES: Written comments should be sent to Rebecca Lent, Chief, Highly Migratory Species (HMS) Management Division, Office of Sustainable Fisheries (F/SF1), NMFS, 1315 East-West Highway, Silver Spring, MD 20910-3282. Comments also may be sent via facsimile (fax) to (301) 713–1917. Comments will not be accepted if submitted via e-mail or the Internet.

FOR FURTHER INFORMATION CONTACT: Pat Scida or Sarah McLaughlin, (978) 281–9260.

SUPPLEMENTARY INFORMATION: Atlantic tunas are managed under the dual authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) and the Atlantic Tunas Convention Act (ATCA). The ATCA authorizes the Secretary of Commerce (Secretary) to implement binding recommendations of the International Commission for the Conservation of Atlantic Tunas (ICCAT). The authority to issue regulations under the Magnuson-Stevens Act and ATCA has been delegated from the Secretary to the Assistant Administrator for Fisheries, NOAA (AA). Within NMFS, daily responsibility for management of Atlantic HMS fisheries rests with the HMS Management Division of the Office of Sustainable Fisheries.

On May 28, 1999, NMFS published in the **Federal Register** (64 FR 29090) final regulations, effective July 1, 1999, implementing the HMS FMP. The HMS FMP and its implementing regulations establish percentage quota shares for the ICCAT-recommended U.S. BFT landing quota for each of the domestic fishing categories, and include measures regarding geographic subquotas and set-asides.

Angling Category Geographical Division

In response to quota reductions in 1992, two management areas were created for the BFT Angling category fishery. The north-south division line is located at 38°47' N. latitude (Delaware Bay). Generally, the recreational fishery begins each season off the southern and mid-Atlantic states, and so a subdivision was created to ensure a late season fishery in the northern mid-Atlantic and southern New England regions. Thus, the geographic split was designed to enable NMFS to manage the early season (June/July off the Virginia to Delaware coasts) and late season (August/September off the New Jersey to Massachusetts coasts) BFT fisheries under separate quotas, corresponding with the summer feeding migration of school, large school, and small medium BFT.

For the last several BFT fishing seasons, NMFS has received comments that an adjustment to the Angling category BFT north-south division line is warranted. Specifically, vessels fishing for BFT from ports in southern New Jersey, which is in the northern area, tend to utilize fishing areas located in the southern area (i.e., offshore of Ocean City, Maryland). This pattern of activity raises two concerns with respect to the dividing line for the southern and northern areas. First, when the southern and northern areas are both open, a significant number of fish caught in the southern area are landed in the northern area and counted against the applicable northern area subquotas. Second, when the southern area is closed, vessels from southern New Jersey are effectively excluded from the school BFT fishery because the fish are generally distributed too far north to accommodate single-day trips. NMFS has received specific suggestions to move the north-south division line to the north of the Ocean City, New Jersey area or to the south of the Ocean City, Maryland area.

NMFS is requesting comments on whether the current north-south division line is adequate or whether it should be moved to increase the geographical extent of recreational fishing opportunities and to define the northern and southern areas in a manner consistent with current fishing patterns. Any change to the current

division line and subsequent reallocation of quota, must be consistent with the HMS FMP, specifically with the objectives to better coordinate domestic conservation and management of the fisheries and to simplify and streamline HMS management. For the BFT Angling category, it is NMFS' goal to ensure reasonable fishing opportunities in all geographic areas without risking overharvest of the Angling category quota.

Various options include: (1) No adjustment to the division line; (2) move the division line to the Ocean City, New Jersey area or to 39°18' N. latitude, just north of Great Egg Inlet to effectively isolate the fisheries as virtually all vessels fishing for BFT from these areas fish in the southern, early season fishery (as suggested to NMFS in previous public comments); (3) move the division line to 38° 03' N. latitude (south of Ocean City, Maryland), so that all of the fishing activity based out of Maryland, Delaware, and southern New Jersey ports takes place in one area, i.e., a newly defined northern area (as suggested to NMFS in previous public comments); (4) move the division line to another latitude that is also consistent with the HMS management objectives mentioned above; and (5) eliminate the line altogether and use NMFS' existing authority to close and open the fishery based on inseason monitoring through review of daily landing trends, availability of BFT on the fishing grounds, and any other relevant factors, to provide for maximum utilization of the quota over the longest possible period of time. Adjusting the location of the north-south division line may reduce confusion and may prevent vessels from being excluded from participating in the fishery, especially when retention limits are different in the two areas.

Angling Category BFT Subquotas

Currently, there are separate Angling category BFT quota landings allocations for each of the areas north and south of the division line (38°47' N. lat). As stated in the HMS FMP, allocations to the southern area are as follows: (1) 47.2 percent of the school BFT Angling category landings quota, minus the school BFT quota held in reserve; (2) 47.2 percent of the large school/small medium BFT Angling category quota; and (3) 66.7 percent of the large medium and giant BFT Angling category quota. Allocations to the northern area are as follows: (1) 52.8 percent of the school BFT Angling category landings quota, minus the school BFT quota held in reserve; (2) 52.8 percent of the large school/small medium BFT Angling category quota; and (3) 33.3 percent of the large medium and giant BFT Angling category quota.

If NMFS adjusts the north-south division line, revision of the north and south allocation percentages also may be considered. Various options for revising the north and south allocation percentages include: (1) Maintain the status quo, i.e., no quota allocation change; (2) revise the allocation based on a review of data regarding estimated landings of all sizes of BFT north and south of any new division line; or (3) switch the north-south allocation percentages of school through small medium BFT in conjunction with implementation of an Ocean City, New Jersey area division line, i.e., 52.8 percent for the southern area and 47.2 for the northern area (as suggested to NMFS in previous public comments).

Request for Comments

NMFS requests comments on whether the location of the north-south division line in the Angling category should be adjusted and, if so, to where; and whether the subquota allocations for the northern and southern areas should be adjusted and, if so, how. Comments received on this ANPR will assist NMFS in drafting any future proposed changes to the Atlantic HMS regulations. The public will be provided ample opportunity for written and verbal comments following publication of any proposed regulatory amendments concerning these issues.

Authority: 16 U.S.C. 971 *et seq.* and 1801 *et seq.*

Dated: April 4, 2000.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Notices

Federal Register
Vol. 65, No. 69
Monday, April 10, 2000

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Tongass National Forest Timber; Demand Considerations; Alaska

AGENCY: Forest Service, USDA.

ACTION: Notice of availability.

SUMMARY: A notice of availability and request for comment on draft timber sale procedures for the Tongass National Forest was published in the **Federal Register** on November 27, 1998 (Vol. 63, No. 228). The draft procedures described an approach for incorporating market and industry information in planning the annual sale program for the Tongass National Forest in accordance with Section 101 of the Tongass Timber Reform Act. The draft procedures were made available to the public at the Regional Forester's office in Juneau, Alaska, and the three Forest Supervisor's Offices in Ketchikan, Petersburg, and Sitka, Alaska. In addition, the document was posted on the internet at a location identified in press releases and briefing sessions. A total of six sets of comments were received and incorporated in the final procedures ("Responding to the Market Demand for Tongass Timber," R10–MB–413, April 2000, USDA Forest Service, Alaska Region). Implementation direction for the procedures is included in the Forest Service Sale Preparation Handbook, Region 10 Supplement 2409.18–2000–1. The Forest Service hereby gives notice that the final procedures and Forest Service directive are now available to the public.

ADDRESSES: Copies of the final procedures and Region 10 Supplement may be obtained by writing Rick Cables, Regional Forester, Alaska Region, Forest Service, USDA, P.O. Box 21628, Juneau, Alaska 99802–1628. The final procedures are also posted on the Alaska Region internet site at *www.fs.fed.us./r10/ro/epb/economic.htm*.

FOR FURTHER INFORMATION CONTACT: Frederick L. Norbury or Kathleen S. Morse, Ecosystem Planning Staff, Forest Service, USDA, P.O. Box 21628, Juneau, Alaska 99802–1628; (907) 586–8886/8809.

SUPPLEMENTARY INFORMATION:

Statutory and Regulatory Background

Section 705(a) of the Alaska National Lands Conservation Act (Pub. L. 96–487) required the Forest Service to "maintain the timber supply from the Tongass National Forest to dependent industry at a rate of four billion five hundred million board feet measure per decade." Section 101 of the Tongass Timber Reform Act (Pub. L. 101–626) removed the timber supply mandate and substituted a more general requirement that the Forest Service seek to provide a supply of timber from the Tongass which meets the annual market demand for timber from such forest and meets the market demand for timber from such forest over the planning cycle. The legislation qualified this admonishment, saying that efforts to meet market demand must be consistent with providing for the multiple use and sustained yield of all renewable forest resources. Further, such efforts are subject to appropriations, other applicable law and the requirements of the National Forest Management Act (Pub. L. 94–588).

In the Record of Decision (ROD) for the Tongass Land and Resource Management Plan (May 23, 1997) the Regional Forester made a commitment to "develop procedures to ensure that annual timber offerings are consistent with market demand." In April 1999, a new ROD for the Tongass Forest Plan was issued by Under Secretary Lyons. The 1999 ROD referenced the draft procedures, finding them to be "an appropriate methodology for the purposes of implementing the 'seek to meet market demand' language of the TTRA." The 6* draft procedures were made available for public review and comment via **Federal Register** notification on November 27, 1998 (Vol. 63, No. 228). The procedures and implementing direction have been finalized.

Summary of Procedures

The procedures estimate the volume of timber likely to be purchased from the Tongass National Forest in the coming year based on observations of industry behavior in prior years. The industry draws its annual raw material supply from an accumulated inventory of timber volume under contract, sometimes called the "buffer stock." This inventory must be large enough to keep mills operating at a steady rate while new sales are being prepared for offer and harvest. Historically, the Forest Service has attempted to allow the industry as a whole to hold the equivalent of two to three years' worth of raw material as volume under contract. The procedures suggest a similar approach but define this inventory requirement in more analytical terms.

The draft procedures assume that, at a minimum, the industry will want to maintain its existing timber inventory and will purchase timber to replace that harvested in a given year. If the existing timber inventory is lower than desired, the industry is likely to purchase more timber than is processed in order to build inventory. Commonly, if the inventory is higher than desired, the industry is likely to purchase less. By comparing the current inventory with an estimate of the desired inventory and factoring in projected annual harvest, the Forest Service can develop a range of expected timber purchases for any given year. The volume offered will be adjusted to fall within the most current estimate.

Comments and Responses

The Forest Service issued a Notice of Availability and Request for Comment on the draft procedures in the **Federal Register** on November 27, 1998 (Vol. 63, No. 228). The comment period closed January 1, 1999.

All relevant comments have been given full consideration in adoption of the final procedures and implementing direction. Comments were received from two environmental organizations, one timber industry association, two economic consulting firms, and one timber sale purchaser. All respondents were from Alaska or from entities representing Alaskan interests. A summary of the comments and responses is in the final report.

Dated: March 24, 2000.

James A. Caplan,

Deputy Regional Forester for Natural Resources.

Industrial Belts from Germany, Italy, Singapore, and Japan; Corrected Final Results of Expedited Sunset Reviews

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of correction to final results of expedited sunset reviews: industrial belts from Germany, Italy, Singapore, and Japan.

SUMMARY: On December 30, 1999, the Department of Commerce ("the Department") published in the **Federal Register** (64 FR 73511) the final results of the June 1999 sunset reviews of the antidumping duty orders on industrial belts from Germany, Italy, Singapore, and Japan. Subsequent to the publication of the final results, we identified an inadvertent error in the "Scope" section of the notice. Therefore, we are correcting and clarifying this error.

On page 73511, the error lies in the following sentence: "The merchandise covered by the antidumping duty orders on Germany and Japan includes industrial belts other than V-belts and synchronous belts used for power transmission, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (*i.e.* closed loops) belts, or in belting lengths or links from Germany and Japan." This sentence should be replaced with: "The merchandise covered by the antidumping duty order on Germany includes industrial belts, other than V-belts and synchronous belts used for power transmission, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (*i.e.* closed loops) belts, or in belting lengths or links.[1]

Further, we are inserting the following sentence, which was inadvertently left out: "The antidumping duty order on imports from Japan covers industrial V-belts and synchronous belts and other industrial belts, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (*i.e.*, closed loops) belts, or in belting in lengths or links."[2]

EFFECTIVE DATE: April 10, 2000.

FOR FURTHER INFORMATION CONTACT: Kathryn B. McCormick or Carole A. Showers, Office of Policy for Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street & Constitution Avenue, NW, Washington, D.C. 20230: telephone (202) 482–1930 and (202) 482–3217, respectively.

This correction is issued and published in accordance with sections 751(h) and 777(i) of the Act.

Dated: April 4, 2000.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

Persulfates From the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review, and Partial Rescission of Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce is conducting an administrative review of the antidumping duty order on persulfates from the People's Republic of China in response to requests by the petitioner, FMC Corporation, and the following two manufacturers/exporters of the subject merchandise: Shanghai Ai Jian Import and Export Corporation, and Sinochem Jiangsu Wuxi Import and Export Corporation. In addition to these two respondents, the petitioner also requested a review of Guangdong Petroleum Chemical Import & Export Trade Corporation. The period of review is July 1, 1998, through June 30, 1999.

We have preliminarily found that sales of subject merchandise have been made below normal value. If these preliminary results are adopted in our final results of administrative review, we will instruct the Customs Service to assess antidumping duties based on the difference between the export price and the normal value. We also have preliminarily determined that the review of Sinochem Jiangsu Wuxi Import & Export Trade Corporation should be rescinded.

EFFECTIVE DATE: April 10, 2000.

FOR FURTHER INFORMATION CONTACT: James Nunno, AD/CVD Enforcement Group I, Office II, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone: (202) 482–0783.

APPLICABLE STATUTE AND REGULATIONS: Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department of Commerce's (the Department's) regulations are to 19 CFR part 351 (April 1998).

SUPPLEMENTARY INFORMATION:

Background

On July 15, 1999, the Department published in the **Federal Register** a notice of "Opportunity to Request an Administrative Review" of the antidumping duty order on persulfates from the People's Republic of China (PRC) covering the period July 1, 1998 through June 30, 1999. See Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity to Request Administrative Review, 64 FR 38181 (July 15, 1999).

On July 31, 1999, in accordance with 19 CFR 351.213(b), the petitioner requested an administrative review of Shanghai Ai Jian Import & Export Corporation (Ai Jian), Sinochem Jiangsu Wuxi Import & Export Corporation (Wuxi), and Guangdong Petroleum Chemical Import & Export Trade Corporation (Guangdong Petroleum). We also received requests for a review from Ai Jian and Wuxi on July 31, 1998. We published a notice of initiation of this review on August 30, 1999. See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocation in Part, 64 FR 47167 (August 30, 1999).

On September 8, 1999, we issued an antidumping questionnaire to Ai Jian, Wuxi, and Guangdong Petroleum. The Department received a response from Ai

Jian in October 1999. In addition, the Department received a response from Shanghai Ai Jian Reagent Works (AJ Works) (producer for Ai Jian) in November 1999. On November 5, 1999, Wuxi notified the Department that it had not made any U.S. sales of subject merchandise during the period of review (POR). *See* the "Partial Rescission of Administrative Review" section of the notice below. Guangdong Petroleum did not respond to the Department's questionnaire.

On November 25, 1999, we issued a letter to Guangdong Petroleum asking it to indicate whether it intended to participate in this administrative review. Guangdong Petroleum did not respond to this letter.

We issued supplemental questionnaires to Ai Jian and AJ Works in January 2000, and received responses to these questionnaires in February 2000. In March 2000, we requested and received additional information from Ai Jian and AJ Works concerning chemical inputs and packing materials.

In February 2000, Ai Jian and the petitioner submitted publicly available information and comments for consideration in valuing the factors of production. In March 2000, the parties submitted rebuttal comments.

Scope of Review

The products covered by this review are persulfates, including ammonium, potassium, and sodium persulfates. The chemical formula for these persulfates are, respectively, $(NH_4)_2S_2O_8$, $K_2S_2O_8$, and $Na_2S_2O_8$. Ammonium and potassium persulfates are currently classified under subheading 2833.40.60 of the Harmonized Tariff Schedule of the United States (HTSUS). Sodium persulfate is classified under HTSUS subheading 2833.40.20. Although the HTSUS subheadings are provided for convenience and customs purposes, our written description of the scope of this review is dispositive.

Partial Rescission of Administrative Review

Wuxi notified the Department that it had not made any U.S. sales of subject merchandise during the POR. Entry data provided by the Customs Service confirms that there were no POR entries from Wuxi of persulfates.

Therefore, consistent with the Department's practice, we preliminarily determine to rescind this review with respect to Wuxi. *See* Stainless Steel Bar From India; Preliminary Results of Antidumping Duty Administrative Review and New Shipper Review and Partial Rescission of Administrative Review, 65 FR 12209 (March 8, 2000).

Separate Rates

It is the Department's policy to assign all exporters of the merchandise subject to review in non-market-economy (NME) countries a single rate, unless an exporter can demonstrate an absence of government control, both in law and in fact, with respect to exports. To establish whether an exporter is sufficiently independent of government control to be entitled to a separate rate, the Department analyzes the exporter in light of the criteria established in the Final Determination of Sales at Less Than Fair Value: Sparklers from the People's Republic of China, 56 FR 20588 (May 6, 1991) (Sparklers), as amplified in the Final Determination of Sales at Less Than Fair Value: Silicon Carbide from the People's Republic of China, 59 FR 22585 (May 2, 1994) (Silicon Carbide). Evidence supporting, though not requiring, a finding of *de jure* absence of government control over export activities includes: (1) an absence of restrictive stipulations associated with an individual exporter's business and export licenses; (2) any legislative enactments decentralizing control of companies; and (3) any other formal measures by the government decentralizing control of companies. With respect to evidence of a *de facto* absence of government control, the Department considers the following four factors: (1) Whether the respondent sets its own export prices independent from the government and other exporters; (2) whether the respondent can retain the proceeds from its export sales; (3) whether the respondent has the authority to negotiate and sign contracts; and (4) whether the respondent has autonomy from the government regarding the selection of management. *See* Silicon Carbide, 59 FR at 22587; *see also* Sparklers, 56 FR at 20589.

With respect to Ai Jian, for purposes of our final results for the period of review (POR) covering December 27, 1996 through June 30, 1998, the Department determined that there was an absence of *de jure* and *de facto* government control of its export activities and determined that it warranted a company-specific dumping margin. *See* Persulfates From the People's Republic of China: Final Results of Antidumping Administrative Review, 64 FR 69494 (December 13, 1999) (Persulfates First Review). For purposes of this POR, Ai Jian has responded to the Department's request for information regarding separate rates. We have found that the evidence on the record is consistent with the final results in Persulfates First Review and continues to demonstrate an absence of government control, both in law and in fact, with respect to its exports, in accordance with the criteria identified in Sparklers and Silicon Carbide.

With respect to Guangdong Petroleum, which did not respond to the Department's questionnaire, we preliminarily determine that this company does not merit a separate rate. The Department assigns a single rate to companies in a non-market economy, unless an exporter demonstrates an absence of government control. We preliminarily determine that Guangdong Petroleum is subject to the country-wide rate for this case because it failed to demonstrate an absence of government control.

Use of Facts Otherwise Available

On September 8, 1999, the Department sent Guangdong Petroleum a questionnaire and cover letter, explaining the review procedures, by air mail through FedEx International Airway Bill. A response to the questionnaire, which covered exports to the United States for the period of review, was due by October 29, 1999. We did not receive responses by the due date. On November 25, 1999, we sent a follow-up letter regarding the past due date for the questionnaire responses and noting the necessity of relying on facts available. Because we have received no responses and have not been contacted by this respondent, we determine that the use of facts available is appropriate.

Section 776(a)(2) of the Act provides that "if an interested party or any other person (A) withholds information that has been requested by the administering authority; (B) fails to provide such information by the deadlines for the submission of the information or in the form and manner requested, subject to subsections (c)(1) and (e) of section 782; (C) significantly impedes a proceeding under this title; or (D) provides such information but the information cannot be verified as provided in section 782(i), the administering authority shall, subject to section 782(d), use the facts otherwise available in reaching the applicable determination under this title."

Because Guangdong Petroleum, which is part of the PRC entity (*see* "Separate Rates" section above), has failed to respond to the original questionnaire and has refused to participate in this administrative review, we find that, in accordance with sections 776(a)(2)(A) and (C) of the Act, the use of total facts available is appropriate for the PRC-wide rate. *See, e.g.*, Sulfanilic Acid From the People's Republic of China; Final Results of Antidumping Duty

Administrative Review, 65 FR 13366, 13367 (March 13, 2000).

Section 776(b) of the Act provides that, if the Department finds that an interested party "has failed to cooperate by not acting to the best of its ability to comply with a request for information," the Department may use information that is adverse to the interests of the party as facts otherwise available. Adverse inferences are appropriate "to ensure that the party does not obtain a more favorable result by failing to cooperate than if it had cooperated fully." *See* Statement of Administrative Action ("SAA") accompanying the URAA, H.R. Doc. No. 103–316, at 870 (1994). Furthermore, "an affirmative finding of bad faith on the part of the respondent is not required before the Department may make an adverse inference." *See* Antidumping Duties; Countervailing Duties: Final Rule, 62 FR 27296, 27340 (May 19, 1997) (Final Rule). Section 776(b) of the Act authorizes the Department to use as adverse facts available information derived from the petition, the final determination from the less than fair value (LTFV) investigation, a previous administrative review, or any other information placed on the record.

Under section 782(c) of the Act, a respondent has a responsibility not only to notify the Department if it is unable to provide requested information, but also to provide a "full explanation and suggested alternative forms." Guangdong Petroleum failed to respond to our requests for information, thereby failing to comply with this provision of the statute. Therefore, we determine this respondent failed to cooperate to the best of its ability, making the use of an adverse inference appropriate. In this proceeding, in accordance with Department practice, as adverse facts available we have preliminarily assigned Guangdong Petroleum and all other exporters subject to the PRC-wide rate the petition rate of 119.02 percent, which is the PRC-wide rate established in the LTFV investigation, and the highest dumping margin determined in any segment of this proceeding. See Fresh Garlic From the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review, 64 FR 39115 (July 21, 1999). The Department's practice when selecting an adverse rate from among the possible sources of information is to ensure that the margin is sufficiently adverse "as to effectuate the purpose of the facts available role to induce respondents to provide the Department with complete and accurate information in a timely manner." See Static Random Access Memory Semiconductors from Taiwan; Final Determination of Sales at Less than Fair Value, 63 FR 8909, 8932 (February 23, 1998). The Department also considers the extent to which a party may benefit from its own lack of cooperation in selecting a rate. See Roller Chain, Other than Bicycle, from Japan; Notice of Final Results and Partial Recission of Antidumping Duty Administrative Review, 62 FR 60472, 60477 (November 10, 1997). It is reasonable to assume that if Guangdong Petroleum could have demonstrated that its actual dumping margin was lower than the PRC-wide rate established in the LTFV investigation, it would have participated in this review and attempted to do so.

Section 776(c) of the Act provides that where the Department selects from among the facts otherwise available and relies on "secondary information," the Department shall, to the extent practicable, corroborate that information from independent sources reasonably at the Department's disposal. Secondary information is described in the SAA as "{i}nformation derived from the petition that gave rise to the investigation or review, the final determination concerning the subject merchandise, or any previous review under section 751 concerning the subject merchandise." *See* SAA at 870. The SAA states that "corroborate" means to determine that the information used has probative value. *See* id. To corroborate secondary information, the Department will, to the extent practicable, examine the reliability and relevance of the information to be used. Although the petition rate of 119.02 percent constitutes secondary information, the information has already been corroborated in the LTFV investigation. *See* Notice of Final Determination of Sales at Less Than Fair Value: Persulfates from The People's Republic of China, 62 FR 27222, 27224 (May 19, 1997). With respect to the relevance aspect of corroboration, the Department will consider information reasonably at its disposal to determine whether a margin continues to have relevance. Where circumstances indicate that the selected margin is not appropriate as adverse facts available, the Department will disregard the margin and determine an appropriate margin. For example, in Fresh Cut Flowers from Mexico: Final Results of Antidumping Administrative Review, 61 FR 6812 (February 22, 1996), the Department disregarded the highest margin in that case as adverse best information available (the predecessor to facts available) because the margin was based on another company's uncharacteristic business expense resulting in an unusually high margin. Similarly, the Department does not apply a margin that has been discredited. *See D & L Supply Co.* v. *United States*, 113 F.3d 1220, 1221 (Fed. Cir. 1997) (the Department will not use a margin that has been judicially invalidated); *see also Borden Inc.* v. *United States*, 4 F. Supp. 2d 1221, 1246–48 (CIT 1998) (the Department may not use an uncorroborated petition margin that is high when compared to calculated margins for the period of review). None of these unusual circumstances are present here; nor have we any other reason to believe that application of the rate as adverse facts available would be inappropriate for the PRC-wide rate. Thus, the 119.02 percent margin does have relevance. Accordingly, we have used the petition rate from LTFV investigation, 119.02 percent, because there is no evidence on the record indicating that the selected margin is not appropriate as adverse facts available.

Export Price

For Ai Jian, we calculated export price (EP) in accordance with section 772(a) of the Act, because the subject merchandise was sold directly to the first unaffiliated purchaser in the United States prior to importation and constructed export price (CEP) methodology was not otherwise warranted, based on the facts of record. We calculated EP based on packed, CIF U.S. port, or FOB PRC port, prices to unaffiliated purchasers in the United States, as appropriate. We made deductions from the starting price, where appropriate, for foreign inland freight, foreign brokerage and handling, marine insurance, and ocean freight. With respect to ocean freight, although Ai Jian asserted that it used market-economy carriers for shipments of persulfates, we could not establish, based on the submitted information, that the freight charges Ai Jian paid reflect prices set by market-economy carriers. Accordingly, for ocean freight and other movement expenses, we based the charges on surrogate values. *See* "Normal Value" section for further discussion.

Normal Value

Section 773(c)(1) of the Act provides that the Department shall determine the normal value (NV) using a factors-of-production methodology if: (1) The merchandise is exported from an NME country; and (2) the information does not permit the calculation of NV using home-market prices, third-country

prices, or constructed value under section 773(a) of the Act.

The Department has treated the PRC as an NME country in all previous antidumping cases. Furthermore, available information does not permit the calculation of NV using home market prices, third country prices, or constructed value under section 773(a) of the Act. In accordance with section 771(18)(C)(i) of the Act, any determination that a foreign country is an NME country shall remain in effect until revoked by the administering authority. None of the parties to this proceeding has contested such treatment in this review. Therefore, we treated the PRC as an NME country for purposes of this review and calculated NV by valuing the factors of production in a surrogate country.

Section 773(c)(4) of the Act and 19 CFR 351.408 direct us to select a surrogate country that is at a level of economic development comparable to that of the PRC. On the basis of per capita gross domestic product (GDP), the growth rate in per capita GDP, and the national distribution of labor, we find that India is at a level of economic development comparable to the PRC. *See* Memorandum from Director, Office of Policy, to Office Director, AD/CVD Group I, Office 2, dated November 8, 1999.

Section 773(c)(4) of the Act also requires that, to the extent possible, the Department use a surrogate country that is a significant producer of merchandise comparable to persulfates. For purposes of the last administrative review of this order, we found that India was a producer of persulfates based on information submitted by the respondents. See Persulfates from the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review, and Partial Rescission of Administrative Review, 64 FR 42912, 42914 (August 6, 1999) (Persulfates First Review Preliminary Results). For purposes of this administrative review, we continue to find that India is a producer of persulfates based on information submitted by both the respondents and the petitioner. We find that India fulfills both statutory requirements for use as the surrogate country and continue to use India as the surrogate country in this administrative review. We have used publicly available information relating to India, unless otherwise noted, to value the various factors of production.

For purposes of calculating NV, we valued PRC factors of production, in accordance with section 773(c)(1) of the Act. Factors of production include, but are not limited to: (1) Hours of labor required; (2) quantities of raw materials employed; (3) amounts of energy and other utilities consumed; and (4) representative capital cost, including depreciation. In examining surrogate values, we selected, where possible, the publicly available value which was: (1) An average non-export value; (2) representative of a range of prices within the POR or most contemporaneous with the POR; (3) product-specific; and (4) tax-exclusive. For a more detailed explanation of the methodology used in calculating various surrogate values, *see* the Preliminary Results Factors Valuation Memorandum from the Team to the File, dated April 3, 2000 (Factors Memorandum). In accordance with this methodology, we valued the factors of production as follows:

To value ammonium sulfate, caustic soda, and sulfuric acid, we used public information from the Indian publication Chemical Weekly, as provided by both the petitioner and the respondents in their February 25, 2000 submissions. For caustic soda and sulphuric acid, because price quotes reported in the Chemical Weekly are for chemicals with a 100 percent concentration level, we made chemical purity adjustments according to the particular concentration levels of caustic soda and sulphuric acid used by respondents. For potassium sulfate and anhydrous ammonia, we relied on import prices contained in the January through August 1998 issues of Monthly Statistics of the Foreign Trade of India (Monthly Statistics), as collectively provided by the petitioner and the respondents in their February 25, 2000 submissions. Where necessary, we adjusted the values reported in the Chemical Weekly to exclude sales and excise taxes. For those values not contemporaneous with the POR, we adjusted for inflation using the wholesale price indices (WPI) published by the International Monetary Fund (IMF). We made further adjustments to account for freight costs between the suppliers and AJ Works' manufacturing facilities.

During the POR, AJ Works self-produced ammonium persulfates, which is a material input in the production of potassium and sodium persulfates. In order to value such ammonium persulfates, we calculated the sum of the materials, labor, and energy costs for ammonium persulfates based on the usage factors submitted by AJ Works on November 5, 1999, February 28, 2000, and March 15, 2000. Consistent with our methodology used in Persulfates First Review, we then applied this value to the reported consumption amounts of ammonium persulfates used in the production of potassium and sodium persulfates.

In accordance with our practice, for inputs for which we used CIF import values from India, we calculated a surrogate freight cost using the shorter of the reported distances either from the closest PRC ocean port to the factory or from the domestic supplier to the factory. See Final Determination of Sales at Less Than Fair Value: Certain Cut-to-Length Carbon Steel Plate From the People's Republic of China, 62 FR 61964, 61977 (November 20, 1997) and the Court of Appeals for the Federal Circuit's decision in *Sigma Corp.* v. *United States*, 117 F.3d 1401 (Fed. Cir. 1997).

We valued labor based on a regression-based wage rate, in accordance with 19 CFR 351.408 (c)(3).

For electricity, we relied upon public information from an August 6, 1996, article in Business World to obtain an average price for electricity provided to industries in India. To value water we relied on public information reported in the October 1997 publication of the Second Water Utilities Data Book: Asian and Pacific Region. To value coal, we relied on import prices contained in the March 1998 issue of Monthly Statistics. We adjusted the values to reflect inflation up to the POR using the WPI published by the IMF. Additionally, we adjusted the value for coal to account for freight costs incurred between the suppliers and AJ Works.

For the reported packing materials—polyethylene bags, woven bags, polyethylene sheet/film and liner, and fiberboard—we relied upon Indian import data from the January through August 1998 issues of Monthly Statistics. For paper bags and wood pallets, we relied upon Indian import data from the March 1998 issue of Monthly Statistics. We adjusted the values to reflect inflation up to the POR using the WPI published by the IMF. Additionally, we adjusted these values to account for freight costs incurred between the suppliers and AJ Works.

To value truck freight, we used price quotes obtained by the Department from Indian truck freight companies in November 1999, and used recently in the investigation of bulk aspirin from the PRC. See Notice of Preliminary Determination of Sales at Less Than Fair Value: Bulk Aspirin From the People's Republic of China, 65 FR 116, 118 (January 3, 2000). Because the time period for this data (*i.e.*, November 1999) is later than that of the POR, we adjusted the data to reflect POR values using the WPI published by the IMF. For ocean freight we used a price quote

from Maersk, Inc. This rate was recently used in the fourth administrative review of sebacic acid from the PRC. See Sebacic Acid From the People's Republic of China: Final Results of Antidumping Duty Administrative Review, 64 FR 69503, 69507 (December 13, 1999).

For marine insurance we used the June 1998 marine insurance data used in Tapered Roller Bearings and Parts Thereof, Finished and Unfinished, From the People's Republic of China; Final Results of 1996–97 Antidumping Duty Administrative Review and New Shipper Review and Determination Not To Revoke Order in Part, 63 FR 63842 (November 17, 1998). For foreign brokerage and handling expenses we used public information reported in the new shipper review of stainless steel wire rod from India. See Certain Stainless Steel Wire Rod From India; Preliminary Results of Antidumping Duty Administrative and New Shipper Reviews, 63 FR 48184, 48185 (September 9, 1998); Factors Memorandum at page 5. We adjusted the values to reflect inflation up to the POR using the WPI published by the IMF.

For factory overhead, selling, general, and administrative expenses (SG&A), and profit, we relied on the financial statements of Calibre Chemicals Pvt. Limited (Calibre), an Indian producer of potassium persulfates and other chemicals, which were submitted by the petitioner in its February 25, 2000, submission, because this company is a producer of subject merchandise.

The petitioner also submitted the financial statements of National Peroxide Limited (National Peroxide), and asserted that while the Department should value factory overhead and profit using Calibre's financial data, the Department should use National Peroxide's data to value SG&A. The petitioner maintains as it did in Persulfates First Review Final that because Calibre produces non-subject merchandise in addition to subject merchandise, its financial data is not representative of persulfates production. However, as we stated in Persulfates First Review Final, we find this approach to be inappropriate and unwarranted. SG&A expenses are not considered to be directly related to the production of merchandise, unlike factory overhead costs. In addition, while we recognize that Calibre's financial data may not mirror the actual experience of AJ Works, this does not render Calibre's data unreliable for purposes of calculating a surrogate SG&A ratio within the context of the Department's NME methodology. Finally, because a company's profit amount is a function of its total expenses, using Calibre's financial data for factory overhead and profit, then using National Peroxide's data for SG&A, as proposed by the petitioner, results in applying a profit ratio that bears no relationship to the overhead and SG&A ratios. Therefore, for purposes of these preliminary results, we have continued to rely upon Calibre's financials for these values. See Persulfates First Review Final, 64 FR at 69499–500.

Consistent with our methodology used in Persulfates First Review, we calculated factory overhead as a percentage of the total raw material costs for subject merchandise, as opposed to calculating factory overhead as a percentage of total materials, labor, and energy costs for all products. See Persulfates First Review, 64 FR at 69498–99; Factors Memorandum at page 6. We also reclassified certain depreciation expenses from Calibre's financial statements as SG&A expenses. See Persulfates First Review, 64 FR at 69501. We removed from the profit calculation the excise duties and sales taxes. See Persulfates First Review Preliminary Results, 64 FR at 42915.

Preliminary Results of the Review

We preliminarily determine that the following margins exist for the period July 1, 1998 through June 30, 1999:

Manufacturer/Exporter	Margin (percent)
Shanghai Ai Jian Import & Export Corporation	0.82
PRC-Wide Rate	119.02

Interested parties may request a hearing within 30 days of publication of this notice. *See* 19 CFR 351.310(c). Any hearing, if requested, will be held 44 days after the date of the publication of this notice or the first workday thereafter. Interested parties may submit case briefs within 30 days of publication. Rebuttal briefs, limited to issues raised in the case briefs, may be filed no later than 35 days after the date of publication. Parties who submit case briefs or rebuttal briefs in this proceeding are requested to submit with each argument (1) a statement of the issue and (2) a brief summary of the argument. Parties are also encouraged to provide a summary of the arguments not to exceed five pages and a table of statutes, regulations, and cases cited.

The Department will subsequently issue the final results of this administrative review, including the results of its analysis of issues raised in any such written briefs or at the hearing, if held, not later than 120 days after the date of publication of this notice.

The Department shall determine and the Customs Service shall assess antidumping duties on all appropriate entries. The Department will issue appropriate appraisement instructions directly to the Customs Service upon completion of this review. The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by this review and for future deposits of estimated duties. For assessment purposes, we do not have the information to calculate an estimated entered value. Accordingly, we have calculated importer specific duty assessment rates for the merchandise by aggregating the dumping margins calculated for all U.S. sales and dividing this amount by the total quantity of those sales. This rate will be assessed uniformly on all entries of that particular importer made during the POR.

Furthermore, the following deposit requirements will be effective upon publication of the final results of this antidumping duty administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(1) of the Act: (1) the cash deposit rate for Ai Jian will be that established in the final results of this administrative review; (2) the rate will continue to be 7.18 percent for Wuxi, which we determined to be entitled to a separate rate in the previous review but which did not have shipments or entries to the United States during this POR (this is the rate which currently applies to this company); (3) the cash deposit rate for all other PRC exporters, including Guangdong Petroleum, will be 119.02 percent, the PRC-wide rate established in the less-than-fair-value investigation; and (4) the cash deposit rate for non-PRC exporters of subject merchandise from the PRC will be the rate applicable to the PRC supplier of that exporter. These requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

Notification of Interested Parties

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of

antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: April 3, 2000.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

International Trade Administration

[A–570–825]

Sebacic Acid From the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of preliminary Results of antidumping duty administrative review of sebacic acid from the People's Republic of China

SUMMARY: The Department of Commerce is conducting an administrative review of the antidumping duty order on sebacic acid from the People's Republic of China in response to requests from the petitioner, Arizona Chemical Company, and the following two respondents: Tianjin Chemicals Import and Export Corporation and Guangdong Chemicals Import and Export Corporation. In addition to these two respondents, the petitioner also requested a review of Sinochem Jiangsu Import and Export Corporation and Sinochem International Chemicals Company. This review covers four exporters of the subject merchandise. The period of review is July 1, 1998, through June 30, 1999.

We preliminarily determine that sales have been made below normal value. Interested parties are invited to comment on these preliminary results. If these preliminary results are adopted in our final results of administrative review, we will instruct the Customs Service to assess antidumping duties on entries subject to this review.

EFFECTIVE DATE: April 10, 2000.

FOR FURTHER INFORMATION CONTACT: James Nunno or Christopher Priddy, Office 2, AD/CVD Enforcement Group I, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone: (202) 482–0783 or (202) 482–1130, respectively.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act) are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department of Commerce's (the Department's) regulations are to 19 CFR part 351 (1999).

SUPPLEMENTARY INFORMATION:

Background

On July 15, 1999, the Department published in the **Federal Register** at 64 FR 38181 a notice of "Opportunity to Request an Administrative Review" of the antidumping duty order on sebacic acid from the People's Republic of China (PRC) covering the period July 1, 1998, through June 30, 1999.

On July 22, 1999, in accordance with 19 CFR 351.213(b), the petitioner requested that we conduct an administrative review of Tianjin Chemicals Import and Export Corporation (Tianjin), Guangdong Chemicals Import and Export Corporation (Guangdong), Sinochem International Chemicals Company, Ltd. (SICC) and Sinochem Jiangsu Import and Export Corporation (Jiangsu). On July 26, 1999, Tianjin and Guangdong also requested that we conduct an administrative review. We published a notice of initiation of this antidumping duty administrative review on August 30, 1999, at 64 FR 47167. On September 9, 1999, we issued questionnaires to the four respondents. Tianjin and Guangdong submitted responses to sections A, C, and D of the antidumping questionnaire on November 8, 1999. The Department issued its supplemental questionnaires on January 19, 2000, and received responses to the questionnaires in February 2000. Both Guangdong and Tianjin submitted additional information clarifying their reported sales and factors of production data in March 2000. SICC and Jiangsu did not respond to the Department's questionnaire.

On December 14, 1999, the Department invited interested parties to provide publicly available information (PAI) for valuing the factors of production and for surrogate country selection. We received responses from the petitioner on January 24, 2000. The respondents did not submit PAI information for purposes of the preliminary results.

The Department is conducting this administrative review in accordance with section 751 of the Act.

Scope of Review

The products covered by this order are all grades of sebacic acid, a dicarboxylic acid with the formula (CH2)8(COOH)2, which include but are not limited to CP Grade (500ppm maximum ash, 25 maximum APHA color), Purified Grade (1000 ppm maximum ash, 50 maximum APHA color), and Nylon Grade (500 ppm maximum ash, 70 maximum ICV color). The principal difference between the grades is the quantity of ash and color. Sebacic acid contains a minimum of 85 percent dibasic acids of which the predominant species is the C10 dibasic acid. Sebacic acid is sold generally as a free-flowing powder/flake.

Sebacic acid has numerous industrial uses, including the production of nylon 6/10 (a polymer used for paintbrush and toothbrush bristles and paper machine felts), plasticizers, esters, automotive coolants, polyamides, polyester castings and films, inks and adhesives, lubricants, and polyurethane castings and coatings.

Sebacic acid is currently classifiable under subheading 2917.13.00.30 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheading is provided for convenience and customs purposes, our written description of the scope of this proceeding remains dispositive.

Separate Rates

It is the Department's standard policy to assign all exporters of the merchandise subject to review in non-market-economy (NME) countries a single rate, unless an exporter can demonstrate an absence of government control, both in law and in fact, with respect to exports. To establish whether an exporter is sufficiently independent of government control to be entitled to a separate rate, the Department analyzes the exporter in light of the criteria established in the Final Determination of Sales at Less Than Fair Value: Sparklers from the People's Republic of China, 56 FR 20588 (May 6, 1991) (Sparklers), and amplified in the Final Determination of Sales at Less Than Fair Value: Silicon Carbide from the People's Republic of China, 59 FR 22585 (May 2, 1994) (Silicon Carbide). Evidence supporting, though not requiring, a finding of *de jure* absence of government control over export activities includes: (1) An absence of restrictive stipulations associated with an individual exporter's business and export licenses; (2) any legislative

enactments decentralizing control of companies; and (3) any other formal measures by the government decentralizing control of companies. With respect to evidence of a *de facto* absence of government control, the Department considers the following factors: (1) Whether the respondent sets its own export prices independent from the government and other exporters; (2) whether the respondent can retain the proceeds from its export sales; (3) whether the respondent has the authority to negotiate and sign contracts; and (4) whether the respondent has autonomy from the government regarding the selection of management. *See* Silicon Carbide at 22587 and Sparklers at 20589.

With respect to Tianjin and Guangdong, in our final results for the period of review (POR) covering July 1, 1997, through June 30, 1998, the Department determined there was both *de jure* and *de facto* absence of government control of each company's export activities and determined that each company warranted a company-specific dumping margin. *See* Final Results of Antidumping Administrative Review: Sebacic Acid From the People's Republic of China, 64 FR 69503 (December 13, 1999) (Sebacic Acid Fourth Review). For this review, both Tianjin and Guangdong have responded to the Department's request for information regarding separate rates. We have found that the evidence on the record is consistent with the final results in the Sebacic Acid Fourth Review and continues to demonstrate an absence of both *de jure* and *de facto* government control with respect to their exports in accordance with the criteria identified in Sparklers and Silicon Carbide.

With respect to SICC and Jiangsu, which did not respond to the Department's questionnaire, we preliminarily determine that these companies do not merit a separate rate. The Department assigns a single rate to companies in a non-market economy, unless an exporter demonstrates an absence of government control. We preliminarily determine that SICC and Jiangsu are subject to the country-wide rate for this case because they failed to demonstrate an absence of government control.

Use of Facts Otherwise Available for Non-Responding Companies

On September 9, 1999, the Department sent antidumping questionnaires to SICC and Jiangsu. SICC and Jiangsu did not respond to the questionnaire. Because we have received no responses, we determine that the use of facts available is appropriate.

Section 776(a)(2) of the Act provides that "if an interested party or any other person (A) withholds information that has been requested by the administering authority; (B) fails to provide such information by the deadlines for the submission of the information or in the form and manner requested, subject to subsections (c)(1) and (e) of section 782; (C) significantly impedes a proceeding under this title; or (D) provides such information but the information cannot be verified as provided in section 782(i), the administering authority shall, subject to section 782(d), use the facts otherwise available in reaching the applicable determination under this title."

Because SICC and Jiangsu, which are part of the PRC entity (*see* "Separate Rates" section above), have failed to respond to the original questionnaire and have refused to participate in this administrative review, we find that, in accordance with sections 776(a)(2)(A) and (C) of the Act, the use of total facts available is appropriate. *See, e.g.*, Sulfanilic Acid From the People's Republic of China; Final Results of Antidumping Duty Administrative Review, 65 FR 13366, 13367 (March 13, 2000).

Section 776(b) of the Act provides that, if the Department finds that an interested party "has failed to cooperate by not acting to the best of its ability to comply with a request for information," the Department may use information that is adverse to the interests of the party as facts otherwise available. Adverse inferences are appropriate "to ensure that the party does not obtain a more favorable result by failing to cooperate than if it had cooperated fully." *See* Statement of Administrative Action ("SAA") accompanying the URAA, H.R. Doc. No. 103–316, at 870 (1994). Furthermore, "an affirmative finding of bad faith on the part of the respondent is not required before the Department may make an adverse inference." *See* Antidumping Duties; Countervailing Duties: Final Rule, 62 FR 27296, 27340 (May 19, 1997) (Final Rule). Section 776(b) of the Act authorizes the Department to use as adverse facts available information derived from the petition, the final determination from the less than fair value (LTFV) investigation, a previous administrative review, or any other information placed on the record.

Under section 782(c) of the Act, a respondent has a responsibility not only to notify the Department if it is unable to provide requested information, but also to provide a "full explanation and suggested alternative forms." SICC and Jiangsu failed to respond to our requests for information, thereby failing to comply with this provision of the statute. Therefore, we determine these respondents failed to cooperate to the best of their ability, making the use of an adverse inference appropriate. In this proceeding, in accordance with Department practice, as adverse facts available we have preliminarily assigned SICC, Jiangsu and all other exporters subject to the PRC-wide rate, the petition rate of 243.40 percent, which is the PRC-wide rate established in the LTFV investigation, and the highest dumping margin determined in any segment of this proceeding. *See* Fresh Garlic From the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review, 64 FR 39115 (July 21, 1999). The Department's practice when selecting an adverse rate from among the possible sources of information is to ensure that the margin is sufficiently adverse "as to effectuate the purpose of the facts available role to induce respondents to provide the Department with complete and accurate information in a timely manner." *See* Static Random Access Memory Semiconductors from Taiwan; Final Determination of Sales at Less than Fair Value, 63 FR 8909, 8932 (February 23, 1998). The Department also considers the extent to which a party may benefit from its own lack of cooperation in selecting a rate. *See* Roller Chain, Other than Bicycle, from Japan; Notice of Final Results and Partial Recission of Antidumping Duty Administrative Review, 62 FR 60472, 60477 (November 10, 1997). It is reasonable to assume that if SICC and Jiangsu could have demonstrated that their actual dumping margins were lower than the PRC-wide rate established in the LTFV investigation, they would have participated in this review and attempted to do so.

Section 776(c) of the Act provides that where the Department selects from among the facts otherwise available and relies on "secondary information," the Department shall, to the extent practicable, corroborate that information from independent sources reasonably at the Department's disposal. Secondary information is described in the SAA as "[i]nformation derived from the petition that gave rise to the investigation or review, the final determination concerning the subject merchandise, or any previous review under section 751 concerning the subject merchandise." *See* SAA at 870. The SAA states that "corroborate" means to determine that the information used has probative

value. *See id.* To corroborate secondary information, the Department will, to the extent practicable, examine the reliability and relevance of the information to be used. To examine the reliability of margins in the petition, we examine whether, based on available evidence, those margins reasonably reflect a level of dumping that may have occurred during the period of investigation by any firm, including those that did not provide us with usable information. This generally consists of examining, to the extent practicable, whether the significant elements used to derive the petition margins, or the resulting margins, are supported by independent sources. With respect to the relevance aspect of corroboration, the Department will consider information reasonably at its disposal as to whether there are circumstances that would render a margin not relevant: Where circumstances indicate that the selected margin may not be relevant, the Department will attempt to find a more appropriate basis for facts available. *See, e.g.,* Fresh Cut Flowers from Mexico; Final Results of Antidumping Duty Administrative Review, 61 FR 6812, 6814 (February 22, 1996) (where the Department disregarded the highest margin as best information available because the margin was based on another company's uncharacteristic business expense resulting in an unusually high margin).

For the initiation of the investigation, the petitioner alleged a dumping margin of 243.40 percent. *See* Initiation of Antidumping Duty Investigation; Sebacic Acid From the People's Republic of China, 58 FR 43339, 43340 (August 16, 1993). In the petition, the U.S. price was based on March 1993 price quotations obtained for sebacic acid from the PRC. The factors of production were valued, where possible, using publicly available published information for India. Where Indian values were not available, the petitioners used data from Pakistan, an appropriate surrogate country at a comparable level of economic development to the PRC. The petitioner relied on its own costs for two factors, steam and factory overhead. If we adjust the petitioner's normal value calculation by excluding steam cost and recalculate factory overhead, selling, general and administrative expenses and profit using the statistics in the Reserve Bank of India Bulletin (1992–1993), a publicly available and independent source used in other investigations of imports from the PRC, the adjusted normal value is comparable to the value calculated in the petition.

We find, therefore, for the purpose of these preliminary results that the PRC-wide margin established in the LTFV investigation is reliable. As there is no information on the record of this review that demonstrates that the rate selected is not an appropriate adverse facts available rate for the PRC-wide rate, we determine that this rate has probative value and, therefore, is an appropriate basis for facts otherwise available.

Export Price

For Tianjin and Guangdong, we calculated export price (EP), in accordance with section 772(a) of the Act, because the subject merchandise was sold directly to unaffiliated customers in the United States prior to importation and because constructed export price (CEP) methodology was not otherwise warranted based on the facts of record. We calculated EP based on packed CIF prices to the first unaffiliated purchaser in the United States. Where appropriate, we made deductions from the starting price for foreign inland freight, foreign brokerage and handling, ocean freight, and marine insurance. With respect to ocean freight, although both respondents asserted that they used market-economy carriers for shipments of sebacic acid, we could not establish, based on the submitted information, that the freight charges the respondents paid reflect prices set by market-economy carriers. Accordingly, for ocean freight and other movement expenses, we based the charges on surrogate values. *See* "Normal Value" section for further discussion.

Normal Value

Section 773(c)(1) of the Act provides that the Department shall determine the normal value (NV) using a factors-of-production methodology if: (1) The merchandise is exported from an NME country, and (2) the information does not permit the calculation of NV using home-market prices, third-country prices, or constructed value (CV) under section 773(a) of the Act.

The Department has treated the PRC as an NME country in all previous antidumping cases. In accordance with section 771(18)(C)(i) of the Act, any determination that a foreign country is an NME country shall remain in effect until revoked by the administering authority. Furthermore, none of the parties to this proceeding has contested the PRC's NME status. Therefore, we treated the PRC as an NME country for purposes of this review and calculated NV by valuing the factors of production in a surrogate country.

Section 773(c)(4) of the Act and 19 CFR 351.408 direct us to select a surrogate country that is at a level of economic development comparable to that of the PRC. On the basis of per capita gross domestic product (GDP), the growth rate in per capita GDP, and the national distribution of labor, we find that India is at a level of economic development comparable to the PRC. *See* "Memorandum from Director, Office of Policy, to Office Director, AD/CVD Group I, Office 2," dated November 8, 1999.

Section 773(c)(4) of the Act also requires that, to the extent possible, the Department use a surrogate country that is a significant producer of merchandise comparable to sebacic acid. We determined in prior reviews of this order that India was a significant producer of comparable merchandise (*i.e.,* oxalic acid). *See* Sebacic Acid Fourth Review. For this review, we find that India was a producer of oxalic acid during the POR based on the Customs Service import data. We find that India fulfills both statutory requirements for use as the surrogate country and continue to use India as the surrogate country in this administrative review. We have used publicly available information relating to India, unless otherwise noted, to value the various factors of production.

For purposes of calculating NV, we valued PRC factors of production in accordance with section 773(c)(1) of the Act. Factors of production include, but are not limited to: (1) Hours of labor required; (2) quantities of raw materials employed; (3) amounts of energy and other utilities consumed; and (4) representative capital cost, including depreciation. In examining surrogate values, we selected, where possible, the publicly available value which was: (1) An average non-export value; (2) representative of a range of prices either within the POR or most contemporaneous with the POR; (3) product-specific; and (4) tax-exclusive. For a more detailed explanation of the methodology used in calculating the various surrogate values, see "Preliminary Results Factors of Production Valuation Memorandum," dated April 3, 2000. We adjusted all values not contemporaneous to the POR to reflect inflation up to the POR using wholesale price indices published by the International Monetary Fund. In accordance with this methodology, we valued the factors of production as follows:

During the POR, both Hengshui Dongfeng Chemical Factory (Hengshui) and Handan Fuyang Sebacic Acid Factory (Handan) purchased castor oil

from market economy suppliers and paid for the castor oil in a market economy currency. Hengshui also purchased castor oil from NME suppliers. For all purchases of castor oil, including castor oil Hengshui purchased from NME suppliers, we used the actual price the factories paid to the market economy suppliers to calculate the factors-based NV in accordance with 19 CFR 351.408(c)(1).

We valued castor seed using 1998 price data from the Solvent Extractors Association of India provided by the petitioner in its January 24, 2000, submission. For macropore resin, we used the value for activated carbon because the Department determined in previous reviews that the valuations of these inputs are interchangeable. *See* Sebacic Acid From the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review, 63 FR 17367, 17369 (April 9, 1998) (Sebacic Acid Third Review). Consistent with our methodology used in the fourth review of this proceeding, we valued activated carbon using public price quotes obtained from Indian companies. *See* Sebacic Acid Fourth Review at 69506. For caustic soda, cresol, phenol, sulfuric acid, and zinc oxide, we used published market prices reported in the Chemical Weekly. For caustic soda and sulfuric acid, because price quotes reported in Chemical Weekly are for chemicals with a 100 percent concentration level, we made chemical purity adjustments according to the particular concentration levels of caustic soda and sulfuric acid used by the respondents. For sodium chloride (also referred to as sodium chlorite or vacuum salt), we used Indian import values from the Monthly Statistics of the Foreign Trade of India (Monthly Statistics) for the period April 1997 through March 1998.

Where appropriate, we adjusted the values reported in the Chemical Weekly to exclude sales and excise taxes. We made further adjustments to account for freight costs between the suppliers' buildings and the respondents' sebacic acid manufacturing facilities.

In accordance with our practice, for inputs for which we used CIF import values from India, we calculated a surrogate freight cost using the shorter of the reported distances either from the closest PRC ocean port to the factory or from the domestic supplier to the factory. *See* Final Determination of Sales at Less Than Fair Value: Certain Cut-to-Length Carbon Steel Plate From the People's Republic of China, 62 FR 61964, 61977 (November 20, 1997) and the Court of Appeals for the Federal Circuit's decision in *Sigma Corp.* v. *United States*, 117 F.3d 1401 (Fed. Cir. 1997).

We valued labor based on a regression-based wage rate in accordance with 19 CFR 351.408(c)(3).

To value electricity, we used the average rate applicable to medium industrial users throughout India as obtained from the "Our India" website (http://www.ourindia.com/power.htm) compiled by the Indian Industrial and Management Services and submitted by the petitioner on January 24, 2000. We based the value of steam coal on April 1997 through March 1998 import values from the Monthly Statistics.

We based our calculation of factory overhead, selling, general and administrative (SG&A) expenses, and profit on data contained in the April 1995 Reserve Bank of India Bulletin for the Indian metals and chemicals industries. To value factory overhead, we summed those components which pertain to overhead expenses and divided them by the sum of those components pertaining to the cost of manufacturing. We multiplied this factory overhead rate by the cost of manufacturing divided by one minus the factory overhead rate. Using the same source, we also calculated the SG&A rate as a percentage of the cost of manufacturing. We calculated profit as a percentage of the cost of production (*i.e.*, materials, energy, labor, factory overhead, and SG&A).

To value plastic and woven bags, we used import values from the Monthly Statistics. For jumbo bag valuation, we used a value from Monthly Statistics as found in the Department's Index of Factor Values for Use in Antidumping Duty Investigations Involving Products from the People's Republic of China (Index of Factor Values) found on the Department's website (http://www.ia.ita.doc.gov/factorv/prc). Additionally, we adjusted these values to account for freight costs incurred between the suppliers and sebacic acid producers.

In valuing foreign inland trucking freight, we relied upon price quotes obtained by the Department from Indian truck freight companies in November 1999; for foreign inland rail rates the Department relied upon data from Certain Helical Spring Lock Washers from the People's Republic of China: Final Results of Antidumping Duty Administrative Review, 64 FR 13401 (March 18, 1999). To value ocean freight, we used a price quote from Maersk Inc., for merchandise comparable to sebacic acid (*i.e.*, oxalic acid). For marine insurance, we used the June 1998 marine insurance data collected for Tapered Roller Bearings and Parts Thereof, Finished and Unfinished, From the People's Republic of China; Final Results of 1996–97 Antidumping Duty Administrative Review and New Shipper Review and Determination Not To Revoke Order in Part, 63 FR 63842 (November 17, 1998). For foreign brokerage and handling expenses, we used public information reported in the antidumping duty investigations of sulfur dyes and stainless steel wire rod from India, respectively. *See* Final Determination of Sales at Less Than Fair Value: Sulfur Dyes, Including Vat Dyes from India , 58 FR 11835 (March 1, 1993); Certain Stainless Steel Wire Rod From India: Preliminary Results of Antidumping Duty Administrative and New Shipper Reviews, 63 FR 48184 (September 9, 1998).

Consistent with the methodology employed in Sebacic Acid Fourth Review, we have determined that fatty acid, glycerine, and castor seed cake (when castor oil is self-produced) are by-products. Because they are by-products, we subtracted the sales revenue of fatty acid, glycerine, and, where applicable, castor seed cake, from the estimated production costs of sebacic acid. This treatment of by-products is also consistent with generally accepted accounting principles. *See* Cost Accounting: A Managerial Emphasis (1991) at pages 539–544. To value fatty acid and glycerine, we used prices published in Chemical Weekly. We valued castor seed cake using market prices quoted in The Economic Times of India (Mumbai) for certain months in 1997.

We also allocated a by-product credit for glycerine to the production cost for the co-product capryl alcohol. We deducted a by-product credit for glycerine from sebacic acid based on the ratio of the value of sebacic acid to the total value of both sebacic acid and capryl alcohol.

Consistent with the methodology employed in the previous administrative review, we have determined that capryl alcohol is a co-product and have allocated the factor inputs based on the relative quantity of output of this product and sebacic acid. Additionally, we have used the production times necessary to complete each production stage of sebacic acid as a basis for allocating the amount of labor, energy usage, and factory overhead among the co-product(s). This treatment of co-products is consistent with generally accepted accounting principles. *See* Cost Accounting: A Managerial Emphasis (1991) at pages 528–533. To value capryl alcohol, consistent with our methodology from

the previous administrative review, we used POR market prices reported in the Chemical Weekly and adjusted the prices for sales and excise taxes.

Preliminary Results of Review

We preliminarily determine that the following dumping margins exist for the period July 1, 1998, through June 30, 1999:

Manufacturer/exporter	Margin (percent)
Tianjin Chemicals I/E Corp	0.82
Guangdong Chemicals I/E Corp	7.51
PRC-Wide Rate	243.40

Interested parties may request a hearing within 30 days of the publication of this notice. *See* 19 CFR 351.310(c). Any hearing, if requested, will be held 44 days after the date of the publication of this notice or the first workday thereafter. Interested parties may submit case briefs within 30 days of publication. Rebuttal briefs, limited to issues raised in the case briefs, may be filed no later than 35 days after the date of publication. Parties who submit case briefs or rebuttal briefs in this proceeding are requested to submit with each argument (1) a statement of the issue and (2) a brief summary of the argument. Parties are also encouraged to provide a summary of the arguments not to exceed five pages and a table of statutes, regulations, and cases cited.

The Department will subsequently issue a notice of the final results of this administrative review which will include the results of its analysis of issues raised in any such written briefs no later than 120 days after the date of publication of this notice.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. We have calculated an importer-specific assessment rate based on the ratio of the total amount of antidumping duties calculated for the examined sales to the total entered value of the examined sales. This rate will be assessed uniformly on all entries of that particular importer made during the POR. The Department will issue appraisement instructions directly to the Customs Service.

Furthermore, the following cash deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(1) of the Act: (1) For the reviewed companies named above which have separate rates (Tianjin and Guangdong), the cash deposit rates will be the rates for those firms established in the final results of this administrative review; (2) for companies previously found to be entitled to a separate rate and for which no review was requested, the cash deposit rates will be the rate established in the most recent review of that company; (3) for all other PRC exporters of subject merchandise, the cash deposit rates will be the PRC country-wide rate indicated above; and (4) the cash deposit rate for non-PRC exporters of subject merchandise from the PRC will be the rate applicable to the PRC supplier of that exporter. These deposit rates, when imposed, shall remain in effect until publication of the final results of the next administrative review.

Notification of Interested Parties

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This determination is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: April 3, 2000.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

International Trade Administration

[A–588–054 and A–588–604]

Tapered Roller Bearings, Four Inches or Less in Outside Diameter, and Components Thereof, From Japan, and Tapered Roller Bearings and Parts Thereof, Finished and Unfinished, From Japan: Final Court Decisions and Amended Final Results of Antidumping Duty Administrative Reviews

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of final court decisions and amended final results of antidumping duty administrative reviews.

SUMMARY: On November 7, 1996, the Department of Commerce (the Department) published the final results of its administrative reviews of the antidumping duty order on tapered roller bearings (TRBs) and parts thereof, finished and unfinished, from Japan (A–588–604), and the antidumping finding on TRBs, four inches or less in outside diameter, and components thereof, from Japan (A–588–054) for the period October 1, 1992 through September 30, 1993. See Tapered Roller Bearings and Parts Thereof, Finished and Unfinished, From Japan and Tapered Roller Bearings, Four Inches or Less in Outside Diameter, and Components Thereof, From Japan; Final Results of Antidumping Duty Administrative Reviews and Revocation in Part of an Antidumping Finding, 61 FR 57629 (November 7, 1996) (1992–93 TRBs from Japan). Subsequent to our publication of these final results, parties to the proceedings challenged certain aspects of our final results before the United States Court of International Trade (the CIT) and; in certain instances, before the United States Court of Appeals for the Federal Circuit (the Federal Circuit).

The CIT recently affirmed final remand results with respect to the 1992–93 final results. As there are now final and conclusive court decisions with respect to litigation for these parties, we are hereby amending our final results of review and will subsequently instruct Customs to liquidate entries subject to these reviews.

EFFECTIVE DATE: April 10, 2000.

FOR FURTHER INFORMATION CONTACT: Deborah Scott or Robert James, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; telephone (202) 482–2657 or (202) 482–0649, respectively.

SUPPLEMENTARY INFORMATION:

Background

Below is a summary of the litigation for the 1992–93 final results for which the CIT and Federal Circuit have issued final and conclusive decisions.

On November 7, 1996, we published in the **Federal Register** our notice of the final results of administrative reviews for the 1992–93 period of review (POR) for 16 manufacturers/resellers/exporters (*see 1992–93 TRBs from Japan*). Subsequent to the publication of these final results, the petitioner (The Timken Co. (Timken)) and two respondents, NSK Ltd. (NSK), and NTN Corporation (NTN), challenged various aspects of our final results before the CIT. (*See* CIT

Ct. Nos. 96–12–02686, 96–12–02730, and 96–12–02740, which were consolidated into Consolidated Court No. 96–12–02686.) The CIT has issued decisions with respect to this litigation which are now final and conclusive.

The decisions issued by the CIT and Federal Circuit with respect to the Department's final results were as follows:

- *Timken* v. *U.S.*, 989 F. Supp. 234 (CIT 1997). The CIT remanded the case and ordered the Department to: (1) treat NTN's home market discounts and NSK's return rebates, post-sales price adjustments (PSPAs), lump-sum PSPAs, and stock transfer commissions as direct expenses; (2) investigate possible dumping of relevant Honda TRB sales during the period April 1, 1993 through March 31, 1997 and, upon a determination that Honda's dumping margin has been zero or *de minimis* for this period and pursuant to a request for revocation by Honda, revoke the antidumping order with respect to Honda; (3) exclude any zero-priced sample sales from NSK's sales database; (4) recalculate the below-cost sales for NSK using the COP database submitted by NSK's related supplier of inputs; (5) (a) explain the circumstances in which it treats related-party commissions as intra-company transfers when it applies its test for determining whether a circumstance-of-sale adjustment should be made to foreign market value (FMV) for commissions, (b) explain conflicting statements as to whether NTN's commission payments were included in or excluded from indirect selling expenses for exporter's sales price (ESP) transactions, and (c) reconsider its treatment of the commission payments to NTN's related U.S. affiliate; (6) reconsider its treatment of NTN's U.S. and home market selling expenses with respect to level of trade; and (7) allow NTN's downward adjustment to U.S. indirect selling expenses for interest incurred when financing antidumping duty cash deposits.
- *Timken* v. *U.S.*, 46 F. Supp. 2d 1052 (CIT 1999). The CIT affirmed the Department's remand results and dismissed the litigation for Consolidated Court No. 96–12–02686.
- *Timken* v. *U.S.*, 1 F. Supp. 2d 1390 (CIT 1998). The CIT granted the Department's and Honda's motions for reconsideration of the Honda issue and set aside the portions of its decision in the 96–12–02686 litigation ordering the Department to investigate possible dumping by Honda during the 1993 through 1997 period. The CIT thereby affirmed the Department's revocation of Honda as described in 1992–93 TRBs from Japan.
- *NTN* v. *U.S.*, No. 99–1461 (Fed. Cir. November 5, 1999). Pursuant to NTN's voluntary motion to dismiss, the Federal Circuit dismissed NTN's appeal of the CIT's decisions in the 96–12–02686 litigation.

As there are now final and conclusive court decisions with respect to the 96–12–02686 litigation, we are amending our final results of review for NSK and NTN based on our recalculation of NSK's and NTN's rates pursuant to the remand. The amended final results margins for NSK are 11.42 percent in the A–588–054 review and 10.28 percent in the A–588–604 review. The amended final results margin for NTN in the A–588–604 review is 16.55 percent.[1] We will issue instructions to Customs to liquidate entries of subject merchandise made by NSK and NTN during this period pursuant to these amended final results.

Since the CIT affirmed the Department's revocation of Honda, we will issue instructions to Customs to liquidate entries of subject merchandise exported by Honda as described in 1992–93 TRBs from Japan at 57652.

In addition, as we have not amended the margins of any of the remaining manufacturers/resellers/exporters subject to the 1992–93 administrative reviews of TRBs from Japan, we will issue instructions to Customs to liquidate entries of subject merchandise based on the rates published in 1992–93 TRBs from Japan.

Amendment to Final Determinations

Pursuant to 19 U.S.C. 1516(f), we are now amending the final results of the 1992–93 administrative reviews of the antidumping finding and duty order on TRBs from Japan. The amended weighted-average margins are:

Manufacturer/exporter	Margin (percent)
For the A–588–054 finding:	
NSK	11.42
For the A–588–604 duty order:	
NSK	10.28
NTN	16.55

Accordingly, the Department will determine and Customs will assess appropriate antidumping duties on entries of the subject merchandise made by firms covered by the review of the period listed above. The Department will issue appraisement instructions directly to Customs.

[1] The A–588–054 antidumping finding does not cover TRBs manufactured by NTN.

Dated: March 27, 2000.

Robert LaRussa,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[C–580–818]

Certain Cold-Rolled and Corrosion-Resistant Carbon Steel Flat Products From Korea: Final Results of Expedited Sunset Reviews

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Certain cold-rolled and corrosion-resistant carbon steel flat products from Korea; final results of expedited sunset reviews.

SUMMARY: On September 1, 1999, the Department of Commerce ("the Department") initiated sunset reviews of the countervailing duty orders on certain cold-rolled and corrosion-resistant carbon steel flat products from Korea (64 FR 47767) pursuant to section 751(c) of the Tariff Act of 1930, as amended ("the Act"). On the basis of a notice of intent to participate and adequate substantive comments filed on behalf of domestic interested parties in each of these reviews, as well as inadequate response from respondent interested parties, we determined to conduct expedited sunset reviews. Based on our analysis of the substantive comments received, we find that revocation of the countervailing duty orders would be likely to lead to continuation or recurrence of a countervailable subsidy. The net countervailable subsidy rates are listed in the Final Results of Review section of this notice.

EFFECTIVE DATE: April 10, 2000.

FOR FURTHER INFORMATION CONTACT: Martha V. Douthit or Melissa G. Skinner, Office of Policy for Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street & Constitution Avenue, NW, Washington, DC 20230; telephone: (202) 482–5050 or (202) 482–1560, respectively.

SUPPLEMENTARY INFORMATION:

Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended ("the Act"), are references to the provisions effective January 1, 1995,

the effective date of the amendments made to the Act by the Uruguay Round Agreements Act ("URAA"). In addition, unless otherwise indicated, all citations to the Department of Commerce's ("the Department's") regulations are to 19 CFR part 351 (1999). Guidance on methodological or analytical issues relevant to the Department's conduct of sunset reviews is set forth in the Department's Policy Bulletin 98:3—*Policies Regarding the Conduct of Five-year ("Sunset") Reviews of Antidumping and Countervailing Duty Orders; Policy Bulletin*, 63 FR 18871 (April 16, 1998) ("*Sunset Policy Bulletin*").

Background

On September 1, 1999, the Department initiated sunset reviews of the countervailing duty orders on certain cold-rolled and corrosion-resistant carbon steel flat products from Korea (64 FR 47767), pursuant to section 751(c) of the Act. We invited parties to comment. On the basis of a notice on intent to participate and adequate substantive responses filed on behalf of domestic interested parties in both reviews, and inadequate response (in these cases no response) from respondent interested parties, we determined to conduct expedited (120-day) sunset reviews, in accordance with 19 CFR 351.218(e)(1)(ii)(C). The Department has conducted these sunset reviews in accordance with sections 751 and 752 of the Act.

In accordance with section 751(c)(5)(C)(v) of the Act, the Department may treat a review as extraordinarily complicated if it is a review of a transition order (*i.e.*, an order in effect on January 1, 1995). These reviews concern transition orders within the meaning of section 751(c)(6)(C)(i) of the Act. Therefore, on December 22, 1999, the Department determined the sunset reviews of the countervailing duty orders on certain cold-rolled and corrosion-resistant carbon steel flat products from Korea to be extraordinarily complicated, and, extended the time limit for completion of the final results of these reviews until not later than March 29, 2000, in accordance with section 751(c)(5)(B) of the Act.[1]

Scope of Review

The products covered by these orders are certain cold-rolled and corrosion-resistant carbon steel flat products as described below. Although the Harmonized Tariff Schedule of the United States ("HTS") subheadings are provided for convenience and customs purposes, our written descriptions of the scope of these proceedings are dispositive.

Certain Cold-Rolled Carbon Steel Flat Products

The products covered by this order include cold-rolled (cold-reduced) carbon steel flat-rolled products, of rectangular shape, neither clad, plated nor coated with metal, whether or not painted, varnished or coated with plastics or other nonmetallic substances, in coils (whether or not in successively superimposed layers) and of a width of 0.5 inch or greater, or in straight lengths which, if of a thickness less than 4.75 millimeters, are of a width of 0.5 inch or greater and which measures at least 10 times the thickness or if of a thickness of 4.75 millimeters or more are of a width which exceeds 150 millimeters and measures at least twice the thickness, as currently classifiable in the HTS under item numbers 7209.11.0000, 7209.12.0030, 7209.12.0090, 7209.13.0030, 7209.13.0090, 7209.14.0030, 7209.14.0090, 7209.21.0000, 7209.22.0000, 7209.23.0000, 7209.24.1000, 7209.24.5000, 7209.31.0000, 7209.32.0000, 7209.33.0000, 7209.34.0000, 7209.41.0000, 7209.42.0000, 7209.43.0000, 7209.44.0000, 7209.90.0000, 7210.70.3000, 7210.90.9000, 7211.30.1030, 7211.30.1090, 7211.30.3000, 7211.30.5000, 7211.41.1000, 7211.41.3030, 7211.41.3090, 7211.41.5000, 7211.41.7030, 7211.41.7060, 7211.41.7090, 7211.49.1030, 7211.49.1090, 7211.49.3000, 7211.49.5030, 7211.49.5060, 7211.49.5090, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7217.11.1000, 7217.11.2000, 7217.11.3000, 7217.19.1000, 7217.19.5000, 7217.21.1000, 7217.29.1000, 7217.29.5000, 7217.31.1000, 7217.39.1000, and 7217.39.5000. Included in this order are flat-rolled products of nonrectangular cross-section where such cross-section is achieved subsequent to the rolling process (*i.e.*, products which have been "worked after rolling")—for example, products which have been bevelled or rounded at the edges. Excluded from this order is certain shadow mask steel, *i.e.*, aluminum-killed, cold-rolled steel coil that is open-coil annealed, has a carbon content of less than 0.002 percent, is of 0.003 to 0.012 inch in thickness, 15 to 30 inches in width, and has an ultra flat, isotropic surface.

Certain Corrosion-Resistant Carbon Steel Flat Products

The merchandise covered by this order includes flat-rolled carbon steel products, of rectangular shape, either clad, plated, or coated with corrosion-resistant metals such as zinc, aluminum, or zinc-, aluminum-, nickel- or iron-based alloys, whether or not corrugated or painted, varnished or coated with plastics or other nonmetallic substances in addition to the metallic coating, in coils (whether or not in successively superimposed layers) and of a width of 0.5 inch or greater, or in straight lengths which, if of a thickness less than 4.75 millimeters, are of a width of 0.5 inch or greater and which measures at least 10 times the thickness or if of a thickness of 4.75 millimeters or more are of a width which exceeds 150 millimeters and measures at least twice the thickness, as currently classifiable in the HTS under item numbers 7210.31.0000, 7210.39.0000, 7210.41.0000, 7210.49.0030, 7210.49.0090, 7210.60.0000, 7210.70.6030, 7210.70.6060, 7210.70.6090, 7210.90.1000, 7210.90.6000, 7210.90.9000, 7212.21.0000, 7212.29.0000, 7212.30.1030, 7212.30.1090, 7212.30.3000, 7212.30.5000, 7212.40.1000, 7212.40.5000, 7212.50.0000, 7212.60.0000, 7215.90.1000, 7215.90.5000, 7217.12.1000, 7217.13.1000, 7217.19.1000, 7217.19.5000, 7217.22.5000, 7217.23.5000, 7217.29.1000, 7217.29.5000, 7217.32.5000, 7217.33.5000, 7217.39.1000, and 7217.39.5000. Included in this order are flat-rolled products of nonrectangular cross-section where such cross-section is achieved subsequent to the rolling process (*i.e.*, products which have been "worked after rolling")— for example, products which have been bevelled or rounded at the edges. Excluded from this order are flat-rolled steel products either plated or coated with tin, lead, chromium, chromium oxides, both tin and lead ("terne plate"), or both chromium and chromium oxides ("tin-free steel"), whether or not painted, varnished or coated with plastics or other nonmetallic substances in addition to the metallic coating. Excluded from this order are clad products in straight lengths of 0.1875 inch or more in composite thickness and of a width which exceeds 150 millimeters and measures at least twice the thickness. Also excluded from this order are certain clad stainless flat-rolled

[1] *See Extension of Time Limit for Final Results of Five-Year Reviews*, 64 FR 71726 (December 22, 1999).

products, which are three-layered corrosion-resistant carbon steel flat-rolled products less than 4.75 millimeters in composite thickness that consist of a carbon steel flat-rolled product clad on both sides with stainless steel in a 20%–60%–20% ratio.

Analysis of Comments Received

All issues raised in the substantive responses by parties to these sunset reviews are addressed in the "Issues and Decision Memorandum" ("Decision Memo") from Jeffrey A. May, Director, Office of Policy, Import Administration, to Robert S. LaRussa, Assistant Secretary for Import Administration, dated March 29, 2000, which is hereby adopted by this notice. The issues discussed in the attached Decision Memo include the likelihood of the continuation or recurrence of a countervailable subsidy, the net countervailable subsidy likely to prevail were the orders revoked, and the nature of the subsidy. Parties can find a complete discussion of all issues raised in these reviews and the corresponding recommendations in this public memorandum which is on file in the Department's Central Record Units, Room B–099.

In addition, a complete version of the Decision Memo can be accessed directly on the Web at www.ita.doc.gov/import_admin/records/frn. The paper copy and electronic version of the Decision Memo are identical in content.

Final Results of Reviews

As a result of these reviews, the Department finds that revocation of the countervailing duty orders would likely lead to continuation or recurrence of a countervailable subsidy at the rates listed below:

Producers/exporters/product	Net countervailable subsidy (percent)
Cold-rolled carbon steel flat products: All Korean producers/exporters	3.95
Corrosion-resistant carbon steel flat products: All Korean producers/exporters	2.69

Nature of the Subsidy

In the *Sunset Policy Bulletin*, the Department states that, consistent with section 752(a)(6) of the Act, the Department will provide to the Commission information concerning the nature of the subsidy, and whether the subsidy is a subsidy described in Article 3 or Article 6.1 of the Subsidies Agreement. Because the benefits received in some of the programs were contingent on exports, these programs fall within the definition of an export subsidy under Article 3.1(a) of the Subsidies Agreement. The remaining programs, outside the export subsidy definition under Article 3.1(a) could be found to be inconsistent with Article 6 if the net countervailable subsidy exceeds 5 percent, as measured in accordance with Annex IV of the Subsidies Agreement. The Department, however, has no information with which to calculate whether the net countervailable subsidy exceeds 5 percent, as measured in accordance with Annex IV of the Subsidies Agreement, nor do we believe it appropriate to attempt such a calculation in the course of a sunset review. Therefore, we are providing the Commission the following program descriptions.

(1) Government Equity Infusions in Pohang Iron & Steel Company, Ltd.

Government equity infusions bestow a countervailable benefit when they occur on terms inconsistent with commercial considerations. *See* 19 U.S.C. 1677(5)(A)(1988). In the investigation, the Department determined subsidy rates of 0.13 percent and 0.07 percent for certain cold-rolled carbon steel flat products and certain corrosion-resistant carbon steel flat product, respectively.

(2) Loans Inconsistent With Commercial Considerations/Preferential Access to Foreign Loans

This benefit is conferred through a disproportionately high volume of loans to the steel industry at rates that are substantially below Korea's generally available commercial interest rates. In the investigation, the Department determined subsidy rates of 2.94 percent and 1.83 percent for certain cold-rolled and certain corrosion-resistant carbon steel flat products, respectively.[2]

(3) Government Infrastructure Assistance for POSCO's Integrated Steel Mill at Kwangyang Bay

The Korean government's infrastructure development at Kwangyang Bay constituted a specific and countervailable subsidy to POSCO because POSCO was found to be the predominant user of the infrastructure. In the investigation, the Department determined subsidy rates of 0.58 percent and 0.30 percent for certain cold-rolled and certain corrosion-resistant carbon steel flat products, respectively.

(4) Dockyard Fees

In the investigation, we determined that POSCO enjoys the use of 15 berths in the Kwangyang Bay port facility at no charge. The GOK normally charges a user fee, or dockyard fee, for the use of berths at all of Korea's ports. Thus, we determined the free use of 15 berths by POSCO in the Kwangyang Bay Industrial Estate constitutes a countervailable benefit. The Department determined subsidy rates of 0.01 percent and less than 0.005 percent for certain cold-rolled and certain corrosion-resistant carbon steel flat products, respectively.

(5) Reserve for Export Loss

Under Article 22 of the Tax Exemption and Reduction Control Act (TERCL), a corporation engaged in export activities can establish a reserve amounting to the lesser of one percent of foreign exchange earnings or 50 percent of net income for the respective tax year. This program confers a benefit that constitutes an export subsidy because it provides a deferment, contingent upon export performance, of direct taxes. In the period of investigation, the Department determined that Dongbu, POSCO, and Union received benefits under this program. In the investigation, the Department determined subsidy rates of 0.03 percent, and 0.06 percent for certain cold-rolled and certain corrosion-resistant carbon steel flat products, respectively.[3]

(6) Reserve for Overseas Market Development

This program operates in a similar fashion to Article 22 of the TERCL described above. This program constitutes an export subsidy because benefits under the program are contingent upon export performance. In the investigation, the Department determined subsidy rates of 0.04 percent and 0.09 percent for certain cold-rolled and certain corrosion-resistant carbon steel flat products, respectively.

[2] On October 1, 1999, the Court of Appeals for the Federal Circuit issued an opinion affirming-in-part and reversing-in-part the Department's determination in this investigation. *AK Steel Corp. et al.* v. *United States* 192 F. 3d 1367 (CAFC Oct. 1, 1999). In that litigation, the court reviewed the Department's determination with respect to the following programs: foreign and domestic loans and government infrastructure assistance for POSCO's integrated steel mill at Kwangyang Bay including POSCO's exemption from the payment of dockyard fees. The case has been remanded to the Court of International Trade. Thus, the CAFC's decision is not yet final and conclusive.

[3] *See Preliminary Affirmative Countervailing Duty Determinations and Alignment of Final Countervailing Duty Determinations with Final Antidumping Duty Determinations: Certain Steel Products from Korea*, 57 FR 57761 (December 7, 1992)

(7) Unlimited Deduction of Overseas Entertainment Expense

Under Article 18–2 of the Corporation Tax Act and supporting legislation, entertainment expenses for domestic clients and foreign clients are eligible to be deducted from taxable income. The amount that can be deducted for domestic entertainment expenses is subject to a ceiling according to an established formula and depending on the amount of any overseas entertainment expenses claimed. There is no cap on overseas entertainment expenses. Because entertainment expense deductions are unlimited only for overseas clients, this program confers benefits which constitute export subsidies, to the extent that the overseas expenses claimed are greater than those which would have been allowed using the domestic cap formula. In the investigation, the Department determined a subsidy rate of less than 0.005 percent for both certain cold-rolled and certain corrosion-resistant carbon steel flat products.

(7) Reserve for Investment

This reserve fund program operates in the same manner as reserves for export loss and overseas market development described above. However, because this program provides benefits only to those industries that use certain production facilities outside of metropolitan Seoul, this program is a regional subsidy. In the investigation, the Department determined subsidy rates of 0.03 percent and 0.02 percent for certain cold-rolled and certain corrosion-resistant carbon steel flat products, respectively.

(8) Duty Drawback

The Government of Korea establishes an authorized loss rate for raw materials used in the manufacture of exported goods. Duty drawback includes the amount of duty remitted on the authorized loss or wastage for the raw materials. Duty drawback for loss or wastage only becomes countervailable when the allowance for this loss or wastage is unreasonable or excessive. Here, we found the duty drawback was not excessive and, therefore, was not countervailable with regard to POSCO. However, Union Steel was found to benefit from this program. The Department, therefore, calculated estimated net subsidies of 0.01 percent for both certain cold-rolled and corrosion carbon steel flat products.

(9) Preferential Utility Rates

In the investigation, the Department determined that countervailable benefits were provided to the steel industry with respect to certain discounts applied to electricity charges for certain firms. The Department determined subsidy rates of 0.03 percent and 0.02 percent for certain cold-rolled and certain corrosion-resistant carbon steel flat product, respectively.

(10) Short-Term Export Financing

The Department determined that during the period of investigation, Pohang Coated Steel Company ("POCOS"), was the only respondent to receive short-term loans contingent on exports. The calculated estimated net *ad valorem* subsidies was less than 0.005 percent for both certain cold-rolled and corrosion-resistant carbon steel flat products.

This notice also serves as the only reminder to parties subject to administrative protective orders ("APO") of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305 of the Department's regulations. Timely notification of the return or destruction of APO materials or conversions to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

We are issuing and publishing these determinations and notice in accordance with sections section 751(c), 752, and 777(i) of the Act.

Dated: March 29, 2000.

Joseph A. Spetrini,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 040300E]

New England Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The New England Fishery Management Council (Council) will hold public meetings of its Herring Oversight Committee, the joint Council/Atlantic States Marine Fisheries Commission (ASMFC) Herring Advisory Panel and the Groundfish Oversight Committee in April, 2000. Recommendations from the committees will be brought to the full Council for formal consideration and action, if appropriate.

DATES: See **SUPPLEMENTARY INFORMATION** for specific dates and times.

ADDRESSES: The meetings will be held between April 24 and April 27, 2000. See **SUPPLEMENTARY INFORMATION** for specific dates and times.

FOR FURTHER INFORMATION CONTACT: Paul J. Howard, Executive Director, New England Fishery Management Council; (978) 465–0492.

SUPPLEMENTARY INFORMATION:

Meeting Dates and Agendas

Monday, April 24, 2000, 10:00 a.m.—Groundfish Oversight Committee

Location: Yoken's Conference Center, Route 1, Portsmouth NH 03801; telephone: (603) 433–3338.

A Groundfish Oversight Committee meeting is scheduled for April 11, 2000. Should the Committee need additional time to continue its discussions, another meeting will be held on April 24, 2000. Contact the Council offices after April 12 to determine if this second meeting is necessary. If held, at this meeting, the committee will continue development of management options for Amendment 13 to the Northeast Multispecies Fishery Management Plan (FMP). Agenda items include discussion of guidance received from the full Council and NMFS concerning overfishing definitions and control rules. Current overfishing definitions and control rules for the multispecies complex will be reviewed and the assumptions and policy decisions in these rules examined. The committee will determine the biological goals of the amendment in light of these discussions. The committee also will organize into subcommittees that will be tasked to develop specific management options for consideration by the full committee.

Wednesday, April 26, 2000, 10 a.m.—Joint Council/ASMFC Herring Advisory Panel Meeting

Location: Sheraton Ferncroft Hotel, 50 Ferncroft Road, Danvers, MA 01923; telephone: (978) 777–2500.

The Joint Advisory Panel will review the comments received from the public during the scoping process for a limited entry or controlled access system for the Atlantic Herring fishery. Based on this review, the advisors will recommend how to proceed in the development of such a system. The advisors will also discuss options for the protection of spawning herring and will recommend whether to make any revisions to the spawning restrictions contained in the ASMFC management plan, and whether to recommend spawning restrictions for

the Council's Atlantic Herring Fishery Management Plan. The advisors will discuss the impact of the total allowable catch on industry sectors and will determine what action, if any, should be recommended to insure the fixed gear sector has access to the fishery. The advisors will also discuss possible adjustments to the area specific total allowable catches, and may make recommendations for changes. The advisors will also elect a chair. The advisors may also discuss the annual specification process and may recommend how that process should proceed.

Thursday, April 27, 2000, 10 a.m.—Joint Council Herring Oversight Committee/ASMFC Atlantic Herring Section

Location: Sheraton Ferncroft Hotel, 50 Ferncroft Road, Danvers, MA 01923; telephone: (978) 777–2500.

The Committees will review the comments received from the public during the scoping process for a limited entry or controlled access system for the Atlantic Herring fishery. Based on this review, the Committees will decide how to proceed in the development of such a system, and will develop a schedule for a and provide initial direction to the Plan Development Team should they choose to continue development of a limited entry or controlled access system. The Committees will also discuss options for the protection of spawning herring and will decide whether to make any revisions to the spawning restrictions contained in the ASMFC management plan, and whether to recommend spawning restrictions for the Council's Atlantic Herring Fishery Management Plan. The Committees will discuss the impact of the total allowable catch on industry sectors and will determine what action, if any, should be taken to insure the fixed gear sector has access to the fishery. The Committees will also discuss possible adjustments to the area specific total allowable catches, and may make recommendations for changes. The Committee may also discuss the annual specification process and may provide direction to the Plan Development Team on how that process should proceed.

Although non-emergency issues not contained in this agenda may come before this Council for discussion, those issues may not be the subject of formal Council action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Paul J. Howard (see **ADDRESSES**) at least 5 days prior to the meeting dates.

Dated: April 4, 2000.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–F

COMMODITY FUTURES TRADING COMMISSION

Notice of the First Meeting of the Technology Advisory Committee

This is to give notice, pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. 2, 10(a)(2), and Section 101–6.1015(b) of the regulations promulgated thereunder, 41 CFR 101–6.1015(b), that the Commodity Futures Trading Commission's Technology Advisory Committee ("TAC") will conduct a public meeting to discuss current issues related to technology in the futures and option markets. The meeting will be held on April 25, 2000, from 1:00 p.m. to 4:00 p.m., in the first floor hearing room (Room 1000) of the Commission's Washington, D.C. headquarters, Three Lafayette Centre, 1155 21st Street, N.W., Washington, D.C. 20581. The agenda for the meeting will be posted on the Commission's website when finalized at http://www.cftc.gov.

The TAC was created by the Commodity Futures Trading Commission for the purpose of receiving advice and recommendations on issues arising out of technological innovation in the financial services marketplace. The purposes and objectives of the TAC are more fully set forth in its charter.

The meeting is open to the public. The Chairman of the TAC, Chairman William J. Rainer, is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the TAC should mail a copy of the statement prior to the meeting to the attention of: The Technology Advisory Committee, c/o Chairman William J. Rainer, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street, N.W., Washington, D.C. 20581. Members of the public who wish to make oral statements should also inform Chairman Rainer in writing at the foregoing address at least three business days before the meeting. Reasonable provision will be made, if time permits, for an oral presentation of no more than five minutes each in duration.

For further information contact De'Ana Dow, Legal Counsel to Chairman Rainer, at (202) 418–5038, or Marcia K. Blase, Legal Counsel to Commissioner Newsome, at (202) 418–5138.

Issued by the Commission in Washington, D.C. on April 5, 2000.

Jean A. Webb,

Secretary of the Commission.

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket No. 00–C0009]

B & B Amusements, Inc., a Corporation, and B & B Spectaculars, L.L.C., a Limited Liability Corporation; Provisional Acceptance of a Settlement Agreement and Order

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: It is the policy of the Commission to publish settlements which it provisionally accepts under the Consumer Product Safety Act in the Federal Register in accordance with the terms of 16 C.F.R. 1115.20(b). Published below is a provisionally-accepted

Settlement Agreement with B & B Amusements, Inc., a corporation, and B & B Spectaculars, L.L.C., a limited liability corporation.

DATES: Any interested person may ask the Commission not to accept this agreement or otherwise comment on its contents by filing a written request with the Office of the Secretary by April 25, 2000.

ADDRESSES: Persons wishing to comment on this Settlement Agreement should send written comments to the Comment 00–C0009, Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT: Dennis C. Kacoyanis, Trial Attorney, Office of Compliance and Enforcement, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 504–0626, 1346.

SUPPLEMENTARY INFORMATION: The text of the Agreement and Order appears below.

Dated: April 2, 2000.

Sadye E. Dunn,

Secretary.

Consent Order Agreement

1. This Consent Order Agreement (hereinafter, "Agreement"), entered between B&B Amusements, Inc. (hereinafter, "Respondent B & B Amusements"), a corporation, B&B Spectaculars, L.L.C., a limited liability corporation (hereinafter, "B&B Spectaculars") and the staff of the Consumer Product Safety Commission (hereinafter, "Commission") pursuant to the procedures set forth in section 1115.20(b) of the Commission's Procedures for Consent Order Agreements, 16 C.F.R. 1115.20(b), is a compromise resolution of the matter described herein, without a hearing or a determination of issues of law and fact.

I. The Parties

2. The "staff" is the staff on the Consumer Product Safety Commission, an independent regulatory commission of the United States established pursuant to section 4 of the CPSA, 15 U.S.C. 2053.

3. Respondent B&B Amusements, Inc. is a corporate organized and existing under the laws of the State of Arizona with its principal corporate offices located at 4491 South 4th Avenue, Yuma, AZ 85365. Respondent is the operator of the Himalaya amusement ride.

4. Respondent B&B Spectaculars, L.L.C. is a limited liability corporation organized and existing under the laws of the State of Oregon with its principal corporate offices located at 4491 South 4th Avenue, Yuma, AZ 85365. Respondent is the owner of the Himalaya amusement ride.

II. Staff's Allegations

5. The staff conducted an investigation of an incident that occurred on or about March 19, 1998 at the Travis County Livestock and Rodeo Show in Austin, TX involving the Himalaya amusement ride owned by Respondent B&B Spectaculars and operated by Respondent B&B Amusements. The incident resulted in the death of a female passenger and in injuries to two other passengers.

6. The staff alleges that the Himalaya amusement ride owned by Respondent B&B Spectaculars and operated by Respondent B&B Amusements contains a defect that creates a substantial risk of injury to the public because Respondents failed to properly maintain, inspect, and operate the ride at the time of the incident involving two injuries and one death.

III. Response of Respondents

7. Respondents deny the allegations set forth by the staff in paragraphs 5 and 6 above.

8. Respondents specifically deny that the Himalaya amusement ride owned by Respondent B&B Spectaculars and operated by Respondent B&B Amusements contains a defect that creates a substantial risk of injury to the public because Respondents failed to properly maintain, inspect, and operate the ride at the time of the incident involving two injuries and one death.

IV. Agreement of the Parties

9. The Commission has jurisdiction over this matter under the Consumer Product Safety Act (CPSA), 15 U.S.C. 2051 *et seq.*

10. Upon final acceptance by the Commission of this Consent Order Agreement, the Commission shall issue the attached Order incorporated herein by reference.

11. This Agreement is entered into for the purposes of settlement only and does not constitute an admission by Respondents or a determination by the Commission that the Himalaya amusement ride owned by Respondent B&B Spectaculars and operated by Respondent B&B Amusements contains a defect that creates a substantial risk of injury to the public because Respondents failed to properly maintain, inspect, and operate the ride at the time of the incident involving two injuries and one death.

12. Upon final acceptance of this Consent Order Agreement by the Commission, Respondents knowingly, voluntarily, and completely waive any rights they may have in this matter (a) to the issuance of a complaint; (b) to an administrative or judicial hearing; (c) to judicial review or other challenge or contest of the validity of the Commission's actions; (d) to a determination by the Commission as to whether Respondents failed to comply with the CPSA as aforesaid, (e) to a statement of findings of facts and conclusions of law; and (f) to any claims under the Equal Access to Justice Act.

13. For purposes of section 6(b) of the CPSA, 15 U.S.C. 2055(b), this matter shall be treated as if a complaint had issued, and the Commission may publicize the terms and conditions of this Consent Order Agreement.

14. Upon provisional acceptance of this Consent Order Agreement by the Commission, this Consent Order Agreement shall be placed on the public record and shall be published in the **Federal Register** in accordance with the procedures set forth in 16 CFR 1115.20(b)(4) and (b)(5). If the Commission does not receive any written request not to accept the Consent Order Agreement within 15 days, the Consent Order Agreement will be deemed finally accepted on the 20th day after the date it is published in the **Federal Register**.

15. This Consent Order Agreement is a Commission order issued under section 15 of the CPSA, 15 U.S.C. 2064.

16. A violation of the incorporated Consent Order Agreement is a prohibited act under section 19(a)(5) of the CPSA, 15 U.S.C. 2068(a)(5) and may subject Respondents to civil and/or criminal penalties pursuant to sections 20 and 21 of the CPSA, 15 U.S.C. 2069 and 2070.

17. Any interested person may bring an action pursuant to section 24 of the CPSA, 15 U.S.C. 2073 in any U.S. District Court for the district where the Respondents are found or are transacting business for the purpose of enforcing the Consent Order Agreement and/or obtaining appropriate injunctive relief.

18. The provisions of the Consent Order Agreement shall apply to Respondents and each of their successors and assigns.

19. Agreements, understandings, representations, or interpretations made outside of this Consent Order Agreement may not be used to vary or to contradict its terms.

Respondent B&B Amusements, Inc.

Dated: February 18, 2000.

Steven J. Merten III,

President, B&B Amusements, Inc., 4491 S. 4th Avenue, Yuma, AZ 85365.

Respondent B&B Spectaculars, L.L.C.

Dated: February 18, 2000.

Steven J. Merten III,

Partner, B&B Spectaculars, L.L.C., 4491 S. 4th Avenue, Yuma, AZ 85365.

Commission Staff

Alan H. Schoem,

Assistant Executive Director, Office of Compliance, Consumer Safety Commission, Washington, DC 20207–0001.

Eric L. Stone,

Director, Legal Division, Office of Compliance.

Dated: March 1, 2000.

Dennis C. Kacoyanis,

Trial Attorney, Legal Division, Office of Compliance.

Order

Upon consideration of the foregoing Consent Agreement entered into between Respondent B&B Amusements, Inc., a corporation, B&B Spectaculars, L.L.C., a limited liability corporation, and the staff of the Consumer Product Safety Commission; and the Commission having jurisdiction over the subject matter and the Respondents; and it appearing that the Consent Order Agreement is in the public interest,

I. *It Is Ordered that* the Consent Agreement be, and hereby is, accepted.

II. *It is Further Ordered that* Respondents will not operate the Himalaya amusement ride unless they take the actions set forth in sections III, IV, and V of this Order.

III. *It Is Further Ordered That* Respondents and each of their successors and assigns notify the Commission in writing at least 60 days prior to placing the Himpalay in service at each location in which Responsents intend to operate the Himalaya.

IV. *It Is Further Ordered That* Respondents and each of their successors and assigns allow the Commission or an entity acting on behalf of the Commission including, but not limited to state amusement ride safety inspectors and private amusement ride safety inspectors, to inspect the Himalaya prior to the ride being placed in service at each location in which Respondents intent to operate it.

V. *It Is Further Ordered That* Respondents and each of their successors and assigns comply with all manufacturer's recommendations and specifications including, but not limited to, parts, operation, inspection, secondary restraints, and maintenance of the Himalaya.

VI. *It Is Further Ordered That* Respondent B & B Spectaculars and each of its successors and assigns notify the Commission in writing at least 60 days prior to sale of all parts of the Himalaya. Such notice shall include the name(s), address(es), and telephone number(s) of the purchaser(s).

VII. *It Is Further Ordered* That Respondent B&B Spectaculars and each of its successors and assigns notify the Commission in writing at least 60 days prior to destroying and/or disposing of the Himalaya. Such notice shall include the name, address, and telephone number of the entity charged with destroying and/or disposing of the Himalaya and the location of the destruction and/or disposal.

VIII. *It Is Further Ordered That Respondents and each of their successors and assigns direct all required notices under the Consent Order Agreement to Alan Alan H. Schoem, Assistant Executive Director, Office of Compliance, U.S. Consumer Product Safety Commission, Washington, D.C. 20207–0001.*

Provisionally accepted and Provisional Order issued on the 3rd day of April, 2000.

By Order of the Commission.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355–01–M

DEPARTMENT OF DEFENSE

Office of the Secretary

TRICARE/The Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); Pharmacy Redesign Pilot Program

AGENCY: Office of the Secretary, DoD.

ACTION: Notice of two-site implementation of the Pharmacy Redesign Pilot Program.

SUMMARY: This notice is to advise interested parties of a two-site implementation of the Pharmacy Redesign Pilot Program for certain military health system (MHS) beneficiaries who are 65 years of age or older, pursuant to the requirements in the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999. Specifically, Section 723 of this act mandates the pharmacy redesign to incorporate private sector "best business practices" in providing pharmacy services in the MHS, including both military medical treatment facilities (MTFs) and the mail-order and retail pharmacy benefit under TRICARE. It is projected that participation in this pilot program will extend access to a system-wide drug benefit for approximately 6,000 over-age 65 DoD eligible beneficiaries that has not been available until now. In the past, Medicare-eligible MHS beneficiaries' access to pharmacy benefits has generally been limited to the MTFs; therefore, the purpose of this pharmacy redesign pilot program is to assess the feasibility and cost of a system-side pharmacy benefit for Medicare eligible MHS beneficiaries. The pilot program is limited to two sites where up to three thousand eligible beneficiaries will be enrolled at each site. A random selection process resulted in Fleming, Kentucky and Okeechobee, Florida as the pilot sites.

The pharmacy benefit under this demonstration will require an annual $200 enrollment fee. The TRICARE retail network pharmacies will provide up to a 30-day supply of medications for a 20% co-payment with each prescription. The beneficiaries will also have access to the National Mail-Order Pharmacy Program (NMOP) where quantities up to a 90-day supply will be dispensed for a flat fee of $8 for each prescription.

The pharmacy redesign pilot program is projected to last for three (3) years and will be evaluated by an independent entity outside the Department of Defense.

EFFECTIVE DATE: Enrollment in the demonstration is projected to begin by June 1, 2000 with Delivery of services by July 1, 2000.

FOR FURTHER INFORMATION CONTACT: CAPT Charles Hostettler, Office of the Assistant Secretary of Defense (Health Affairs), TRICARE Management Activity, (703) 681–1740.

SUPPLEMENTARY INFORMATION:

A. Background

In June 1998, the General Accounting Office (GAO) testified before the Subcommittee on Military Personnel, Committee on Armed Services, House of Representatives, that over the past several years, concern about the costs and quality of DoD's pharmacy benefit has surfaced. GAO recommended that DoD establish a more system-wide approach to managing its pharmacy benefit by establishing a uniform, incentive-based formula across its pharmacy programs. Furthermore, GAO recommended that a system-wide pharmacy benefit be granted to

Medicare-eligible retirees who are excluded from the contractor retail network and NMOP pharmacy systems.

B. Description of Project

In response to the June 1998 GAO report, the FY 1999 Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Pub. L. 105–261) directed DoD to develop a system-wide pharmacy redesign plan to and implement the system-wide redesigned benefit at two sites for Medicare-eligible beneficiaries.

An eligible beneficiary for the pharmacy redesign pilot program is a member or former member of the uniformed services as described in section 1074(b) of title 10; a dependent of the member described in section 1076(a)(2)(B) or 1076(b) of title 10; or a dependent of a member of the uniformed services who died while on active duty for a period of more than 30 days, who meets the following requirements: (a) 65 years of age or older, (b) entitled to Medicare Part A, (c) enrolled in Medicare Part B, (d) resides in an implementation area, and (e) the requirement to be enrolled in Medicare Part B shall not apply in the case of an individual who at the time of attaining the age of 65 lived within 100 miles of the catchment area of a military medical treatment facility.

The pharmacy redesign implementation will be evaluated by an independent entity outside the Department of Defense. The evaluation shall include: (a) an analysis of the cost of the pharmacy redesign implementation under TRICARE, and also to the eligible individuals who participate in the pilot program, (b) an assessment of he extent to which the implementation of such system satisfies the requirements of the eligible individuals for the health care services available under TRICARE, (c) an assessment of the effect, if any, on military medical readiness, (d) a description of the rate of participation, and (e) an evaluation of any other matters that the Department considers appropriate.

The DoD component responsible for the conduct of this project is the TRICARE Management Activity.

Dated: April 3, 2000.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, DoD.

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board

ACTION: Notice of advisory committee meetings.

SUMMARY: The Defense Science Board (DSB) Task Force on Unconventional Nuclear Warfare Defense will meet in closed session on April 25–26, 2000, at Sandia National Laboratories, Kirtland Air Force Base, Albuquerque, NM, and June 8–9, 2000, tentatively at Strategic Analysis, Inc., 3601 Wilson Boulevard, Suite 500, Arlington, VA. This Task Force will determine the adequacy of DoD's ability to detect, identify, respond, and prevent unconventional nuclear attacks by terrorists or subnational entities, and the appropriate role(s) and capability of DoD to provide protection against unconventional nuclear attacks in support of homeland defense.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition, Technology & Logistics on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings, the Defense Science Board Task Force will review and evaluate the Department's ability to provide information

In accordance with Section 10(d) of the Federal Advisory Committee Act, Public Law 92–463, as amended (5 U.S.C. App. II, (1994)), it has been determined that these Defense Science Board meetings, concern matters listed in 5 U.S.C. § 552b(c)(1) (1994), and that accordingly these meetings will be closed to the public.

Dated: April 3, 2000.

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

SUMMARY: The Leader, Information Management Group, Office of the Chief Information Officer, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before June 9, 2000.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Leader, Information Management Group, Office of the Chief Information Officer, publishes that notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g. new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5)

Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment.

The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology.

Dated: April 4, 2000.

Abstract: The National School-to-Work Office collects information from funded local partnerships to gather evidence on state and local progress in implementing School-to-Work systems. Data elements have included student, school, and employer involvement in School-to-Work; graduation and postsecondary transition rates for students; and funds leveraged by partnerships to sustain their School-to-Work systems. Information is used to provide an annual School-to-Work report to Congress, as well as to build state's capacity to collect and analyze information for their own system improvement purposes.

Requests for copies of the proposed information collection request may be accessed from *http://edicsweb.ed.gov*, or should be addressed to Vivian Reese, Department of Education, 400 Maryland Avenue, SW, Room 5624, Regional Office Building 3, Washington, D.C. 20202–4651. [Docket No. RP00–234–000]

CNG Transmission Corporation; Notice of Proposed Changes in FERC Gas Tariff

April 4, 2000.

Take notice that on March 31, 2000 CNG Transmission Corporation (CNG), tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheet, with an effective date of May 1, 2000:

Fifty-sixth Revised Sheet No. 32

CNG requests waiver of the filing requirements of Section 18.2 of the GT&C to relieve CNG of its obligation to make its next three quarterly stranded cost adjustment filings.

CNG states that the purpose of the rate filing is to submit CNG's quarterly revision of the Section 18.2.B Surcharge, effective for the three-month period commencing May 1, 2000. The charge for the quarter ending April 30, 2000 has been $0.0200 per Dt., as authorized by Commission order dated January 18, 2000 in Docket No. RP00–148–000. CNG's proposed section 18.2.B surcharge for the next quarterly period is $0.0217 per Dt. costs, which CNG incurred for the period of December 1999 through February 2000.

CNG states that copies of this letter of transmittal and enclosures are being served upon CNG's customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. This filing may be viewed on the web at http://www.ferc.fed.us/online/

rims.htm (call 202–208–2222 for assistance).

Federal Energy Regulatory Commission

[Docket No. RP00–237–000]

Columbia Gas Transmission Corporation; Notice of Proposed Changes in FERC Gas Tariff

April 4, 2000.

Take notice that on March 31, 2000, Columbia Gas Transmission Corporation (Columbia) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following revised tariff sheets with a proposed effective date of May 1, 2000:

Fifth Revised Sheet No. 280
Seventh Revised Sheet No. 281
Seventh Revised Sheet No. 282
Fourth Revised Sheet No. 283

Columbia states that it is making this filing to revise its tariff to comply with the Commission's changes in its Order No. 637 to the right-of-first-refusal (ROFR) afforded certain firm shippers in 18 CFR Section 284.221(d)(2)(ii). In Order No. 637, the Commission revised the ROFR to limit its applicability. Columbia is revising General Terms and Conditions (GTC), Section 4, which contains the procedures for the awarding of existing firm capacity and the exercise of the ROFR on Columbia, to reflect these changes. Columbia is also revising Section 4 to be consistent with certain comparable time frames and provisions in Section 14.5(b).

Columbia states that copies of its filing have been mailed to all firm customers, interruptible customers, and affected state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. [Docket No. RP00–238–000]

Columbia Gulf Transmission Company; Notice of Proposed Changes in FERC Gas Tariff

April 4, 2000.

Take notice that on March 31, 2000, Columbia Gulf Transmission Company (Columbia Gulf), tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following revised tariff sheets with a proposed effective date of May 1, 2000:

Fourth Revised Sheet No. 144
First Revised Sheet No. 144A
Fifth Revised Sheet No. 145
Third Revised Sheet No. 145A
Third Revised Sheet No. 147

Columbia Gulf states that it is making this filing to revise its tariff to comply with the Commission's changes in its Order No. 637 to the right-of-first-refusal (ROFR) afforded certain firm shippers in 18 C.F.R. Section 284.221(d)(2)(ii). In Order No. 637, the Commission revised the ROFR to limit its applicability. Columbia Gulf is revising General Terms and Conditions (GTC), Section 4, which contains the procedures for the awarding of existing firm capacity and the exercise of the ROFR on Columbia Gulf, to reflect these changes.

Columbia Gulf states that copies of its filing have been mailed to all firm customers, interruptible customers, and affected state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. This filing may be viewed on the web at http://www.ferc.fed.us/online/rims.htm (call 202–208–2222 for assistance).

Distrigas of Massachusetts Corporation; Notice of Proposed Changes in FERC Gas Tariff

April 4, 2000.

Take notice that on March 31, 2000, Distrigas of Massachusetts Corporation (DOMAC) tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheet, to become effective June 1, 2000:

Eighth Revised Sheet No. 94

DOMAC states that the purpose of this filing is to record semiannual changes in DOMAC's index of customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP98–717–001]

El Paso Natural Gas Company; Notice of Application

April 4, 2000.

Take notice that on March 28, 2000, El Paso Natural Gas Company (El Paso), Post Office Box 1492, El Paso, Texas 79978, filed an application in Docket No. CP98–717–001, pursuant to Section 7(b) of the Natural Gas Act and Rule 215 of the Commission's Regulations, requesting the Commission to amend the authorization to abandon facilities granted by the Commission's order issued January 15, 1999 at Docket No. CP98–717–000, all as more fully described in the application on file with the Commission and open to public inspection. This filing may be viewed on the web at *http://www.ferc.fed.us/online/rims.htm* (call 202–208–2222 for assistance).

El Paso states that in the January 15, 1999 order, the Commission granted El Paso permission and approval to abandon, by removal, to the extent practicable, three segments totaling approximately 49.16 miles, of El Paso's 12¾" O.D. El Paso-Douglas Loop Line (Line No. 1005), with appurtenances, located in Dona Ana and Luna Counties, New Mexico. Also, in the January 15, 1999 order, the Commission directed El Paso to file monthly status reports to describe the abandonment activities, including whether pipe was abandoned by removal or in place. El Paso has filed three status reports on January 12, February 11, and March 13, 2000.

El Paso further states that, as set forth in El Paso's application and responses to data requests filed in Docket No. CP98–717–000, El Paso intended to abandon the segments of pipeline by removal to the extent practicable since there may be certain areas where it is deemed more practicable to abandon the pipeline in place. El Paso indicated that areas where it may be necessary to abandon in place: pipeline underlying agricultural land; canal and drain crossings; road crossings; railroad crossings; or any area where the landowner specifies abandonment in place.

El Paso states that in the status report filed February 11, 2000, El Paso informed the Commission that El Paso had determined it was more practicable to abandon most of the pipe by transfer to El Paso's affiliate. El Paso Energy Communications (EPECC) for use as fiber optics conduit.

By letter dated March 8, 2000, the Office of Energy Projects directed El Paso to file an application seeking an amendment to its Section 7(b) authorization to reflect the new proposal for abandonment of the three segments of Line No. 1005 totaling 49.16 miles. Accordingly, El Paso is requesting amended abandonment authorization for approximately 44.0 miles of Line No. 1005 by transfer to EPECC for use as fiber optics conduit. The remaining portion of such line consisting of approximately 5.16 miles will be abandoned in place.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 25, 2000, file with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. The Commission's Rules require that protestors provide copies of their protests to the party or parties against whom the protests are directed. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

A person obtaining intervenor status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by every one of the intervenors. An intervenor can file for rehearing of any Commission order and can petition for court review of any such order. However, an intervenor must submit copies of comments or any other filings it makes with the Commission to every other intervenor in the proceeding, as well as an original and 14 copies with the Commission.

A person does not have to intervene, however, in order to have environmental comments considered. A person, instead, may submit two copies of comments to the Secretary of the Commission. Commenters will be placed on the Commission's environmental mailing list, will receive copies of environmental documents and will be able to participate in meetings associated with the Commission's environmental review process. Commenters will not be required to serve copies of filed documents on all other parties. However, commenters will not receive copies of all documents filed by other parties or issued by the Commission and will not have the right to seek rehearing or appeal the Commission's final order to a federal court.

The Commission will consider all comments and concerns equally, whether filed by commenters or those requesting intervenor status.

Take further notice that, pursuant to the authority contained in the subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules and Practice and Procedure, a hearing will be held without further notice before the

Commission or its designee on this application is no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that the requested abandonment is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for El Paso to appear or be represented at the hearing.

Linwood A. Watson, Jr.,
Acting Secretary.

[Docket No. CP00–162–000]

El Paso Natural Gas Company; Notice of Request Under Blanket Authorization

April 4, 2000.

Take notice that on March 29, 2000, El Paso Natural Gas Company (El Paso), Post Office Box 1492, El Paso, Texas 79978, filed a request with the Commission in Docket No. CP00–162–000, pursuant to Section 157.216(b) of the Commission's Regulations under the Natural Gas Act (NGA) for authorization to abandon by removal the Belen City Gate Meter Station authorized in blanket certificate issued in Docket No. CP82–435–000, all as more fully set forth in the request on file with the Commission and open to public inspection. This filing may be viewed on the web at http://www.ferc.fed.us/online/rims.htm (call 202–208–2222 for assistance).

El Paso proposes to abandon by removal the Belen City Gate Meter Station, serving PNM Gas Services, a division of Public Service Company of New Mexico (PNMGS). El Paso states that authorization for a budget-type sales facilities and services, including the Belen City Gate Meter Station, with appurtenances was received by order issued on December 14, 1967 in Docket No. CP68–88–000. El Paso reports that the facility was required by El Paso to facilitate the delivery, measurement and sale of natural gas from its interstate transmission pipeline system to PNMGS for resale. El Paso continues that due to load growth in the Belen and Los Lunas, New Mexico areas PNMGS has expanded its distribution system, and that PNMGS has requested El Paso to construct, install and operate a new delivery point, the Belen North Delivery Point, near its newly expanded system.

Any person or the Commission's staff may, within 45 days after the Commission has issued this notice, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the NGA (18 CFR 157.205) a protest to the request. If no protest is filed within the allowed time, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the NGA.

National Fuel Gas Supply Corporation; Notice of Tariff Filing

April 4, 2000.

Take notice that on March 31, 2000, National Fuel Gas Supply Corporation (National) tendered for filing as part of its FERC Gas Tariff, Fourth Revised Volume No. 1, the following tariff sheet to become effective April 1, 2000.

Twenty-Third Revised Sheet No. 9

National asserts that the purpose of this filing is to comply with the Commission's order issued February 16, 1996, in Docket Nos. RP94–367–000, et al. Under Article 1, Section 4, of the settlement approved in that order, National must redetermine quarterly the Amortization Surcharge to reflect revisions in the Plant to be Amortized, interest and associated taxes, and a change in the determinants. The recalculation produced an Amortization Surcharge of 8.32 cents per dth.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, DC 20426, in accordance with Sections 385.214 of 385.211 of the Commission's Rules and Regulations. Panhandle Eastern Pipe Line Company; Notice of Proposed Changes in FERC Gas Tariff

April 4, 2000.

Take notice that on March 31, 2000, Panhandle Eastern Pipe Line Company (Panhande) tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the tariff sheets listed on Appendix A to the filing, to become effective May 1, 2000.

Panhandle states that this filing is made in accordance with Section 25 (Flow Through of Cash-Out Revenues in Excess of Costs and Scheduling Charges Assessed Against Affiliates) of the General Terms and Conditions (GT&C) in Panhandle's FERC Gas Tariff, First Revised Volume No. 1. The revised tariff sheets filed herewith reflect the following changes to Panhandle's currently effective Maximum Reservation Rates under Rate Schedules FT, EFT, LFT and SCT, and currently effective Maximum commodity rates under Rate Schedules IT and EIT:

(1)A ($0.01) per Dt. reduction from the Base Reservation Rate for each of the Gathering Charge Rate, Field Zone Transmission Charge Rate and Market Zone Access Charge Rate under Rate Schedules FT, EFT and LFT;

(2).A (0.06¢) per Dt. reduction from the Base Rate for each of the Gathering Charge Rate, Field Zone Transmission Charge Rate and Market Zone Access Charge Rate under Rate Schedule SCT; and

(3) A (0.03¢) per DT. reduction form the Base Rate for each of the Gathering Charge Rate, Field Zone Transmission Charge Rate and Market Zone Access Charge Rate under Rate Schedules IT and EIT.

Panhandle further states that copies of this filing are being served on all affected customers and applicable state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. Pine Needle LNG Company, LLC; Notice of Proposed Changes in FERC Gas Tariff

April 4, 2000.

Take notice that on March 31, 2000 Pine needle LNG Company, LLC (Pine Needle) tendered for filing to become part of its FERC Gas Tariff, Original Volume No. 1, First Revised Tariff Sheet No. 4. The proposed effective date of the enclosed tariff sheet is May 1, 2000.

Pine Needle states that the instant filing is being submitted pursuant to Section 18 and Section 19 of the General Terms and Conditions (GT&C) of Pine Needle's FERC Gas Tariff (Tariff). Section 18 of the GT&C of Pine Needle's Tariff states that Pine Needle will file, to be effective each May 1, a redetermination of its fuel retention percentage applicable to storage services. Section 19 of the GT&C of Pine Needle's Tariff provides that Pine Needle will file, also to be effective each May 1, to reflect net changes in the Electric Power (EP) rates.

Pine Needle states that it is serving copies of the instant filing to its affected customers, State Commissions and other interested parties.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. Southern Natural states that pursuant to Section 38.3 of the General Terms and Conditions of Southern Natural's Tariff the Refund Report sets forth Excess Storage Usage Charges to be refunded to Rate Schedule CSS customers.

Any person desiring to be heard or to protest said filings should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed on or before April 11, 2000. Protests will be

considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. This filing may be viewed on the wet at http://www.ferc.fed.us/online/rims.htm (call 202–208–2222 for assistance).

[Docket No. RP00–232–000]

Southern Natural Gas Company; Notice of Proposed Changes to FERC Gas Tariff

April 4, 2000.

Take notice that on March 31, 2000, Southern Natural Gas Company (Southern) tendered for filing as part of its FERC Gas Tariff, Seventh Revised Volume No. 1, the following tariff sheets with the proposed effective date of April 1, 2000.

Tariff Sheets Applicable to Contesting Parties:

Fiftieth Revised Sheet No. 14
Seventy First Revised Sheet No. 15
Fiftieth Revised Sheet No. 16
Seventy First Revised Sheet No. 17

Tariff Sheets Applicable to Settling Parties:

Thirty Sixth Revised Sheet No. 14a
Forty Second Revised Sheet No. 15a
Thirty Sixth Revised Sheet No. 16a
Forty Second Revised Sheet No. 17a

Southern submits the revised tariff sheets to its FERC Gas Tariff Seventh Revised Volume No. 1, to reflect a change in FT/FT–NN Southern Energy Cost Surcharge, due to an increase in the FERC interest rate effective April 1, 2000.

Southern states that copies of the filing were served upon all parties listed on the official service list compiled by the Secretary in these proceedings.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. This filing may be viewed on the web at http://ferc.fed.us/online/rims.htm (call 202–208–2222 for assistance).

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2964]

City of Sturgis; Notice of Authorization for Continued Project Operation

April 4, 2000.

On March 31, 1998, the City of Sturgis, licensee for the Sturgis Project No. 2964, filed an application for a new or subsequent license pursuant to the Federal Power Act (FPA) and the Commission's regulations thereunder. Project No. 2964 is located on the St. Joseph River in St. Joseph County, Michigan.

The license for Project No. 2964 was issued for a period ending March 31, 2000. Section 15(a)(1) of the FPA, 16 U.S.C. 808(a)(1), requires the Commission, at the expiration of a license term, to issue from year to year an annual license to the then licensee under the terms and conditions of the prior license until a new license is issued, or the project is otherwise disposed of as provided in Section 15 or any other applicable section of the FPA. If the project's prior license waived the applicability of Section 15 of the FPA, then, based on Section 9(b) of the Administrative Procedure Act, 5 U.S.C. 558(c), and as set forth at 18 CFR 16.21(a), if the licensee of such project has filed an application for a subsequent license, the licensee may continue to operate the project in accordance with the terms and conditions of the license after the minor or minor part license expires, until the Commission acts on its application. If the licensee of such a project has not filed an application for a subsequent license, then it may be required, pursuant to 18 CFR 16.21(b), to continue project operations until the Commission issues someone else a license for the project or otherwise orders disposition of the project.

If the project is subject to Section 15 of the FPA, notice is hereby given that an annual license for Project No. 2964 is issued to the City of Sturgis for a period effective April 1, 2000, through March 31, 2001, or until the issuance of a new license for the project or other disposition under the FPA, whichever comes first. If issuance of a new license (or other disposition) does not take place on or before March 31, 2001, notice is hereby given that, pursuant to 18 CFR 16.18(c), an annual license under Section 15(a)(1) of the FPA is renewed automatically without further order or notice by the Commission, unless the Commission orders otherwise.

If the project is not subject to Section 15 of the FPA, notice is hereby given that the City of Sturgis is authorized to continue operation of the Sturgis Project No. 2964 until such time as the Commission acts on its application for subsequent license.

[Docket No. RP00–229–000]

Tennessee Gas Pipeline Company; Notice of Tariff Filing

April 4, 2000.

Take notice that on March 31, 2000, Tennessee Gas Pipeline Company (Tennessee), tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, the revised tariff sheets identified in Appendix A to the filing. Tennessee proposes that the foregoing tariff sheets be made effective on May 1, 2000.

Tennessee states that as part of its transition to interactive Internet communications in compliance with the Federal Energy Regulatory Commission's Order No. 587–l, Tennessee has undertaken a major rewrite of its critical computer system functions. In conjunction with the rewrite, Tennessee further states that it is taking the opportunity to initiate additional modifications to its computer systems in order to streamline certain of

Tennessee's processes and to provide additional service flexibilities (collectively, hereinafter referred to as Service Upgrades). In order to provide the Service Upgrades by completion and implementation of the rewrite, Tennessee is seeking approval for certain modifications to its existing tariff and pro forma service agreements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room. Federal Energy Regulatory Commission Notice

Sunshine Act Meeting

April 5, 2000.

The following notice of meeting is published Pursuant to section 3(A) of the Government in the Sunshine Act (Pub. L. No. 94–409), 5 U.S.C 552B:

AGENCY HOLDING MEETING: Federal Energy Regulatory Commission.

DATE AND TIME: April 12, 2000, 10 a.m.

PLACE: Room 2C, 888 First Street, N.E., Washington, D.C. 20426.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

*Note: Items listed on the Agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION: David P. Boergers, Secretary Telephone (202) 208–0400, For a recording listing items stricken from or added to the meeting, call (202) 208–1627.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda; however, all public documents may be examined in the Reference and Information Center.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–6575–1]

Office of Research and Development; Board of Scientific Counselors Request for Suggestion of Candidates

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; request for suggestions of candidates.

SUMMARY: Pursuant to the Federal Advisory Committee Act, Public Law 92–463, as amended (5 U.S.C., App. 2), EPA, Office of Research and Development (ORD) is requesting suggestions for candidates for membership on the Board of Scientific Counselors.

The Board of Scientific Counselors (BOSC), is in its second charter renewal process, and once renewed will provide advice and recommendations to the EPA on the operation of ORD's research program. As stated in the Charter, BOSC's primary functions are to: (a) evaluate science and engineering research programs, laboratories, and research-management practices of ORD and recommend actions to improve their quality and/or strengthen their relevance to the mission of the EPA; and (b) evaluate and provide advice concerning the utilization of peer review within ORD to sustain and enhance the quality of science in EPA.

The membership of the BOSC will include a balanced representation of interested persons with professional and personal qualifications and experience to contribute to the functions of the BOSC and may be drawn from business and industry, the academia, environmental organizations and other related organizations. Committee members are appointed for terms of one to four years by the EPA Deputy Administrator.

ADDRESSES: Submit suggestions for the list of candidates to: Shirley R. Hamilton, Designated Federal Officer, Board of Scientific Counselors, Environmental Protection Agency (8701R), 1200 Pennsylvania Ave., NW, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Shirley R. Hamilton at the above address or at (202) 564–6853. The Agency will not formally acknowledge or respond to suggestions.

SUPPLEMENTARY INFORMATION: Submit suggestions of candidates no later than May 5, 2000. Any interested person or organization may submit names of qualified persons. Suggestions for the list of candidates should be identified by name, occupation, organization, position, address and telephone number, and if available, email address. Candidates will be asked to submit a resume of their background, experience and qualifications and other relevant information as a part of the consideration process.

Dated: April 4, 2000.

Norine E. Noonan,

Assistant Administrator, for Research and Development.

[FR Doc. 00–8710 Filed 4–7–00; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[ER–FRL–6252–8]

Tampa Bay Water Regional Reservoir and Pipeline: Intent To Prepare an Environmental Impact Statement

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Notice of intent to prepare an Environmental Impact Statement (EIS) on the reservoir and pipeline to the Alafia River located in southeast Hillsborough County, Florida.

PURPOSE: Pursuant to 40 CFR 1501.7 and in accordance with Section 102(2)(c) of the National Environmental Policy Act (NEPA), the U.S. Environmental Protection Agency (EPA) has identified the need to prepare an environmental impact statement (EIS) and therefore issues this Notice of Intent pursuant to 40 CFR 1507.7.

FOR FURTHER INFORMATION AND TO BE PLACED ON THE MAILING LIST CONTACT: Ms. Lena Scott, Environmental Protection Agency—Region 4, Office of Environmental Assessment, 61 Forsyth Street, Atlanta, Georgia 30303, Telephone (404) 562–9607 of Fax (404) 563–9598.

SUMMARY: EPA intends to prepare the EIS to evaluate Tampa Bay Water's (Authority) proposal to construct and operate a 1,200-acre reservoir and pipeline located in southeast Hillsborough County, Florida. The proposed reservoir will provide storage during high flow periods for use as potable water when surface water is not available for withdrawals. An 84-inch, 8-mile long pipeline will connect the reservoir to the South Central Hillsborough Intertie near the Alafia River withdrawal location. EPA intends to retain the services of an independent contractor to prepare the EIS using the

"third party method" as provided under 40 CFR Section 6.510(b)(3). By utilizing the third party method, EPA enters into an agreement for the Authority to engage and pay for the services of a contractor to prepare the EIS under the direction of EPA.

Need for Action: EPA awarded construction grants totaling $12,615,000 to Tampa Bay Water for the reservoir and pipeline. Based upon draft Environmental Information Documents (EID) submitted for the regional reservoir, EPA determined the EID did not adequately address potential impacts of the project and could not issue a Finding of No Significant Impact (FNSI). Known concerns include viable alternatives to the proposed action, impacts on protected wetlands, effects from inter-basin transfer of water, short- and long-term impacts on the Alafia River and Tampa Bay aquatic ecosystems from the incremental withdrawal of water resources attributable to reservoir operations, impacts on threatened and endangered species, impacts of salinity changes on aquatic organisms, sport and commercial fisheries.

Alternatives:

- EPA releases grant funds without conditions.
- EPA releases grant funds with conditions.
- EPA withholds grant funds exercising the "No Action" alternative.

Scoping: EPA will hold a public scoping meeting in which a general description of the projects and its goals will be presented. Time and meeting location will be announced in newspapers local to the project. Both oral and written comments will be accepted at the meeting to assist EPA to determine the scope of the EIS. Persons who do not attend the meeting and wish to comment on the issues are invited to respond in writing to this agency within 30 days of the scoping meeting.

Estimated Date of Release: August 30, 2001.

Responsible Official: A. Stanley Meiburg, Deputy Regional Administrator, Region 4, Environmental Protection Agency.

Richard E. Sanderson,

Director, Office of Federal Activities.

[FR Doc. 00–8671 Filed 4–7–00; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[AD–FRL–6574–8]

Electric Utility Steam Generating Units; Notice of Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting.

SUMMARY: The EPA must determine whether hazardous air pollutants (HAP) emissions from electric utility steam generating units should be regulated under section 112 of the Clean Air Act (CAA), as amended, on or before December 15, 2000. The EPA's Office of Air and Radiation, Office of Air Quality Planning and Standards will hold a public meeting to provide interested persons an opportunity to provide EPA their views regarding the Agency's determination.

DATES: The public meeting will be held on June 13, 2000.

ADDRESSES: The public meeting will be held in the Lake Michigan Room, 12th floor, of the EPA Region V offices located at 77 West Jackson Boulevard, Chicago, Illinois. The meeting will be from 9:30 a.m. until 4 p.m., Central Daylight time.

FOR FURTHER INFORMATION CONTACT: Mr. William Maxwell, Combustion Group, Emission Standards Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number: (919) 541–5430, facsimile number: (919) 541–5450, e-mail *maxwell.bill@epa.gov*. Members of the public wishing to attend the meeting should register by phoning Ms. Libby Bradley at (919) 541–5578. Please note that space is limited to approximately 150 attendees and registrations will be accepted on a first-come, first-served basis. On or about June 1, 2000, a tentative agenda, including a list of those registered to date, will be posted to the Agency website *http://www.epa.gov/ttn/uatw/combust/utiltox*.

SUPPLEMENTARY INFORMATION: Section 112(n)(1)(A) of the CAA requires EPA to perform a study (*i.e.*, utility toxics study) of the hazards to public health anticipated to occur as a result of HAP emissions from electric utility steam generating units, after imposition of the requirements of the CAA, and to prepare a Report to Congress containing the results of the study. The Agency is to proceed with rulemaking activities under section 112 to control HAP emissions from electric utility steam generating units if EPA finds such rulemaking is appropriate and necessary after considering the results of the study. The utility toxics study was completed, and the Final Report to Congress issued on February 24, 1998. The Agency is required to make a finding as to whether it is appropriate and necessary to regulate HAP emissions from electric utility steam generating units on or before December 15, 2000.

On February 29, 2000, EPA published a notice in the **Federal Register** (65 FR 10783) requesting from the public any information or data that might be considered appropriate for the Agency to consider prior to making the regulatory determination. The deadline for submitting any such data is March 31, 2000. A public meeting is being held in order to provide the public an opportunity to present their views to EPA concerning this determination. This meeting will allow EPA to listen to public opinion on the issue of mercury and other HAP emissions from electric utility steam generating units and the regulatory determination. Members of the public wishing to present formal comments at the meeting should so indicate when registering. Individual speaking times will be limited to 10 minutes in order to give everyone an equal opportunity to speak. Seating will be limited for the meeting and advance registration is suggested. Walk-in comments will be heard on a time-available basis at the end of the session. Please note that scheduling of this public meeting does not extend the March 31, 2000 deadline for submitting additional data in response to the February 29, 2000 **Federal Register** document. Rather, this meeting provides opportunity for interested persons to make known their views to EPA.

Dated: March 27, 2000.

Robert D. Brenner,

Acting Assistant Administrator, Office of Air and Radiation.

Meeting of the Local Government Advisory Committee and Small Community Advisory Subcommittee

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Local Government Advisory Committee and its Small Community Advisory Subcommittee

will meet on April 26, 2000, from 12 noon—2 p.m. EDT in Washington, DC. The meeting will be held in Room 3528 in the Ariel Rios North Building and Committee members will participate via conference call. The Committee will consider adopting recommendations to the Agency regarding its draft implementation guidance for Executive Order 13132, entitled "Federalism."

The Committee will hear comments from the public between 12:30–12:45 p.m. on the 26th. Each individual or organization wishing to address the Committee will be allowed a minimum of three minutes. Please contact the Designated Federal Officer (DFO) at the number listed below to schedule agenda time. Time will be allotted on a first come, first serve basis.

This is an open meeting and all interested persons are invited to attend. Meeting minutes will be available after the meeting and can be obtained by written request from the DFO. Members of the public are requested to call the DFO at the number listed below if planning to attend so that arrangements can be made to comfortably accommodate attendees as much as possible. However, seating will be on a first come, first serve basis.

DATES: The meeting will begin at 12 p.m. on Wednesday, April 26, 2000, and conclude no later than 2 p.m. on the same day.

ADDRESSES: The meeting will be held in Washington, DC at EPA Headquarters in Room 3528 of the Ariel Rios North Building located at 1200 Pennsylvania Avenue, NW.

Requests for Minutes and other information can be obtained by writing to the DFO at 1200 Pennsylvania Avenue, NW (1306A), Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: The DFO for this Committee is Denise Zabinski Ney. She is the point of contact for information concerning any Committee matters and can be reached by calling (202) 564–3684 or by email at ney.denise@epa.gov.

Dated: March 3, 2000.

Denise Zabinski Ney,

Designated Federal Officer, Local Government Advisory Committee.

[FRL–6575–6]

National Environmental Justice' Advisory Council; Notification of Meeting and Public Comment Period(s); Open Meetings

Pursuant to the Federal Advisory Committee Act (FACA), Public Law 92–463, we now give notice that the National Environmental Justice Advisory Council (NEJAC), along with the various subcommittees will meet on the dates and times described below. All times noted are Eastern Standard Time. All meetings are open to the public. Due to limited space, seating at the NEJAC meeting will be on a first-come basis. Documents that are the subject of NEJAC reviews are normally available from the originating EPA office and are *not* available from the NEJAC. The NEJAC and subcommittee meetings will take place at the Omni Hotel at CNN Center, 100 Center Street, Atlanta, GA 30335. The meeting dates are as follows: May 23 , 2000 through May 26, 2000. All times shown are Eastern Time. This is the second in a series of focused policy issue meetings for the NEJAC. To help prepare for this specific focused policy issue meeting the following background information is provided:

Request

The Charter for the National Environmental Justice Advisory Council (NEJAC) states that NEJAC shall provide independent advice to the Administrator on areas that may include, among other things, "the direction, criteria, scope, and adequacy of the EPA's scientific research and demonstration projects" relating to environment justice. In order to provide such independent advice, the Agency, through the Office of Environmental Justice (OEJ), requests that the NEJAC convene a focused and issue-oriented public meeting in Atlanta, Georgia. The meeting shall be used to receive comments on, discuss, and analyze federal efforts to make community-based strategies in the area of disease prevention and health improvement more effective. The Agency, furthermore, requests that the NEJAC produce a comprehensive report on the differing views, interests, concerns, and perspectives expressed by the stakeholder participants on the issue, and provide advice and recommendations for the Agency's review and consideration.

Issue

The meeting will focus on federal efforts to secure disease prevention and health improvement in communities where health disparities exist that may result from, or be exacerbated by, disproportionate effects of environmental pollutants and certain socioeconomic and cultural factors.

(1) What strategies and areas of research* should be pursued to achieve more effective, integrated community-based health assessment, intervention, and prevention efforts?

(2) How should these strategies be developed, implemented and evaluated so as to insure substantial participation, integration and collaboration among federal agencies, in partnership with: impacted communities; public health, medical and environmental professionals; academic institutions; state, tribal and local governments; and the private sector?

(3) How can consideration of socioeconomic status and cultural factors: (a) Contribute to health disparities and cumulative and disproportionate environmental effects; and (b) be incorporated into community health assessments?

Background

Dr. David Satcher, the Surgeon General, recently stated that a major national health goal for the next ten years should be to reduce the health disparities that exist in this country and which are especially apparent in minority, low-income, and/or indigenous communities. Equally true is that many of these same communities bear a disproportionate exposure to environmental pollutants that may underlie and/or contribute to these disparities. When such exposures are combined with other social and physical living conditions present in these environments, the potential for health disparities is magnified even further.

A growing number of researchers and community representatives have argued that one should not treat minority, low-income, and/or indigenous communities with an "all things being equal" approach. Given varying degrees of vulnerability among communities, the impacts of specific environmental pollutants on a given community's health and that community's ability to cope with such impacts often may be

*Research in this context encompasses a broad range of studies that may include basic science, applied research, and data collection. These may be carried out by: federal, state, tribal or local governments; universities; communities; industry; and/or individuals.

affected dramatically by a multiplicity of factors.

Two additional issues that arise in environmental justice communities are how community-based research is carried out and the nature and availability of health care. Environmental justice communities are defined as communities with significant minority, low-income and/or indigenous populations adversely and disproportionately impacted by environmental pollution. First, most research targeted at identifying environmentally related health problems in communities does not take into account the need to build partnerships within the community. In addition, the research is focused on finding problems not solutions. As a result, the community usually lacks a full understanding of research findings and does not have the resources or knowledge to address the problem. Second, communities usually lack access to health care and even when available, practitioners often lack training in environmental medicine and therefore may be unable to provide proper diagnosis and treatment.

Discussion

Improvements in health and living conditions are a priority for most residents of minority, low-income and/or indigenous communities. These communities also desire the ability to meaningfully participate in any decision-making process that affect their lives and to take actions to protect and improve their health. Community-based assessment, intervention and prevention efforts, *i.e.*, efforts conducted by, with, or for communities, intended to address these concerns are finally beginning to take the above into consideration.

Integrated community-based assessment, intervention and prevention strategies should lead to the following:

(1) More effective integrated community-based intervention/prevention strategies that address contributors to negative health in a community;

(2) Multi-disciplinary research that elucidates specific vulnerabilities that result from the interaction of socioeconomic factors and physical environments. These vulnerabilities may be associated with the health disparities found among minority, low-income and/or indigenous populations; and

(3) Direction on how community-based assessments can contribute to better understanding of causal relationships.

The NEJAC is being requested to provide advice and recommendations in the following specific areas:

(1) To assess the extent to which an integrated community-based public health model that includes assessment, intervention and prevention can contribute to disease prevention and health improvement in environmental justice communities;

(2) To identify the most critical gaps in community-based assessment and research and to recommend strategies that federal agencies should employ to address them;

(3) To identify ways in which a community-based model enhances ongoing research, intervention/prevention, and regulatory activities of EPA and other federal agencies; and

(4) To recommend strategies and mechanisms that should be developed and implemented to insure a more fully integrated, collaborative effort by the federal agencies, working with impacted communities and other vital partners, to reduce these health disparities.

Greater coordination, collaboration, and cooperation by multiple federal agencies is necessary. This effort should now include a number of health agencies that have been concerned with health disparities but have not recognized environmental exposures as an etiologic factor. Such agencies can play critical roles in providing solutions to environmental justice issues. EPA and other federal agencies involved to date in the upcoming NEJAC meeting include the National Institute for Environmental Health Sciences (NIEHS), the Agency for Toxic Substances and Disease Registry (ATSDR) and the National Center for Environmental Health (NCEH) which will facilitate engaging the other key public health agencies.

Meeting

Registration for the NEJAC meeting will begin on Tuesday, May 23, 2000 at 4:00 p.m. A public comment period for overall environmental justice issues is scheduled for Tuesday, May 23, 2000, from 6:30 p.m. to 9:30 p.m. On Wednesday, May 24, 2000, a second public comment period dedicated to the focused policy issue is scheduled from 6:30 p.m. to 9:30 p.m. The full NEJAC will convene Wednesday, May 24, 2000, from 8:00 a.m. to 5:00 p.m. Business will include a series of panels with expert testimony on the focused policy issue, a review of ongoing NEJAC activities and a discussion of new business items. All subcommittees of the NEJAC will meet on Thursday, May 25, 2000, from 9:00 a.m. to 5:30 p.m. The full NEJAC will reconvene Friday, May 26, 2000, from 8:00 a.m. to 5:00 p.m. for Subcommittee reports and closing discussions.

Any member of the public wishing additional information on the subcommittee meetings should contact the specific Designated Federal Official at the telephone number listed below.

Subcommittee Federal official	Telephone No.
Enforcement: Ms. Shirley Pate	202/564–2607
Health and Research:	
Mr. Lawrence Martin	202/564–6497
Mr. Chen Wen	202/260–4109
International: Ms. Wendy Graham	202/564–6602
Indigenous Peoples: Mr. Danny Gogal	202/564–2576
Waste/Facility Siting: Mr. Kent Benjamin	202/260–2822
Air and Water:	
Mr. Wil Wilson	202/564–1954
Ms. Alice Walker	202/260–1919

Members of the public who wish to participate in one of the public comment periods should pre-register by May 1, 2000. Individuals or groups making oral presentations during the public comment period will be limited to a total time of five minutes. Only one representative from a community, organization, or group will be allowed to speak. Any number of written comments can be submitted for the record. The suggested format for individuals making public comment should be as follows:

Request To Make Public Comment Speaker's Template

Name of Speaker: _____
Name of Organization/Community: _____
Address/Phone/Fax/Email: _____
Description of Concern: _____
Recommendations/Desired Outcome: _____

If you wish to submit written comments of any length (at least 50 copies), they should also be received by May 1, 2000. Comments received after that date will be provided to the Council as logistics allow. All information should be sent to the address or fax number cited below.

Registration

Pre-registration for all attendees is recommended. To receive a registration form, call the number listed below or visit the web site. Correspondence concerning registration should be sent to Tama Clare of Tetra Tech Environmental Management, Inc. at: 1881 Campus Commons, Suite 200, Reston, VA 20191, phone: 703/390–0641 or fax: 703/391–5876. Hearing-impaired individuals or non-English speaking attendees wishing to arrange

for a sign language or foreign language interpreter, may make appropriate arrangements using these numbers also. In addition, NEJAC offers a toll-free Registration Hotline at 1–888/335–4299. For on-line registration, you may visit the Internet site: *http://www.ttclients.com/nejac.*

Dated: April 4, 2000.

Marva E. King,

Acting Designated Federal Official, National Environmental Justice Advisory Council.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–6574–5]

Notice of Proposed Administrative Settlement Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act

AGENCY: Environmental Protection Agency.

ACTION: Notice; request for public comment.

SUMMARY: In accordance with section 122(i) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended ("CERCLA"), 42 U.S.C. 9622(i), notice is hereby given of a proposed administrative settlement concerning the National Zinc Superfund Site, with Cyprus Amax Minerals Company; St. Joe Minerals Corporation, now known as the Doe Run Resources Corporation; Horsehead Industries, Inc. d/b/a Zinc Corporation of America; and Salomon Smith Barney Holdings, Inc. ("Settling Parties"); and the United States Departments of Justice, and State, and the United States General Services Administration ("Settling Federal Agencies").

The settlement requires the Settling Parties to pay a total of $350,000.00 in reimbursement of Past Response Costs, plus an additional sum for interest on the amount calculated from the date set forth in the definition of Past Response Costs in the Settlement Agreement through the date of payment to the Hazardous Substances Superfund.

As soon as reasonably practicable after the effective date of this Agreement, and consistent with paragraph 12.1(b) of the Settlement Agreement, the United States, on behalf of the Settling Federal Agencies, shall pay to the Environmental Protection Agency Hazardous Substance Superfund $150,000.00 in reimbursement of Past Response Costs, plus an additional sum for interest on that amount calculated from the date set forth in the definition of Past Response Costs in the Settlement Agreement through the date of payment.

The settlement includes a covenant not to sue under section 107 of CERCLA, 42 U.S.C. 9607.

For thirty (30) days following the date of publication of this document, the Agency will receive written comments relating to the settlement. The Agency will consider all comments received and may withdraw or withhold its consent to the proposed settlement if comments received disclose facts or considerations which indicate that the settlement is inappropriate, improper, or inadequate. The Agency's response to any comments received will be available for public inspection at 1445 Ross Avenue, Dallas, Texas 75202–2733.

DATES: Comments must be submitted on or before May 10, 2000.

ADDRESSES: The proposed settlement and additional background information relating to the settlement are available for public inspection at 1445 Ross Avenue, Dallas, Texas, 75202–2733. A copy of the proposed settlement may be obtained from Carl Bolden (6SF–AC), U.S. Environmental Protection Agency Region 6, 1445 Ross Avenue, Dallas, Texas, 75202–2733 at (214) 665–6713. Comments should reference the National Zinc Superfund Site, Bartlesville, Oklahoma and EPA Docket Number 6–02–98, and should be addressed to James E. Costello at the address listed below.

FOR FURTHER INFORMATION CONTACT: James E. Costello (6RC–S), U.S. Environmental Protection Agency 1445 Ross Avenue, Dallas, Texas 75202–2733 at (214) 665–8045.

Dated: March 27, 2000.

Lynda F. Carroll,

Acting Regional Administrator, Region 6.

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than April 24, 2000.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166–2034:

1. Robert James Coleman, Mt. Carmel, Illinois; Shane Evan Gray, St Francisville, Illinois; and Bryan Keith Loeffler, Allendale, Illinois, all as trustees; to acquire voting shares of Allendale Bancorp, Inc., Allendale, Illinois, and thereby indirectly acquire voting shares of First National Bank of Allendale, Allendale, Illinois.

B. Federal Reserve Bank of Kansas City (D. Michael Manies, Assistant Vice President) 925 Grand Avenue, Kansas City, Missouri 64198–0001:

1. Jeffrey B. and June L. Van Dyke, Plainville, Kansas; to acquire voting shares of Plainville Bancshares, Inc., Plainville, Kansas, and thereby indirectly acquire voting shares of The Plainville State Bank, Plainville, Kansas.

Board of Governors of the Federal Reserve System, April 4, 2000.

Robert deV. Frierson,

Associate Secretary of the Board.

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at www.ffiec.gov/nic/.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 4, 2000.

A. Federal Reserve Bank of Richmond (A. Linwood Gill, III, Vice President) 701 East Byrd Street, Richmond, Virginia 23261–4528:

1. Islands Bancorp, Beaufort, South Carolina; to become a bank holding company by acquiring 100 percent of the voting shares of Islands Community Bank, N.A., Beaufort, South Carolina (in organization).

B. Federal Reserve Bank of Atlanta (Lois Berthaume, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303–2713:

1. First Central Bancshares, Inc., Lenoir City, Tennessee; to acquire 100 percent of the voting shares of First Central Bank of Monroe County, Sweetwater, Tennessee (in organization).

C. Federal Reserve Bank of Kansas City (D. Michael Manies, Assistant Vice President) 925 Grand Avenue, Kansas City, Missouri 64198–0001:

1. Lisco State Company, Lisco, Nebraska, and First Nebraska Bancs, Inc., Sidney, Nebraska; to acquire 100 percent of the voting shares of Kimball Bancorp, Inc. Kimball, Nebraska, and thereby indirectly acquire the American National Bank, Kimball, Nebraska.

D. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 2200 North Pearl Street, Dallas, Texas 75201–2272:

1. Plains Bancorp, Inc., Lubbock, Texas; to merge with Sudan Bancshares, Inc., Sudan, Texas, and thereby indirectly acquire First National Bank, Sudan, Texas.

Board of Governors of the Federal Reserve System, April 4, 2000.
